Mr. STEVENS. Mr. President, I am not going to delay this proceeding. I think it is time we got down to the vote. Having served as chairman of the Ethics Committee and served with the Senator from Alabama, succeeded by the Senator from New Hampshire, I want to say that those who want to question this procedure ought to go and look at the files of the Ethics Committee. This is not an easy task. It is one very complicated concept, this idea of sitting in judgment on ourselves. I personally believe that we are absolutely served well by the members of this Ethics Committee. I left that committee because of another reason, to become ranking member of another committee. But it does seem to me that the time that is spent on the Ethics Committee is time that helps preserve this system and it helps support the public confidence in our Senate and the traditions of the

Senate. I, for one, would be very slow to make changes in this Rule that has been discussed here.

Again, if my colleagues have any questions about this investigation, and the way it has been handled or the way any other matters are being handled, I suggest you go to the Ethics Committee and visit. Those files are available to Members of the Senate and the nonpartisan staff of the Ethics Committee are there to brief Members of the Senate. It is one of the finest staffs I have ever worked with. I support the procedure that has been used on this matter and the other ethics matters that have been brought before the Senate since I have been here.

Several Senators addressed the Chair.

The PRESIDENT pro tempore. The Senator from Pennsylvania [Mr. SPECTER].

Mr. SPECTER. Mr. President, I shall speak but a moment, but the issues of confidentiality and the issues of separation of the prosecutor's function and the judge's function are very different. I believe that the issue, as we have discussed it here today, has gone afield, and I think importantly so, perhaps because Senator DURENBERGER has chosen not to contest the basic facts.

We have a responsibility and authority under the Constitution to proceed without regard to what laws are established in collateral fields. However, there is a large body of law which says flatly that the prosecutorial function ought to be separated distinctly from the judgement function. There are cases in the Supreme Court of the United States which make that abundantly plain because, in the investigative stage, there may be matters which come to the attention of the committee which the respondent, a man in the position of Senator DURENBERGER, does not know about. The prosecutor, the independent counsel who presents the case, and call him what you like and there is no suggestion that the prosecutor deals unfairly because the U.S. attorney or district attorney is a quasijudicial official, but that individual necessarily presents a case, and that individual has contact with the judges, the members of the committee in a way in which the respondent and his lawyer do not have.

It has been specified that Mr. Bennett saw the committee on 21 occasions and Senator DURENBERGER's counsel saw the committee on three occasions. In this regard, I believe it is very important that, after this proceeding is concluded, there be a separation.

The distinguished vice chairman referred to the issue as bifurcation. It is something I had discussed with Senator RUDMAN in advance, and, since this proceeding unfolded, I decided not to make a comment because there was no contest on the basic facts. But there really ought to be a separation of the presentation of the evidence and the prosecutorial function from those who decide it. That can be accomplished fairly simply. I think that is a matter which requires our attention promptly at the conclusion of this matter.

I thank the Chair.

Mr. LEVIN addressed the Chair.

The PRESIDENT pro tempore. The Senator from Michigan [Mr. LEVIN].

Mr. LEVIN. Let me say first, Mr. President, the committee has done its job extraordinarily well, thoroughly, and with great dignity under the extraordinary leadership of Senator HEFLIN and Senator RUDMAN. This body is very much in their debt and the Nation is very much in their debt.

The colleague that we judge today, Mr. President, is one whose intellect is keen, whose heart is open. He has reached out to groups in this society that have been neglected. He has reached out to Members of this body in particularly personal ways. He has always been of good cheer and is an extraordinarily decent human being. I believe, Mr. President, that the personal relationships which DAVE DURENBERGER has forged with so many of us will not only withstand the strain of these events, but will, over time, hopefully, be deepened by them.

As Senators, we must unflinchingly exercise the judgment which is required by these facts. As a human being, I remain a steadfast friend of DAVID DURENBERGER and an admirer of the legislative work he has accomplished in this body.

Mr. MITCHELL addressed the Chair.

The PRESIDENT pro tempore. The majority leader.

Mr. MITCHELL. Mr. President, I do not wish to deter any Senator who wishes to address the Senate from doing so, but it is my hope that we can bring this matter to a conclusion.

In the tradition of the Senate, of course, each Senator is free to address any aspect of the matter that he or she chooses. But I think in some respects it is unfortunate that much of the debate has veered off into an evaluation of the Ethics Committee and of the counsel of the Ethics Committee. If Senators have concerns about the method by which ethical allegations are treated, there is an appropriate process for making those concerns felt and for changing the procedure. If there are concerns about the conduct of a particular counsel in this case, I think those should be addressed to the Ethics Committee.

But this is not a proceeding about the conduct of the Ethics Committee. This is not a proceeding about the conduct of the counsel to the Ethics Committee. This is a proceeding about the conduct of Senator DAVE DURENBERGER and the resolution on which we are about to vote. I hope every Senator will bear that in mind as we cast our votes, difficult and painful as that may be.

It is remarkable, I think, that after the discussion, after the presentation of the chairman and vice chairman, virtually nothing that has been said has been directly related to the resolution itself.

Again, I emphasize, I do not want to deter any Senator from speaking, but there has been a lot of discussion about protracted proceedings being to the detriment of the Senator, and I suggest we are now reaching, if we have not already reached, that stage in this proceeding here. I hope that we can, Mr. President, bring the matter to a conclusion consistent with the opportunity of every Senator to address the matter. Those Senators who feel in good conscience that this resolution ought not to be adopted should vote no if that is their concern, if they believe that.

That is the appropriate opportunity, an alternative available to those who have some concern about the subject of the resolution. Those who have concerns about the procedures of the Ethics Committee in general, or in this specific case, that ought to be in a proper forum for concern there.

So I hope, Mr. President, that we can bring this to a prompt conclusion in the interest of all concerned, including the distinguished Senator from Minnesota.

Mr. CHAFEE. Mr. President, Hemingway describes courage as "grace under pressure." DAVE DURENBERGER, my friend, indeed a friend of all of us, has this courage, this "grace under pressure," and has shown it.

Through these trying times, DAVE DURENBERGER has continued his valuable Senate work, especially in connection with the Clean Air Act and the conference which is currently under way on that very bill. He has grown in both character and Senate reputation during these difficult days.

Mr. GRASSLEY. Mr. President, the action which the Senate is about to take is probably the most difficult many of us will have undertaken in our capacity as U.S. Senators. Many refer to the Senate as a club, a club which takes great pains to always operate in an atmosphere of collegiality and camaraderie. It is most painful, therefore, for us to go on record against one of our colleagues, one of our friends.

The Senator from Minnesota has been an excellent Member of this body, and I am confident will continue to be. He takes on the tough issues and develops thoughtful and creative resolutions. His excellent leadership on health issues, in particular, should make the voters in Minnesota proud.

As ranking member of the Finance Subcommittee on Medicare and Long Term Care, Senator DURENBERGER's work on physician payment reform, specifically, has been of great benefit to those of us from rural States. Indeed, as a colleague on the Rural Health Caucus, I know that Senator DURENBERGER has been a friend of the elderly and infirm, especially regarding their access to rural health care.

But, Mr. President, this resolution is not about the excellent record of the senior Senator from Minnesota. It is about a series of actions which he took 5 and 6 years ago. While, as a friend, I would like to excuse those actions, I cannot and will not excuse or condone them in any way. And for me, those actions have heightened my awareness of the responsibility which I have as a U.S. Senator.

The Ethics Committee has done a most thorough job on that most difficult task. This experience certainly demonstrates that the process of the Ethics Committee investigation works. The senior Senator from Minnesota has had the opportunity to present his case to his peers. His defense, while eloquent in its sincerity, does not absolve him of his offense. After his day in court, he must now face the punishment, which he has accepted.

Lest anyone in this body be tempted to point a finger at the Senator from Minnesota, I dare to suggest that there is a lesson here for all of us. Entrusted by the good citizens of this Nation to run the affairs of the Congress, we should act with care to serve as role models. As public officials, we must embrace the awesome responsibility of attempting to live up to the expectations of our constituents.

Finally, Mr. President, I want to commend Senator DURENBERGER for the way in which he has handled himself throughout this inquiry and investigation. Always forthright about the allegations, he has conducted himself in a most respectful manner. None of us will ever know of the pain and torment, let alone the personal sacrifices, that this investigation has had on the Senator and his family.

Yet throughout this ordeal, he has been honest an forthright with us. We, his colleagues in the Senate, owe it to him to not let his earlier mistakes affect the manner in which we work with him now and in the future. The business of the Senate is too important for us to impede the contributions of the Senator from Minnesota. I am sure that those contributions will be many.

Senator DURENBERGER, I offer you and your family my prayers that you'll be able to put all of this behind you, and that, using your own words, you will be the very best Senator that you can be.

Mrs. KASSEBAUM. Mr. President, nearly 12 years ago, I entered the Senate in the same class as the Senator from Minnesota, and I want to add a personal note to the proceedings before us.

During my years in the Senate with Senator DURENBERGER, I have developed a great appreciation for his enthusiasm for the legislative process and for his dedication to shaping sound policy. His contributions in the areas of health care policy and environmental issues have shown a depth and breadth of understanding and skill that are the mark of a thoughtful legislator.

The Senator from Minnesota also is frank to acknowledge that his own serious mistakes have brought us this point. I will support the committee's resolution, but I could not do so without expressing my person appreciation for his substantive contributions to national policies.

Mr. HATFIELD. Mr. President, anyone who has served in the Senate knows that personal relationships have been and always will be our only anchor against the sometimes violent tides of controversy. Issues come and go, but those relationships remain—politics tear us apart, but those relationships hold us together.

I therefore cannot imagine a task more difficult and more personally painful than being called upon to pass judgment on a colleague's behavior. And yet that is what we are asked to do today—and what we are required to do for the sake of this institution and the people we serve.

Let me underscore the point that Senator DURENBERGER's accomplishments—his service to the people of Minnesota and the people of this country—are not in question. From the Americans with Disabilities Act to the Pepper Commission to Medicare Physicians Payment Reform, his efforts have improved the lives of a great many people. Nothing we do or say here today will detract from that fact.

Let me also make a distinction that too often is lost in the shuffle—a distinction I think is fundamental to the task at hand and indeed to this institution and the relationships which anchor it. That distinction is best articulated by the Scriptures, which teach us to love the person even though we may disapprove of his actions.

I do not mean to suggest that we are not accountable for our actions, we are. But as we stand here in judgment today, let us also stand here in humility. Let us be on guard against, the temptation to cloak ourselves in the myth of infallibility—on guard against the seductive notion that somehow we are better, wiser, and more worthy for finding fault in someone else.

We gather here day after day, charged with the task of making decisions which affect the course of events in this country and often in this world. We gather here as men and women who have been given the most precious thing a democracy has to offer: the public trust. Yet for all the attention lavished upon us and all the responsibility entrusted to us, we cannot escape one basic fact. We are, every single one of us, human beings.

And above all else, the Senate is an institution of individual human beings—an institution in which our compassion goes hand in hand with our doubts, our dreams hand in hand with our failures. We are obligated to protect this institution—but in so doing, let us not forget the human relationships which hold it, and indeed us, together. Let us be honest and fair—but let us also reaffirm the enduring yet fragile relationships which can serve as our anchor through this storm.

Mr. JEFFORDS. Mr. President, I have had the privilege of serving on both the Environment and Public Works Committee and the Labor and Human Resources Committee with Senator DAVID DURENBERGER. My experience in working with Senator DURENBERGER has given me the opportunity to see the kind of service he has provided to his constituents in Minnesota and to this country. Senator DURENBERGER is a committed public servant who has worked diligently to represent his State in the U.S. Senate. He has been particularly effective on recent critical legislation such as the Americans with Disabilities Act and the Clean Air Act. His ongoing and tireless efforts to improve health care in this country as the ranking member on the Finance Committee's Subcommittee on Medicare and Long-Term Care are well known. Senator DURENBERGER is a bright, hard working, committed and effective U.S. Senator.

I consider DAVID DURENBERGER a friend and am deeply sorry for him and his family for the events that have led up to this difficult day.

That is why it grieves me to have to vote today to denounce Senator DURENBERGER as recommended by the Ethics Committee. The charges are serious and deserve such denunciation. However, I do believe that Senator DURENBERGER's years of dedication and service to his State, his country and this Senate should not be overlooked as we take this action to denounce him for the activity that led to the Ethics Committee's decision. I hope that we will all learn from his experience, as I am sure he has, and be even more diligent in our efforts to be above reproach in our financial dealings and personal activity.

Mr. HEFLIN addressed the Chair.

The PRESIDENT pro tempore. The chairman of the committee [Mr. HEFLIN].

Mr. HEFLIN. Mr. President, in a moment I will ask for the yeas and nays, but I would like to mention just one or two things.

I do not want to leave the impression that during the times the special counsel appeared that he was advocating action against Senator DURENBERGER. On many occasions he was there defending him. You do not know what went on in each of those meetings in which he was present, and you jump to conclusions when you make such wild statements.

I think it is unfair to the special counsel to leave here with some impression that he has used those occasions to advocate a position contrary to the best interests of Senator DURENBERGER. He evaluated evidence. He presented it. He reviewed certain statutes, and he recommended not to apply certain of those statutes. If those statutes had been applied, the resolution would have been calling for expulsion.

So I say that the attacks that have been made upon him have been unfair to our special counsel. I do agree that it is a very difficult task and perhaps maybe the rules do need changing. I think they need to be further studied, and I think that our rules and process can be improved.

But I do not want to leave here with the impression that the Ethics Committee, which has six individuals, three from each party and most of whom are lawyers—I believe Senator HELMS is not a lawyer, but the Senator over the years has exercised good judgment in carrying out his Ethics Committee duties—is going to be pulled around as if we have a ring in our nose. I can remember many instances in which several Senators had knockdown, dragout arguments with our special counsel. I did. I disagreed with him and we argued back and forth. I do not want to leave here with the idea that he has done something wrong. I think he has a difficult task. In my judgment, he has done a fine job.

After we finish this, sometime, I would like to have the floor to thank some people. But since I think we have gone along far enough on this, I ask for the yeas and nays.

The PRESIDENT pro tempore. Is the demand sustained? The demand is sustained.

The yeas and nays were ordered.

The PRESIDENT pro tempore. Senators are reminded that Mr. DURENBERGER will address the Senate following the vote. The Chair will take the liberty of asking Senators to remain in their seats during the vote and that the well remain clear and that the clerk repeat the response of Senators. The clerk will call the roll.

The legislative clerk called the roll.

Mr. BOSCHWITZ (when his name was called). Present.

Mr. DURENBERGER (when his name was called). Present.

Mr. SIMPSON. I announce that the Senator from Wyoming [Mr. WALLOP] is necessarily absent.

I further announce that the Senator from South Dakota [Mr. PRESSLER] is absent due to a death in the family.

I further announce that if present and voting, the Senator from South Dakota [Mr. PRESSLER] and the Senator from Wyoming [Mr. WALLOP], would each vote "yea."

The PRESIDENT pro tempore. Are there any Senators in the Chamber who have not voted, or wish to change their vote?

The result was announced—yeas 96, nays 0, as follows:

[Rollcall Vote No. 175 Leg.]

ANSWERED "PRESENT"—2

Boschwitz Durenberger

NOT VOTING—2

Pressler Wallop

So the resolution (S. Res. 311) was agreed to.

Mr. HEFLIN. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. RUDMAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDENT pro tempore. The Senator from Minnesota [Mr. DURENBERGER] is recognized.

Mr. DURENBERGER. Mr. President, as you can imagine my heart is very full at this moment, and I will be very brief.

Actions speak louder than words. And I am acutely aware that nothing I say today will change the past, or the future for that matter.

The record of my previous statements to the committee, to the people of Minnesota, is there for anyone to examine. To my colleagues here who know me and work with me, I would just say how deeply sorry I am for the painful and the necessary experience we have just been through; also, as the vice chairman said, for that extra burden that my misconduct has placed on each of you.

I love the Senate and cherish the ideal it stands for. If anyone wants to judge my respect for this body and for each of you, I would simply suggest that they look at my actions over the last 22 months to help bring this matter to a conclusion.

I opened my files and my staff to complete scrutiny by the committee; I released my lawyers from the attorney-client privilege; I cooperated in expediting the hearings and over the last few days, and just minutes ago I urged final and uncontested action on the resolution.

Mr. President, I did everything in my power to have this matter fairly considered and behind us.

Now, thankfully, that has been done. As for the future I would ask only that I be judged by that same standard, not necessarily what I say, but what I do. Financial restitution is only a beginning. I intend to apply myself every day to lifting a portion of the burden that I have placed on the Senate by taking more than my share of the institutional responsibilities around this place.

I will work even harder than I already have to bring about solutions to our national challenges by bringing to the Senate the best ideas my State and my experience can produce.

Mr. President, if there is a smudge on the seal of the U.S. Senate, or on the Star of the North, as we like to call our State, I will work my hardest to polish both back to brightness.

These are easy and on my part hopeful things to say, I know. But with God as my witness, I have committed myself to the work it will take to get it done.

I want to thank our leaders, GEORGE MITCHELL, and BOB DOLE, for their fair and expeditious handling of this matter, and my special friend, the Republican whip, ALAN SIMPSON, for his love, my colleague, RUDY BOSCHWITZ, for always being there for me throughout this process.

I commend the members of the Ethics Committee for their commitment and their dedication to the most difficult task in this place. I thank all of my colleagues who have encouraged me. I thank those who have spoken here today. I thank the other members of the Senate family—on the staffs, in the restaurants, and the elevators, on the subways, and at the guard desk.

I thank my outstanding attorney, Jim Hamilton, Bert McKasy, Mary

Albert, and Karen Tomcala. I thank my loyal staff who have stuck by me and done their jobs with excellence.

Finally, but especially, I thank the thousands of Minnesotans who called and wrote and stopped me on the street to give their encouragement. It is very easy for me to stand here today and say to you that I have been truly blessed in many ways through this whole experience.

Today is an ending and a beginning. For past mistakes, I ask your forgiveness. For future challenges, I need your friendship.

As a result of what I have lived—and it has been a costly education—I have reordered my personal and my professional priorities to be, first, a better man, and, then, a better Senator. And the proof of that, Mr. President, will be my actions over the next 4 years.

I have confidence in the Senate of the United States. I have confidence in the people of Minnesota. And I have confidence in the power of friendship and the power of prayer. With your help, I can be bold enough to say our best days lie ahead.

Mr. President, I yield the floor.

Mr. HEFLIN addressed the Chair.

The PRESIDENT pro tempore. The Senate will be in order.

The Senator from Alabama is recognized.

Mr. HEFLIN. Having already thanked Bob Bennett and his assistants for their outstanding service to the committee and to the Senate, I add my thanks to Jim Hamilton, Bert McKasy, Mary Albert, and Karen Tomcala, for their able representation of Senator DURENBERGER.

I would also like to thank the Comptroller General for providing to the committee investigators from the GAO's Office of Special Investigations and, particularly, for Houston Fuller of that office, who has clearly demonstrated the impartiality and professionalism expected from GAO investigators.

I also want to express the committee's appreciation to the Librarian of Congress for allowing the committee to have the services of Mr. Jack Maskell, one of the top experts in governmental ethics laws. Additionally, I want to thank the Senate legal counsel, the very able, Mike Davidson and his staff for their assistance, and the entire Ethics Committee staff, including Victor Baird, David Apol, Sheila Langenhenning, Annette Gillis, Marie Mullis, Shannon Falls, Jennifer Jones, Karen Vermaire, Sharon Nixon, and staff director, Wilson Abney.

I yield the floor.

Mr. COHEN addressed the Chair.

The PRESIDENT pro tempore. The Senator from Maine [Mr. COHEN].

Mr. COHEN. Might I inquire, under the previous order, are we returning to the amendment offered by the Senator from Maine?

Mr. MITCHELL. Following consultation with my colleagues, I am going to suggest a brief recess to give Senators the opportunity to stretch, and then we will get back to that amendment.

RECESS UNTIL 7:30 P.M.

Mr. MITCHELL. I ask unanimous consent that the Senate stand in recess until the hour of 7:30 p.m.

There being no objection, at 6:57 p.m. the Senate recessed until 7:30 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. KOHL].

FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT OF 1990

The Senate continued with the consideration of the bill.

The PRESIDING OFFICER. The clerk will report the bill.

The legislative clerk read as follows:

A bill (S. 2830) to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes.

The PRESIDING OFFICER. The Senator from Maine.

AMENDMENT NO. 2356

Mr. COHEN. Mr. President, I rise to support this important amendment which, as my colleagues know, incorporates, S. 1245, the Fish Safety Act of 1990.

Food safety is a principal concern among today's consumers. In response to particular concerns regarding the safety of seafood, I joined Senator MITCHELL and others last year in introducing S. 1245, the Federal Fish Inspection Act, calling for a mandatory seafood inspection program.

Seafood consumption is no longer limited to coastal and shoreside communities. It has become a main plate item, like beef, pork and poultry, with more and more Americans enjoying seafood each year. Unlike meat and poultry, however, seafood is not required to be inspected under Federal law. The result of this anomaly has been a growing consumer apprehension regarding the safety of seafood products.

When average Americans see hospital waste washing up on beaches or oil spills blanketing stretches of shoreline, they understandably start to wonder whether food from the sea is safe to eat.

Consumer apprehension is reaffirmed when they learn that seafood, unlike meat and poultry products, is not subject to mandatory Federal inspection.

This legislation responds to these concerns by establishing a mandatory seafood inspection program.

Let me touch upon four key provisions of S. 1245.

First, it designates the Department of Agriculture [USDA] as the lead agency. Although the Food and Drug Administration [FDA] and the National Oceanic and Atmospheric Administration [NOAA] now coordinate a voluntary seafood inspection program, consumer groups and industry representatives alike agree that USDA is best suited to manage the proposed mandatory program. After all, USDA has been successfully managing the Federal inspection programs for meat and poultry since the 1930's.

Second, the program calls for the use of Hazard Analysis Critical Control Points [HACCP] methodologies. This means that, unlike meat and poultry inspection programs which are continuous, seafood inspection will focus only at the points where the greatest threats to food safety exist. To continuously inspect seafood would simply be too costly and too cumbersome because, while meat and poultry are processed at centralized locations, seafood is processed at thousands of different locations throughout the country. The HACCP principles in the inspection program, developed by the National Academy of Sciences, will ensure a safe and wholesome supply of seafood.

Third, our bill calls for an inspection program that is Government-supported. Seafood inspection, like meat and poultry inspection, is a public health issue. The Government currently supports meat and poultry inspection programs. It would simply be intolerable to require the seafood industry to pay for seafood inspection while other programs are Government-supported.

Finally, S. 1245 requires that imported seafood be held to the same inspection standards as domestically harvested products. It is critical that domestic and imported seafood be treated the same in order to ensure the safety of seafood products.

I realize that there is opposition to this legislation. As my colleagues know, another bill, S. 2228, introduced by Senator HOLLINGS and Senator STEVENS, also proposes to establish a mandatory seafood inspection program.

The inspection program called for in S. 2228 is similar to S. 1245 in many substantive respects. Both bills call for a mandatory inspection program employing the HACCP methodology. Both require the Food and Drug Administration to set tolerance levels. Both bills require imported seafood to be inspected by the same standards as domestic seafood products. These are just a few similarities between the two bills.

The critical difference between S. 1245 and S. 2228 is jurisdictional. S. 1245 establishes the U.S. Department of Agriculture as the lead agency,

while S. 2228 establishes the U.S. Department of Commerce as the lead agency.

Obviously, I believe that USDA should be the lead agency. The USDA has been inspecting meat and poultry for over 60 years. USDA has the experience and the infrastructure to effectively operate a seafood inspection program.

The USDA has an extensive infrastructure that can support a new fish inspection program, including nearly 5,000 field offices and over 100,000 employees.

The USDA has an extensive network for research, training, and enforcement necessary to implement this program.

Frankly, the size of this program is such that it would simply overwhelm any other Federal agency but the USDA's Food Safety Inspection Service. To place this program primarily in NOAA or FDA would overwhelm those agencies to the point of ineffectiveness.

The USDA also has tremendous experience in certifying foreign inspection programs which is critical since S. 1245 will hold imports to the same standards as domestic fish.

It is critical that we take advantage of the USDA's experience in these areas.

The time for a mandatory seafood inspection program is now. There is unprecedented support from both the industry and consumer groups for S. 1245. The inspection program called for in this legislation will restore consumer confidence. Equally important, it will do so without subjecting the fishing industry to unworkable and unreasonable regulations.

The benefits of this legislation will reach far beyond the fishing community. It will serve every American consumer by assuring a safe and wholesome supply of seafood.

Let me say to my friend from Alaska that my support for the amendment offered by my colleague from Maine is not because of any power grab. I have no interest, and I know my colleague from Maine has no interest, in engaging in a power grab on the part of the Agriculture Committee over that of Commerce. There is no collusion, as far as I am concerned, with the farming community. I tend to think of the seas being farmed by fishermen. But there is no connection, in my judgment, between the farming community and the fishing community on this point.

The reason that I have supported this amendment, and the reason I believe that USDA ought to be the lead agency is quite simple: USDA, no matter how stretched, no mater how deficient one might charge it as being in terms of its current inspection programs, is far more capable of carrying out the inspection than either FDA or NOAA.

Second, I think that the U.S. Department of Agriculture is better prepared to inspect foreign catches than either FDA or NOAA.

The third point is this: Hopefully, sometime down the line, that the Department of Agriculture might come to include and consider fish in the same category as they do meat and poultry in many of its programs, not only for inspection purposes, but also for promotion purposes. I will give my colleagues an example.

Last fall, I requested USDA to include mackerel in the food assistance to Poland, and I was met with very strong resistance. The attitude on the part of USDA was, "we do not do fish; that is not our business." While I thought mackerel would be a very important addition to that aid package, USDA's attitude was, "we simply do not want to deal with this particular product."

So I hope that, if the seafood inspection program is under the Department of Agriculture, it might begin to see fish on par with meat and poultry as a vital staple for not only American consumption purposes, but also for foreign consumption.

The Senator from Alaska opposes the Department of Agriculture as being the lead agency. He opposes it for several reasons. I pointed to the user fee. I believe the Senator from Alaska would say that this is going to be such an expensive proposition that the Federal Government really should not undertake this; it does not have the ability to undertake this and should not pay for this. I see the Senator shaking his head, so I will not pursue that line any further, and I will wait until he makes his remarks.

The Senator from Alaska also suggests that the meat and poultry industries support this amendment because they see it as a way of destroying fish as a competitor. I see the Senator from Alaska nodding in agreement that he views this as a tactic conceived by the meat and poultry industries as a way of destroying their competition, namely, fish.

He would also point out, I suppose, and I would like to hear him comment on this further, that, under fish inspection, if you have one fish that is rotten or spoiled, you would have to destroy the whole catch; whereas, under the meat and poultry program, if you have one chicken or carcass that is spoiled you simply dispose of that one chicken or carcass. You do not have to destroy the entire flock or herd at that point.

I think there is plenty to debate here. I see the majority leader is on the floor. I assume the majority leader is going to inquire as to the possibilities of what might be the parameters of this debate. I had only intended to lend my support to the Senator's amendment to point out that my support for the amendment was based upon the fact that I felt USDA could do a better job of inspecting fish and that the costs should not be borne through a user fee. Rather, I believe that fish should be treated like meat and poultry in these respects.

With respect to grading services, however, the fishing industry would be more than happy to pay on a user fee basis.

Mr. STEVENS. Mr. President, let me first address the problem that the Senator from Maine has just commented on, and that is the question of costs under the Departament of Agriculture as opposed to the costs under the Commerce Committee's system of the Department of Commerce together with the FDA administering the fisheries inspection system.

I should emphasize to begin with there is no question that we are all seeking a greater public support for seafood inspections. The National Oceanic and Atmospheric Administration published a very good book, "Meeting The Challenge: New Directions In Seafood Inspection." The Commerce Committee have had a whole series of these studies and publications.

The Senator from Maine mentioned costs. If he would examine S. 2228, section 20, the recovery of costs, which is in the Commerce Committee bill, he would see that there are only two types of fees that could be collected. One relates to export certificates and the other relates to targeted inspection of imports. Under the Agriculture bill, which is S. 1245, in section 1926, the costs of inspector's overtime will be recovered by the Secretary of Agriculture at rates to be determined by the Secretary and will be borne by the establishments inspected, which is contrary to the words that have been put out by almost everyone that is supporting the Agriculture bill.

The Agriculture Committee bill envisions a system of collecting costs of inspection from fish processors for overtime or holiday work. Now, I just happen to have put up my State's map, and I hope people would take a look at it to see what we are talking about about overtime. My son is the captain of a fishing vessel that fishes up in the Pribilofs, out in the Bering Sea. He is farther from our home in Anchorage than I am from Kansas City right now. Dutch Harbor, which is now the No. 1 fish port of the United States, is over 900 miles from Anchorage.

Now, you talk about overtime and holiday work. The whole cost of the Agriculture bill will be borne by the areas where there is wild fish harvest, where we still take fish from the seas. It will not be borne by the people who have fish farms, who will have their

agricultural inspection stations to deal with all forms of poultry, and beef, and hogs, and chickens throughout the State. We do not have that in Alaska.

The reason I oppose this Agriculture bill so much is related to the growth of fisheries in the United States since the passage of the Magnuson Act which extended the jurisdiction of the United States to 200 miles. We envisioned at that time that we could force our the foreign fishing vessels and turn the harvesting of fish within the waters off our shore into an American industry and develop some sound practices concerning the conservation of the fisheries off our shores.

Mr. President, that has succeeded beyond our wildest dreams. Let me give you some statistics. In Alaska in 1988 there were domestic landings of 2,639,250,000 pounds out of a total of almost 7.2 billion pounds. Within 1 year, the Alaska harvest went up to 4.088 billion pounds but the harvest nationwide increased to only 8.4 billion pounds. In other words, while the U.S. harvest went up only 1 billion, the Alaska harvest went up 2.

Now because of the 200-mile limit we have seen a vast increase in the harvest of fish off our shores. A tremendous industry has grown now. Incidentally in the increase in value is about the same. Alaska in terms of dollars went up from $1.3 billion to a total of — as a matter of fact, I have to say because of last year it went down.

There is one comment made by the majority leader that is correct. After the *Exxon Valdez* incident, the price of fish in Alaska went down, notwithstanding the fact that less than 10 percent of the fish are harvested from that area. None of the fish was contaminated by the *Exxon Valdez* entered into any markets but we lost the value of fish because of the concepts that were mentioned by the majority leader. That is why we all support increased means of securing consumer reassurance through fisheries inspection on a formal basis by the Federal Government.

I am completed now to try to answer some of the statements that have been made, and I hope that the Chair will not be a little scared or disturbed by this, but this is a computer printout of the comparison between these two bills. I am told it is very easy to feed into the RECORD, so I ask unanimous consent that it be printed in the RECORD, Mr. President.

There being no objecton, the printout was ordered to be printed in the RECORD, as follows:

SEAFOOD SIDE-BY-SIDE

Activity	Hollings S. 2228	Senate Agriculture S. 1245
Title	Consumer Seafood Safety and Quality Act of 1990 (Sec. 1)	Fish Safety Act of 1990 (Sec. 1)
Referral	Commerce	Agriculture
Legislation amended	New legislation	Food Security Act of 1985 (Sec. 3); the Act of May, 1914 (Sec. 4)
Lead agency	Health and Human Services (FDA); Commerce (NOAA) (Secs. 3 and 4)	Agriculture (FSIS) (Secs. 1901 and 1903)
Products affected	Applies to any fish and fish products, including aquaculture, intended for human consumption except products containing relatively small portions of fish or historically not considered as fish by consumers (Secs. 3 and 4).	Applies to all fish and fish products, including aquaculture intended for human consumption except products containing relatively small portions of fish or historically not considered as fish by consumers (Secs. 1901 and 1903)
Type of program	"Seafood safety and quality assurance program" including federal seafood standards, national inspection system, registration, research, consumer education, monitoring for fish growing and harvesting areas (Sec. 4); comprehensive and efficient system based on HACCP approach and providing for frequent and unannounced inspections, training of inspectors and personnel; sampling and testing; inspector authority to detain/condemn products; takes into consideration the special characteristics of fish and fish products (Sec. 7).	"Comprehensive and efficient health-based" inspection system with frequent and unannounced inspections, taking into account special characteristics of fish and fish products; based on HACCP approach, considering NMFS/MSSP, providing for identification and classification of fish harvesting areas; inspector authority to detain and condemn products; sampling and testing (Secs. 1903 and 1905)
Training requirements	Inspection program must provide for training of inspection and processing personnel (Sec. 7)	Requires USDA regulations on procedures for training inspectors (Sec. 5)
Registration/certification requirements	Requires Commerce registration of processing facilities, including processing vessels (Sec. 6)	Requires Agricultural certification of establishments, including processing vessels, and any place handling or processing fish (Sec. 1907);
	Requires Commerce study of need to register harvesting vessels and if so, notify Congress (Sec. 21).	Requires USDA–Commerce study of need to register harvesting and fish tender vessels and if so, notify Congress (Sec. 1921)
Sanitary/processing standards	Requires Health Secretary to prescribe processing, sanitation and quality standards including harvesting vessel standard (Sec. 5).	Requires Agriculture Secretary to issue standards of sanitation and other good processing, storage, etc. procedures (Sec. 1902 and 1920)
Product standards	Requires Health Secretary to prescribe standards of identity, and composition, minimum quality, and fill of container consistent with existing Federal and any applicable international standards, including definition of common and usual fish (Sec. 5 and 6).	Requires Agriculture Secretary to prescribe standards for marking products; all seafood products must have USDA label with an official mark and identification number (Secs. 1908 and 1920); requires rules identifying and naming fish (Sec. 1902)
Labeling and marking	All products have an identifying code and official mark; Secretary may set additional voluntary grading criteria (Sec. 5).	All products have an identifying code and official mark (Sec. 1908)
Contaminant standards	FDA must develop contaminant level standards after contracting with the National Academy of Sciences to identify contaminants and recommend priorities (Sec. 5).	Requires FDA (in consultation with the National Academy of Sciences and other agencies) to establish tolerances for harmful substances for use by USDA after formal rulemaking (Sec. 1903 and Sec. 6)
Shellfish	Commerce to set up 5-year shellfish indicator research program (Sec. 17) (consulting with other agencies) to prescribe standards for shellfish growing areas (Sec. 5); general seafood safety program must be consistent with NSSP guidelines (Sec. 4).	Commerce Secretary to set up 5-year shellfish indicator research program (Sec. 1921); see also production area monitoring, below (Sec. 1904)
Production areas	Requires Commerce (in cooperation with the HHS) to implement system for identifying and designating growing and harvesting areas where noncomplying products may originate; authorizes Commerce to identify problem areas from which contaminated fish are harvested; shellfish from unmonitored areas or closed state waters would be considered adulterated (Sec. 8).	Requires Commerce and States to set up a system for identifying and classifying fish and shellfish growing and harvesting areas; USDA to provide notification of hazardous areas based on product samples; authorizes Commerce Secretary to close federal waters (Sec. 1904)
Penalties	Includes civil penalties up to $5,000 for each violation (each continuous day is separate offense); also criminal penalties set at $10,000 or imprisonment for one year, for willful or gross negligence, except if violation involves intent to defraud or distribute adulterated fish and fish products limits raised to $20,000 and three years imprisonment (Sec. 12).	Includes civil penalties up to $5,000 for 1st violation plus 10% more for each subsequent one (each continuous day is a separate offense (Sec. 1915); also criminal penalties set at $10,000 or one year imprisonment, or both, unless violation involves intent to defraud or distribute adulterated or misbranded fish or fish product, limits raised to $20,000 or three years imprisonment or both (Sec. 1916). Separate penalties with a maximum of $10,000 specified for persons who bribe or assault inspectors (Sec. 1919); Killing and inspector is prohibted
Recordkeeping	Requires facilities to keep records and permits the Commerce Secretary reasonable access to and authority to copy them (Sec. 7).	Requires establishments to keep records and permit Agriculture Secretary and Commerce Secretary reasonable access to them (Secs. 1909 and 1920)
Illness/health monitoring	Requires Health Secretary to establish through the Centers for Disease Control and active seafood illness survillance program (Sec. 15).	Requires Health Secretary to establish through the Centers for Disease Control an active seafood illness survillance program (Sec. 1913)
Research	Requires Commerce and Health Secretaries to establish and administer a 5-year shellfish indicator research program; requires the Health Secretary and the Commerce Secretary to jointly develop a strategic plan on research on fish and fish product safety, including contaminant testing, fish inspection techniques and sanitation practices (Sec. 17) Commerce to study the role of various vessels in providing fish and fish products to determine the necessity of including any particular type in the registration and imspection program (Sec.21).	Requires Agriculture Secretary to determine research priorities, with "Appropriate" Federal agencies to conduct it; establishment of research advisory panel; USDA to research improved sanitation, contaminant testing; fish inspection techniques; USDA in cooperation with Commerce to study the need to register harvesting and fish tender vessels (Sec. 1921)
Recall provisions	Provides specific recall authority to the Health Secretary and the Commerce Secretary (Sec. 9)	Provides specific recall authority to Agriculture Secretary (Sec. 1912)
Education	Requires Health Secretary and Commerce Secretary to design and implement a national consumer education program on seafood (Sec. 16).	Authorizes $2 million annually in USDA grants to assist States in food safety information activities (Sec. 1921)
Federal-State relationships	Authorizes Federal assistance to States in setting up their programs; states establishing programs at least equal to Federal program are eligible for Federal grants for up to 60 percent of the costs for operation (Sec. 19).	Authorizes two types of State-run programs: (1) those covering intrastate commerce (as long as the State law requires the program at least equal to Federal program), (2) those operating interstate on behalf of the Federal Government with 50 percent Federal funding. (Sec. 1903)
Federal, State and foreign interagency relationships.	Authorizes Health or Commerce Secretary to utilize other agency, state or foreign government resources on a reimbursable basis (Sec. 20); interagency consultation required on certain specified activities.	Authorizes Agriculture Secretary to utilize other agency resources on reimbursable basis (Sec. 1924); interagency consultation required on certain specified activities
Imports	Imports held to same standards (Secs. 6 and 10)	Imports held to same standards (Secs. 1907 and 1910)
	Countries importing into U.S. must have certified inspection programs at least equal to U.S. system and an agreement ensuring reciprocity with respect to imports and exports of fish and fish products; inspection required for all fish and fish products from countries without certification or agreement (Sec. 10).	Countries importing into U.S. must have certified inspection programs at least equal to U.S. system; imports prohibited from countries without certification (Sec. 1910)
Hearing provisions	Administrative hearing opportunity must be provided for persons adversely affected by Act (Sec. 13).	Administrative hearing opportunity must be provided for persons adversely affected by Act (except in criminal prosecution); language also included on judicial review (Sec. 1918)

SEAFOOD SIDE-BY-SIDE—Continued

Activity	Hollings S. 2228	Senate Agriculture S. 1245
Employee protection	An employee cannot be discharged, disciplined or discriminated against for filing a complaint relating to a violation or refusing to perform duties that commit a violation (Sec. 14).	None
Implementation timetable	Program must be implemented within 2 years of enactment (Sec. 4); NAS report on contaminants due within 18 months of enactment (Sec. 5); Commerce study of vessels due within 18 months of enactment (Sec. 21).	FDA contract with NAS within 30 days of enactment; NAS report within 6 months of contract, FDA final rules within one year of NAS report; USDA implementation of program within 18 months of FDA final rules (up to 37 months total); Commerce and FDA responsibilities generally must be implemented within 2 years of enactment (Secs. 5, 6 and 7).
Recovery of costs	Authorizes the Health and Commerce Secretaries to develop user fees for: (1) inspections to certify that voluntary grading standards exceed minimum quality standards; (2) provision of certificates of export; (3) inspection of imports from nations which have not entered into a bilateral agreement (Sec. 20).	The cost of USDA inspection services rendered shall be borne by the Federal Government except for overtime and holiday work performed by inspectors which shall be paid by the establishments affected. (Sec. 1926).
Exclusions	Exempts personal use, vessels (except processing vessels and others determined to have HACCP points), industrial products (Sec. 21); certain products meeting export requirements (Sec. 11); common carriers (Sec. 12).	Exempts personal use; nonprocessing vessels; retail stores and restaurants; nonfood fish products (Sec. 1901 and 1902). Certain products meeting export requirements (Sec. 1911); common carriers (Sec. 1917); certain temporary conditions (Sec. 1906)
Funding	Authorizes up to $35 million in FY 91, $60 million in FY 92, and $90 million in FY 93; plus up to $15 million annually in FY 1991, 1992 and 1993 for research for research (Sec. 18).	Authorizes up to $14 million in FY 1991, $40 million in FY 1992, $80 million in FY 1993, $100 million each in FY 1994 and 1995; also authorizes up to $5 million annually in FY 1991, 1992, and 1993 for research (Sec. 1927); and $750,000 annually for Extension for fish safety education (Sec. 4)

Mr. STEVENS. It is a comparison between the Hollings bill, S. 2228 and the Agriculture Committee bill, S. 1245. I think any fair comparison of these two bills will lead to the conclusion that except for costs, which are greater under the Agriculture Committee bill, these bills are almost the same. The Agriculture Committee bill places the inspection, as one might expect, in the Department of Agriculture. The Commerce Committee bill places inspection systems as one might expect, in the Commerce Department but with the addition of a firm relationship with the Federal Food and Drug Administration.

Now, I see the Senator from Vermont is on the floor, and I am pleased because I wanted to comment on a statement he made. He made the statement that Alaska's butter clam industry crashed due to contamination problems. I want to assure the Senate that that is not so, and I would hope that the Senator from Vermont would examine the history of this industry. It is a very small industry in Alaska. It has gone up and down over a period of time but it has not suffered collapse due to any contamination.

We have small industries harvesting razor clams, butter clams, and what they call goey duck clams. None of them have suffered sharp declines because of contamination. The greatest threat to these industries occurred in the 1965 Good Friday earthquake which raised or lowered, depending on the area, a series of shellfish beds. The earthquake and the following tidal wave destroyed large areas of habitat in Alaska. We do not have a problem with sewage. We do not have problems with other forms of pollution that are manmade that contaminate shellfish in other areas of the country.

The main barrier to the development of Alaska shellfish industry is transportation costs. Because it is a fresh product, everything that is used to deal with this shellfish industry, the butter clam industry and the related shellfish beds has to be flown in and out of Alaska. There was a contamination found that we called paralytic shellfish poison, a toxin that results from natural causes in Alaska, not manmade pollution causes, and it is no problem because it is not permitted in commercially marketed shellfish.

Now, Mr. President, the issues behind mandatory seafood inspection were explored by two gentleman, Michael Dicks and David Harvey for the National Food Review. It is a very good article. I commend it to the attention of the Senate because it is very impartial. It reviews this bill that is pending before the Senate, the bill offered by the majority leader, the Federal Fish Inspection Act, S. 1245.

And I particularly would call attention of the Senate to the conclusion of these two authors.

I ask unanimous consent that the short article appear in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. STEVENS. They say:

Rather than invest in new inspection systems or increase funding for current programs, new or improved consumer education programs may have a larger impact on the reduction of risk per dollar of expenditure. Also, while a new mandatory inspection program for seafood may be politically expedient, without better information of foodborne illnesses, consumers may be faced with greatly increased expenditures without an accompanying reduction in health risks.

That is where we come to the main issue of my comments.

Mr. COHEN. Will the Senator yield?

Mr. STEVENS. Yes.

Mr. COHEN. Does the Senator suggest there is no need for an inspection program? If that is the thrust of the article, would it be fair to say that the Senator from Alaska does not feel it is necessary at all?

Mr. STEVENS. I am not saying it is not necessary. The Senate Commerce Committee has been workng on this matter for over 2 years. We have had a series of investigations done by the Federal agencies that we work within Commerce and in FDA. I believe that increased inspection systems are required. As a matter of fact, the system that is outlined by both bills is the same. The difference is who puts it in place, and what is the result of it? Is it done by people who are used to dealing with dirt farmers or is it done by people who are dealing with the oceans and with the navigable waters?

NOAA is there in Commerce. It deals with the navigable waters. We are dealing basically with fish from navigable waters. We are not dealing with fish farms. If the Senate wants to put fish farms under the Department of Agriculture, they can be our guest. We think that they are subject to a great many forms of potential contamination than we have. They have to have decontamination additions to their water systems.

I do not suggest that there is no need for additional public reassurance that the inspection systems are there and they are working.

Again, I call attention—I put this in the record now—both bills provide the same system. Federal inspection support of the fishing industry, whether it is in Agriculture or in Commerce.

Mr. COHEN. If the Senate will yield for a moment to pursue one issue that we raised earlier, I was under the impression that the Senator was in favor of user fees, and that was based upon a conversation that he and I had earlier today, namely, that Alaska fisherman were more than willing to pay for any additional inspection that might be necessary. I have been advised that is not a provision in the Senator's bill.

Mr. STEVENS. It is not, but it is in the provision in the bill the Senator from Maine supports.

Mr. COHEN. Only for overtime, as is the provision for meat and poultry.

Mr. STEVENS. You do not get meat and poultry 1,000 miles from home. You do not get meat and poultry——

Mr. COHEN. You may have that just for certain days.

Mr. STEVENS. We have people working on holidays. Our people work 24, 36 hours in order to harvest the species. Now I do not support them but there are tremendous growth in the factory trawlers, processing vessels that harvest their own fish. Those are at sea now, and they will have to be inspected. They are the ones that are going to be paying the overtime.

Mr. COHEN. The Senator may have a legitimate point that pertains to

Alaska. That may not be the same situation with other States who also have extensive fishing activities.

Mr. STEVENS. Let me point out the conversation we had earlier today which related to the aministration's plan to impose user fees. These user fees are not imposed by the Senator from South Carolina's bill. They are not imposed by the Senator from Maine's bill. But they will come up in any event in regard to both propsects.

We do impose user fees for inspections, and we object to being put into a department where the tradition of inspections is a continuous inspection system.

This is also discussed in some of the material I am going to get to here, or maybe later. But the Department of Agriculture's inspection systems are continuous. This system envisioned by both bills is a system that does not envision continuous inspection. It is an inspection system dealing with the areas of critical risk, as the Senator knows. Therefore, it is a different concept.

We feel once fisheries are in the Department of Agriculture, there will be pressure one way or the other, either to put the fisheries into a continuous inspection system or to move all of the current systems of the Department of Agriculture—chickens, beef, and hogs and all the rest—into a noncontinuous inspection system.

As the Senator knows, I am going to be going into that a little bit. There has been tremendous controversy in the Department of Agriculture already concerning the current system of inspection.

There has been some indication—and I think it comes unfortunately from some of the people in the Department of Agriculture—that for some reason or another under the current system there is some risk in America's fisheries because of the current inspection systems that are in place.

There are systems in place by the way, Mr. President. I can assure the Senate that no fish get into the system in the State of Alaska without inspection, and we have zero tolerance. As the Senator from Maine said, if we discover one bad fish, that is it for the lot. It is gone.

This was a tradition started, by the way, by the FDA at the time of the great problem concerning swordfish on the east coast and halibut on the west coast, particularly Alaska, when there was what they called the mercury scare. At that time, following a recommendation from some health fadists, there were people who were eating fish three times a day for months on end, and it turned out that their food of choice was either halibut or swordfish.

There were some that turned up with some problems from having been exposed to too much mercury. So it sort of reminds me of the problem we had with some of the sugar substitutes, if the Senator will recall. It was excessive consumption of one particular type of food that led to the problems. But at the time, FDA closed down the harvest of large halibut in Alaska, and it closed down the swordfish industry on the east coast. That came about because of FDA inspection systems.

Our people complied with it. We later were able to show that it was not any risk to any normal person consuming fish throughout a lifetime. But the abnormal person that consumed so much of the same product in a short period of time under a health food proposal where they were not eating almost anything else, those people got into trouble. That led to almost the loss of our industry.

But I will tell the Senate that the net result of that was an increased awareness of the intensity of the activity from the FDA and the accuracy of their activities.

Again, I want to get back to the concept of why are we here? There has been this allegation that for some reason or other our fish products, with the increased use of fish—I am going to get into that too, Mr. President; there has been increased use of fish in the United States—that some of the other meat sources are putting out the word that for some reason or other consumption of fish is risky.

Those facts are just not borne out. I want to put into the RECORD some data from the Centers for Disease Control that was published by the Department of Agriculture's Economic Research Service. It shows that from 1973 to 1984, 597 outbreaks of salmonella—I would add that salmonella is not related to salmon, as I am sure most Members of the Senate will know—that out of 597 outbreaks 5 of them came from fish, 2 of them came from shellfish. This is not a risk of the fishing industry. This is a risk primarily attributable to the current processes of the Department of Agriculture.

I told my fishermen, if they were friends of Custer, they are going to love the Department of Agriculture when it comes to inspection systems because there is not anything I have read so far from anybody that will commend the current system of inspection in the Department of Agriculture.

Why should we put fisheries into Agriculture in order to raise the level of public support for the inspection systems, when public support for Agriculture's inspection systems is going down like an elevator.

We do not want to be in the Department of Agriculture. We want to be just where we are, with the Department of Commerce, with its divisions of the National Marine Fisheries Service and National Oceanic and Atmospheric Administration and with FDA. They have a proven track record. This report of the Centers for Disease Control substantiates that.

The current systems are giving the public a much higher quality product than any of the red meats are. Yet, the red meat industry wants us put into the Department of Agriculture, in my opinion.

I ask unanimous consent that this material be printed in the RECORD along with a review of salmonella outbreaks from the Centers for Disease Control. All of these statistics support what I am saying.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SALMONELLA FACTS

Salmonella Outbreaks, 1973-1984: From the CDC data base as published by USDA's Economic Research Service.

From 1973-1984: 597 total outbreaks of salmonellosis in U.S.: 231—food vehicle not identified; 96—beef, veal, pork, lamb; 52—poultry; 5—fish; and 2—shellfish.

From Risk Estimate of actual occurrence: This risk analysis was prepared by FDA and reviewed by CDC. Dr. Walter Dowdle transmitted CDC's response to FDA, and stated that the conclusions reached by the FDA analysis for chicken, fish and shellfish were "the most probable scenario for the United States, and consistent with CDC's three decades of experience in tracking foodborne disease."

Chicken: 500,000 cases salmonellosis annually attributable to chicken; 125 salmonella deaths from chicken exposure annually.

Finfish: 725 cases salmonellosis annually attributable to finfish; 1 salmonellosis death annually attributable to finfish.

Shellfish: 1,000 cases salmonellosis annually attributable to shellfish; 1 salmonellosis death annually attributable to shellfish.

From 1973 to 1987, the following numbers of outbreaks and outbreak-associated cases of salmonellosis were reported to CDC's Foodborne Diseases Surveillance System:

These were transmitted by Dr. Robert Tauxe, EDB, DBD, CDC by telephone.

	Outbreaks	Outbreaks associated cases
Poultry	66	5,743
Other meat	122	5,960
Shellfish	3	80
Other fish [1]	5	121

[1] Other fish includes crustaceans.

Even if these actual reported data are corrected for weight of food consumed, poultry and other meat exceeds fish as a cause of salmonellosis by a considerable margin.

Mr. STEVENS. There is no public health crisis in seafood that would warrant an upheaval of the current Federal seafood inspection structure. As a matter of fact, just to the contrary; seafood is safe, or safer, than any food you can buy today.

This Agriculture bill, for some reason tries to place suspicion on the existing seafood inspection system. That is not warranted by the facts and

this proposed transfer of NOAA and FDA assets to Agriculture is not warranted by anything that anybody can present to this Senate, in my opinion.

What we are after now is something entirely different.

Mr. President, I will finish up, and I will yield to somebody who might want to speak.

I want to say this: More and more than independent processing facilities in our State are being absorbed by the seafood subsidiaries of the national food conglomerates. These conglomerates deal with the Department of Agriculture. They do not deal with Commerce; they do not deal with FDA: they do not know what NOAA stands for. And these enormous entities, headed up by the people we know—if you read "The Barbarians At the Gate"—do not care about the consumer; they are concerned about the bottom line in those industries.

We are concerned about preserving the respect that the consumer has for seafood products, particularly the products from my State. They are wanted all over the world. The very thought that the Senate of the United States would want to transfer to inspection systems from Commerce and the Federal Food and Drug Administration to Agriculture lends to the suspicion that has been raised by these other meat industries that something is wrong with seafood. That is not true. That is absolutely not true.

Mr. President, I ask unanimous consent that I be able to yield to my colleague for such remarks as he may want to make. I have to have a conference concerning the future of this amendment. I would like to ask unanimous consent that a brief summary of industry letters supporting our opposition to the Agriculture bill, as well as the administration's views on this matter be printed at the end of my statement.

The PRESIDING OFFICER. Without objection it is ordered.

(See exhibit 2.)

EXHIBIT 1

ISSUES BEHIND MANDATORY SEAFOOD INSPECTION

(By Michael R. Dicks and David Harvey)

Rapidly rising per capita consumption of seafood and a renewed emphasis on water quality have aroused concern over whether fish and shellfish in the United States are safe to eat. Highly publicized incidents in recent years, such as contamination of coastal waters in the Northeast by medical wastes, disease outbreaks among crabs and oysters in the Chesapeake Bay, and red tide contamination in the Carolinas, have led to calls for mandatory Federal inspection.

The seafood industry is basically not adverse to mandatory inspections. However, the industry is concerned with the method and cost of inspections, and the adverse publicity generated by consumer groups.

HOW SAFE IS SEAFOOD?

From 1973 to 1987, the Centers for Disease Control (CDC) received 3,703 reports of foodborne disease outbreaks where the food source of the disease was identifiable (An outbreak is an occurrence of a disease involving two or more people.) Nearly 163,000 cases of individual illnesses were associated with these outbreaks. Just over 20 percent of the outbreaks were attributed to seafood—14.7 percent for fish and 5.7 percent for shellfish. However, seafood was deemed responsible for only 5 percent of the individual cases—2.2 percent for fish and 2.8 percent for shellfish.

According to data supplied to the U.S. House Committee on Merchant Marine and Fisheries by the Food and Drug Administration (FDA), an average of 44 individual cases of illness occurred per foodborne disease outbreak from all food sources, while fish averaged only 7 individual cases per outbreak and shellfish, 22. In comparison to the two largest meat sources, beef and poultry, the number of outbreaks and cases involving seafood were relatively small.

However, people were eating a lot more beef and poultry. During 1973–87, the average annual per capita consumption of beef, poultry, and seafood was 85.1, 55.4, and 18.7 pounds, respectively. After adjusting for differences in consumption, fish and shellfish (14.5 outbreaks and 171 cases per billion pounds consumed) were more likely to cause foodborne disease outbreaks and illnesses than either poultry (2.1 outbreaks and 102 cases per billion pounds consumed) or beef (1.4 outbreaks and 57 cases per billion pounds consumed). If sicknesses related to raw shellfish are omitted from all seafood-related illnesses, the number of individual cases drops to 75 per billion pounds consumed, 25 percent less than for poultry and only slightly higher than for beef.

These statistics are based on the reported number of foodborne diseases whose source is identifiable. Many outbreaks and cases go unreported or their source is unknown. As a result, the distribution of disease across food types may be different. For instance, between 1973 and 1987, CDC recorded 597 outbreaks of salmonellosis—a flu-like illness caused by Salmonella bacteria. The source for 231 of these outbreaks was never identified. Beef, veal, pork, and lamb accounted for the majority of known outbreaks, 96; followed by poultry, 52; fish, 5; and shellfish, 2.

These data are assumed to represent commercially supplied products only (see box). However, reported outbreaks and illnesses may originate from any source, as product origin is not specified when the illness is recorded.

Data from FDA's Center for Food Safety and Applied Nutrition indicate that two foodborne diseases associated with fish—ciguatera and scombroid poisonings—accounted for 82 percent of confirmed fish-related illnesses during 1973–87. Ciguatera poisoning is most often caused by eating tropical reef fish, such as snapper, grouper, or barracuda, that accumulate toxins in their flesh from the food they eat. Scombroid poisoning, on the other hand, is apparently the result of a buildup of toxins from bacterial growth on tuna, mackerel, and similar fish after death.

An average of 76 individual illnesses occur annually in the United States as a result of ciguatera poisoning and another 64 result from scombroid poisoning. The remaining 18 percent of confirmed fish-related illnesses are caused by salmonellosis, 25 illnesses per year, and anasakiasis, 5 illnesses per year.

A wider spectrum of pathogens are associated with shellfish, particularly raw shellfish. Estimates of individual illnesses associated with shellfish point to various species of Vibrio bacteria as a major source of contamination. The International Commission on Microbiological Specifications for Foods notes that diseases due to Vibrio are prevalent where large populations of living Vibrio bacteria are present, either on raw shellfish or in products that have been recontaminated after cooking. Freshly harvested marine animals are also at risk.

WHERE DOES OUR SEAFOOD COME FROM?

In 1988, Americans reduced their consumption of seafood—fish and shellfish—for the first time since 1982. Per capita consumption reached a record 20.2 pounds in 1987 and fell to just under 19.9 pounds in 1988 in response to short supplies, higher prices, and safety concerns.

The seafood we eat comes from four main sources: imports, commercial landings, aquaculture, and recreational catch. However, their relative shares have changed considerably during the 1980's. Between 1980 and 1988, imports of edible fish and shellfish rose 43 percent from 2.1 to 3.0 billion pounds, while the supply of edible seafood from domestic sources (commercial landings minus exports) only increased 12 percent, from 3.1 to 3.5 billion pounds. U.S. aquaculture production grew from 203 million pounds in 1980 to an estimated 790 million pounds in 1988. Supplies from recreational catch are estimated to have grown 8 percent during the period, roughly the same rate as population growth, particularly where water quality is poor and temperatures high.

The Center for Food Safety and Applied Nutrition estimates that individual cases of nonlethal *Vibrio* illnesses could number between 5,000 and 10,000 annually. While *Vibrio* contamination is a major source of illness, a number of other diseases are associated with shellfish. Salmonellosis in shellfish is estimated at 100 to 1,000 cases per year. Some 4 to 500 cases of acute, nonlethal viral infections are recorded annually, but the total number of cases could be as high as 50,000 and may be climbing.

SEAFOOD INSPECTION

Red meat and poultry, as well as many other perishable food items, are federally inspected at various stages of processing to ensure consumers that the products are safe. Currently, seafood does not have a mandatory Federal inspection program similar to those for red meat and poultry. Unlike meat and poultry, where each carcass is subject to inspection, only random samples of seafood are inspected.

The great diversity of fish and shellfish species, relatively small sales volumes, the nature of associated diseases, and location of harvest, processing, and distribution systems could make visual inspection largely ineffective and continuous inspection cost prohibitive. In many seafood operations, there are a variety of species being processed and a large number of sizes present, even within one specie. This makes disease problems harder to spot and would slow the inspection process, making it more costly per pound. The poultry and livestock industries, on the other hand, have highly standardized products. In addition, many seafood processors operate on a seasonal or irregular basis and in isolated locations, again raising inspection costs per pound.

Although no single, mandatory program exists, a myriad of State and Federal agencies are involved in inspecting seafood. The National Marine Fisheries Service (NMFS), part of the U.S. Department of Commerce,

provides a voluntary inspection program to interested seafood processors, packers, brokers, and users. NMFS inspectors examine the raw fish and shellfish, ensure hygienic preparation, and certify final product quality and condition. Participants must pay for the service, and their products may carry either a Federal grade or inspection mark. Most years, this program has inspected about 10 to 20 percent of the seafood consumed in the United States.

FDA, an agency of the U.S. Department of Health and Human Services, is responsible for ensuring that all foods destined for interstate commerce, including fish and shellfish, are safe for consumption. To accomplish this, FDA has a mandatory program for inspecting the facilities of seafood processors, shippers, packers/repackers, labelers/relabelers, warehouses, and importers. Annually, this program inspects 25 to 30 percent of the facilities of all U.S. seafood firms.

The agency collects and analyzes seafood products for a wide array of possible problems including toxins, diseases, parasites, decomposition, preservative content, mislabeling, and sanitary environment. Both visual and laboratory examinations are performed. But the majority of FDA inspections are focused on plant sanitation, with more detailed inspections occurring because of concerns raised by individual inspectors.

The Environmental Protection Agency (EPA) has the overall responsibility for reducing or preventing pollution in navigable waters to protect fish and wildlife, and providing safe water supplies for recreation and consumption. EPA is directly responsible for the regulation of transportation and disposal of materials in ocean waters to prevent an increased risk to human health, the marine environment, ecological systems, and economic potential.

EPA is required to evaluate the risk to human health from chemical-contaminated fish and shellfish. The agency sets minimum allowed levels for specific toxic substances. Seafood is tested for such compounds as polychlorinated biphenyl (PCB) and mercury.

The U.S. Fish and Wildlife Service, an agency of the U.S. Department of the Interior, is responsible for the fish and wildlife portion of the National Contaminant Biomonitoring Program. The program's primary objective is to determine nationwide levels and trends of selected environmental contaminants in freshwater fish.

State Governments also inspect seafood establishments (processing and packing plants, for example), analyze fish and shellfish samples, assess water quality, and patrol harvesting areas. Many county governments perform functions in coordination with, or in addition to, State programs and activities.

PROPOSED LEGISLATION

Four bills dealing with the inspection or safety of seafood are currently before the U.S. Congress. Two different House bills call for mandatory seafood inspection. The Mandatory Fish Inspection Act of 1989 (H.R. 1387) was introduced by Representative Dorgan of South Dakota and the Consumer Seafood Safety Act of 1989 (H.R. 2511) by Representative Studds of Massachusetts. A third bill, the Fish and Fish Products Safety Act of 1989 (H.R. 3155), was introduced by Representative Dingell of Michigan. It seeks to expand FDA's role in the inspection and labeling of seafood.

The Senate bill, introduced by Senator Mitchell of Maine, is the Federal Fish Inspection Act (S. 1245). It seeks to broaden the Federal Meat Inspection Act to cover inspection of seafood products. Legislative debate regarding a comprehensive seafood inspection program focuses on three main issues: which Federal agency should be in charge of the inspection, what will be the principal components of the mandatory inspection program, and who will pay for the inspections.

H.R. 1387 would name USDA as the lead agency for inspecting all fish and shellfish destined for human consumption. The inspection program would be patterned after those already in place for meat and poultry. All commercial processors would be inspected. It is unclear whether the bill would cover shellfish sold live and those fish that are gutted at sea and sold directly to retail or wholesale markets. A program modeled after those for meat and poultry would require USDA to pay inspectors' salaries, but processing plants would be charged for any overtime.

H.R. 2511 would make NMFS the lead agency for seafood inspection and model the inspection system after the Hazard Analysis Critical Control Point method (HACCP). This method examines the specific processes used to move seafood from harvest to final product and identifies the points that have the greatest risk of introducing contamination. These points would then be monitored to ensure that processing or handling procedures are in compliance with NMFS standards.

This bill would broaden the scope of the inspection system to include harvesting, processing, transportation, and marketing of all seafood products sold in interstate commerce. Fish and shellfish would be tested for heavy metals, pesticides viruses, and naturally occurring toxins. Federal standards would be set for grading, labeling, packaging, and acceptable levels of contaminants. Inspectors would be authorized to take samples and access records. Although H.R. 2511 does not specifically mention who would pay for the inspections, it does call for appropriations of $90 million annually for the first 4 fiscal years, so most of the cost would probably be borne by the Federal Government.

H.R. 3155 would amend the Federal Food, Drug, and Cosmetic Act to give FDA the responsibility for seafood inspection and labeling. The Secretary of Health and Human Services would prescribe standards for chemical and microbiological contaminants, parasites, and toxins. Firms processing fish and shellfish would also have to meet sanitary and quality control standards. Seafood processors and importers would be subject to inspections and would be required to register yearly with FDA.

S. 1245 would expand the scope of the Federal Meat Inspection Act to cover fish and shellfish. USDA would be the lead agency for inspections, but the system would be set up to avoid duplicating present programs. The system would include standards for processing, storing, and handling domestic and imported seafood. The HACCP method would be used, with mandatory reporting and recordkeeping requirements. How inspection costs would be allocated is not specifically mentioned in this bill.

MANDATORY FEDERAL INSPECTION

As the debate over mandatory seafood inspection continues, examining several key points may clarify the issues and help develop an effective and efficient inspection program.

Lack of data. The only central source of data on foodborne illnesses is the CDC. The data CDC has compiled to date are incomplete and thus potentially misleading. Often, because consumers are unaware of the symptoms of foodborne diseases, many illnesses go unreported.

Using this limited information, FDA has estimated the risk to consumers of foodborne diseases associated with red meats, poultry, and seafood. The estimates indicate that for chicken one illness will occur per 25,000 servings, while for seafood one illness will occur every 250,000 servings. If raw shellfish is excluded, the estimate drops to only one illness per 5 million servings of seafood.

All foods have the potential for causing illness. Better estimates of the comparative risk associated with each food should be obtained before inspection resources are targeted to specific areas. At present, the data do not support the need for targeting seafood, particularly fish, with a larger share of inspection resources. More information is needed on the exact source of seafood-borne illness. Scientists need to know at what stage, from harvest to final preparation, the product was contaminated, and whether it was from a commercial or recreational source, (Recreational catch is estimated at 3 to 4 pounds of edible fish products per person.)

Overlapping responsibilities. Numerous agencies are currently involved in seafood inspection. Given tight budget resources, an inspection program should aim to reduce as far as possible any overlap of responsibilities. If one agency is to be in charge of seafood inspection, which one can most efficiently incorporate this new role into its already existing structure and responsibilities? Will personnel and resources devoted to seafood inspection at other agencies be transferred to that agency?

Program costs. Should a user fee be charged or should inspections be funded out of tax revenues? Most seafood products are bought by higher income families, whereas chicken and beef purchases are more uniform among all income levels. Thus, all taxpayers would pay for the seafood inspection program, but higher income families would be the main beneficiaries.

Source of contamination. Despite the fact that fish and shellfish come from various locations and include many species, the types of bacteria and viruses that occur naturally in seafood are similar in most cases. They are typically found in water and sediment and rarely include any species that are disease-producing in mammals. Therefore, fish caught in waters not polluted by human or animal wastes are free from health hazards when handled properly. Current water quality legislation may reduce the number of seafood-related illnesses by reducing contaminants prior to harvest. This may redistribute inspection resources to post-harvest activities.

Rather than invest in new inspection systems or increase funding for current programs, new or improved consumer education programs may have a larger impact on the reduction of risk per dollar of expenditure. Also, while a new mandatory inspection program for seafood may be politically expedient, without better information on foodborne illnesses, consumers may be faced with greatly increased expenditures without an accompanying reduction in health risks.

EXHIBIT 2

Those opposed to seafood on the Farm Bill include:

Pacific Seafood Processors Association which represents all of the major shore-based processors in the Pacific Northwest and Alaska. Eight of the top ten seafood processors in the Pacific Northwest/Alaska belong to PSPA. PSPA members process approximately 25 percent of all seafood landed in the U.S. (approx. 40 percent of the value.)

Interstate Shellfish Sanitation Conference is an interstate compact among 28 coastal states to monitor shellfish harvesting areas and prevent the sale of contaminated shellfish. The ISSC is composed of state officials, federal agencies, and industry members. ISSC has worked with FDA, NOAA, and EPA to develop the National Shellfish Sanitation Program. ISSC represents the entire shellfish processing industry.

Texas Shrimp Association is one of the largest shrimp fishermen's organization.

Southeastern Fisheries Association which represents fishermen from Alabama, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, and Texas.

Those who support the Commerce Committee bill include:

Trident Seafoods which is the largest seafood processing company in the Pacific Northwest and Alaska.

All Alaskan Seafoods.

Alaska Pacific Seafoods.

American Fishing Tackle Manufacturers Association.

Public Citizen a consumer advocate group.

THE SECRETARY OF HEALTH
AND HUMAN SERVICES,
Washington, DC, July 19, 1990.

Hon. GEORGE J. MITCHELL,
U.S. Senate,
Washington, DC.

DEAR SENATOR MITCHELL: We want to strongly reiterate the Administration's position opposing inclusion of seafood inspection provisions in S. 2830, the Farm Bill.

As Chief of Staff Sununu indicated in the attached letter of May 8 to the leadership of the Commerce and Agriculture Committees, "The Administration believes that overall responsibility for Seafood Safety should remain with the Food and Drug Administration at the Department of Health and Human Services and the National Marine Fisheries Services [NMFS] of the Department of Commerce."

The Senate Agriculture Committee Seafood Inspection Bill was developed without consulting the Administration. We strongly support the approach that the Senate Commerce Committee took in its seafood bill, S. 2228.

There are fundamental differences between these bills that are of interest to states, the seafood industry, consumers, committees of authority and the Administration. To assure that both committees' approaches are thoroughly examined, this matter should be addressed as free-standing legislation.

We urge the Senate to refrain from adding seafood inspection to the Farm Bill and ask that it be dealt with as a separate issue.

This position is consistent with Administration policy.

Sincerely,

Louis W. Sullivan, M.D., Secretary, U.S. Department of Health and Human Services; Robert A. Mosbacher, Secretary, U.S. Department of Commerce, Richard G. Darman, Director, Office of Management and Budget.

THE WHITE HOUSE,
Washington, May 8, 1990.

Hon. PATRICK J. LEAHY,
Chairman, Committee on Agriculture, Nutrition, and Forestry, U.S. Senate, Washington, DC.

DEAR PAT: The status of the federal seafood safety program has been the subject of considerable debate in Congress during recent months. There has been some confusion regarding the Administration's views, and I am writing to clarify our position.

The Administration believes that overall responsibility for seafood safety should remain with the Food and Drug Administration [FDA] of the Department of Health and Human Services and the National Marine Fisheries Service [NMFS] of the Department of Commerce. The expansion of the federal seafood safety program in the President's fiscal year 1991 budget is, therefore, directed toward those agencies. Furthermore, the Administration supports user fees for those services that impart substantial private benefit to the seafood industry. The seafood industry has requested additional federal inspection, which would increase public confidence and enhance seafood marketing opportunities. For these reasons, the Administration supports user fees to finance an expanded program.

FDA's seafood safety program currently includes mandatory, random inspections and extensive research, and relies on long-standing relationships with states, other federal agencies and foreign countries. Many of the activities in FDA's program require highly specialized knowledge and training, including expertise in marine biology and related marine disciplines. FDA's program should remain the cornerstone of the federal regulatory system for seafood.

NMFS is the only federal agency authorized to control fishing activities of vessels in federal waters and has closed those waters to harvesting when a FDA tolerance for a contaminant in shellfish has been exceeded. NMFS has an unsurpassed knowledge of fishing vessels and acceptability of catch. Like FDA, NMFS has experience in inspecting seafood processors under its current voluntary program. This program includes grading and lot certification for export, features important for international trade. NMFS is also the lead federal agency with respect to fisheries trade policy and strategy.

The clearest health risk from seafood involves the consumption of raw molluscan shellfish, although less than one percent of all seafood is consumed that way. This risk stems largely from human pollution of coastal waters. Monitoring the quality of local growing waters is the only viable recource. FDA and NMFS, working with the states, are uniquely qualified to address this pubic health problem. All state shellfish safety programs for monitoring growing waters are based on FDA training and rely on FDA technical assistance. An enhancement of this program is best implemented by FDA and NMFS.

The Administration has proposed a $14 million increase in FDA's 1991 budget to accommodate an enhanced program. We believe that the public health interests of the Nation would best be served by a modest but well-targeted expansion of the programs operated by FDA and NMFS.

We look forward to working with you as you continue to examine this issue.

Sincerely,

JOHN H. SUNUNU,
Chief of Staff.

Mr. MURKOWSKI. I thank my colleague, the senior Senator from Alaska, and I thank the Chair.

As I think my colleagues have observed, the concern expressed by the senior Senator is not a concern he shares alone. I find it utterly amazing that this agricultural bill there should suddenly be subject to a proposal on fisheries.

It seems to me that the bill is broad enough now that it is not necessary to include another whole industry.

We are debating the agricultural bill, Mr. President. The Senator from Alaska is not an expert on agriculture, but I do know something about harvesting resources from the sea. That is to a large degree in the agriculture industry as it exists in Alaska. The possibility that the Senate would approve a seafood inspection plan during debate on the farm bill is something that, as I have said, I found totally out of synch with the objective of this legislation.

I am not interested in getting into discussion with my colleagues from meat-producing States, or pork-producing States, or chicken-producing States. What we are suggesting is simply that the issue of seafood inspection should not be part of the agricultural bill. It does not belong, and I strongly oppose the consideration of seafood inspection at this time in this piece of legislation.

Seafood inspection should not be dealt with as an add-on to an overweight farm bill. There is no good reason for putting it here. When the Senate takes up seafood inspection, it is going to be breaking new ground, not just adding a new twist to an old program. It will make fundamental changes in the way an entire industry is regulated, and this matter deserves consideration as a totally separate issue.

Let there be no mistake about it, Mr. President, I am not opposed to seafood

inspection. We have responsible seafood inspection in Alaska, and I strongly support the concept of mandatory Federal inspection of seafood production facilities. The protection of American consumers and of the legitimate industry both, require it.

However, I also believe this matter is of such importance that it requires the body's full attention. There are two competing proposals for mandatory Federal inspection, as you know: one from the Agriculture Committee and one from the Commerce Committee. Neither of these should be adopted, Mr. President, until such time as they both can be compared and discussed in detail. This is not the time.

It is my understanding that the current Agriculture Committee proposal was developed without substantive input from the administration, and that the administration strongly supports the approach taken by the Commerce Committee. That alone behooves the Senate to move cautiously with respect to Agriculture Committee proposals.

USDA already manages the beef and chicken industries. Why it wants to get into fish, I don't know. I can only assume it wants sole authority, and that this is in many ways, a turf battle.

There are many serious issues involved with seafood inspection. As an example, let me call my colleagues' attention to the issue of inspecting processing vessels. They may be hundreds of miles out at sea. They may spend several months out there. It's easy to picture how a random inspection plan would work for processing plants located on shore, but it is much less so to imagine a truly random, unannounced approach at sea.

The best that the authors of the Agriculture Committee have been able to suggest in their committee report is to offer the vague statement that they contemplate the transfer of inspectors from Coast Guard vessels on routine patrol.

Mr. President, this is a suggestion that needs a closer look. It is totally impractical, because Mr. President, the ocean out there is as big as the entire United States and we have only a few Coast Guard vessels. This kind of problem is not going to be solved by putting inspectors on Coast Guard vessels and asking them to wander around out there. The factory trawlers operate over huge areas, and there are not enough Coast Guard vessels to handle the duties they have right now. How can we expect them to become taxis for new Federal inspectors?

A large part of the controversy over these two approaches revolves around what agency or agencies will have jurisdiction over seafood. The Agriculture Committee's proposal would place seafood inspection under the Department of Agriculture, which presently maintains inspection programs for meat and poultry. To some, including some representatives of the seafood industry itself, it simply makes sense for the same agency to administer the inspection programs for all such products. They argue that only USDA has the background and staff to administer a major new inspection program.

However, Mr. President, I must point out that the program proposed for seafood is in no way similar to the programs the Department carries out for meat and poultry. Meat and poultry are processed under what is called "continuous Federal inspection," which simply means that there is a USDA inspector in the plant while it is operating. The program proposed for seafood is substantially different. It is called the "Hazard Analysis/Critical Control Point" process, and requires the scientific identification of high-risk points in the seafood preparation process, and monitoring to ensure that seafoods passing those points continues to be wholesome.

While it is true that USDA has a large number of employees familiar with inspection procedures for meat and poultry, the Hazard Analysis/Critical Control Point process is entirely different, and despite USDA's experience with continuous inspection, it is no better suited to implement the proposed seafood program than any other agency.

In fact, the Commerce Committee and the administration believe there are agencies that are far better equipped to handle seafood inspection than USDA. The National Marine Fisheries Service currently administers voluntary seafood inspection programs nationwide, and has demonstrated knowledge of the industry. It is also the only agency with the authority to control fishing activities. The Food and Drug Administration currently provides mandatory random inspections of seafood, does research on seafood safety, monitors the safety of the waters from which most seafoods are harvested, and has built up important, longstanding relationships with State inspection programs, other Federal agencies, and foreign countries. These elements are critically important to making a seafood inspection plan successful.

Mr. President, let me repeat once again that when the Senate takes up seafood inspection, it will be breaking new ground, not just adding a new product to an old system. It will be making fundamental changes in the way an entire industry is regulated. This matter deserves consideration as a separate issue, not as a hurried add-on to the already overburdened farm bill. Let us get on with the farm bill and leave the fish for another day.

Mr. LEAHY. Mr. President, I want to clear up one matter for the record. Senator STEVENS challenged my earlier statement that the butter clam industry in Alaska has been wiped out.

I ask unanimous consent to have printed in the RECORD a scientific article that confirms this fact that the butter clam industry in Alaska has been wiped out. This article is "A Serious Threat to Shellfish Aquaculture," by Sandra E. Shumway, in World Aquaculture, volume 20, issue 4, notes that "The Alaska butter clam industry was essentially destroyed by toxic-algae over 40 years ago. * * * Today there is virtually no commercial clam fishery and all Alaska beaches are considered at perpetual risk."

A discussion of the seasonal toxicity of butter clams is found in a U.S. Fisheries and Wildlife Special Scientific Report, volume 53, by J.S. Chambers.

The butter clam industry is small and has gone up and down slightly over time. It has not suffered collapse at any time due to contamination.

Alaska has small industries harvesting razor clams, butter clams and goey ducks. None of them have suffered sharp declines from contamination.

The greatest threat to these industries occurred in 1964, when the Good Friday earthquake raised and lowered shellfish beds, destroying large areas of habitat.

Alaska does not have problems with sewage and other forms of pollution contaminating its shellfish, as other areas of the country do. The main barrier to Alaska developing a larger shellfish industry is transportation costs—everything has to be flown in and out.

The only contamination that has been found in Alaska's shellfish is paralytic shellfish poison—a toxin which is carefully tested for in Alaska. As a result, Alaska does not have a problem with PSP in its commercially marketed shellfish.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From World Aquaculture, December 1989]

A SERIOUS THREAT TO SHELLFISH AQUACULTURE

(By Sandra E. Shumway)

Toxic algal blooms occur all over the world and appear to be increasing in number and diversity. Of major concern are the toxic forms that can cause human illness ranging from mild discomfort to paralysis and death, but the problem also includes species that can affect our utilization of shellfish resources. The economic loss from organisms that cause human illness can be catastrophic, but if harvesters, managers, government officials and the media can work together to develop monitoring systems and ensure responsible press coverage, we should be able to protect the interests of all concerned.

Red tides occur when certain species of algae respond to favorable changes in their environment and "bloom" in numbers that may attain several million cells per litre of seawater. Actually, these blooms may or may not be visible and they may or may not

be red; some of the most devastating blooms of late were brown. They may be distinctly toxic or merely noxious—that is, they may produce specific toxins or simply cause anoxia through the decay process or by clogging the gills of filter-feeding animals. Finally, these blooms can appear and render shellfish toxic virtually overnight.

Toxic algae create serious problems for shellfish acquaculture. They are a threat to human health and they can cause mass mortalities of shellfish. Worse, the problems created by blooms of toxic algae are no longer limited to the dinoflagellates.

The toxins produced by various algae are potent and tend to accumulate in the molluscs that feed on them. These in turn become toxic to humans who eat them. There are a variety of toxins and therefore a variety of shellfish poisons, including paralytics shellfish poisoning (PSP), diarrhetic shellfish poisoning (DSP), neurotoxic shellfish poisoning (NSP), and amnesic shellfish poisoning (ASP).

Shellfish toxicity and its association with exceptional blooms of plankton has been known for centuries. It is particularly well-defined in the case of PSP, a recurrent phenomenon in some areas, and a serious threat to human health where control measures are lacking. Slow progress is being made towards understanding the nature of blooms that cause toxic shellfish, but they are still a serious problem for harvesters, seafood processors, consumers and regulatory agencies, and therefore a serious problem for aquaculture.

The problems created by toxic algae are more acute in some areas than others. The Alaska butter clam industry was essentially destroyed by toxic algae over 40 years ago. Alaska has almost 53,000 km of coastline and more than 100 species of clams, and in 1917 the industry produced 5 million pounds of shellfish products. Today there is virtually no commercial clam fishery and all Alaskan beaches are considered perpetually at risk. In Sweden and Norway mussel culture increased at a steady rate until 1984-1985, when blooms of the dinoflagellate *Dinophysis* spp. caused a major setback. The highly successful mussel production industry in Spain (approximately 10,000 persons employed) has also suffered severe setbacks due to both DSP and PSP. Developing countries often lack the expertise and managerial infrastructure to deal with sudden PSP outbreaks and the toll on human health as well as the industry can be enormous. The first PSP event in the Philippines (in 1983) left 21 people dead and nearly 300 ill. As a result, the harvest and sale of shellfish was banned for 8 months.

GROWING PROBLEM

It appears the incidence and diversity of blooms has been increasing in recent years. Although some feel this is due to an increased awareness and a larger number of observers, the evidence indicates a real increase in the frequency, intensity, duration, and geographic spread of outbreaks around the globe.

There are many possible reasons for this. Blooms can be enhanced by nutrient enrichment of the marine environment, decreased grazing pressure on the alga in question, large-scale hydrometeorological changes, upwelling of nutrient-rich bottom water and heavy freshwater runoff. It has also been firmly established that there is a direct correlation between the number of red tides and the extent of coastal pollution (particularly from sewage and some forms of industrial wastes). The potential hazards to the shellfish industry are staggering and shellfish monitoring programs designed to protect the general public have become a necessity in previously unaffected regions, especially southeast Asia and other Pacific areas.

Finally, there is increasing evidence that toxic species are being transported to new areas via the ballast of ships or infected shellfish. Toxic shellfish are often deliberately transported to clean waters so they can self-depurate, but when this is done there is danger that the "clean" area will become infected with cysts or motile cells that may seed a future bloom. In an effort to control the spread of blooms, The Netherlands has prohibited the transfer of mussels from potential "PSP risk" areas to clean areas.

Dinoflagellates are the most common sources of these toxic blooms. PSP outbreaks are usually associated with dinoflagellates of the genera *Protogonyaulax, Gymnodinium,* and *Pyrodinium;* DSP outbreaks usually involve *Dinophysis;* and NSP is commonly associated with *Pytchodiscus.*

Paralytic shellfish poisoning

The toxic marine dinoflagellate, *Alexandrium tamarensis,* is the organism responsible for PSP in many parts of the world and, because of the serious damage it can cause to the shellfish industry, it is probably the best understood of any of the toxic species. Other species of *Gonyaulax* are also known to cause toxicity in shellfish, especially in the Pacific northwest and Europe.

Pyrodinium bahamense var. *compressa* produces paralytic toxins and has been associated with severe outbreaks of shellfish poisoning in southeast Asia. It was first observed in Papua, New Guinea, in 1969, and one of the worst episodes was the red tide that killed 21 people in the Philippines in 1983.

While this species is most common in the East Indies and Philippines, it also occurs in Thailand and India. A recent outbreak in Guatemala, where there was no prior history of PSP, resulted in 26 deaths and 185 serious illnesses. Villagers consumed clams at a local feast and death ensued soon after. The toxin was so virulent that mice died in the hands of lab technicians as they injected them with a diluted solution of the toxin.

Gymnodinium catenatum has been associated with outbreaks of PSP in Japan, the northwest coast of North America, southern Ireland, Spain, Mexico, Argentina and southern Tasmania. This species was responsible for the closure of large mussel farms in northwest Spain and Tasmania in 1985-1986, and the deaths of three children along the west coast of Mexico in 1979. It has also caused shellfish mortalities in larval, and juvenile and adult oysters and mussels.

The dinoflagellate *Ptychodiscus (=Gymnodinium) brevis* causes neutoxic shellfish poisoning with symptoms similar to, but milder than PSP. No deaths have been associated with this species. Outbreaks of *Ptychodiscus* are annual events, primarily along the coasts of Florida and Texas, Florida routinely monitor for the dinoflagellate.

Diarrhetic shellfish poisoning

Diarrhetic shellfish poisoning is easily confused with gastroenteritis and general stomach upsets that can result from eating polluted shellfish. Consequently, DSP has only been recognized as a disease for the past ten years, and no mortalities have been recorded. The most seriously affected areas are Europe and Japan, although there is increasing evidence that the problem may be more widespread than previously known. The toxins associated with DSP include okadaic acid derivatives which are fat-soluble.

The dinoflagellate *Dinophysis acuminata* is considered the main source of DSP in European episodes, although there is no direct proof thus far. Two other species, *D. acuta* and *D. norvegica,* are probably responsible for DSP in Norway, and *D. fortii* is a causative organism in Japanese waters along with *Prorocentrum. P. lima,* a benthic dinoflagellate, has been implicated in Spain, and harvesting is monitored for a few weeks every summer and fall in anticipation of its presence. A bloom is not necessary for toxicity; concentrations as low as 100 cells/L can produce high levels of DSP in mussels.

Just as some PSP toxins can persist in shellfish long after the blooms have disappeared, the DSP toxins from *Dinophysis acuta* and *D. norvegica* have remained in blue mussels for up to 5 months in Swedish waters. In other areas toxins have been known to persist for many months, resulting in prolonged closures and severe economic loss to the shellfish industries.

While the majority of DSP outbreaks have occurred in Japan and Europe, it seems unlikely that the occurrences are limited to those areas. Because the symptoms of DSP so closely mimic common gastroenteritis, there is a good chance that cases of DSP have gone unreported. Twelve species of *Dinophysis* exist in Long Island waters, and roughly the same numbers are found in the phytoplankton communities of British Columbia and the northeast coast of the United States. Although no conclusive evidence exists for the presence of DSP in United States and Canadian waters, it nevertheless must be considered a potential problem.

Amnesic shellfish poisoning

A sudden and unexpected outbreak of shellfish toxicity occurred in 1987 among cultured blue mussels in the Cardigan River estuary of Prince Edward Island (Canada). Mussels harvested from this area poisoned 129 people and caused two deaths. The toxic substance was identified as domoic acid, a naturally occurring compound not previously known to be a shellfish poison. The Prince Edward Island incident was the first recorded case of human poisoning from this neurotoxin, and it established a new illness—amnesic shellfish poisoning (ASP). The symptoms include abdominal cramps, neurologic responses involving memory loss and disorientation and—in some instances—death. The toxin apparently was produced by a diatom, *Nitzschia pungens,* a common member of the phytoplankton community not previously known to produce toxins. Thus far, only the forma *multiseries* from eastern Prince Edward Island has been shown to produce the toxin.

The Canadian outbreak prompted officials in Maine to monitor several areas for this toxin. Digestive glands from sea scallops collected near Eastport had domoic acid levels of 568-595 μg/g tissue, and low levels of this toxin were found in several other areas. Because domoic acid is a highly potent neurotoxin, its presence in the phytoplankton has caused great concern within the shellfish industry.

Other effects

Gyrodinium aureolum should be considered a major threat to aquaculture activities, especially in northwestern Europe. In some instances, kills of cultivated organisms can be attributed to deoxygenation of the

water when the bloom begins to decay, but in others there is clear evidence that biotoxins are involved. The clams *Mya, Ensis, Tapes and Cerastoderma* all surfaced on the beaches during a bloom of *Gyrodinium* in Youghal, Ireland, and during a large bloom of *Gyrodinium*, clearance rates declined in blue mussels. The *Gyrodinium* cells caused considerable cellular damage to the gut of the mussels, but they recovered rapidly once the concentration of the algal cells was reduced.

Survival of larval oysters *(Crassostrea gigas)* apparently declines in the presence of *Gymnodinium* cells and it has been suggested that *Crassostrea* embryonic development could be used as a bioassay of water quality before, during and after blooms of this species.

Toxic algal blooms are becoming increasingly severe on a global scale and are no longer limited to the dinoflagellates. Relative newcomers are recently described chrysophyte, *Aureococcus anophagefferens* and the prymnesiophyte, *Chrysochromulina polylepis. Aureococcus* was responsible for the reduction of eelgrass beds and the collapse of the bay scallop industry on Long Island, and the near elimination of mussel populations in Narragansett Bay. *Chrysochromulina* is currently causing problems in Swedish waters, but there are no records of its earlier occurrence in that area. This species is acutely toxic to eggs and larvae of the blue mussel, inhibiting fertilization of ova and development of embryos. This is the first report of such toxic effects for this species and the implications for culture facilities are obvious. *Chrysochromulina* is also found in British Columbia (Canada), and it may be only a matter of time before problems occur.

Another species *Prorocentrum minimum* var. *mariae lebouriae* was responsible for a disastrous case of shellfish poisoning in Japan in 1942 when 324 illnesses and 114 deaths resulted from eating short-neck clams. This species is common in Portugal where it has been associated with occasional shellfish toxicity incidents, and it has recently spread to Norway, Sweden and Denmark, although not yet connected with shellfish toxicity in these areas. Although it is often stated that toxic dinoflagellates have little or no effect on the shellfish themselves, this is not true. Recent studies have demonstrated a number of direct effects on shellfish, producing responses that are species specific, geographically specific and often dramatic. Of particular interest to culturists are the effects of *Protogonyaulax* on feeding responses, byssus production and survival.

ESTIMATED LOSSES TO THE SHELLFISH INDUSTRY AS A RESULT OF TOXIC ALGAL BLOOMS

Alga	Shellfish	Location	Loss (million U.S. dollars)
Protogonyaulaz tamarensis.	Mytilus edulis	Gulf of Maine, 1972.	>10
	Mya arenaria	Gulf of Maine, 1980.	>2
Protogonyaulax catenalla.	Protothaca stamanea.	British Columbia	2+
	Saxidomus giganteus.	(annually)	
	Venerupis japonica		
	Panope generosa		
	Crassostrea gigas	California, 1980	0.63
Crassostrea virginica			
	Ostrea edulis		
	Saxidomus giganteus.	Washington	No fishery since 1979.
		Alaska	No Fishery since 1946.
	Clinocardium nuttali.	Alaska	No fishery since 1962.
Aureococcus anaphagefferens.	Mytilus edulis	Narragansett Bay, 1987.	0.1
	Argopecten irradians.	Long Island, 1987	>2
Ceratium fusus	Oyster	Korea, 1978	4.5
Nitzschia pungens	Mytilus eululis	P.E.I. Canada, 1987.	0.3
Pyrodinium bahamense.	Perna viridis	Philippines	0.5
	Spondylus butleri	Philippines	
	Tridacna corcea	Western Samar	2.2
	Septifer bilocularis		
	Perna viridis		
"Red Tide"	Pearly oysters	Japan, 1933	
PSP	Scallops	Japan, 1978	10
Ceratium tripos	Shellfish	New Jersey, USA)	60

ESTIMATED LOSSES TO THE SHELLFISH INDUSTRY AS A RESULT OF TOXIC ALGAL BLOOMS—Continued

APPROXIMATE TIMES OF TOXIN RETENTION FOR VARIOUS SPECIES OF BIVALVE MOLLUSCS

Species	Toxin source	Retention time
Anadara maculosa	Pyrodinium bahamense	6 weeks.
Arctica islandica	Protogogonyaulax tamarensis.	2 months in vivo.
Choromytilus meridionalis.	Gonyaulax catenella	3 months.
Clinocardium nuttali	Gonyaulax acatenella	9 weeks.
Crassostrea cucullata	Not specified; probably Pyrodinium bahamense.	2 months.
Crassostrea echinata	Pyrodinium bahamense	3 weeks in closed system; longer in vivo.
Crassostrea gigas	Gonyaulax acatenella	1–9 weeks.
Crassostrea virginica	Gymnodinium breve	2–6 weeks.
Meretrix casta	Not specified; probably Pyrodinium bahamense.	1 month.
Modiolus auriculatus	Pyrodinium bahamense	6 weeks.
Modiolus modiolus	Gonyaulax temarensis	Up to 60 days.
Mya arenaria	Gonyaulax acatenella	5 weeks.
	Gonyaulax temarensis	4–6 weeks.
Mytilus californianus	Gonyaulax acatenella	< one month.
Mytilus edulis	Protogonyaulax tamarensis.	10–50 days.
	Gonyaulax acatenella	4–11 weeks.
Patinopecten yessoensis	Protogonyaulax tamarensis.	6 weeks to 5 months.
Placopecten magellanicus.	Protogonyaulax tamarensis.	6 months in closed system, can be year-round in vivo.
Protothaca staminea	Protogonyaulax acatenella	5 weeks.
Saxidomus giganteus	Protogonyaulax acatenella	>2 years.
Saxidimus solidissima	Gonyaulax catenella	< one month.
Spondylus sp	Pyrodinium bahamense	Highly toxic after months.
Tresus capax	Gonyaulax acatenella	11 weeks.
Venerupis japonica	Gonyaulax acatenella	5 weeks.

INTOXIFICATION

The rates at which shellfish accumulate toxins are species-specific and, in most cases, directly related to the number of dinoflagellate cells available to the animals. Rate of loss is also species-specific and varies with season. Low water temperature seems to retard toxin loss but the precise relationship between temperature and the uptake and release of toxins is not fully understood. Further, the rate of detoxification is highly dependent on the site of toxin storage within the animal. Toxins in the gastrointestinal tract (e.g., the blue mussel) are eliminated more quickly than toxins bound in tissues (scallops; the clams *Spisula*, and *Saxidimus*).

The existing data on toxin retention for a number of bivalve species are summarized in an accompanying table. Mussel (*Mytilus* and *Modiolus*) accumulate PSP toxins faster than most other species of shellfish and also eliminate them more quickly. Oysters, on the other hand, accumulate the toxins more slowly than mussels, but they take considerably longer to detoxify. In contrast, species such as *Saxidimus giganteus* and *Spisula solidissima* may remain toxic for extended periods (in the case of *Saxidimus*, for more than 2 years).

Interestingly, some species of shellfish avoid toxic dinoflagellates. One species of particular interest is the hard clam or quahog, *Mercenaria mercenaria.* During a bloom of *Protogonyaulax tamarensis* in 1972, the entire coastline of Massachusetts came under interdict, and more than 1100 hectares of shellfish harvesting grounds were contaminated. Bioassays of shellfish revealed toxin concentrations in the range of 3000-5000 μg per 100 g, and the most heavily contaminated shellfish were the blue mussel, soft-shelled clam and bay scallop. However, *no* quahogs or oysters were affected. Studies in our laboratory revealed that when the quahog encounters *Protogonyaulax* it retracts its siphons and then isolates itself from the extenal environment by closing its shell valves, and these remain closed until the surrounding water is clear of the dinoflagellate. Efforts to induce toxicity by feeding *Protogonyaulax* to the quahogs were unsuccessful.

It is also possible that quahogs respond to other dinoflagellates in the same manner. Quahogs exposed to nontoxic red-tide blooms have been seen to bury themselves deep in their holding trays, and wild populations have been found as much as 35 cm below the sediment surface during these blooms instead of their usual 15 cm.

Toxicity information on samples of mussels and quahogs collected from the same localities in Maine between 1979 and 1986 is summarized in an accompanying table. At no time were quahogs found to be toxic, although mussels from the same area had toxin levels as high as 2600 μg/100 g. These differences among species regarding toxin accumulation and retention time should be given serious consideration when species are evaluated for culture in areas prone to toxic algal blooms.

People have attempted to detoxify shellfish contaminated with paralytic shellfish toxins in an effort to reduce the "off market" period. The most obvious method is to transplant shellfish to waters free of the toxic organisms and allow them to self-depurate. While this is satisfactory for many species of shellfish, detoxification rates vary considerably between species and some remain toxic for extended periods of time. Detoxification using temperature or salinity stress has been tried with marginal success. Chlorination has also been used in France but this alters the flavor of the shellfish and decreases marketability.

Ozonation is a promising method although its capabilities are limited. Several investigations have used ozone to inactivate PSP toxins in shellfish exposed to blooms of *Protogonyaulax tamarensis, catenella* and *breve,* although others have obtained conflicting results.

Conventional wisdom now holds that ozonized seawater can be used to detoxify shellfish recently contaminated by the vegetative cell phase of toxic dinoflagellates, but not if they were intoxified by cysts. In a study during a red-tide outbreak, ozone treatment of seawater prevented shellfish from accumulating paralytic shellfish poison. From these various results it has been concluded that inactivation can be achieved in bivalves without measurably altering their physical state, and that it can be done rapidly enough to be economically feasible. Ozone is useless in detoxifying bivalves that have ingested cysts or have had the toxins bound in their tissue over long periods of time.

At present the economic feasibility of detoxifying shellfish on a large scale in artificial systems is questionable. In areas prone to regular outbreaks of toxic algal species, culturists and commercial fishermen alike must still depend on reliable monitoring systems to warn of toxic shellfish. Through the combination of an intensive monitoring program and the culture of "rapid release" species such as the blue mussel, species such as quahogs and oysters that avoid toxic dinoflagellates, or species such as scallops from which nontoxic adductor muscles are utilized, economic losses can be minimized.

MONITORING

With all these threats to the industry you have to wonder what, if anything, can be done. Obviously, the most important priority is to find a way of predicting the onset of toxic blooms. The advantages of being able to predict the occurrence of potentially detrimental algal blooms are obvious. Early detection would allow officials to warn people, and a forewarning to culturists could save them from economic disaster. Unfortunately, we will lack an effective way of predicting the onset of algal blooms.

There is increasing evidence that most blooms originate in the ocean rather than in bays, and it is possible that key meteorological and oceanographic parameters could be used to evaluate the probability of a bloom. Oceanographers are already capable of identifying areas where there is a high probability that a bloom will occur, but accurate prediction is still not possible. Undoubtedly, as more studies explore the correlations between bloom events and environmental parameters, our predictive capability will improve.

Since most blooms originate offshore, satellite imagery, satellite-tracked monitoring buoys, aircraft and balloons could be part of an early warning system for detecting blooms. These vehicles would be equipped with sensors to monitor specific environmental parameters known to be associated with algal blooms. Instrumentation for satellites and aircraft has been developed which utilizes the light absorbed or emitted as fluorescence from algae. Unfortunately, there is no definitive way to distinguish between toxic and nontoxic blooms.

The Martinet system established in Norway is expected to be in full operation soon. This is an early warning service that will include noxious algae and algal toxins. The system is composed of various types of remote sensing plus a network of rapporteurs and laboratories where algae and toxins will be identified. The ultimate goal is to establish an international contact network.

While a successful method of prediction would be hailed by the shellfish industry, such systems are expensive. In the absence of predictive capabilities, monitoring remains the most powerful tool available to management. Monitoring of phytoplankton is simple and relatively inexpensive, and it can forewarn of potentially harmful conditions and detect new species that may pose a hazard. This type of monitoring is an integral part of mariculture in Japan. Early monitoring paid off in Ireland in 1984 when presence of *Dinophysis acuminata* was detected. Nearby mussel farms were warned of the potential danger, and when their product tested positive for DSP, the harvest of harmful mussels was avoided. In another instance, toxic cysts and motile cells of *Protogonyaulax* were discovered in areas historically free from outbreaks of shellfish toxicity, a finding which should alert potential culturists to the necessity for monitoring local waters.

Many countries have established comprehensive monitoring programs, but these are usually in response to a massive outbreak of toxic algae. It is an unfortunate human tendency to lavish the most attention on blooms that result in fatalities. Japan, the USA and Canada lead the field in this regard. Europe is developing monitoring programs, and an extensive program was recently established in Tasmania. Certainly more are needed, especially in developing countries where primitive culture facilities are common and technical assistance may be lacking. Large-scale programs such as those established in Japan, USA, and Canada provide an early warning system and minimize the losses due to blooms by implementing both area- and species-specific closures.

While regular water sampling and satellite monitoring will help locate toxic blooms in their early stages of development, the methods are by no means failsafe, making it difficult for farms and aquaculture facilities to plan their harvests. Even in the event of an early warning, it is impossible to prevent most species of bivalves from becoming toxic. An early warning can, however, prevent the sale and consumption of toxic shellfish and allow growers to harvest early or plan their harvests around the blooms to minimize economic damage.

ECONOMIC THREAT

Toxic algal blooms are at once a major economic threat to the shellfish culture industry and a public health hazard. Damage to human health is more easily evaluated than the cost of adverse publicity or a shellfish closure.

Blooms affect both fisheries and culture by rendering shellish toxic and thus unmarketable, by directly killing shellfish, or by causing the public to avoid a spectrum of related but unaffected products. Available data on economic losses associated with toxic algal blooms are summarized in an accompanying table.

Often more devastating than the blooms themselves is the accompanying publicity, misinformation and public unease, the impact of which goes far beyond the immediate drop in sales. Bans on shellfish cause loss of jobs for fishermen and employees in related industries that supply and service the culture industry. The bans also disrupt international trade and discourage expansion into aquaculture.

The impact of a toxic algal bloom is not always restricted to the immediate area. During the 1972 outbreak of "red tide" in New England, mussels, clams, quahogs and oysters were removed from the market in Maine and Massachusetts (the bay scallop, *Argopecten irradians*), was initially included but later cleared since only the non-toxic adductor muscle is marketed. New York and Connecticut followed by stopping the importation and sale of shellfish from the affected states. Although the ban specifically identified the species mentioned above, consumers responded by avoiding a spectrum of unaffected seafoods, including fish, lobsters, sea scallop meats, and northern shrimp, none of which were toxic. Losses to fishermen due to adverse publicity surrounding this incident were estimated by the National Marine Fisheries Service at more than US $1 million.

The recent occurrence of domoic acid in mussels from a small area in Canadian waters resulted in considerable economic loss not only to Canadian mussel growers outside of the affected area, but to United States mussel producers in nearby New England as well. And because of the protracted and sensational publicity accorded the event, the public was suspicious of most shellfish for a considerable period after the incident.

Clearly, misinformation can be one of the most serious consequences of a toxic algal bloom, and once consumer confidence is shaken by adverse publicity it can be a long and expensive process to re-establish it. Many agencies now attempt to avoid the publication of misleading information. The Shellfish Institute of North America (SINA) has issued informative newsletters and has met with Federal officials to ensure that accurate information is released. In California, information regarding PSP is issued to the news media by only one agency: the Department of Health Services. In Canada, the Department of Fisheries and Oceans oversees collection, testing, enforcement, management and public information at an annual cost over $1 million.

In areas prone to toxic algal blooms, consumers must be constantly reassured of the quality of seafood products being marketed, and news media must be encouraged to give equal coverage when the shellfish bans are lifted. Further, both the affected and the unaffected shellfish species should be clearly identified. One of the best campaigns to reverse the adverse effects of toxic algal blooms is currently being run by the Canadian government. Designed to re-establish consumer confidence in shellfish after the domoic acid incident on Prince Edward Island, the campaign should serve as an example of what can be done to offset otherwise extensive economic loss from toxic algal blooms.

Only through improved monitoring programs, increased public awareness and accurate, positive publicity can shellfish growers combat the increasingly common and potentially disastrous results of toxic algal blooms.

(Dr. Sandra E. Shumway is with the Maine Department of Marine Resources and the Bigelow Laboratory for Ocean Sciences, West Boothbay Harbor, Maine 04575 USA. This article is from her presentation at the mussel culture symposium at Aquaculture '89, Los Angeles, CA, February 1989. A comprehensive scientific review of the subject, complete with citations to the relevant literature, will be published in the Journal of the World Aquaculture Society.)

Mr. MURKOWSKI. I see the majority leader is on the floor. I yield to him at this time, and I believe I will have the opportunity to finish my statement at the conclusion of his remarks. I yield to the majority leader.

Mr. MITCHELL. I thank my colleague.

The PRESIDING OFFICER. The majority leader.

UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, following consultation with Senator HOLLINGS, Senator LEAHY, Senator STEVENS, and others interested in this matter, and having cleared this with Senator DOLE, the distinguished Republican leader, I now ask unanimous consent that the majority leader, after consultation with the Republican leader, may at any time proceed, not-

withstanding the provisions of rule XXII, to the consideration of a bill to be introduced by the majority leader and placed on the calendar on Thursday, July 26, regarding fish inspection, and that the measure be considered under the following limitations: That there be 2 hours for debate on the bill; that the only amendment in order to the bill be a Hollings-Kennedy substitute amendment to be under a 2-hour time limitation as well; that no other amendments be in order; no motion to commit be in order; that the time be equally divided in the usual form; that upon the use or yielding back of time on the amendment and the bill, the Senate proceed to vote without any intervening action or debate on or in relation to the Hollings-Kennedy substitute amendment; that upon disposition of the Hollings-Kennedy substitute amendment, the Senate proceed to vote without any intervening action or debate on the Mitchell bill as amended, if amended; provided further that the Hollings-Kennedy amendment be printed in the RECORD of Friday, July 27, in order to be eligible to be offered.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the majority leader?

Mr. STEVENS. Mr. President, reserving the right to object, and I shall not object, it was my understanding that the majority leader was to introduce his bill and put it in the RECORD on Friday, July 27.

Mr. MITCHELL. It was originally that form, but at the request of Senator HOLLINGS we agreed to move it up to Thursday, July 26, to give Senator HOLLINGS a chance then to review it and then offer his substitute on the following day.

Mr. STEVENS. I still have pride in authorship. I thought I was going to be a cosponsor of this amendment, too.

Mr. MITCHELL. I apologize. I ask unanimous consent where I used the word Hollings-Kennedy that it be Hollings-Stevens-Kennedy.

The PRESIDING OFFICER. Without objection, that correction will be made in the RECORD.

Is there objection to the request of the majority leader? Without objection, it is so ordered.

The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I thank the majority leader. I think this really resolves a major problem and we can debate the matter of the seafood inspection on its merits alone.

I thank him for his leadership and cooperation.

Mr. STEVENS. Mr. President, I join in that comment of the Senator from South Carolina. I think this is a very good solution so we may get on with the agriculture bill.

I assume that this means that the leaders will take down this amendment in a few minutes so we can proceed with the agriculture bill.

My colleague was making his remarks. I would like to finish what I was saying just before. I do not know how long the Senator from Alaska wishes to speak.

Mr. MURKOWSKI. May I make an inquiry. My understanding is the majority leader is basically pulling down the seafood inspection from the agriculture bill.

Mr. MITCHELL. That is correct. Under this agreement, it will be done separately. That is the purpose of this amendment.

Might I add to my unanimous-consent request a standard provision that no budget point of order be waived. That is at the request of the Budget Committee.

The PRESIDING OFFICER. Is there any objection to the addendum to the unanimous consent? Is there objection to the request of the majority leader?

Without objection, it is so ordered.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that I be named a cosponsor of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Vermont.

Mr. LEAHY. Mr. President, I do not want to cut off anybody who wants to speak. I obviously will not.

Can I urge my colleagues, as much as I have been enchanted and thrilled by their debate and discussion on fisheries, if we are not going to have this amendment before us, maybe they might want, for the sake of posterity, to put the remainder of the remarks in the RECORD and get back to the farm bill, which after all is the main reason we are going to be here.

Once we get on it, we will be finished. If we talk about something else, it is an hour later, and we are going to be here in the wee hours of night.

The PRESIDING OFFICER. The senior Senator from Alaska.

Mr. STEVENS. Mr. President, I yield the floor.

The PRESIDING OFFICER. The senior Senator yields the floor.

The majority leader.

Mr. MITCHELL. Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn by the majority leader.

The amendment (No. 2356) was withdrawn.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I thank the floor manager and the majority leader and my senior colleague for recognizing that if you put fishing and traditional agriculture in bed together, they make very strange bedfellows. Indeed, we need to address these issues in far greater detail before we can agree on a union. So I do appreciate my colleagues' willingness to recognize the concern that has been expressed by the Alaskan delegation and others.

The PRESIDING OFFICER. The manager of the bill, the Senator from Vermont.

Mr. LEAHY. Mr. President, I appreciate my distinguished colleagues from Alaska for their brevity. I will, of course, look forward tomorrow with eagerness to reading their remarks in the RECORD.

Mr. President, I do not intend to address all the points raised by Senator HOLLINGS earlier today regarding Senator MITCHELL's amendment on fish inspection.

Senator MITCHELL has acted with the highest integrity in the process and insisted we try to work everything out.

Senator MITCHELL wanted all affected committees to work together to try to craft the best seafood protection bill possible.

He instructed his staff to set up meetings very early this year with my committee, the Commerce Committee, the Labor Committee and the Environment and Public Works Committee.

All affected agencies were invited to make presentations at a series of meetings with Senator MITCHELL's staff. FDA, the Commerce Department, industry representatives, the Interstate Shellfish Sanitation Conference, public interest groups all were invited to meetings.

The majority leader did all he could to work this out. We gave sequential referral, after discussing S. 1245 with the majority leader, to the Commerce Committee so they could address their concerns.

They made no changes to S. 1245.

The majority leader has acted with the highest integrity in this process. He has worked out a 2-hour time agreement to address the fish inspection issue outside the context of the farm bill.

I need to clear up a few other matters.

Senator HOLLINGS had printed in the RECORD letters in support of his bill S. 2228.

To balance that, I would like to similarly have printed in the RECORD several letters of support regarding Senator MITCHELL's amendment to the farm bill—S. 1245—the Fish Safety Act.

A letter dated July 19, 1990, from the National Fisheries Institute, the largest trade organization representing the fish industry. The National Fisheries Institute represents almost 1,000 seafood firms and 40 seafood trade organizations and support S. 1245.

A July 24 letter of support for S. 1245 from the Shellfish Institute of North America. That Shellfish Insti-

tute represents firms involved in all aspects of the U.S. shellfish industry.

A July 14 letter from the North Carolina Fisheries Association explaining that "consumer confidence in the commercial fishing industry and its products is vital if we are to grow or even survive." They support the Mitchell amendment.

A July 16 letter from the Wisconsin Commercial Fisheries surrounding the amendment of Senator MITCHELL.

A July 24, 1990, letter from Public Voice for Food and Health Policy supporting Senator MITCHELL's amendment.

The Boston Fisheries Association states that S. 1245 "seems to represent the most sensible way to achieve this important legislative goal and we respectfully urge you to press forward with it."

The board of directors of the Virginia Seafood Council voted unanimously to support the Mitchell amendment in the Senate. An October 17, 1989, letter.

Mr. President, I ask unanimous consent to have printed in the RECORD the letters to which I have referred.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

NATIONAL FISHERIES INSTITUTE, INC.,
Arlington, VA, July 19, 1990.

THE NATIONAL FISHERIES INSTITUTE URGES YOUR SUPPORT FOR SEAFOOD INSPECTION LEGISLATION

DEAR SENATOR: Seafood inspection's time has come. Consumers and industry strongly support such legislation. We urge you to vote for the proposal to establish a seafood inspection program in the U.S. Department of Agriculture (USDA). We expect this proposal (S. 1245) to be offered by Senator Mitchell for inclusion in the Farm Bill.

The National Fisheries Institute is made up of almost 1,000 firms engaged in all aspects of the U.S. seafood industry, including vessel operators, processors, importers, distributors, brokers, restaurants and retail chains. Growing seafood consumption, environmental concerns, and international trade requirements dictate action for the public good. We respectfully request your support for S. 1245.

Sincerely yours,

LEE J. WEDDIG,
Executive Vice President.

SHELLFISH INSTITUTE OF NORTH AMERICA,
Arlington, VA, July 24, 1990.

Hon. GEORGE MITCHELL,
U.S. Senate, Washington, DC.

DEAR SENATOR MITCHELL: Consumers and industry strongly support seafood inspection legislation. We urge you to vote for the proposal to establish a program in the U.S. Department of Agriculture (S. 1245) to be offered by Senator Mitchell for inclusion in the Farm Bill.

The Shellfish Institute of North America is made up of firms engaged in all aspects of the U.S. shellfish industry, including vessel operators, processors and distributors. We respectfully request your support for S. 1245.

Sincerely yours,

ROY E. MARTIN,
Executive Director, Science and Technology.

N.C. FISHERIES ASSOCIATION, INC.,
New Bern, NC, July 14, 1990.

Hon. GEORGE MITCHELL,
U.S. Senate, Washington, DC.

DEAR SENATOR MITCHELL: We appreciate your efforts as a leader in the efforts to obtain legislation for the inspection of seafood. Consumer confidence in the commercial fishing industry and its products is vital if we are to grow or even survive.

We encourage you to press ahead with S-1245. In our view, S-1245 will adequately address the concerns of seafood consumers.

Yours truly,

JERRY SCHILL,
Executive Director.

WISCONSIN COMMERCIAL FISHERIES,
Madison, WI, July 16, 1990.

Hon. GEORGE MITCHELL,
U.S. Senate, Senate Office Building, Washington, DC.

DEAR SENATOR MITCHELL: All of us in Wisconsin greatly appreciate your leadership in the Senate to obtain legislation for the inspection of fish and seafood. Obtaining a good program this year is vitally important to consumers and our industry.

That is why we urge you to continue moving S.1245 forward. We firmly believe that S.1245 will successfully institute the reforms that both consumers and the industry need.

Sincerely yours,

GARY R. GOYKE,
Legislative Liaison, Wisconsin Commercial Fisheries.

PUBLIC VOICE FOR FOOD AND HEALTH POLICY,
Washington, DC, July 24, 1990.

DEAR SENATOR: As you know, an amendment to the Farm Bill incorporating S. 1245, the "Fish Safety Act of 1990," will be offered by Senators Mitchell, Cochran, Leahy, and Lugar. On July 18, Public Voice wrote to all Senate members, urging positive action on S. 1245 with the addition of a strong whistleblower provision.

Recently, you received a letter from Commerce Committee members opposing S. 1245, based on the issue of which Federal agency or agencies should be given jurisdiction over the seafood safety program. We want to stress that the discussion of a federal seafood safety program should not be reduced to a jurisdictional dispute but instead should center on the best way to close this serious gap in our Federal food safety system.

S. 1245, with the addition of a strong employee protection provision, contains most of the elements needed for an effective public health protection program. While we commend the Commerce Committee for acting on legislation (S. 2228) to create a seafood inspection program, there are a number of areas where the Commerce Committee bill falls far short of S. 1245 in providing needed consumer protections.

1. Clear lines of agency responsibility and accountability are needed: The lines of responsibility for almost all aspects of the program in S. 2228 are blurred between the Commerce Department and the Food and Drug Administration, carrying an enormous potential for failure of the program. A complex food safety program which fails to clearly divide responsibility between the Federal agencies involved will be detrimental to consumers and industry alike.

S. 1245 clearly assigns responsibility for the separate aspects of the program, using the strengths of the three relevant agencies: FDA to set contaminant limits, USDA to carry out inspection and product sampling, and the Commerce Department to monitor growing and harvesting waters.

2. Jurisdiction over actual inspection: We disagree with the Committee's decision to entrust the actual inspection of fish to the Department of Commerce, an agency whose primary mission is to promote marketing, rather than to protect the public health. In fact, the Commerce Department's current inspection service is voluntary and includes "grading" of fish products for purely marketing purposes. The program in S. 2228 continues this service in order "to promote commerce in fish . . ." [Sec. 5(a)(3)(C)].

Public health safeguards should be the first and only purpose of this legislation. For that reason, we think that assigning inspection responsibility to USDA, as does S. 1245, is a better choice. USDA is better positioned to expand its inspection efforts to cover fish because of its demonstrated capacity to conduct meat and poultry inspections, and its extensive domestic and international infrastructure of inspectors, laboratories and offices.

3. State programs to replace Federal inspection program: S. 2228 would allow approved state inspection programs to replace the Federal program for fish in interstate commerce. This is a serious problem since a state's law may be weaker in some ways than the Federal law. S. 2228 requires that an approved state program ensure fish meet or exceed Federal standards for contaminants and harvesting areas; however, they need to have a program only comparable to Federal registration, inspection and monitoring requirements.

States should be authorized to implement the Federal program at a minimum, as is required by S. 1245.

4. Timeframes needed: a. FDA should have a tight timeline it must meet to set initial standards for contaminants in fish, as is required by S. 1245. S. 2228 provides no deadline at all for FDA's initial standards. The current failure of FDA to set more than one tolerance level for fish has been a problem under present law.

b. Commerce should also have a tight timeline to meet in issuing its processing, storage, handling, and other regulations under the program, as is required by S. 1245.

5. Inspection of imports: Imports make up about two-thirds of the fish products consummed in the U.S. They should come in for the same scrutiny as domestic products. S. 2228 does not require FDA or the Commerce Department to conduct inspections in foreign plants. Under S. 1245, a foreign nation must have its inspection program certified by USDA and must allow USDA officials to inspect their plants and products in order to export to the United States.

6. Emergency detention of fish likely to be adulterated: S. 2228 is missing any provision which would allow the inspector to immediately act to detain fish to prevent an unsanitary plant from continuing to market fish which are likely to be adulterated. The bill does not provide for this or other emergency powers that may be needed pending the outcome of a hearing. Such provisions, included in S. 1245, would be important deter-

rents against violations and should be included in legislation.

7. Waters: Under S. 2228, the Department of Commerce appears to have been given authority to set water quality standards. This authority should remain with the EPA. S. 1245 does not remove EPA's authority over water quality.

Because of our serious concerns about the shortcomings of S. 2228, Public Voice cannot recommend that you support this measure. S. 2228 is not an acceptable alternative to S. 1245 with whistleblower protection added.

Sincerely,

ELLEN HASS,
Executive Director.

BOSTON FISHERIES ASSOCIATION, INC.,
Boston, MA, July 13, 1990.

Hon. GEORGE MITCHELL,
U.S. Senate, Washington, DC.

DEAR SENATOR MITCHELL: This is to thank you for your efforts to secure a mandatory seafood inspection program which will protect the interests of consumers while furthering our industry.

S. 1245 seems to represent the most sensible way to achieve this important legislative goal and we respectfully urge you to press forward with it.

Thank you for your continued support for the fishing industry in New England.

Sincerely,

MICHAEL VITALE,
President.

VIRGINIA SEAFOOD COUNCIL,
Newport News, VA, October 17, 1989.

The Virginia Seafood Council, a trade association representing seafood processors, packers, planters and harvesters in the Commonwealth of Virginia, supports Senate Bill No. 1245 titled "Federal Fish Inspection Act".

The Board of Directors and membership of the Council, at its regular quarterly meeting on October 10, 1989, voted unanimously to support the Mitchell bill in the United States Senate. This Council has been discussing federal seafood inspection programs for many years. The Council reiterates its endorsement of the Hazard Analysis Critical Control Point method of seafood inspection.

We understand that under Senate Bill No. 1245 the administration of such inspection will be developed and carried out in accordance with HACCP. We further understand that Bill 1245 provides for training and funding of inspection officers. We strongly urge the appointment of an Undersecretary of Seafood in the structure of the Department of Agriculture and encourage that undersecretary to develop a strong working relationship with individual States.

FRANCES W. PORTER,
Executive Director.

Mr. LEAHY. Mr. President, I need to point out that Senator MITCHELL invited staff from several committees to work together in January, February, and March of this year to try to work out a comprehensive bill. Staff of Senator HOLLINGS attended some of these meetings, and several other meetings with my staff and staff of the majority leader.

Earlier today, Senator HOLLINGS attacked the USDA meat and poultry inspection program. The points are not relevant.

I could read from reports severely criticizing the Commerce Department's management of our coastal fisheries. We could also cite reports about FDA. We are all aware of the GAO report stating that FDA cannot now carry out its responsibilities.

This should not come down to a "my inspectors versus your inspectors debate."

I made it clear in my remarks that the inspection program in the Mitchell bill is not based on the USDA continuous inspection program which Senator HOLLINGS criticized. A visual inspection program, which is used for meat and poultry, is not appropriate for fish inspection.

The Mitchell bill is based on the National Residue Program operated by USDA. Under that program thousands of samples of meat and poultry are taken and subjected to millions of tests for harmful chemicals.

It is also based on a cost-efficient procedures to inspect processors on a random basis, or as needed, to make seafood safer. It does not call for a continuous inspection program.

I will not do that.

The Environmental Protection Agency has issued a major report on the contamination of our coastal waters entitled "Assessing Human Health Risks from Chemically Contaminated Fish and Shellfish."

I could read into the record other reports on the contamination of our fisheries and the depletion of our marine resources. I will not do that now.

The National Fish and Wildlife Foundation has issued a 300-page critical report of the National Marine Fisheries Service.

I could direct the Senate's attention to recent congressional reports and committee testimony on the sad state of our marine and coastal fisheries.

I do not think that is useful to quote from these reports. We would end up in an endless debate.

I want to look forward. I agree with the majority leader that we should have an opportunity to present our case to the Senate—as should Senator HOLLINGS and supporters of S. 2228—and then let the Senate decide.

I am not afraid of a vote.

I want to emphasize, S. 1245 is carefully drafted to not give USDA jurisdiction over marine fisheries. The Commerce Committee has that jurisdiction.

I do not want to have an endless "surf and turf" battle—lets debate the issues, and vote.

Mr. BOSCHWITZ. Mr. President, I rise today as a cosponsor of this amendment to establish a mandatory Federal fish inspection program.

Last year I was an original cosponsor of similar legislation (S. 1245) introduced by Majority Leader GEORGE MITCHELL, and am pleased that the full Senate is now considering this important measure.

This amendment makes the Department of Agriculture [USDA] the lead agency for fish inspection, but the Food and Drug Administration [FDA] and the National Oceanic and Atmospheric Administration [NOAA] will also play important roles. USDA will conduct the inspections, FDA will set standards, and NOAA will retain jurisdiction over growing and harvesting waters. USDA has expertise in this area since it now has responsibility for meat and poultry inspection. Indeed, fish is the only form of meat that is not now inspected by USDA.

I believe that it is in the best interest of American consumers and the fishing industry to make fish inspection mandatory rather than voluntary. The current voluntary system reaches a small amount of the fish consumed in our country.

Fish has become an important component of the diet of Americans. At the same time, American consumers have become more aware of food safety issues. The time is right to enact a mandatory program like this. This amendment benefits the American consumer as well as the fishing industry.

Again, I commend my colleagues for their hard work on fish inspection legislation. I urge the adoption of this amendment.

ORDER OF PROCEDURE

Mr. LEAHY. Mr. President, I understand we are not quite ready to go to third reading. We still have the Conrad amendment to deal with.

The distinguished Senator from Vermont I know is here. I would suggest, Mr. President, if I could have the attention of my colleagues, a number of Senators have been asking what will be the schedule tonight. Ideally, we will try to finish tonight. I already made changes in my own plans not only for this weekend but for the first week of the recess to clear the decks on both those areas in case we have not finished the farm bill, because obviously if we do not finish it tonight very near to midnight, then we will be in for several more days on it.

I assume that would knock out the recess or the first week of it. I say that because those who have amendments, please bring them over. We will try to dspose of them. But I intend once there are no amendments pending here to move for third reading.

I know the distinguished Senator from Vermont, Senator JEFFORDS, has an amendment and is prepared to go forward. I would assume that we would do that and then we would go to the amendment which is pending from Monday, with 20 minutes remaining on it, of the distinguished Senator from North Dakota.

I mention that not trying to lock anything in, but just to give Senators some idea of the schedule.

And having said that, I yield to my good friend and colleague, the Senator from Vermont.

The PRESIDING OFFICER. The Senator from Vermont is recognized.

AMENDMENT NO. 2357

(Purpose: To modify the prohibition on a milk production termination program)

Mr. JEFFORDS. Mr. President, I have an amendment at the desk dealing with page 28, line 11, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Vermont [Mr. JEFFORDS], proposes an amendment numbered 2357.

On page 28, line 11, after "export", insert the following: "(other than the export of live dairy cattle)".

Mr. JEFFORDS. Mr. President, I am very pleased to announce to this body, I had intended to offer an amendment and discussed it at length yesterday. However, in consultations with Senator BAUCUS, whose committee amendment I was going to amend, and after discussions with the dairy people and with the cattlemen, we came up with a solution to a very longstanding problem. This problem has gone on for some 5 years now. Now we can look to a program which might help us in the future with dairy surpluses, and yet will not in any way adversely affect the beef industry.

What we are excited about is recognizing that for instance in Eastern Europe, the Soviet Union, and all other places, there is a need for good, healthy dairy cows. Why slaughter them? Why not send them overseas and allow them to help the people of those countries which are having difficulty producing food. So it leaves a number of options open to us by exporting rather than slaughtering?

With that, I am pleased to say I think we have an excellent solution to longstanding problems. It has been cleared by both sides of the aisle. I would also like to note that it conforms with my comments yesterday before this body. The Dairy Termination Program established in 1985, reduced milk surpluses, saved the taxpayers $2.4 billion in CCC purchases and increased dairy farm income. This amendment will allow the Secretary of Agriculture to have the option of exporting live dairy cattle as part of a dairy termination program. It will give him the option of taking cattle from regions where milk surpluses exist and to buy dairy heifers as well. Any program of this type would have to be paid for by assessments from the dairy industry. More importantly it will not adversely affect the beef industry. As you will recall we exported about 65,000 of dairy cattle in 1986 as part of the DTP. This amendment will help to move dairy cattle to countries needing more dairy production. At the same time it has helped to heal a longstanding difference between the dairy and beef industry. It is a good solution.

I ask for a vote.

The PRESIDING OFFICER. Is there further discussions on the amendment by the distinguished Senator from Vermont?

If not, the question is on agreeing to the amendment.

The amendment (No. 2357) was agreed to.

Mr. JEFFORDS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

The PRESIDING OFFICER. Without objection, the motion to lay on the table is agreed to.

AMENDMENT NO. 2358

(Purpose: To modify the findings of the dairy title)

Mr. JEFFORDS. Mr. President, I have another amendment at the desk that deals with page 18, line 24, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Vermont [Mr. JEFFORDS] proposes an amendment numbered 2358.

Mr. JEFFORDS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

The amendment is as follows:

On page 18, line 20, strike "and".

On page 18, line 24, stike the period and insert a semicolon.

On page 18, after line 24, insert the following:

(7) dairy policy should protect against widely fluctuating consumer prices and producer income;

(8) it is the interest of the United States to have wholesome dairy products available for domestic and international nutrition programs;

(9) a properly functioning dairy program should result in a balanced purchase of dairy products so that the products are available to carry out the nutrition programs; and

(10) the Federal dairy program should encourage greater protein production in milk and discourage additional butterfat production through the use of incentives and disincentives.

Mr. JEFFORDS. Mr. President, the purpose of this amendment, which has also been agreed to by both sides, is to make sure we clearly state in the farm bill what the purpose and functions of the dairy program are. Sometimes, under the pressures of budget problems, we tend to forget why we have it. The basic purpose of the amendment is to provide a balancing wheel to prevent against widely fluctuating producer income. Then it goes on to indicate the importance of ensuring that we have protein instead of butterfat and the importance of excess protein being available to school lunch programs, et cetera.

I ask for the adoption of the amendment.

The PRESIDING OFFICER. Is there any further discussion on the amendment offered by the Senator from Vermont?

Mr. LEAHY. Mr. President, I compliment my colleague. The amendment is perfectly acceptable on this side, as was the other one, and I urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Vermont, Mr. JEFFORDS.

The amendment (No. 2358) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JEFFORDS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEAHY. Mr. President, I wish to compliment my colleague from Vermont, Senator JEFFORDS, who has shown the usual Vermont way, few words but effective. He has gotten his amendments quickly through. As a result, some of those who may be finishing up supper and planning to come later with their amendments should be forewarned that the bill is now open once again for amendment and, if they have amendments, they should come tonight because, at this pace, we could well finish tonight, and I would not want anybody to be accidentally or otherwise precluded.

I yield to my colleague from Vermont.

Mr. JEFFORDS. I appreciate the Senator's yielding to me.

There are some people worrying and stirring about that I may offer another amendment. I had considered offering an amendment to reduce the trigger price from 7 to 6 billion pounds of milk, because I feel it would help save money. On the other hand, at this late time, I do not feel it would be appropriate to do that. The House adopted such an amendment this afternoon. I would urge the conferees to seriously consider adopting that lower trigger, which I think would be very helpful and could save considerable sums of money and anguish on the part of dairy farmers.

I appreciate the Senator from Vermont, my good senior Senator, yielding, and I appreciate his kind words. I also want to compliment him on the excellent job he has done protecting Vermont and the dairy industry, but, most importantly, for moving this bill along expeditiously. It could well have gone on for 2 months instead of the number of days we have had, which in

themselves seem long. But it has provided an excellent opportunity for people to be heard. I think the end result is one that we are going to be proud of.

Mr. LEAHY. Mr. President, I thank my colleague and good friend, Senator JEFFORDS. Sometimes these days feel like a year as we go along. A number of Senators have worked very hard to craft what I think is a very good bill. Senator JEFFORDS, of course, is one of the leading voices in agriculture matters, he was in the House and is in the Senate. We have worked closely together on this. I hope now that we are close to finishing.

I see my friend from Pennsylvania here so I will not hold the floor at all if he is seeking recognition.

Mr. HEINZ. Mr. President, I do seek recognition.

The PRESIDING OFFICER. The distinguished senior Senator from Pennsylvania is recognized.

AMENDMENT NO. 2359

(Purpose: To provide for the application of en route or delivery tolerances to all commodities inspected for import prohibition purposes)

Mr. HEINZ. Mr. President, in a minute, just as soon as the Xerox machine does its job, I will send an amendment to the desk, and I might just take a moment to explain the amendment.

The amendment changes section 8(e) of the United States Code with the object of ensuring that when the U.S. Department of Agriculture inspects foreign and domestic commodities for quality, that it would apply comparable inspection standards to both.

Mr. President, the amendment having arrived, I send it to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania [Mr. HEINZ], for himself, Mr. BRADLEY, Mr. ROTH, Mr. SPECTER, Mr. BIDEN, and Mr. LAUTENBERG, proposes an amendment numbered 2359.

On page 924, line 15, insert "(a) IN GENERAL.—" before "The first".

On page 924, between lines 19 and 20 insert the following new subsection:

(b) TOLERANCES.—Section 8e(a) of such Act (7 U.S.C. 608e-1(a)) is amended by adding at the end thereof the following new sentences:

"In carrying out inspections pursuant to a marketing order in the United States or foreign countries, all such inspections shall apply en route or delivery tolerances to all commodities, domestic or foreign, when such inspections are performed at any site in the United States other than a shipping point. For purposes of this subsection, the term 'shipping point' means, with respect to domestic and foreign commodities, the point of origin of the shipment in the producing area or at a port of loading for ship stores. All inspections under this paragraph shall be paid for by the shipper on a user fee basis."

Mr. HEINZ. Mr. President, I allowed the clerk to do something that is becoming increasingly unusual in this Chamber and that is to read an amendment so people who are listening, as I hope people are because there are very few people in the Chamber as we speak, will be informed as to the substance of the amendment, it was brief; and, second, because other amendments dealing with marketing orders have been discussed, have been rumored, and I wanted everybody to know very clearly what this amendment is about. It is not about striking any marketing orders. It is not about stationing inspectors in other countries.

The sum and substance of it is to say that when produce arrives from a distant point and is inspected as it is about to go from port to market, as many products, say, in the biggest city in my State, Philadelphia, when grapes from Chile or other products come into the Port of Philadelphia, they are inspected at that point, as they should be. They are disembarked and they are shipped to very proximate markets: New York, Washington, DC, Baltimore, Philadelphia. They travel a very short distance, but they have traveled a very long distance in order to arrive in Philadelphia.

By the same token, if a domestic producer of grapes, from California, for example, ships grapes, they are inspected but they are not inspected when they get to Philadelphia on the train or the truck. They are inspected back in California in the fields, in the San Joaquin or Sacramento Valleys just as they are being picked or processed getting ready for the box.

And that is fine. I do not intend to change that.

Grapes is not a bad example because they travel this long distance across the United States. Some will actually come to Philadelphia before they move on to other destinations.

So what we have is an inspection, in this case of California table grapes, that may take place 3,000 miles and perhaps a week or 2 or 3 before the produce is actually delivered to the supermarket that sells it to the consumer.

Similarly, the same length of time may elapse between the time produce is picked in Chile and shipped directly up by boat to Philadelphia. But while that time has elapsed—it might be a week, it might be 2 weeks—it is only after the passage of that time that the product is inspected.

What this amendment says is that there should be a sufficient allowance to take that difference in timing of inspection into account. So, if you will excuse the expression, you are comparing apples to apples and grapes to grapes, in a comparable fashion.

This amendment has, I also believe, a greater significance because just a month ago President Bush announced, as you may recall, the "Enterprise for Americas" initiative. That is an initiative which is intended to create, and I quote the President:

• • • incentives to reinforce Latin America's growing recognition that free market reform is the key to sustained growth and political stability.

We all have a great interest in all of Latin America being free and being stable and also achieving sustainable growth. A essential element of that initiative is designed to expand trade by ultimately creating a hemispherewide free trade zone.

In announcing that initiative, the President stated that:

The great economic lesson of this century is that protectionism still stifles progress, and free markets breed prosperity.

How right he is.

This Senator believes it is highly ironic that while the administration is quite properly and aggressively pursuing open markets with our trading partners in Latin and South America, we are, in one particular provision of the farm bill before us, considering a proposal that would further restrict market access of Latin and South American countries to the United States' market.

Specifically, I am referring to the provision in the bill that would extend domestic marketing orders to imported kiwi fruit, nectarines, and plums. That is a provision which will have serious economic consequences, not only for the foreign producers of those three commodities, but also for U.S. ports, among them Philadelphia. It will have not only an impact on ports like Philadelphia but on the workers, the shippers, and the carriers who depend on foreign produce. Most important, if the provision in the bill remains without any modification such as I have proposed, it will cost the consumer, and cost the consumer plenty, both in terms of higher prices and in the availability of produce at many times of the year.

There will be less fruit available. I will come back and explain why in a minute. But the bottom line is, if you like having many of the fruits that we take for granted during the winter months, I urge my colleagues, on behalf of their consumers, to support this amendment.

I know the Chair is probably quite familiar with marketing orders. I do not know if all our colleagues are. Essentially, domestic marketing orders control the production, sale, and marketing of agricultural produce. And those supporting the extension of marketing orders to imported produce, which is grown during opposite sea-

sons from ours—it is very important to realize the difference in hemispheric production—claim their purpose in doing so is simply to ensure that imported produce meets the same quality standards as domestic fruit.

The principle is fine. I have no disagreement with the principle at all. Foreign produce should have to meet our standards. But I have very strong concerns and reservations regarding the application of that principle the way it will be applied in this provision, because an extension of the domestic marketing order to imported kiwi, plums or nectarines, must be carefully circumscribed to assure it does not become a trade barrier.

Foreign suppliers—and I will have printed in the RECORD at the appropriate point a letter from the Chilean Government—are indeed rightly apprehensive about domestic marketing orders being used to establish discriminatory inspection standards in violation of the GATT standards code.

I know the ranking member of the Committee on Agriculture has placed in this bill a provision that says if anything here violates the GATT, it should be dropped. That is good and I salute him for doing so. But I spent a good part of the morning, as did some of my Finance Committee colleagues, with U.S. Special Trade Representative Carla Hills, discussing the functioning of the GATT. The most notable reason we did that is because the GATT does not function very well.

When there is a trade distorting practice and you go to the GATT, you may get, and then again you may not get, a report on it 2 or 3 years later. We all know what happens around here after 6 months, let alone 2 or 3 years. A lot can change.

While I think, again, what Senator LUGAR did is correct, as a practical matter, given the way the GATT functions, which is slowly if at all, it will not have much practical effect unless a miracle takes place in the Uruguay round, and that looks increasingly unlikely.

Nevertheless, notwithstanding the inability currently of the GATT to function, we are signatories to the GATT standards code. We are obliged to afford imported fruit the same treatment as domestic fruit. The way we go about it, it is highly questionable that we do that. My point is we do not.

The negative impact on imports is the result of inequities in the process by which marketing orders are established and administered. Marketing order inspection standards discriminate against imported fruit because they apply different definitions for shipping point for domestic and imported fruit.

For domestic points, as I explained briefly at the outset, it is the point of origin for the shipment in the producing area in the United States or at the point of loading for overseas shipment. That is where we inspect U.S. domestic produce. In other words an inspector practically inspects the fruit while it is in the field. Domestic fruit bound for export is inspected at the U.S. port before departure.

To think about it most simply, U.S. fruit is inspected for quality, for grading, for fitness when it is very close to being its freshest. Obviously that cannot be the case for imported fruit. It is on its way into our country. It has been picked earlier. It has been shipped in. It is not inspected in the field. It is not inspected at the processing station. It is not inspected at the port of departure. It is inspected at the point of entry into the United States, a point, frankly, that is usually very close to the market where it will be purchased and consumed.

In other words, foreign fruit is inspected for quality, for grade, for fitness after being subjected to what could be a very long and possibly bruising shipment. And that is why foreign producers inevitably ship to non-U.S. markets when marketing orders are in effect.

Now, let me take a moment to explain that. If you are shipping a whole boatload of plums or nectarines or grapes and you have two possible markets for them, and one has a very high standard of inspection, that basically applies to fruit when that is being picked in the field, and your fruit is taking a 7- or 10-day journey through the Panama Canal, you might not be up to that very high standard which is applied to fruit in the field that still comes 3,000 miles across the United States in a bumpy old truck.

So you are not going to take the chance and you will send your grapes or nectarines or plums to Europe, or you will send them to Canada. But you will not take the chance of sending them to the United States if that kind of marketing order is in effect.

The purpose of my amendment is to allow for the differences in timing in place of inspection so that we still have inspection, and it is still stringent, and it is still strong, but it does not impose an unrealistically high standard. It imposes only a comparable standard on like products.

It is also true, Mr. President, that in the final analysis, once we get past a certain threshold that the best judge of quality is not necessarily an inspector working for Uncle Sam. It is your Aunt Sophie and my Aunt Sophie. Aunt Sophie is not about to buy bruised plums, nor is the retailer who stocks that fruit.

We should let the marketplace be the ultimate judge of the fine points of quality for imports, just as we do with the domestic industry.

Mr. President, I would like to point out as well that this contradiction that I have discussed has some very real domestic ramifications as well. Domestic fruit being sold in the U.S. market is inspected, as I said, at the shipping point for tolerances fresh from west coast fields. It is shipped east and it is rarely reinspected. Why should domestic fruit have a lesser standard at the point of delivery than imported fruit? Indeed, while that is what is happening, that should not be the case.

So my amendment requires imported fruit to be inspected under the same or comparable standards that U.S. fruit is. Fair is fair, and this is fair.

I believe it will help ensure year-round availability of fruit for the grocer and consumer. We are going to be much more consistent with the GATT. We will retain the marketing order provision so that there is no concern that we are going to strike that. We simply want to ensure that foreign commodities are on a level playing field with domestic ones; not a tilted field.

When Congress passed legislation allowing domestic marketing orders to be applied to imported table grapes, we took note of the fact that Federal inspections could impede imports. Let me just say that I had hoped that might not be the case, but it has turned out to be the case. Federal inspections has impeded trade.

Once those table grape marketing orders took effect, shipment through our ports virtually ceased, and they ceased because Chilean exporters prefer to ship to other markets without marketing orders. I guess I do not blame them, because who in their right mind would risk hundreds of thousands of dollars of produce against the possibility that some Federal inspector might decide there were too many blemishes per bunch of grapes.

In conclusion, Mr. President, I want to repeat what I said before and to make clear to those who are listening, this amendment will not have any effect on the marketing and sale of domestic fruit. They will continue to have the kind of reasonable and responsible protection that they now have. It will, however, assure that we have a level playing field. Obviously, we will never had any success in insisting that other companies open their markets while we hide behind arcane domestic programs that effectively bar imports from their markets to ours.

Mr. President, I do urge my colleagues to support this amendment and ensure that their constituents continue their ability to buy fruit year round.

Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMON. Mr. President, section 1721 of the Senate farm bill extends the domestic marketing order that dictates quality conditions—for production, marketing and sale of domestic produce—to be applied to imported kiwi, plums, and nectarines. Imports failing to meet the conditions are barred from entering the United States.

Unless amended, this provision will establish discriminatory standards for domestic and imported fruit. Domestic fruit is inspected and graded right after harvest and before it is trucked to delivery points. Imported fruit is subject to the same shipping point standards after transport, when it arrives at the delivery point.

The fact that imported fruit is inspected and graded much later in the commercial chain than domestic fruit puts imported produce at a disadvantage compared to domestic produce. The resulting inequity is inconsistent with our obligations as signatories to the GATT standards code which requires us to treat imports the same as domestically produced products.

Ninety-one percent of the Delaware River Ports' Chilean and New Zealand produce will now be subject to marketing orders. Unless amended, section 1721 will force foreign suppliers to seek alternative markets.

Loss of this trade could cost the Delaware River Ports $174 million annually in indirect and direct benefits and jeopardize 10,000 jobs in this region.

Loss of trade will negatively affect consumers since it will create an artificial scarcity resulting in higher prices for the produce available.

This is not a new problem. The ports have experienced serious economic loss as the result of extension of domestic marketing orders to imported table grapes.

The intent of section 1721 can be maintained without jeopardizing jobs and economic growth and without costing American consumers more of their grocery dollars.

The equitable solution is to allow fruit destined for U.S. markets and subject to domestic marketing orders to be inspected: First, against the stringent shipping point standards before it leaves the country of origin; or second, against delivery point standards upon arrival in the United States. Such a solution would put imported produce on an equal basis with domestic fruit. It would ensure quality control without loss of business at U.S. ports and without prohibitive consumer costs.

Chilean exporters have stated their interest in such a program and have agreed to undertake all costs. Similar programs already exist in Mexico and Canada. Establishment of such a pilot program is an appropriate and responsible way to ensure that the concerns of domestic growers, importers, port workers and consumers are adequately addressed.

Mr. LAUTENBERG. Mr. President, I rise in support of the Heinz amendment, of which I am a cosponsor.

Mr. President, this amendment has important implications for both international trade policy and the economic well being of the Delaware River Valley.

It is particularly important because of provisions in this bill that would extend the domestic marketing order for kiwi, plums, and nectarines to imported fruit.

Taken at face value, Mr. President, that provision looks fairly innocent. Supporters of the provision tell us it is necessary to ensure that consumers get the same high quality in imported fruit that they get in domestic fruit covered by the domestic marketing order. They say that it should not affect the availability of imported fruit. They tell us that so long as the imported product meets the domestic standards, there should be no problem.

Mr. President, I can assure my colleagues that this is not the case.

Many of you will recall that in 1987, I rose to speak against another amendment concerning marketing orders and imported fruit. Three years ago, the issue was table grapes.

Throughout the 1987 debate we raised the following concerns:

First, marketing orders would be used as barriers to imported produce.

Second, foreign exporters would develop alternative markets which had no marketing orders.

Third, both the Delaware River ports and U.S. consumers would be harmed by such action.

And, fourth, other domestic producers would seek to extend marketing orders to imports which would not only jeopardize other products imported by our ports, but would have an even greater impact on the consumers.

When we raised these concerns, Mr. President, we were told that our fears were unfounded. However, I find myself here again with the following facts.

First, once the marketing order takes effect for table grapes on April 20, shipments through the ports virtually cease.

In 1987, Chile redirected 10 to 12 ships when it was apparent they would not reach the ports by the time the marketing order was to take effect. The port lost almost $8 million.

Second, the Chilean exporters are developing alternative markets to ship their grapes, along with other Chilean produce once the United States marketing order takes effect.

Last year, Chile exported 1.4 million cases of produce after April 20, the effective date for the table grape marketing order. Of those 1.4 million cases, only 1,700 came through our ports; 98 percent went to other markets which did not have similar restrictions.

Mr. President, the diversion of produce to other markets also has a deleterious effect on consumers. As the supply of produce is choked off, prices go up. In effect, marketing orders impose an additional tax on produce. The additional costs are imposed in a very regressive way.

The economic consequences of the marketing order provision in the bill would be particularly significant for the Delaware River ports. Millions of dollars and thousands of jobs are at stake.

If this bill's marketing order provision were enacted, 91 percent of the imports passing through our three ports from Chile and New Zealand would be affected by marketing orders. This produce represents over $148.5 million in direct and indirect benefits, totaling 30 percent of the man-hours in the ports, or 10,000 jobs.

Mr. President, the Delaware River ports learned a bitter lesson from the 1987 table grapes experience.

And we should learn from that experience to prevent the loss of many American jobs and to prevent real harm to the economy in the Delaware River Valley region.

Mr. President, this amendment offers a realistic approach to this matter.

We don't need to imperil American jobs. Nor do we need to incur millions of dollars in consumer costs to do what the supporters of the bill's marketing order provision want us to do.

If the real goal of the marketing order provision in the bill is simply to guarantee that imported kiwi, nectarines, and plums meet the standards applied to domestic produce, if the intent of this amendment is not to erect nontariff barriers to keep imported fruit off American shelves, then this amendment should be acceptable.

The amendment calls for equity. It provides that imported fruit would be inspected against the same standards used for domestic fruit at the point of delivery.

You might ask, isn't that what the provision in the bill does? The answer is no. The provision would apply shipping point standards to imported fruit at the point of entry into the United States. And that's the problem.

Domestic fruit is inspected according to shipping point standards when it is freshly harvested and before it moves across country by truck to delivery destinations. But after undergoing transport, domestic produce is reinspected according to delivery point standards, which are less rigorous since they take into account the effects of transport.

By contrast, imported fruit must meet more stringent shipping point standards after undergoing ocean transport from the producing country.

I say to those advocating equal treatment for imports—let that treatment really be equal. Let's agree that all fruit should be inspected at the point of delivery according to delivery point standards.

That's what this amendment would do.

I think it's a fair solution for all involved, and I hope my colleagues will support it.

The PRESIDING OFFICER. Is there further debate on the amendment offered by the senior Senator from Pennsylvania? The Senator from Indiana.

Mr. LUGAR. Mr. President, I am advised that the distinguished Senator from California, Senator WILSON, is on his way to the floor and has a strong interest in the amendment. In his absence, unless there are other Senators who wish to be recognized, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I discussed this with the distinguished Senator from Pennsylvania. I am shortly going to make a unanimous-consent request that we temporarily set his amendment aside while we spend a few minutes taking up some items that have been cleared for action and then also as part of that unanimous-consent request, I would request we go back on the Heinz amendment, once we have finished this list of amendments, that will be accepted by voice vote.

So I make this request, Mr. President. I make a unanimous-consent request that the Heinz amendment be temporarily set aside and that it be in order for the distinguished Senator from Indiana and I to offer a series of amendments that have been cleared, and at such time as the two of us have finished offering those, the Heinz amendment be the order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. I thank my colleagues, Mr. President. I thank the Senator from Pennsylvania for his courtesy.

AMENDMENT NO. 2360

(Purpose: To promote exports of value-added agricultural products)

Mr. LEAHY. Mr. President, I offer an amendment on behalf of Senator BAUCUS and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. BAUCUS (for himself, and Mr. Grassley), proposes an amendment numbered 2360.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

Mr. GRASSLEY. I object. I would like to have it read in whole or at least let me take a look at it.

Mr. LEAHY. I am going to explain it.

Mr. GRASSLEY. All right.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 425, between lines 4 and 5, insert the following new paragraph:

"(2) to increase export sales of United States processed, value-added agricultural products;".

On page 425, line 5, strike out "(2)" and insert in lieu thereof "(3)".

On page 425, line 6, strike out "(3)" and insert in lieu thereof "(4)".

On page 425, line 9, strike out "(4)" and insert in lieu thereof "(5)".

On page 425, line 15, strike out "(5)" and insert in lieu thereof "(6)".

On page 425, line 18, strike out "(6)" and insert in lieu thereof "(7)".

On page 429, between line 23, strike out "and".

On page 429, between line 23 and 24, insert the following new subparagraph:

"(E) and increase the United States share of world markets for processed, value-added products because of the multiple benefits derived from such United States exports for American producers, processors, agricultural-industrial exporters and the national workforce; and".

On page 429, line 24, strike out "(E)" and insert in lieu thereof "(F)".

On page 432, line 17, after the comma insert "and value-added".

On page 437, between lines 5 and 6, insert the following new subsection:

"(c) VALUE-ADDED PRODUCTS.—With respect to the trade performance of processed, value-added products under the reviews required under this section, the Secretary, not later than 18 months after the initial 3-year period described in such subsections, shall conduct an interim review under this subsection. Such interim and subsequent reviews shall include reports to the appropriate Committees of the Congress concerning those actions that the Secretary has taken during the reporting period to increase exports of United States processed, value-added agricultural products and the plans of the Secretary pertaining to such actions during the subsequent reporting period.".

On page 466, between lines 15 and 16, insert the following new paragraph:

"(10) RELIEF FROM UNFAIR TRADE PRACTICES AGAINST PARTICULAR COMMODITIES.—

"(A) COMMERCIAL EXPORT PROMOTION.—

"(1) AVAILABILITY.—The Secretary shall, if appropriate for each agricultural commodity described in clause (ii), make available some or all of the commercial export assistance that is available under this subtitle to assist in the mitigation or to offset the unfair trade practice serving as the basis for the proceeding described in such subparagraph.

"(ii) APPLICATION.—Clause (i) shall apply in the case of agricultural commodities for which the United States has—

"(I) instituted any dispute settlement proceeding under any international trade agreement;

"(II) been prevented from progressing to a decision in proceedings described in subclause (I) as a result of the failure of a panel to reach a conclusive interpretation of law or the refusal of the party maintaining the unfair trade practice to permit the proceeding to progress; or

"(III) initiated a section 301 investigation into foreign unfair trade practices effecting the article.

"(B) DUTIES OF SECRETARY.—For any agricultural commodity described in subparagraph (A)(ii), the Secretary shall—

"(i) promptly consult with representatives of the industry producing such commodities and other allied groups or individuals regarding specific actions or the development of an integrated marketing strategy that utilizes some or all of the assistance available under this subtitle to assist in the mitigation or to offset the unfair trade practice identified in subparagraph (A)(ii); and

"(ii) ascertain and take into account the industry preference for the practical use of available assistance in implementing subparagraph (A)(i).".

On page 477, between lines 10 and 11, insert the following new section:

"SEC. 407. BUDGET INCENTIVES.

"(a) PROVISION OF ADVISE.—Not later than November 15 of each year, the Secretary shall advise the Secretary of the Treasury and the Director of the Office of Management and Budget concerning the additional United States agricultural exports, including but not limited to exports of value-added agricultural products resulting from the assistance provided by the Secretary under section 302(c)(10).

"(b) ESTIMATION OF REVENUE.—The Director of the Office of Management and Budget shall estimate the amount of additional revenue received by the Treasury as a result of the assistance programs established under this Act to provide for the enhancement of United States processed, value-added agricultural exports.

"(C) DETERMINATION OF BUDGETS.—In determining the budgets of the Department of Agriculture, the President shall, to the maximum extent practicable, provide special consideration for the export assistance programs funded by the Secretary under this Act, based on the increases in Treasury receipts and the balance of payments of the United States with other countries.".

Mr. LEAHY. This is an amendment on behalf of Senator BAUCUS on the exports of value-added agricultural products. It requires regular reviews of the Department on promotion of the exports of value-added agricultural products.

It states the policy of the United States is to increase the value added agricultural exports, directs the Secretary to take steps toward that end, requires the administration to report the tax revenue increases stemming from increased value added agricultural exports, and it provides assistance to U.S. agricultural exporters facing other nations' unfair trade practices.

Mr. BAUCUS. Mr. President, I rise today to offer an amendment to

expand exports of value-added agricultural products.

A few statistics graphically illustrate the problem we now face. Although the United States is the world's largest agricultural exporter by volume, its share of global agricultural trade in 1987 by value was only 13 percent. The average value of U.S. agricultural exports per ton was only $223, compared to a world average of $249 and the European Community's $637.

The United States would reap tremendous benefits if it could complete more of the processing involved in converting the raw agricultural products into finished products before export.

The USDA's Economic Research Service estimates that if the United States could double its share of the world market for value-added agricultural products it would result in a $50 billion increase in U.S. GNP, create a million new jobs, and increase Federal tax revenues by $10 billion.

The amendment I am proposing takes four important steps to increase the value-added agricultural exports:

First, states the policy of the United States to increase value-added agricultural exports;

Second, directs the Secretary of Agriculture to take steps toward that end and report to Congress on progress;

Third, requires the administration to report on the tax revenue increases stemming from increased value-added agricultural exports; and

Fourth, provides assistance to U.S. agricultural exporters facing other Nation's unfair trade practices.

I believe this amendment is an important first step toward expanding value-added agricultural exports and boosting economic growth in the United States.

I urge my colleagues to support this amendment.

Mr. LEAHY. Mr. President, the distinguished Senator from Iowa has had a chance to review it. I will withhold for a moment asking for its consideration. I will note it is my understanding this has been cleared on both sides.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. LIEBERMAN). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I ask unanimous consent that the distinguished Senator from Iowa [Mr. GRASSLEY] be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Montana.

The amendment (No. 2360) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2361

(Purpose: To establish an interagency research, design criteria and eradication program on zebra mussels, Dreissena polymorpha, as they affect the nation's agricultural irrigation systems)

Mr. LEAHY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. MOYNIHAN (for himself, Mr. LEAHY, Mr. LEVIN, and Mr. D'AMATO), proposes an amendment numbered 2361.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of Title XIV, add the following:

SEC. . Interagency research, design criteria and eradication program on zebra mussels, Dreissena polymorpha, as they affect the nation's agricultural irrigation systems.

(a) the Secretary of Agriculture and the Assistant Secretary of the Army for Civil Works, in consultation with the Director of the U.S. Fish and Wildlife Service and the Administrator of the Environmental Protection Agency, shall develop a program of research and design criteria for agricultural irrigation systems, with the emphasis on developing techniques and design standards to eradicate and control the effects of zebra mussels in the nation's agricultural irrigation system.

(b)(1) There are hereby authorized to be appropriated to the Secretary of Agriculture to carry out subsection (a) of this section, the amount of $2,000,000 for each of the five fiscal years beginning with fiscal year 1991.

(2) There are hereby authorized to be appropriated to the Secretary of the Army for Civil Works to carry out subsection (a) of this section, the amount of $2,000,000 for each of the five fiscal years beginning with fiscal year 1991.

Mr. MOYNIHAN. Mr. President, I rise today along with Senators LEVIN and D'AMATO to offer an amendment to S. 2830, the Food Agriculture, Conservation, and Trade Act of 1990. If accepted, this rather simple amendment, will provide the necessary assistance in protecting the Nation's agricultural irrigation system from zebra mussels.

To my friends and colleagues who have yet to hear or experience the effects of this foreign mollusk which is presently working its way through the surface water system of our Nation, I encourage you to take note.

Mr. President, I have stood on the Senate floor in the past and will continue too in my effort to raise the level of awareness on this issue. The zebra mussel is a dangerous new infestation. It presents a threat to our entire surface water system and ultimately will effect the way we live and work.

The zebra mussel—the scientific name is Dreissena polymorpha—is not indigenous to North America. It is native to the Black, Caspian, and Azov Seas of Soviet Central Asia. It has been in Europe for more than 150 years, and now it is here.

Unlike other infestations, this one is irreversible. The zebra mussel is here to stay. It cannot be quarantined or eradicated. Within 20 years time it will have spread through the entire surface water system in North America. As it does so it will surely infest the Nation's agriculture irrigation system and in doing so cause untold damage to our agricultural system.

According to the 1984 Farm and Ranch Irrigation Survey prepared by the U.S. Department of Agriculture, the last survey for which data is available, there are 49 million irrigated acres in the United States. This represents 13 percent of all cropland—$39.7 billion in agriculture product sales comes from irrigated land a full 30 percent of all agriculture product sales.

In a 1979 issue of the Russian Journal Gidriobiologicheskii Zhurnal American translation Hydrobiological Journal, research biologists, L.V. Shevtsova, T.A. Kharchenko, and V.A. Movchan stated that:

> There is resulting biological interference due to the fouling of irrigation pipelines by Driessena. When these mollusks establish themselves in a closed irrigation network they reduce the throughput of the pipes, resulting in inadequate watering of the crops, a reduction in their yield and increased expenditure of electricity. The shells of mollusks that die in the pipes are carried into the filters of the sprinklers which they clog and put out of action.

It should not be of any great surprise that we turn to the Soviets for this information as the zebra mussel belongs in their waters.

In a 1989 report prepared for the Environment Minister of Ontario, Canada, "The Zebra Mussel, Dreissena Polymorpha: A Synthesis of European Experiences and a Preview for North America," concluded that:

> The underground irrigation piping for farms, greenhouses and golf courses that drew water directly are susceptible to biofouling by zebra mussels. Measures should be taken immediately to either avoid or control infestations of such systems.

Mr. President, what I proposed today is a simple thing. The Secretary of Agriculture and the Assistant Secretary of the Army for Civil Works will develop a interagency research, design criteria, and eradication program for

zebra mussels in the Nation's irrigation system. They will work in consultation with the U.S. Fish and Wildlife Service and the Environmental Protection Agency. We cannot wait until this cripples our irrigation system. We must act now.

With that said, and to my colleagues who are unfamiliar with the history of the zebra mussels I shall elaborate.

The zebra mussel is native to the fresh waters of Southern Asia. It was first identified there in 1771. Canals built during the late 18th century allowed the species to expand its range. It took less than a century for the mussel to spread over much of Europe—by the 1930's, zebra mussels had reached the British Isles.

Infestations of Dreissena created difficulties for the water supplies in Hamburg in 1886 and in Rotterdam in 1887 by clogging intake pipes. In 1895, Berlin's waterworks were closed for 27 days due to fouling of pipes by thousands of decaying mussels. In 1921, a hydroelectric plant in northern Germany closed because 1.5 meter thickness of mussels severely restricted water flow.

But still, as of only 5 years ago, the zebra mussel had not reached North America. Or perhaps it had, but if so, it had not survived.

Nonetheless, it is believed that in the summer of 1986, zebra mussels arrived in North America in the ballast water of a ship arriving from Europe, and that this event or series of similar events has led to the infestation we now face. It is thought that ballast water taken on in a European port contained immature zebra mussels, that these mussels survived the 5- to 7-day trip that is now commonplace, and that this water was released into Lake St. Clair, which lies north of Detroit between Lake Huron and Lake Erie.

The first confirmed sighting of the zebra mussel in the Great Lakes was in the Canadian waters of Lake St. Clair on June 1, 1988. Zebra mussels now have been found throughout the entire Great Lakes system. As far west as Duluth, MN, and as far east as the St. Lawrence River in New York.

The mussel can move between different bodies of water in several ways. The larvae, called veligers, can be transported downstream or downwind by water currents. Mussels attach to the hulls of boats, and larvae can survive for up to a week in the cooling water of boat engines. They can be carried by the feet of water birds and other wildlife.

Some advocate using natural predators of the zebra mussel to control its population. Diving ducks prey upon the mussel. In Lake Erie, where the zebra mussel is abundant, observers are reporting an increase in the diving duck population. Unfortunately, there are limits to the ability of the duck to control this organism. Wetland habitat in the Gret Lakes may be too small to support the duck population needed to control this infestation.

Mr. President, the Senate Committee on Environment and Public Works has held three hearings in the last 3 months concerning the zebra mussel and the effects it will have on infrastructure and fishery habitats. The picture is rather grim. The U.S. Fish and Wildlife Service has estimated that the zebra mussel in the Great Lakes will cost $5 billion over the next 10 years in environmental and economic losses. As the zebra mussel moves throughout the surface water system of our Nation this figure will surely rise dramatically.

Mr. LEAHY. Mr. President, just to take one moment, the research program recommended by Senator MOYNIHAN on zebra mussels is one that I am very much in favor of. The zebra mussel, for my colleagues who have not had the misfortune, looks like a little tiny snail or clam. It has been a problem with the Great Lakes. I see the smiles of the clerks. Trust me, it is not a happy thing to see. It multiplies very, very rapidly. It is the rabbit of mussels as far as its proclivity to procreate.

The distinguished Senator from Kentucky has brought some of them here. There is no way of putting them in the RECORD.

But the zebra mussel, if picked up even on a boat, will go through the Great Lakes, just a few of them, and all of a sudden they will start multiplying. They look for water intake, irrigation intakes, water intakes, sewage intakes. They cluster in there. So somebody who has miles of irrigation pipe could literally within a very short time, months or a year, find them totally clogged with these things. They are virtually impossible to get rid of.

I admit a parochial concern, if they start working their way down to Lake Champlain, one of the most beautiful lakes in this country, largest fresh body of water outside the Great Lakes. So it is a very important amendment.

I appreciate on behalf of my distinguished colleague from Kentucky who has not had the visitation of zebra mussels other than the shellaced demonstration that he had here which I will not describe further for the RECORD because I could not possibly do it justice. But I urge its adoption.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, let me underline the importance of the amendment.

The distinguished Senator from New York has described the gravity of the problem. I simply emphasize on behalf of the Great Lakes States that the zebra mussel is also present in those areas, and the amount of damage to various utility intake systems is already extensive. The Senator from New York [Mr. MOYNIHAN] has pointed this out in each of the committees on which he serves.

Having seen this amendment before on other occasions, I know the fervence with which Senator MOYNIHAN has pressed this issue, and having seen new damage in my home State of Indiana from the zebra mussel, I can say that the problem is real.

It is not certain how this menace is to be stopped. It is certain that millions of dollars will be spent in extra maintenance by all of the Great Lakes situations so long as the zebra mussel continues to multiply.

So I commend the Senator for the amendment, and on this side of the aisle we are prepared to accept it.

Mr. LEAHY. I ask unanimous consent that I be listed as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, I join with my colleagues from New York in offering this amendment to get the Army Corps, and other agencies working on preventing the spread of an aquatic pest, the zebra mussel, to our Nation's waterways and irrigation systems.

This nonindigenous species threatens to wreak havoc on the Great Lakes ecosystem, and will probably spread through all freshwater systems in the country if it is not stopped soon. The mussel has lodged in many places in the Great Lakes, clogging drinking water and utility intake pipes, and is spreading at a frightening rate. This amendment will develop a research and prevention program and also instruct the Army Corps to establish design criteria for irrigation systems so as to avoid infestation.

This is only a small downpayment on the resources that the nation will need to invest to halt the spread of this invader. I thank both sides for accepting this amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from New York.

The amendment (No. 2361) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2362

Mr. LEAHY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. SANFORD (for himself and Mr.

GRAHAM), proposes an amendment numbered 2362.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Add the following section at the end of title IX:

SEC. 9. DISTORTIONS TO WORLD SUGAR TRADE.

Whereas the Senate finds that:

(1) the sugar industry is important to the countries of Latin America, especially in the Caribbean, Central American and Andean regions;

(2) the United States is an important destination for sugar from these countries;

(3) over the past nine years, import quotas have drastically reduced United States imports of sugar;

(4) the sugar industry of these countries is in the midst of a prolonged crisis, undermining economic growth and creating political instability;

(5) for the long-term development of these regions, trade is more important than aid;

(6) the export-promotion strategy of these regions can succeed only to the extent that other developed countries increase access to their markets for sugar;

(7) despite requests by regional governments, the international community has not been forthcoming in granting broader market access; and

(8) in light of Latin America's severe economic crisis and its commitment to rebuilding its economies, the international community should remove obstacles to reviving trade.

Therefore, the General Accounting Office shall, no later than October 31, 1990, report to Congress recommendations for policies the United States can adopt to improve and enhance developing countries access to world sugar markets and reduce other distortions to world sugar trade.

Mr. LEAHY. Mr. President, this is an amendment stating that the GAO should make recommendations on the sugar policy which will reduce negative effects on the developing nations. It has been cleared on both sides.

Mr. LUGAR. Mr. President, the distinguished Senator from North Carolina [Mr. SANFORD] has long been active, as the Chair knows, in Central America working with the Central American countries. He has also been active throughout the Caribbean as a part of his responsibilities on the Foreign Relations Committee and as a great humanitarian.

The Senator is concerned, as I am and many Senators are, with the impact of our sugar policies, how we can work with the program we have adopted in this body but we must do so, mindful also of our foreign relations responsibilities.

I commend the Senator for his amendment. We are prepared to accept it.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from North Carolina.

The amendment (No. 2362) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2363

Mr. LEAHY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. GARN (for himself and Mr. RIEGLE), proposes an amendment numbered 2363.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 444, line 20, strike "fiscal" and insert "financial" and strike all from line 24 through 7 on page 445 and insert the following:

"(3) is the financial institution issuing the letter of credit or a subsidiary of such institution."

Mr. GARN. Mr. President, I want to thank the managers of the bill for accepting the amendment Senator RIEGLE and I have proposed to the farm bill. The amendment is intended to correct a problem regarding national treatment of financial institutions in the United States that was identified by the Treasury Department and is a continuing concern of the Banking Committee.

The national treatment concern arises because of language in the bill that would bar foreign institutions from eligibility to receive assignment of letters of credit guaranteed by CCC. The language in the bill is apparently intended to maintain the current CCC ban on guaranteeing transactions in which the same financial institution is involved at both ends of the deal. However, as drafted the provision goes beyond this objective and discriminates against foreign banks.

The national treatment principle is an important element of U.S. banking law, embodied in the International Banking Act of 1978. It requires that foreign financial institutions in the United States be accorded the same legal and regulatory treatment as that accorded U.S. institutions. This is a guiding principle not only of U.S. policy but of the GATT and OECD. If we violate this principle in U.S. law, we weaken our negotiating position for financial liberalization with foreign governments and open our banks to retaliation overseas.

The amendment strikes the reference to foreign financial institutions and substitutes generic language in conformity with U.S. banking law. An institution would be ineligible for CCC guarantees if it is the same institution issuing the letter of credit, or a subsidiary. In addition to its specific coverage of subsidiaries, this restriction would cover any branch, agency, or home office of an issuing institution which are in fact part of the same financial institution. Thus, transactions would be barred between all closely affiliated parties.

Mr. LEAHY. This amendment changes the eligibility requirements for banks under the Export Credit Guarantee Program. The chairman and ranking member of the Banking Committee have offered it. I know of no objection to it.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. We are prepared to accept the amendment on this side of the aisle.

The PRESIDING OFFICER. Is there further debate on the amendment?

If there be no further debate, the question is on agreeing to the amendment.

The amendment (No. 2363) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2364

(Purpose: To express the sense of the Senate concerning the rebalancing proposal of the European Community)

Mr. LEAHY. Mr. President, I send an amendment to the desk on behalf of Mr. Simon and numerous other Senators and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. SIMON, for himself, Mr. CONRAD, Mr. HARKIN, Mr. DIXON, Mr. LUGAR, Mr. BURDICK, Mr. COATS, Mr. DASCHLE, Mr. GORE, Mr. HELMS, Mr. HOLLINGS, Mr. JEFFORDS, Mrs. KASSEBAUM, Mr. LEVIN, Mr. WALLOP, Ms. MIKULSKI, and Mr. GRAMM proposes an amendment number 2364.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 499, between lines 9 and 10, insert the following new section:

SEC. 1136. SENSE OF SENATE CONCERNING REBALANCING PROPOSAL OF THE EUROPEAN COMMUNITY.

(a) FINDINGS.—Congress finds that—

(1) the success of the agriculture negotiations under the Uruguay Round of the General Agreement on Tariffs and Trade (GATT) is important to the liberalization of world agricultural trade and the develop-

ment of the markets for United States commodities;

(2) In order to correct distortions and restrictions in world agricultural markets, the participants in GATT negotiations have committed to substantial and progressive reductions in agricultural protection and support;

(3) the history of establishing more market-oriented trade since World War II has been progressive liberalization through a series of multilateral trade negotiations;

(4) the European Community's proposal to "rebalance" import protections could actually permit the European Community to increase import barriers for some products, including products which have enjoyed barrier free trade status as a result of earlier trade negotiations;

(5) this rebalancing proposal could pose a particularly severe threat to United States exports of corn gluten feed and oilseeds to the European Community, products whose duty-free status the European Community has long sought to undercut; and

(6) the European Community market for United States exports of corn gluten feed and oilseeds has been a successful fixture of United States-European Community trade relations for approximately 30 years, and should not be restricted.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that—

(1) the European Community's proposed balancing of import protections is fundamentally at odds with the important goals of liberalizing world agricultural trade and eliminating trade-distorting policies;

(2) such rebalancing could have a particularly severe impact on United States exports of corn gluten feed and oilseeds to the European Community, leaving them vulnerable to unfair treatment and increased trade barriers; and

(3) the United States, throughout the remainder of the Uruguay Round of the GATT negotiations on agriculture, should forcefully reject the European Community's proposal to rebalance import protections.

Mr. SIMON. Mr. President, today, I am proposing a sense-of-the-Senate amendment expressing the Senate's opposition to the European Community's proposal to rearrange its import protections on certain agricultural commodities.

Protectionist policies in other countries, including the EC countries, cost U.S. farmers billions of dollars in lost sales annually.

I fear this EC proposal to rebalance import protections could result in import barriers for products important to my State and others— particularly soybeans and corn gluten feed. Soybeans and soybean-processed products make up one-third of our argicultural exports to other countries. Illinois is the Nation's leading producer of soybeans. Decatur, IL, is affectionately called the "soybean capital of the World." Between September 1988 and August 1989 the United States exported 1.75 billion dollars' worth of soybeans and soybean products to the European Community, accounting for one-third of all U.S. agricultural exports to the EC.

Corn gluten feed is another important processed product that could be threatened by this proposal. Illinois traditionally is the Nation's second top, producer of corn. The United States exported 650 million dollars worth of corn gluten feed last year.

Restrictions on imports of these products could have a devastating impact on the agricultural economy in my State.

The United States and the EC have had an open trade agreement on oilseeds, including soybeans, for 30 years. Right now at the GATT talks we are working hard to correct restrictions in world agricultural markets. The participants are committed to opening up world agricultural trade. The concept of rebalancing trade restrictions is fundamentally at odds with the goals of free trade.

The rebalancing proposal—now considered by the Europeans to be one of their major objectives in the negotiations—represents yet another attempt to force United States producers to pay the price for Europe's inefficient agricultural policy.

My amendment, which has the support of my colleague from Illinois, Senator DIXON, and Senators CONRAD, HARKIN, LUGAR, LEAHY, BREAUX, BURDICK, COATS, DASCHLE, GORE, HELMS, HOLLINGS, JEFFORDS, KASSEBAUM, LEVIN, and WALLOP, expresses the Senate's support for the U.S. negotiators to forcefully reject any EC proposal to rebalance import protections, making sure the rights of American farmers are not eroded as a result of these negotiations.

Mr. LEAHY. Mr. President, this expresses a sense of the Senate concerning a rebalancing proposal of the European Community. I understand that nobody objects to it.

The PRESIDING OFFICER. Is there objection?

If there be no further debate, the question is on agreeing to the amendment of the Senator from Vermont.

The amendment (No. 2364) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEAHY. Mr. President, I have an amendment authorizing the America the Beautiful Act, and 26 other Senators join me and the distinguished ranking member, Senator LUGAR, in cosponsoring the National Tree Trust Act, S. 2426. There have been other changes made to it.

AMENDMENT NO. 2365

(Purpose: To authorize the President to designate a private nonprofit foundation as eligible to receive funds for the purpose of promoting community tree planting and cultivation projects, and to authorize the Secretary of Agriculture to establish a rural tree planting program and a community tree planting program)

Mr. LEAHY. Mr. President, I send an amendment on behalf of myself and Mr. LUGAR to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for himself and Mr. LUGAR, proposes an amendment numbered 2365.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 861, between lines 19 and 20, insert the following new subtitle:

SUBTITLE E—AMERICA THE BEAUTIFUL

SEC. 1571. SHORT TITLE.

This subtitle cited as the "America the Beautiful Act of 1990".

SEC. 1572. FINDINGS.

Congress finds that—

(1) trees and forests provide beauty and diversity to both rural and urban landscapes;

(2) trees and forests protect the Nation's soil, water, and wetland resources by filtering runoff and preventing erosion;

(3) trees and forest provide food and cover for many species of wildlife;

(4) trees and forests capture and safely store greehouse gases, thereby reducing the possibility of global climate change;

(5) trees and forests provide shade, block winds, and add moisture to the air, thereby mitigating the urban "heat island" effect and signficantly reducing energy use;

(6) trees and forests make important contributions to the environmental, social, and economic well-being of both rural and urban areas across the Nation; and

(87) stewardship of trees and forests could be significantly enhanced by encouraging, promoting, and supporting partnerships and community service projects involving individuals, youth groups, organizations, businesses and governments at all levels.

SEC. 1573. PURPOSES.

The purposes of this subtitle are to—

(1) authorize the President to designate a private nonprofit foundation as eligible for a one-time grant from the Secretary of Agriculture, to be used for promoting public awareness and a spirit of volunteerism, soliciting private sector contributions, and overseeing the use of these contributions to encourage tree planting projects in communities and urban areas;

(2) promote the principles of basic forest stewardship through the nationwide planting, improvement, and maintenance of trees in order to increase reforestation, enhance the environmental and aesthetic qualities of our Nation's rural and urban areas, and reduce global carbon dioxide levels;

(3) authorize the Secretary of Agriculture to provide increased financial and technical

assistance to State forestry agencies and others, and enter into cost sharing agreements with individuals, for the purpose of encouraging owners of nonindustrial private lands to plant and maintain trees and improve forests in rural areas; and

(4) authorize the Secretary of Agriculture to provide increased financial and technical assistance to State forestry agencies and others for the purpose of encouraging units of local government, civic groups, and individuals to plant and maintain trees and improve forests in communities and urban areas.

SEC. 1574. NATIONAL TREE TRUST FOUNDATION.

(a) PURPOSES.—It is the intent of this section to provide for the awarding of a grant to a private nonprofit Foundation to be used for the following purposes—

(1) to solicit, accept, and administer public and private sector grants;

(2) to promote public awareness and a spirit of volunteerism by awarding grants to, and providing organizational support and training for, local community volunteer organizations dedicated to tree planting and the care of trees;

(3) to support the preservation of unique national resources and environments; and

(4) to award matching grants to nonprofit organizations including youth groups for the planting and cultivation of trees to ensure that our descendants may share the pride of their ancestors when referring to their land as "America the Beautiful".

(5) to award matching grants to municipalities that have developed an urban forestry and have demonstrated a capability to provide at least one-half of the total cost of the project or program for which the Foundation funds will be used.

(b) AUTHORITY.—

(1) IN GENERAL.—The President is authorized to designate a private nonprofit organization (hereinafter referred to in this section as the "Foundation") as eligible to receive funds pursuant to subsection (d), after making a determination that such organization is able, consistent with its charter, to carry out the purposes described in subsection (a), and that the officers of such organization have the experience and expertise necessary to direct the activities of the organization.

(2) CONSTRUCTION.—Nothing in this section shall be construed as making the Foundation an agency or instrumentality of the United States, or as making officers, employees, or members of the board of directors of the Foundation officers or employees of the United States.

(c) AMOUNT OF GRANT.—In fiscal year 1991, the Secretary of Agriculture is authorized to make a grant to the Foundation, from amounts appropriated to carry out this subtitle, in an amount that shall not exceed $25,000,000.

(d) USE OF FUNDS.—

(1) IN GENERAL.—Amounts provided under a grant awarded under subsection (c) shall be utilized by the Foundation—

(A) to carry out the purposes described in subsection (a); and

(B) for the administrative expenses of the Foundation incurred in carrying out such purposes.

(2) INTEREST.—Notwithstanding any other provision of law, the Foundation may hold amounts awarded under a grant under subsection (c) in interest-bearing accounts, prior to the disbursement of such funds for the purposes described in subsection (a), and may retain for such program purposes any interest earned on such deposits.

(e) ELIGIBILITY OF THE FOUNDATION.—

(1) COMPLIANCE.—To be eligible to receive a grant under this section, the Foundation shall agree to comply with the requirements of this section.

(2) CONSISTENCY WITH PURPOSES.—The Foundation may use funds provided under this section only for programs and projects that are consistent with the purpsoes described in subsection (a).

(3) OUTSIDE SOURCES OF COMPENSATION.—Officers and employees of the Foundation may not receive any salary or other compensation for services rendered to the Foundation from any source other than the Foundation.

(4) PROHIBITION ON ISSUANCE.—The Foundation shall not issue any shares of stock or declare or pay any dividends.

(5) COMPENSATION.—No part of the funds of the Foundation shall inure to the benefit of any board member, officer, or employee of the Foundation, except as salary or reasonable compensation for the services or expenses of such member, officer or employee. Compensation for board members shall be limited to reimbursement for reasonable costs of travel and expenses. No director, officer, or employee of the Foundation shall participate, directly or indirectly, in the consideration or determination of any question before the Foundation if such question affects the financial interests of the director, officer, or employee or the interests of any corporation, partnership, entity, or organization in which such director, officer, or employee is an officer, director, or trustee, or in which such director, officer, or employee has any direct of indirect financial interest.

(6) POLITICAL ACTIVITY.—The Foundation shall not engage in lobbying or propaganda for the purpose of influencing legislation and shall not participate or intervene in any political campaign on behalf of any candidate for public office.

(7) GENERAL AUDITS.—For the fiscal year in which the Foundation receives the grant awarded under this section, and for the succeeding 5 fiscal years, the accounts of the Foundation shall be audited annually in accordance with generally accepted accounting procedures by independent certified public accountants or independent licensed public accounts certified or licensed by a regulatory authority of a State or of a political subdivision of the United States. The report of each such independent audit shall be included in the annual report required by paragraph (10).

(8) AGENCY AUDITS.—The financial transactions undertaken under this section by the Foundation may be audited by any agency designated by the President for the fiscal year in which the Foundation receives the grant awarded under this section and for the 5 succeeding fiscal years.

(9) MAINTENANCE OF RECORDS.—The Foundation shall ensure—

(A) that each recipient of assistance provided through the Foundation under this subtitle maintains, for 5 years after the receipt of such assistance, separate accounts with respect to such assistance, and such records as may be reasonably necessary to disclose fully the amount and the disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is provided or used, the amount and nature of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit; and

(B) that the Foundation, the agency designated by the President pursuant to paragraph (8), or any of the duly authorized representatives of the Foundation, shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipient of assistance under this section that are pertinent to the provision and use of such assistance.

(10) ANNUAL REPORT.—Not later than 3 months after the conclusion of each fiscal year, the Foundation shall publish an annual report for the preceding fiscal year. The report shall include a comprehensive and detailed report of the operation, activities, financial condition, and accomplishments of the Foundation under this subtitle. The obligation of the Foundation to publish annual reports under this paragraph shall terminate after publication of the report incorporating the findings of the final audit required by paragraph (9).

SEC. 1575. RURAL TREE PLANTING, FOREST IMPROVEMENT AND STEWARDSHIP PROGRAM.

(a) ESTABLISHMENT.—The Secretary of Agriculture is authorized to establish a rural tree planting, forest improvement and stewardship program as a special component of the Rural Forestry Assistance Program and forest stewardship incentives program established under section 3 and 4 of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2102) (as amended by subtitle A).

(b) ASSISTANCE.—

(1) IN GENERAL.—In carrying out this section, the Secretary of Agriculture is authorized to provide financial, technical, and related assistance to State foresters and other persons for the purpose of assisting nonindustrial private landowners to plant, maintain, and improve trees and forest resources in rural areas.

(2) EMPHASIS.—Assistance provided by the Secretary of Agriculture under this section shall be used to emphasize tree planting and forest stewardship practices designed to prevent soil erosion, enhance aesthetics and recreational opportunities, improve wildlife habitat, increase timber supplies, reduce the possibility of global climate change, and provide other environmental and economic benefits.

SEC. 1576. COMMUNITY TREE PLANTING AND FOREST IMPROVEMENT PROGRAM.

(a) ESTABLISHMENT.—The Secretary of Agriculture is authorized to establish a community tree planting and improvement program as a special component of the urban forestry assistance program established under section 8 of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2105) (as redesignated by section 1514).

(b) ASSISTANCE.—

(1) IN GENERAL.—In implementing this section, the Secretary of Agriculture is authorized to provide financial, technical, and related assistance to State foresters and other persons for the purpose of assisting units of local government, civic organizations, and individuals to plant, maintain, and improve trees and forests in communities and urban areas.

(2) EMPHASIS.—Assistance provided by the Secretary of Agriculture under this section shall be used to emphasize tree planting and forest improvement practices designed to improve the efficiency of energy use, enhance aesthetics and recreational opportunities, improve wildlife habitat, moderate temperature extremes, reduce the possibility of global climate change, and provide other general environmental benefits that contribute to social well-being and a sense of community.

SEC. 1577. GENERAL PROVISIONS.

(a) ADDITIONAL AUTHORITY.—In carrying out this title, the Secretary of Agriculture may utilize such of the authority provided in section 12 of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2109) (as redesignated by section 1514) as the Secretary may consider appropriate and practicable.

(b) REGULATIONS.—The Secretary of Agriculture may issue such regulations as may be necessary to carry out the provisions of this subtitle.

SEC. 1578.

There are authorized to be appropriated as necessary such sums as may be necessary to implement this subtitle.

Mr. LUGAR. It is a pleasure to join with the distinguished chairman in offering this amendment. I simply emphasize that the Chair knows this is a program of very great importance to the President and Mrs. Bush.

The distinguished chairman and I were invited, as were other members of the committee, for the initiation of a program which is part of our national attempt to work through agriculture, in this case forestry, for the national environment, as well as for the enhancement and the beauty of tree planting in our cities.

So I am most hopeful that the amendment will find favor this evening. Obviously, on our side of the aisle, we support it strongly.

Mr. President, our amendment includes a provision to authorize the President to designate the National Tree Trust Foundation as eligible to receive Federal funds and authorizes a grant in fiscal year 1991 of up to $25 million. It includes a specific authorization both of the President's Rural Tree Planting and of his Community Tree Planting and Forest Improvement Program. Furthermore, our amendment links the President's Rural Tree Planting Program to the stewardship programs already included in the forestry title and ensures that the President's program and the stewardship program will be complementary in nature.

Yesterday our committee held a hearing on the President's bill, S. 2426. The President's Tree Planting Program was endorsed by such groups as the American Forestry Association, The National Association of State Foresters, the American Association of Nurserymen and the American Forest Council.

Mr. President, we all know the key role which tree planting and sound forest management can play in enhancing the quality of our environment and the quality of our lives. I am delighted with the strong interest which the President has demonstrated in tree planting and in enhancing the quality of private forest lands. I urge the Senate to adopt this amendment.

Mr. LEAHY. Mr. President, both the distinguished Senator from Indiana and I commended the President for his tree planting initiative, and Mrs. Bush. I have told both President Bush and Mrs. Bush I was very proud of that initiative, and I strongly supported it. And, in fact, I intend to plant a couple of trees on my own tree farm in Vermont in honor of their initiative.

I hasten to add, if anybody wonders if there is a personal ulterior interest, the trees planted on my tree farm will be paid for and planted by my wife and myself and will not come under this or any other program. But they will be in honor of President and Mrs. Bush's initiative.

I understand, however, others may wish to speak on or amend what we have said.

I yield the floor.

Mr. KERREY addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska [Mr. KERREY].

AMENDMENT NO. 2366 TO AMENDMENT NO. 2365

Mr. KERREY. Mr. President, I, too, have a second-degree amendment that I send to the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Nebraska [Mr. KERREY] proposes an amendment numbered 2366 to amendment numbered 2365.

Mr. KERREY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, strike lines 2 through 8.
On pages 4–9, strike section 1574.

Mr. KERREY. Mr. President, let me thank the chairman and ranking member for permitting me to hold hearings, at least one hearing on this particular bill. I voiced some concern, and I put a hold on the bill for a period of time, and the principal concern that I had was that this particular program had not been adequately heard.

I have, in this amendment, urged my colleagues to simply strike one portion of this program. That is the creation of a new tree trust foundation, a private foundation that will be funded with public moneys, that will be started with public moneys. On the balance of the program, I believe the administration, particularly in the rural areas, rural tree planting areas, has made substantial improvements.

I believe it is essentially increasing funding for preexisting programs. It changes the emphasis of the program slightly, and I strongly support it. I still have strong reservations about the creation of a brandnew program, a new Federal program such as this.

In fact, on the day that we had this hearing, the distinguished senior Senator from New Mexico came and presented a very similar program, multipurpose program, not just for trees, wherein he wanted a much smaller amount, I point out. I believe the amount was $2 million; half a million dollars the first year, half a million dollars the second. And he was going to match with private sector donations.

This is a large amount of money for a private foundation. We are going to create a brandnew private foundation that will be involved in planting trees. I think it is legitimate for us to raise some concerns.

I still have a significant amount of doubt about the clarity of the mission of this particular foundation. It is not enough just to say we are going to plant some trees in urban areas, in my opinion. I think you have to have a much more precise objective than what has been laid out in this particular measure.

They talked about conservation. Well, conservation is extremely important. If conservation is the objective, they ought to describe how they are going to get people excited about conservation as part of planting trees—talk about global warming and all kinds of other things, and talk about the loss of trees in our forests. This particular program would deal with only 58 percent of our forests, and it seems to me we have the potential of sending some rather unfortuante signals to the American people.

If we cannot get this done correctly, it will be possible to say money is being wasted, which it could be, Mr. President. As I said, we are starting a new foundation. There is no track record.

Outstanding individuals are involved that intend to raise the private sector money. Typically, these sorts of individuals, they raise the money before they approach us, and it seems to me not altogether unreasonable for us to suggest they raise the private sector money in this particular case, and do it that way, as well.

Again, I do not intend to press this any further than asking for a voice vote on this, and to express my strong feelings that we should not be funding this program at this time. These are good people that have a good objective. They should be raising private money and getting the operation going, and then coming to taxpayers and asking us to put $35 million on the line.

It has not been proven, and it is not clear exactly what it is going to do. As a result, I urge my colleagues to consider that this particular program should be rejected.

Mr. LEAHY. Mr. President, I believe the distinguished Senator from Nebraska has raised important concerns, and I wish to commend him for the hearing held yesterday. I think it was an important hearing, and Members

should read the transcript of that when it is available.

I think his hearing demonstrates how important it is for our committee to continue oversight to ensure that the foundation operates in the public interest.

I find myself in one of the very rare instances, practically about the only time I can think of, when I have been in opposition to the Senator from Nebraska since he has been here.

I will oppose his second-degree amendment. I do it with this reservation: We will have followup oversight of this. I think the oversight will make sure that the concerns that he has raised through this amendment will be met. If the concerns are not, then, at a subsequent time I doubt I will find myself in opposition to such an amendment. On tonight's bill, though, I would.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LEAHY. Is the Senator from Vermont correct in understanding that we would vote first on the Kerrey amendment and, if that failed, then we would vote on the overall amendment that Senator LUGAR and I have sent to the desk?

The PRESIDING OFFICER. The Senator is correct.

The Senator from Indiana is recognized.

Mr. LUGAR. Mr. President, I have listened carefully to the distinguished Senator from Nebraska. This is an issue and an area in which he has had considerable interest and expertise, and I respect that.

On balance, it appears to me that the foundation concept that Senator LEAHY and I presented ought to be retained. It has very strong bipartisan support. At this point 27 Senators have cosponsored this proposal and some people outside the Congress as well; former Senator Muskie, former Senator Howard Baker, the former First Lady, Mrs. Johnson.

It has the support of major forest groups throughout the United States, including the American Forestry Association, American Forest Council, the Amerian Association of Nurserymen, the Association of State Foresters, the National Arbor Foundation in Nebraska, and small tree planting programs throughout the United States.

This initiative is structured to try to mobilize thousands of voluntary groups in all 40,000 communities throughout our Nation. As the Senator from Nebraska has acknowledged, the hope is clearly that each Federal dollar will produce at least $5 in benefits to forestry in American communities. This program contemplates a very tight financial and audit control structure to make certain that it achieves those goals.

So, even as I acknowledge the importance of the Senator's amendment and his argument, I will support the chairman and support the trust. I am hopeful that that position will prevail.

The PRESIDING OFFICER. The Senator from Nebraska, [Mr. KERREY].

Mr. KERREY. Mr. President, if I could indulge for one final comment, I appreciate the advance to vote as quickly as possible. Again, I thank the chairman for permitting me to hold this hearing on this. I reiterate that this is a new program, advanced enthusiastically by the President and quickly joined with a considerable amount of support in the Congress.

I point out with respect to those who are strong and powerful advocates of the line-item veto, this is a pretty good example for those of us who oppose line-item veto and also talk about where the executive branch gets an idea and pushes $35 million through like that. It is not difficult for them to come up with support. They get a great idea they like, not proven up or done anywhere before, they put themselves together a blue-ribbon board of directors who have never been in operation before, barely understand their own articles of incorporation or what they are trying to do, $35 million rolls out like that. Those advocating line-item veto need to remember moments like this. The executive branch has less restraint than the public sometimes understands.

Again, I thank the chairman and ranking member for permitting me to hold hearings on this. I ask my colleagues to vote against the Tree Trust Foundation.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the second-degree amendment of the Senator from Nebraska.

The amendment (No. 2366) was rejected.

AMENDMENT NO. 2365

Mr. LEAHY. Mr. President, we now move to the underlying amendment.

The PRESIDING OFFICER. Is there further debate on the first-degree amendment No. 2365?

The Senator from Indiana [Mr. LUGAR].

Mr. LUGAR. Mr. President, I am offering an amendment with Senator LEAHY to add the President's Tree Planting Program to the forestry title of the farm bill. Our amendment includes a provision to authorize the President to designate the National Tree Trust Foundation as eligible to receive federal funds and authorizes a grant in fiscal year 1991 of up to $25 million. It includes a specific authorization both of the President's Rural Tree Planting and of his Community Tree Planting and Forest Improvement Program. Furthermore, our amendment links the President's Rural Tree Planting Program to the stewardship programs already included in the forestry title and ensures that the President's program and the stewardship program will be complementary in nature.

Yesterday our committee held a hearing on the President's bill, S. 2426. The President's Tree Planting Program was endorsed by such groups as the American Forestry Association, the National Association of State Foresters, the American Association of Nurserymen, and the American Forest Council.

Mr. President, we all know the key role which tree planting and sound forest management can play in enhancing the quality of our environment and the quality of our lives. I am delighted with the strong interest which the President has demonstrated in tree planting and in enhancing the quality of private forest lands. I urge the Senate to adopt this amendment.

The PRESIDING OFFICER. Is there further debate? Hearing none, the question is on agreeing to the amendment of the Senator from Vermont.

The amendment (No. 2365) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2367

(Purpose: To establish a program within the Department of Agriculture for the eradication of pseudorabies in U.S. swine populations, and for other purposes)

Mr. LEAHY. Mr. President, I send to the desk a amendment on behalf of Mr. HARKIN and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. HARKIN, proposes an amendment numbered 2367.

Mr. LEAHY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following new section:

SEC. . PSEUDORABIES ERADICATION.

(a) FINDINGS.—Congress finds that efforts to eradicate pseudorabies in United States swine populations by the Department of Agriculture in cooperation with State agencies and the pork industry have a high priority and should be continued until pseudorabies is completely eradicated in the United States.

(b) ESTABLISHMENT OF PROGRAM.—The Secretary shall establish and carry out a program for the eradication of pseudorabies in United States swine populations.

(c) USE OF FUNDS FOR TESTING AND CONTROL OF DISEASES AND PESTS.—The Secretary shall ensure that not less than 65 percent of the funds appropriated for any animal or plant disease or pest eradication or control program administered by the Department

of Agriculture shall be used for testing and screening of animals or plants and for other purposes directly related to the eradication or control of the animal or plant disease or pest.

(d) APPROPRIATIONS.—There are hereby authorized to be appropriated for each of the fiscal years ending September 30, 1991 through September 30, 1995, such sums as may be necessary for the purpose of carrying out the program established under this section.

Mr. LEAHY. Mr. President, I have been advised the other distinguished Senator from Iowa [Mr. GRASSLEY] wishes to be added as a cosponsor, and I ask that unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARKIN. Mr. President, pseudorabies is an acute, fatal disease affecting most species of domestic and wild animals. It is especially damaging to swine, in which it causes a variety of problems including death in newborn pigs and animals of all ages and fetal death and abortion in pregnant animals.

Pseudorabies poses a serious economic threat to our Nation's pork producers. Overall, it has been estimated that the annual cost of pseudorabies to the pork industry is approximately $60 million a year. The annual cost of pseudorabies to the Iowa pork industry alone is estimated to be well in excess of $20 million.

Pseudorabies eradication efforts have begun, relying on a cooperative program involving State and Federal funds and veterinarians and pork producers themselves, who are involved in helping to guide and carry out the program at all levels. Iowa pork producers have demonstrated that pseudorabies can be eradicated if producers are committed to the effort and if adequate resources are available for the task.

This amendment recognizes the importance of efforts to eradicate pseudorabies in United States swine populations and specifically authorizes and directs the Department of Agriculture to establish and carry out a program of pseudorabies eradication.

The amendment also provides that the Department of Agriculture shall use not less than 65 percent of the funds appropriated for animal and plant disease or pest eradication or control programs for testing and screening of animals or plants and for other purposes directly related to the eradication or control of the disease or pest.

This provision is included based on my examination of the current pseudorabies eradication program at USDA, which showed that too large a share of the funds appropriated for the program is being spent on administrative, overhead and indirect expenses. Too little money is getting out to the States to assist in the actual eradication work.

Under this amendment at least 65 percent of the program funds would get to the State level to help defray the costs of testing, screening and other items of expense directly related to the eradication or control of pseudorabies. This provision is vary important in order to achieve more effective use of Federal dollars in the pseudorabies eradication effort.

Mr. President, I urge my colleagues to support this amendment and the eradication of this very serious threat to the U.S. pork industry.

Mr. LEAHY. Mr. President, I understand that this amendment has been cleared, and I ask for its favorable consideration.

The PRESIDING OFFICER. Is there further debate? The question is on agreeing to the amendment of the Senator from Iowa.

The amendment (No. 2367) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2368

Mr. LUGAR. Mr. President, I send an amendment to the desk and ask for its immediate consideration. It is an amendment offered by Senator FOWLER and Senator GORTON.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Indiana [Mr. LUGAR], for Mr. FOWLER (for himself and Mr. GORTON), proposes an amendment numbered 2368.

Mr. LUGAR. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning on page 924, strike line 21 and all that follows through line 18, page 929, and insert the following:

SEC. 1725. SHORT TITLE.

This may be cited as the "Agricultural Marketing Research and Reform Act of 1990."

SEC. 1726. DEFINITION.

COSMETIC.—The term "cosmetic" means superficial damage to, or alteration of, the exterior appearance of an agricultural commodity that does not significantly affect yield, taste, or nutritional value.

SEC. 1727. STATEMENT OF POLICY.

It is the policy of Congress that federal grade standards for perishable commodities shall be developed with consideration of their impact on farmers' ability to reduce pesticide use and of consumer access to a safe, affordable, abundant, flavorful and nutritious food supply.

It is further the policy of Congress that the Federal Government shall investigate the impact of federal grade standards on pesticide use in agriculture and take appropriate action based on the findings of that research.

SEC. 1728. RESEARCH.

(a) The Secretary of Agriculture shall provide for the conduct of research, through the Economic Research Service and the Cooperative State Research Service, in consultation with other agencies within USDA;

(b) The research shall examine the effects, to the extent listed in the following subsection (c) ("scope of research"), of grade standards and other regulations, as developed and promulgated pursuant to the Agricultural Marketing Act of 1946 (7 U.S.C. 1621 et seq.), and other statutes governing cosmetic appearance;

(c) SCOPE OF RESEARCH.—The primary goal of this research is to investigate the extent to which grade standards and other regulations governing cosmetic appearance affect pesticide use in the production of perishable commodities. The research shall also—

(1) determine pesticide application levels for U.S. perishable commodity production and assess trends and factors influencing those trends of such pesticide application levels since 1975;

(2) determine the extent to which federal grade standards and other regulations affect pesticide use in agriculture for cosmetic appearance;

(3) determine the effect of reducing emphasis on cosmetic appearance in grade standards and other regulations on:

(A) the application and availability of pesticides in agriculture;

(B) the adoption of agricultural practices that result in reduced pesticide use;

(C) production and marketing costs;

(D) domestic and international markets and trade for perishable commodities:

(4) determine the extent to which grade standards and other regulations reflect consumer preferences;

(5) develop options for implementation of food marketing policies and practices that will remove obstacles that may exist to pesticide use reduction, based on the findings of research conducted under this section;

(6) FIELD RESEARCH.—

(A) The Secretary of Agriculture shall implement, not later than 12 months after enactment of this Act, or upon completion of the first phase of the research, a minimum of three, 2-year market research project, in at least three States, to demonstrate and evaluate the feasibility of consumer education and information programs;

(B) Scope of field research—research shall be conducted to evaluate programs designed to—

(i) offer consumers choices among perishable commodities produced with different production practices;

(ii) provide consumers with information about agricultural practices used in the production of perishable commodities;

(iii) educate the public about the relationship, as determine in the research conducted under this Act, between cosmetic appearance of perishable commodities and pesticide use.

(d) DISSEMINATION OF RESULTS.—The Secretary of Agriculture shall disseminate to concerned parties the results obtained from prior scientifically valid research concerning federal marketing policies and practices described in this section to avoid any duplication of effort and to ensure that current knowledge concerning such policies and practices is enhanced;

(e) ADVISORY COMMITTEE—

(1) The Secretary of Agriculture shall establish an advisory committee for the purposes of providing ongoing review of the implementation of the requirements in this

section and providing the Secretary of Agriculture with recommendations regarding the implementation of those requirements;

(2) MEMBERSHIP.—The Advisory Committee shall consist of twelve members comprising of three representatives from not-for-profit consumer organizations, three representatives from not-for-profit environmental ortganizations, three representatives from production agriculture and the pershibable commodity grower/shipper community, and three representatives from the food retailing sector, each with experience in the policy issues discussed in this section;

(3) The Adivisory Committee shall cease to exist no later than September 30, 1993.

(f) REPORT—The Secretary of Agriculture shall report to Congress on the findings of research under this section no later then September 30, 1992 with the exception of the findings under subsection (6) which shal be reported no later than September 30, 1993.

SEC. 1729. CHANGES IN PROCURALD REGULATIONS.

With regard to federal grade standards developing and promulgated pursuant to the Agricultural Marketing Act of 1946 (7 U.S.C.1621 et seq.), the Secretary of Agriculture shall—

(1) take into account the impact of these standards on perishable commodity growers' ability to reduce the use of pesticides;

(2) provide for citizens outside of the perishable commodity industry fair and reasonable opportunity to formally petition a change in grade standards;

(3) provide for a comment period after a formal petition to change grade standards has been made to enable all interested paties to submit information. The Secretrary of Agriculture shall evaluate the information and consider it in the revision process;

(4) provide interested parties with annual status reports, updated upon request, on all pending grade standard changes the Department of Agriculture is considering.

SEC. 1730. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out the activities required under this Act, $4,000,000 for each fiscal year.

Mr. LUGAR. Mr. President, this provision in Senate bill 2830 mandates changes in cosmetic standards used to grade fruits and vegetables. The provision was originally drafted by the distinguished Senator from Georgia [Mr. FOWLER] and it has received considerable criticism from USDA and the United Fresh Fruit and Vegetable Association.

The revised amendment proposed now by the distinguished Senator from Georgia, and the distinguished Senator from Washington [Mr. GORTON] will require only a study of upgrading such standards. The amendment has been cleared on both sides of the aisle.

Mr. GORTON. Mr. President, along with my distinguished colleague, Senator FOWLER, I am proud to offer the Agricultural Marketing Research and Reform Act of 1990 as an amendment to the fruit and vegetable title of the 1990 farm bill. This amendment will require USDA to investigate the extent to which grade standards governing cosmetic appearance affect pesticide use in the production of perishable commodities.

While I do not believe that cosmetic standards contribute significantly to increased pesticide use, I believe this amendment offers a pragmatic, thoughtful approach to studying the issue. This amendment, it should be noted, has the support of both the fruit and vegetable industry as well as consumer and environmental groups.

Mr. President, the United States has the safest food supply in the world. I am certain that this amendment will reaffirm the strong conviction our fruit and vegetable industry, and the agriculture community in general, has to maintaining this situation. I urge the adoption of the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? Hearing none, the question is on agreeing to the amendment.

The amendment (No. 2368) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEAHY. Mr. President, as I understand, under the original order now we would go back to the Heinz amendment, on which the yeas and nays have been ordered.

The PRESIDING OFFICER. The Senator is correct.

Mr. LEAHY. Mr. President, I ask for the regular order.

AMENDMENT NO. 2359

The PRESIDING OFFICER. The question occurs on the amendment offered by the Senator from Pennsylvania, Mr. HEINZ.

Mr. CRANSTON addressed the Chair.

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. CRANSTON. Mr. President, I urge my colleagues to oppose the amendment offered by the Senator from Pennsylvania. I understand that Senator WILSON is coming to the floor to also oppose this amendment. I understand that Senator LEAHY, the chairman of the committee, is not supporting it.

This amendment would permit a lower grade for imported fruits that are covered by marketing orders. It appears that the intent of the provision is to deprive consumers of the benefit of the inspection.

This amendment would allow fruits and vegetables which are harvested at the tail-end of the foreign season to reach U.S. consumers without having the same inspection given to domestic fruit. That does not make sense.

The Chilean produce would be allowed to enter United States markets at the same time that top quality domestic produce first comes on the market.

We need to consider the consumer on this issue. Produce inevitably deteriorates during ocean shipment. The transit time from Chile is approximately 2 weeks, a very significant time period for fresh produce to endure. It may not be in the shape when it arrives that it was when it started its voyage.

The amendment will undermine the integrity of the marketing order system. The marketing order program assures consumers of getting a reliable supply of quality produce and deserves much of the credit for the dependable quality of American produce.

Marketing order requirements have not restricted Chilean or other foreign exports into our country. They merely require that imported produce be inspected during the domestic harvest season for compliance with the same standards as domestic produce. Instead, marketing orders have secured the market for the Chileans by assuring the consumer of a consistent quality product.

U.S. requirements for imported grapes are quite low compared to most countries. The second largest market for Chilean grapes is the European Community. Yet, the European Community and Canada maintain grade requirements on a year-round basis. In contrast, U.S. marketing order requirements are only applied during the domestic harvest season. Further, the United States only requires that imports meet the lowest grade—U.S. No. 1.

Fresh produce is not an easily identifiable product as concerns the country of origin. As a result, consumer disappointment in the quality of taste of a particular bunch of grapes may be generalized with respect to all grapes.

Marketing orders mandate a minimum quality standard for produce. These standards do not restrict imports, but only require that imported produce be inspected during the domestic harvest season for compliance with the same standards as domestic produce. Remember, this is not a maximum grade, but a minimum grade.

Produce inevitably deteriorates during shipping, which from Chile can take more than 2 weeks. The entry of substandard grapes will undermine U.S. consumer's confidence in the quality of all table grapes and ruin the market for early-season domestic produce.

Chilean exports of table grapes grew from almost nothing in the mid-1970's to approximately 41 million boxes in 1989. The figure is expected to reach 54 million boxes in 1994. Clearly, all the grape producers have benefited from the marketing order's quality standards.

There is no need for this amendment. Most of the grapes that enter the country after April 20, are exempt

from the marketing order's minimum quality standards. Why have inspection for the entire shipping season when it is only the last 3 weeks that causes a problem?

The marketing order inspection requirement is fully GATT consistent and has been upheld by a Federal district court in Philadelphia. In addition, the administration has historically opposed offshore inspection.

We are also concerned that this concession is being given to Chile without any reciprocity in the treatment of United States grape exports to Chile. The United States does not impose any duties on imported grapes during the main U.S. harvest season. Chile, on the other hand, imposes a 15-percent duty, plus a value-added tax of 18 percent on all table grapes imported to their country.

I urge my colleagues to reject this provision and protect the consumer and the integrity of the marketing order program.

Mr. DECONCINI. Mr. President, I rise in opposition to the amendment of Senator HEINZ regarding agricultural products—particularly grapes. I urge my colleagues to reject the idea of allowing lower standards for Chilean agricultural commodities than the same commodities grown in the U.S.

It is common knowledge in the produce business that fruits and vegetables undergo some inevitable deterioration in transit. The transit time from Chile is approximately 2 to 3 weeks, a significant time period for fresh produce to spoil, especially a product as delicate as grapes.

Under the proposed amendment, grapes from Chile will end up having lower standards than United States grapes for quality. These Chilean grapes could enter the U.S. markets at the same time that top quality domestic grapes first come on the market. The result may be a consumer rejection of grapes that have deteriorated in transit—a rejection that will carry over into their confidence in domestic grapes.

Of the total imports of 41 million boxes of grapes from Chile, only about 240,000 boxes are subject to the inspection for quality. If that is the case, why the uproar from the Senator from Pennsylvania.

Many agricultural products, including grapes, have 8e provisions which require that foreign produce imported into this country meet the same minimum quality standards as the domestic product. Note that I said the same standard, not a higher one, just the same standard that U.S. producers have to meet. That is why the Mexican grape growers support the 8e provisions. The 8e provisions are also fully compatible with GATT.

Quality standards have not restricted Chilean exports; rather, they have secured a market for them by assuring the consumer of a quality product. Importation of Chilean grapes has increased from 500,000 boxes in 1975 to an estimated 41 million boxes this year. Undoubtedly, the quality standards have not inhibited the importation of grapes from Chile. Additionally, I should note that the United States has no duty on grapes from Chile. By contrast, Chile imposes a 15 percent duty on all table grapes imported into their country.

This amendment could be devastating to my growers in Arizona who produce 1.8 million boxes a year. With 5,700 acres in Arizona planted for table grapes, my growers cannot afford to have low quality grapes on the market which would reduce the American consumer's confidence in their product.

I urge my colleagues to reject this provision. It's the right thing to do for the consumer, the domestic producers, and the foreign producers.

Mr. INOUYE. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is the amendment offered by the Senator from Pennsylvania [Mr. HEINZ].

Mr. INOUYE. Mr. President, I rise in strong opposition to the Heinz amendment that would strike the commodities that have been added to section 8(e) of the Agricultural Marketing Agreement Act of 1937. I believe that the purpose of these marketing orders is to protect the interests of our domestic consumers and provide them with high quality commodities, whether the product is foreign or domestic. Often, however, the efforts of the domestic industries to market high quality products are undercut by imports of like commodities that are of inferior quality.

The fruit and vegetable title of S. 2830 as written would guarantee equal treatment of both domestic and foreign producers. I am not seeking higher standards for imports but equal standards.

Producers and consumers certainly deserve the benefits of fair market treatment and quality control, respectively, as is currently provided for all commodities under section 8(e) of the act. I believe that the inclusion of these additional commodities under section 8(e) of the act would result in higher quality produce for our Nation's consumers. The issue is clearly not one of competition or protectionism, but rather of quality and taste.

I urge my colleagues to oppose the Heinz amendment.

The PRESIDING OFFICER. The Senator from Kentucky [Mr. MCCONNELL].

Mr. MCCONNELL. Mr. President, I understand the amendment we are on. I would like to make a few observations about the farm bill in general since we are not ready for a vote here and a couple of observations about an amendment I will not be offering on this farm bill but will be offering subsequently on the debt ceiling.

Mr. President, with regard to the farm bill in general it seems to me on the whole it is one we can be proud of, although I must say I think the dairy section is quite possibly a step backwards. We have in the dairy section of the farm bill that we are going to be passing in the next couple of days, the potential for quotas. Quotas, I think, are a step backwards. We are supposed to be moving in the direction of a market-oriented farm bill. In my particular section of the country, we are milk deficient. The last thing dairy farmers in the southeast need is a bill that opens up the possibility of quotas in the coming years.

So, my suspicion, Mr. President, is we will have to revisit that section of the farm bill, probably in connection with whatever budget agreement is reached, because it does have the potential not only to be costly but, as I said, to move us away from a market orientation which is what we have had in the '85 farm bill in the dairy section.

Mr. President, on another matter, one of the most irritating experiences that farmers have had in recent years is a result of the Budget Reconciliation Act last year, in which withholding requirements for farmers were dropped from $2,500 to $150. The net result of that, for small farmers in particular, is an enormous aggravation.

We have been working with the leadership on the Finance Committee and with the staff, and hope that by the time the debt ceiling is offered we will have crafted this amendment in a fashion that can be accepted by the Finance Committee. I would like to take a few moments to describe the problem many of my colleagues are already aware of. As a matter of fact, the bill I have introduced, S. 2186, is cosponsored by the following Senators: Senators SYMMS, FORD, MCCLURE, BURNS, KASTEN, JOHNSTON, SANFORD, BAUCUS, HELMS, BOND, WARNER, EXON, and GRASSLEY just a few moments ago indicated that he would like to cosponsor as well.

Mr. President, the problem is this. A provision in last year's Revenue Reconciliation Act mandated that farmers who have an aggregate payroll of more then $2,500 per year must automatically withhold Federal income taxes from the wages of all employees. Employers will have to provide a W-2 form to all workers each year. If the farm workers are seasonal migrants and do not live in the area, farmers will have to be able to demonstrate that they made a good faith effort to locate the workers in order to send their W-2 forms to them.

Individual employees who earn $150 or more are subject to the same withholding requirements.

Before the 1990 tax year, farmers and their employees were permitted to jointly decide whether or not to withhold tax on workers wages. Agriculture businesses and farmers were not given notice of the proposed change last year and did not get the opportunity to express their views with regard to this legislation. Public opinion was not requested prior to passing the law.

IRS sent notices to over 400,000 agriculture employers in December 1989. This mailing included W-2 form, employment eligibility verification, a form I-9, and circular E, an employer's tax guide which is an 50-page explanation of employer tax reporting requirements.

Mr. President, this law is confusing and too tedious for the average small farmer to implement. If a farmer fails to properly fill out his tax forms he will be penalized by the IRS.

Most small farmers will have to hire professional help to handle the extra paperwork required to comply with this law. This legislation is clearly an attempt to force the farmer to do the work of the IRS, and enforce the Tax Code at the expense of burying the farmer in paperwork.

To give a sense of the impact on this, Mr. President, there are over 92,000 farms in Kentucky, The average farm size is 146 acres whereas the average of U.S. farm is 416 acres. Therefore, because of the small size, many Kentucky farmers cannot afford full-time employees, many times. Not only can farmers not afford full time employees, but they do not need them. Tobacco farms in Kentucky frequently are fewer than 3 acres; hay farms around 38 acres. The nature of farming these crops requires seasonal labor. Farmers will hire help to harvest a cutting hay which may take 3 or 4 days, and then not require any additional help for another month until the next cutting is ready to harvest.

Tobacco farmers have even more intense hiring needs. For 3 acres of tobacco a crew of six laborers may work for 5 days to cut, haul, and hang in the barns the 7,000 pounds of tobacco.

Weather plays a role in both of these operations and acting quickly is important. If the farmer cannot hire and keep a crew long enough to complete the job it means portions of the crop will be lost.

Adding additional time-consuming bureaucracy to an already intense time is more than these farmers should be required to bear.

There are 92,000 farmers in Kentucky and well over half of these farmers have all farm jobs. Therefore, these farmers are especially dependent on seasonal workers during peak periods.

Mr. President, the principal point is this: This is an onerous provision that, in my judgment, over the long haul is not going to produce any new revenue for the Government, at least not new revenue, fairly collected. We are working with the Finance Committee in the hopes that this amendment can be accepted when we get to the debt ceiling. But I want to notify not only Kentucky farmers but farmers all over the country that we are working to solve this problem and to get this onerous restriction off of their backs.

Mr. President, earlier this year I introduced legislation to repeal a provision in the Revenue Reconciliation Act of 1989. S. 2186 currently has 12 cosponsors and I would like to thank my colleagues, Senators SYMMS, FORD, MCCLURE, BURNS, KASTEN, JOHNSTON, SANFORD, BAUCUS, HELMS, BOND, WARNER, EXON, and GRASSLEY for their interest and support of this legislation.

Unfortunately, this provision has placed an added burden to our Nations' farmers by requiring them to withhold Federal taxes from workers' income. Previously, such withholding was voluntary and farmers and their employees were permitted to jointly decide whether or not to withhold tax on workers' wages. Now, all workers with earnings of $150 or more, or those workers employed where the aggregate payroll is in excess of $2,500, must have taxes automatically withheld from their wages by their employers.

I understand that this bill was passed with good intentions. However, this onerous provision was included in the Budget Reconciliation Act without hearings or any other opportunity for farmers and worker representatives to comment on the consequences of such a requirement. A requirement which has proved to be an administrative nightmare to thousands of small farmers in my State and throughout the nation.

The IRS sent notices to over 400,000 agricultural employers in December 1989. This mailing included a W-4 form, employment eligibility verification—form I-9, and circular E, an Employer's Tax Guide, which is a 56 page explanation of employer tax reporting requirements.

This law is confusing and too tedious for the average small farmer to implement and if a farmer fails to properly fill out his tax forms he will be penalized by the IRS.

There are over 92,000 farms in Kentucky. The average farm size in Kentucky is 146 acres whereas the average U.S. farm is 416 acres. Therefore, because of the small size, many Kentucky farmers cannot afford a full-time employee.

Not only can farmers not afford full-time employees but they do not need them. Tobacco farms in Kentucky are less than 3 acres. Hay farms are around 38 acres.

The nature of farming these crops requires seasonal labor. Farmers will hire help to harvest a cutting hay which may take 3 or 4 days and then not require any additional help for another month until the next cutting is ready to harvest.

Tobacco farmers have even more intense hiring needs. For 3 acres of tobacco a crew of 6 laborers may work for 5 days to cut, haul, and hang in the barns the 7,000 pounds of tobacco.

Weather plays a role in both of these operations and acting quickly is important. If the farmer cannot hire and keep a crew long enough to complete the job it means portions of the crop will be lost.

Adding additional time consuming bureaucracy to an already intense time is more than these farmers should be required to bear.

Over half of Kentucky's farmers have off farm jobs. Therefore, these farmers are especially dependent on seasonal workers during peak periods of harvest.

This requirement unnecessarily burdens farmers and workers. Most farmers are unable to readily comply to this law because they are not equipped to handle the excessive paperwork. Many may be forced to hire accountants to properly fill out withholding forms. Other farmers will spend hours collecting and reporting. Workers will be forced to file for refunds when many would not otherwise have to file at all.

This provision is unfair to farmworkers. Most farm laborers do not even earn enough to incur a tax liability. Consequently, the money—earned by those who are least able to afford an income loss—is spent by the Federal Government, interest-free, until the farm workers can file for a refund.

Many seasonal workers do not have social security numbers, but yet the farmer is held accountable and liable for carrying out the tax code.

Withholding federal taxes from a typical farm laborers income can slash 15 percent from their modest take home pay.

In 1987, the average farmworker earnings were a little less than $5,000, while the minimum taxable base is $4,000. This means that nearly half the wages paid to farm workers are not even subject to Federal income tax. Some of these people will not know how to file returns to get a refund and will not go through the process to get their money back. In essence, they will give their money to the Government.

I realize we are experiencing a deficit problem but it is grossly unfair to penalize our small farmers and low-income laborers.

This legislation is clearly an attempt to force the farmer to do the work of the IRS and enforce the tax code at the expense of burying the farmer in paperwork.

Last year the Joint Tax Committee estimated that over the next 5 years this change could generate $404 million: $270 million comes in the first years, however over $240 million would be from unclaimed tax refunds; in years 3 through 5 average revenue generated would be $22 million.

This withholding requirement does not raise much money, because most of the workers are too poor to owe taxes. So this change does not even help to cut the deficit.

Therefore, Mr. President, I believe a mistake has been made in enacting this provision of Public Law 101-239. Farmers, laborers and the entire farm community will bear the undue burden of this legislation. My bill represents an opportunity to do something good for the small family farmer—the backbone of our Nation.

Mr. President, I ask unanimous consent that two newspaper articles and the amendment in its current form be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Hopkinsville (KY) New Era, Mar. 16, 1990]

FEDERAL TAX REGULATION INCREASES FARMER WOES

(By Ward Burnette)

Although we're well into a new year according to the calendar, the new crop year for our farmers is just now beginning.

Once again, they plan their farming operations, deciding what to plant and how much to plant.

As always, the uncertainty of things such as weather and crop prices is taken into consideration when planning a new crop year.

But in the last few years, the availability of farm labor has become a major problem in farm operations and affects many decisions. Farm families have been the traditional source of the temporary field labor. Children grew up on farms learning the necessary skills and hired themselves out to neighbors.

But farm families have become fewer in number, and the size of the families is smaller now. Jobs in town with regular hours take many workers out of the fields.

A major reason why last year's tobacco crop was less than expected was due to the inability of our tobacco farmers to find enough labor.

And if finding labor hasn't made things hard enough, a new regulation that was recently discovered in the federal budget makes the problem more difficult. The new regulation requires that income tax be withheld for all workers, even those that work for a day or part of a day.

Prior to this, withholding of employee income tax was voluntary for farmers, who made the decision in conjunction with their employee.

While it is not really a problem for regular employees, this regulation becomes a bookkeeping nightmare for farmers who hire a lot of temporary labor during peak harvest times of tobacco, hay or silage.

Many farmers have said that a lot of their help are reluctant to even give their Social Security numbers to a farmer who hires them. And there is a concern that many farmers will end up paying the tax out of their own pockets just to get help.

But what is really the greater injustice, and one that the leaders in this state should be concerned about, is the burden it places on low-income farm laborers.

The average farm worker earnings in 1987 was a little less than $5,000, while the minimum taxable base is $4,400. This means that nearly half the wages paid to farm workers are not even subject to federal income tax. Some of these people won't know how to file returns to get a refund and won't go through the process to get their money back. In essence, they will give their money to the government.

They may hire someone to fill out their returns, or if they file themselves, the money that has been withheld through the year has been essentially loaned to the federal government interest-free.

What makes this such an injustice is that these are the people who need every dime of their paychecks to meet the bare essentials of food and housing. They are the group of people least able to give or loan money to the federal government.

With the budget deficit a problem, the federal government is scrambling for ways to boost receipts. However, it is unthinkable that they are forcing poor farm workers to balance the budget.

The irony of the situation is that the IRS estimates that this provision will bring in $270 million in 1990, but that figure drops to $23 million in 1994, which has not been explained. In terms of trillion dollar budgets, $23 million is a paltry sum for the burned and problems it causes to collect it.

This new regulation hits Kentucky particularly hard since statistics show that the Appalachian II region (Kentucky, Tennessee and West Virginia) has a much higher percentage of temporary farm labor than the rest of the nation.

Representative Hal Rogers and Sen. Mitch McConnell have introduced separate bills designed to repeal the provision. Sen. Wendell Ford is also working on legislation to deal with the problem.

This law is not just a problem for farmers. It causes an economic hardship on a number of Kentuckians and takes money out of the state that rightfully belongs to our citizens—money that should stay here. I urge you to contact members of the congressional delegation and ask them to work for the repeal of this provision.

[From the Paducah Sun, Mar. 16, 1990]

BORROWING FROM POOR NOT RIGHT

A farmer hires a few temporary workers to help with the harvest for a couple of weeks.

A shopkeeper employs a high school student to clerk on Saturdays.

Employer and employee both know earnings will not be enough to be taxable at the federal level and in a general way, the Internal Revenue Service knows it too.

But under the rules, these workers have to be treated as though they were full-time factory or office personnel, subject to all the same paperwork and withholding requirements.

Small farmers were sucked into this bureaucratic whirlwind by a previously little noticed provision of the Omnibus Budget Reconciliation Act of 1989.

Kentucky's two senators, Wendell Ford and Mitch McConnell, and Kentucky Congressman Hal Rogers, in response to a deluge of complaints from farmers in the state, have offered relief legislation that should be warmly received by their colleagues.

There is no justification for saddling small operators, many of whom already have enough problems to keep them occupied, with more forms to fill out.

And that's not the worst of federal heavy-handedness. It is nothing less than dishonorable for mammoth government to be borrowing, at no interest, the pittances of those who can least afford to surrender any of their wages for any length of time.

Those who fail to reach the tax threshold—it's estimated that of $240 million withheld from farm workers the first year, the government would keep only about $20 million—will be entitled to full refunds.

But they will have to file for it. In the meantime, their money has been in hands of the spenders in Washington, not their own pockets where it belonged.

A workable mechanism surely could be devised that would allow farmers, and businesses, to declare that a given worker is not likely to reach a taxable level of income and thereby skip the paperwork and the withholding.

And if a declaration occasionally is in error, Uncle Sam will have the last word anyway, on the following April 15.

AMENDMENT

An amendment proposed by Mr. McConnell to repeal the provisions of the Revenue Reconciliation Act of 1989 which requires the withholding of income tax from wages paid for agricultural labor.

SECTION 1.

That section 7631 of the Revenues Reconciliation Act of 1989 is hereby repealed and the Internal Revenue Code of 1986 shall be applied as if such section (and the amendments made by such section) had not been enacted.

SEC. 2.

The Secretary of the Treasury shall conduct a study concerning the requirements on farmers to report and fulfill the obligations of the Tax Code. It shall consider the seasonal hiring patterns, available labor sources, and other characteristics as necessary.

Mr. McCONNELL. Mr. President, I yield the floor.

The PRESIDING OFFICER. The distinguished floor manager, the Senator from Vermont [Mr. LEAHY].

Mr. LEAHY. Mr. President, I understand that there was going to be a tabling motion made by the distinguished Senators from California, which I will support, on the pending amendment. I have been asked by a number of Senators from both parties if there is any possibility of getting a heads up before there is a rollcall.

I wonder, Mr. President, if I might inquire of the distinguished senior Senator from California if the California Senators are going to, say, within the next 10 minutes or so, make that tabling motion because we are within 10 or 15 minutes of it. We want both

the Democratic and Republican Cloakrooms to get a beeper out. If I might ask the distinguished Senator from California, what is the plan?

The PRESIDING OFFICER. The Senator from California.

Mr. CRANSTON. Yes, I do plan to table. Senator Wilson is here. Let me confer with him for one moment, and then we will proceed.

May I suggest the absence of a quorum?

Mr. LEAHY. Will the Sentor withhold that for a moment?

Mrm. CRANSTON. Certainly.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Just so those who are watching will know, Mr. President, we may be close to getting such an agreement. What I will do—I assume this will inconvenience the least number—is put in a quorum call and try to do that for about a 10-minute period and then go to the tabling motion so people will know, so both Cloakrooms can let Senators know, so they can get back.

Mr. President, before I suggest the absence of a quorum, I should hasten to add that this is not a 10-minute prelude by any means.

I sugget the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assisting legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I ask unanimous consent that the pending amendment be laid aside in order to allow the managers of the bill to bring forward some cleared amendments and at the expiration of that time to have it come back up as the order of the Senate.

The PRESIDING OFFICER. Is there objective? Without objection, it is so ordered.

AMENDMENT NO. 2369

(Purpose: To clarify the treatment of multiyear program contract payments)

Mr. LEAHY. Mr. President, I send an amendment to the desk on behalf of Mrs. KASSEBAUM and Mr. DASCHLE and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mrs. KASSEBAUM (for herself and Mr. DASCHLE), proposes an amendment numbered 2369.

Mr. LEAHY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 328, between lines 12 and 13, insert the following new subsection:

(d) TREATMENT OF MULTIYEAR PROGRAM CONTRACT PAYMENTS.—Effective beginning with the date of enactment of this act, the Food Security Act of 1985 is amended by inserting after section 1001C (7 U.S.C. 1308-3) the following new section.

"SEC. 1001D. TREATMENT OF MULTIYEAR PROGRAM CONTRACT PAYMENTS.

"(a) IN GENERAL.—Notwithstanding any other provision of law, in the event of a transfer of ownership of land (or an ownership interest in land) by way of devise or descent, the Secretary of Agriculture may, if the new owner succeeds to the prior owner's Conservation Reserve Program contract (entered into pursuant to title XII of this Act) make payments to the new owner under such contract without regard to the amount of payments received by the new owner under any Conservation Reserve Program contract executed prior to such devise or descent.

"(b) LIMITATION.—Payments made pursuant to this section shall not exceed the amount to which the previous owner was entitled to receive under the terms of the contract at the time of the death of the prior owner."

Mr. LEAHY. Mr. President, this amendment addresses the payment-limitation requirements relating to the Conservation Reserve Program payments. I think it will prevent sensitive land from being broken out, which obviously would increase erosion.

On this side, I support the amendment by Senator KASSEBAUM and Senator DASCHLE.

Mrs. KASSEBAUM. Mr. President, I am proposing an amendment today to address a serious problem with payment-limitation requirements relating to the Conservation Reserve Program. Under current regulations, an unfair situation has surfaced whereby a person who is receiving their maximum payment limit cannot receive rental payments on inherited land in the Conservation Reserve Program.

Although it is true that a person signs a CRP contract knowing that it is subjec to the payment limitation, the person inheriting the land did not sign the original contract and probably would not have if they had already reached their payment limit. Unfortunately, CRP acreage has very little income-producing ability other than the denied rental payments. Yet, the owner still has to pay taxes on that land. Consequently, under current law, the farmer inheriting land is encouraged to till highly erodible soil. Obviously it was not the intent of the Conservation Reserve Program to encourage this practice. If we want farmers to abide by the terms of CRP contracts, we should also abide by those terms. Mr. President, this is a fair and equitable amendment.

I would also like to stress that this amendment should be relatively revenue neutral, according to budget analyses at the Department of Agriculture and the Congressional Budget Office. When estimating CRP costs, the USDA assumes all rental payments will be made. My amendment merely requires that CRP contracts be paid in full through the life of the contract.

Mr. LUGAR. Mr. President, we support the amendment and urge its adoption.

The PRESIDING OFFICER. Is there further debate?

There being no further debate, the question is agreeing to the amendment.

The amendment (No. 2369) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENTS NOS. 2370, 2371, AND 2372 EN BLOC

Mr. LUGAR. Mr. President, I send three amendments to the desk by the distinguished Senator from Montana [Mr. BURNS], the first one in behalf of Senator BURNS and Senator CONRAD and ask for their consideration en bloc.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Indiana [Mr. LUGAR], for Mr. BURNS (for himself and Mr. CONRAD), proposes an amendment numbered 2370; and for Mr. BURNS proposes en bloc amendments numbered 2371 and 2372.

Mr. LUGAR. Mr. President, I ask unanimous consent that the reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

AMENDMENT NO. 2370

In S. 2830, on page 490, line 23, insert the following new section:

"SEC. 1124. DURUM WHEAT IMPORTS.

(a) The Secretary of Agriculture shall conduct a study of the impact on domestic durum wheat growers of the importation of durum wheat from Canada into the United States.

(b) By no later than 1 year after the date of enactment of this Act, the Secretary of Agriculture shall submit to the Congress a report on the study conducted under subsection (a).

AMENDMENT NO. 2371

In S. 2830, on page 490 line 23, insert the following new section:

SEC. 1124. ALFALFA SEED IMPORTS.

(a) The Secretary of Agriculture shall conduct a study of the impact on domestic alfalfa seed growers of the importation of alfalfa seed from Canada into the United States.

(b) By no later than 1 year after the date of enactment of this Act, the Secretary of Agriculture shall submit to the Congress a report on the study conducted under subsection (a).

AMENDMENT NO. 2372

In S. 2830, on page 1081, line 10, add the following new section:

"SEC. . USDA'S OFFICE OF TRANSPORTATION.

(a) It is the sense of Congress that the United States Department of Agriculture's Office of Transportation should continue as an independent office and take the lead in addressing agricultural transportation issues. The USDA's Office of Transportation should actively participate in efforts to seek solutions to present and future rail transportation problems. This is especially important for the purpose of maintaining and improving United States agriculture's competitive position in the world marketplace. Likewise, USDA, through the Commodity Credit Corporation is a major shipper of grain. During periods of rail car shortages CCC loses the flexibility it needs to properly administer federal government farm programs. Grain rail car shortages can interfere with the PL-480 program, government food donation efforts and the efficient transfer of government grain stocks to private ownership.

(b) It is the sense of Congress that USDA's Office of Transportation should assist in ensuring that adequate numbers of grain rail cars are available on an equitable and timely basis to preserve the competitiveness of U.S. agricultural producers.

(c) It is the sense of Congress that availability of adequate and timely rail transportation for all of this Nation's agricultural areas permits farmers and our rural communities to maximize the benefit of prices received from end-user to producer. Conversely, when rail transportation is not available on an adequate and timely basis, farmers and rural communities are forced to seek, and rely upon, expensive government programs rather than the marketplace.

Mr. LUGAR. Mr. President, the first of these amendments deals with the direction of the Secretary to study the impact of durum wheat from Canada with a 1 year after enactment.

The second amendment by the distinguished Senator from Montana directs the Secretary to study the impact of alfalfa seed imports from Canada, with a report within 1 year.

And the third amendment by the distinguished Senator from Montana expresses the sense of Congress that USDA's Office of Transportation to continue its role in agriculture and transportation issues.

I commend to the Senate these three amendments.

On our side of the aisle, we are in support.

The PRESIDING OFFICER (Mr. SIMON). If there is no further debate, the question is on agreeing to the amendments, en bloc.

The amendments (Nos. 2370, 2371, and 2372) were agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEAHY. Mr. President, those are the amendments that have been cleared for action. I am going to attempt again to encourage attendance. I know most Senators are back working diligently in their office. But I would point out that those Senators who came forward in the last few hours have had remarkable success in getting amendments out, not only getting them accepted early in the evening but in plenty of time to get their press release out.

We are going to go back now I know on the Heinz amendment, but I would suggest, if there are other amendments, Senators bring them forward because Senators who have had pending amendments, Senator HEINZ and others, have been very cooperative in setting them aside so we could move ahead.

With that, Mr. President, I ask regular order.

Mr. LOTT. Will the Senator yield for a question?

Mr. LEAHY. I yield the floor.

Mr. LOTT addressed the Chair.

The PRESIDING OFFICER. The Senator from Mississippi is recognized.

Mr. LOTT. Mr. President, I was just wondering, maybe I missed part of what the Senator was saying. That is why I was asking the Senator to yield. Could the Senator give us some feel on what we can expect in the next few minutes or tonight. I know Senators have no idea what is going on, whether we are going to get to a conclusion, whether we are going to get to vote, whether we are going to finish. There has to be some reasonableness around here as to when we call it quits for a day. Can we get a little information about what the schedule is?

Mr. LEAHY addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont is recognized.

Mr. LEAHY. My good friend from Mississippi has slipped uncharacteristically out of the traditionalist mode. He knows that amendments, like Dracula, come out after dark, unfortunately, and while I would like to perform some exorcist exercise here on the floor and remove them all, that does not quite seem possible. If it were up to me, I would tell my good friend from Mississippi we would go to third reading right now, but there is an amendment by the distinguished Senator from Pennsylvania [Mr. HEINZ] pending. The last I heard, the Senators from California, with support of the manager, were about to move to table. Because of what I have told both the Republican and Democratic leadership, if that is going to happen, we would put in a 10-minute quorum call at that time so that the Republican and Democratic cloakrooms could alert Senators.

I might say the question perhaps should be asked, Mr. President, of the Senators from California. If they are going to make that motion to table, we will get the beepers going and alert the Members and that vote would occur 10 minutes thereafter.

Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. SPECTER. Mr. President, the debate on the pending amendment has been somewhat disjointed.

Mr. LEAHY. We should have the regular order first. Has the amendment come back up?

The PRESIDING OFFICER. The pending amendment is the Heinz amendment.

Mr. SPECTER. I ask unanimous consent that my remarks follow immediately those of my distinguished colleague from Pennsylvania in support of the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2359

Mr. SPECTER. Mr. President, the purpose of this amendment is to put imported fruit from Chile, for example, on a par with fruit which is shipped from California, for example, to the State of Pennsylvania. There is concern that the law as drafted, absent this amendment, will hurt the consumers by discouraging imports from Chile. Where you have a requirement that the inspection in Philadelphia, PA, for example, after the fruit has arrived from Chile be the point of origin inspection, which is the——

The PRESIDING OFFICER. Can we have order, please. The Senator from Pennsylvania is entitled to order.

Mr. SPECTER. There is concern that if the standard on fruit which is shipped from Santiago, Chile, be the point of origin standard when it arrived in Philadelphia, that is simply unfair. Here you have fruit which is shipped from California and the standard is point of origin and it travels 2,000 miles to Pennsylvania, but the fruit which is shipped from Santiago, Chile, is gauged by point of origin when it reaches Pennsylvania. So that my colleague, in drafting this amendment, has argued for some tolerance.

We have just had an extensive discussion in the cloakroom where we might alter this approach by having the same standard for the California fruit when it arrives in Philadelphia as the Chilean fruit is when it arrives in Philadelphia so that would put California fruit and Chilean fruit on the same level.

We seek here, Mr. President, to have as much fruit available for the consumer as possible, to give the consumer the maximum choice and to have as much competition to move the price down. The bill in its present form gives a very decided preference to California fruit, which works to the disadvantege of the American consumer, is in violation of GATT and, in

addition, imposes very substantial losses on the port of Philadelphia because it discourages Chilean fruit being transported to the United States to come in through Philadelphia.

Mr. President, with respect to the consideration of GATT, there are prohibitions under the General Agreement on Tariffs and Trade which prohibit subjecting imported products to any treatment which is "less favorable than that accorded to the like domestic products with respect to any law, regulation, or requirement affecting the internal sale, offering for sale, purchase, transportation, distribution, or use of the products."

That is the effect of the present bill, because fruit coming from Chile, when it arrives in Pennsylvania, is being judged by point of shipping standards at the time of arrival whereas California fruit is not; it is judged at point of shipping at the time it leaves California. So that there is a violation under GATT.

Mr. President, the effect of the bill in its present form has been subjected to very considerable criticism by the Consumers for World Trade in a letter dated July 19, 1990, addressed to Senators expressing concern of regarding the provisions which would add kiwi, nectarines, and plums to the list of commodities subject to section 8e of the Agricultural Agreement Act of 1937.

This letter goes on to say:

We are very concerned with the potential cumulative impact that extending marketing orders to extending additional commodities will have on the availability of fresh fruit year round at reasonable prices for consumers, as well as the economic viability of U.S. ports. We believe that every attempt must be made to avoid either result.

Mr. President, I emphasize both of those aspects. The availability of fresh fruit year round at reasonable prices for consuemrs is being prejudiced by the preferential treatment for California fruit which discourages fruit coming in from Chile, and the additional factor of the economic viability of United States ports with a tremendous economic loss for the port of Philadelphia.

The letter goes on to say:

CWT is a national, nonprofit organization, established in 1978, concerned with the effect of foreign trade policies on the consumer. CWT supports expanded and liberalized foreign trade to provide the consumer with a broader selection of goods at a lower price.

The letter continues:

We—

Referring to Consumers for World Trade—

have been troubled with potential adverse trade implications of marketing orders. Our trading partners fear that marketing orders can be used as non-tariff barriers. Past experience with marketing orders has demonstrated the negative effect they can have on imported produce. Recently, the Delaware River Ports suffered a serious loss resulting from a marketing order on table grapes. Once the marketing order became effective, the United States became a residual market. The result is likely to be the creation of an artificial scarcity of the product and inflated prices for consumers.

We are concerned about the potential use of marketing orders as barriers to imports. We have witnesed this with table grapes and fear the problem will be exacerbated with any commodities added in the future.

I think perhaps at this juncture it is best to ask unanimous consent that the full text of the letter be printed at this point in the RECORD, even though this may be somewhat repetitious.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONSUMERS FOR WORLD TRADE,
Washington, DC, July 19, 1990.

DEAR SENATOR: I am writing on behalf of the Consumers for World Trade (CWT) to oppose a provision in the Senate Farm Bill. (S. 992) It would add kiwi, nectarines and plums to a list of commodities subject to Section 8e of the Agriculture Agreement Act of 1937.

We are very concerned with the potential cumulative impact that extending marketing orders to additional commodities will have on the availability of fresh fruit year round at reasonable prices for consumers, as well as the economic viability of U.S. ports. We believe that every attempt must be made to avoid either result.

CWT is a national, non-profit organization, established in 1978, concerned with the effect of foreign trade policies on the consumer. CWT supports expanded and liberalized foreign trade to provide the consumer with a broader selection of goods at a lower price.

We have been troubled with potential adverse trade implications of marketing orders. Our trading partners fear that marketing orders can be used as non-tariff barriers. Past experience with marketing orders has demonstrated the negative effect they can have on imported produce. Recently, the Delaware River Ports suffered a serious loss resulting from a marketing order on table grapes. Once the marketing order became effective, the United States became a residual market. The result is likely to be the creation of an artificial scarcity of the product and inflated prices for consumers.

We are concerned about the potential use of marketing orders as barriers to imports. We have witnessed this with table grapes and fear the problem will be exacerbated with any commodities added in the future.

CWT urges you to give serious consideration to the negative effects of this provision to the economy and to the consumer. We urge you to seek less damaging ways to insure that imported food products meet satisfactory standards. We ask you to support the amendment to strike this provision (Section 1721) and support the efforts of the Senators from Pennsylvania, New Jersey, and Delaware.

Sincerely,

DOREEN L. BROWN,
President.

Mr. SPECTER. Mr. President, we are concerned that the tolerance might have some lower standard, and perhaps a better way to approach this problem would be to require that the California fruit and the Chilean fruit have the same standard, and it be judged at point of shipment at the time of arrival so that instead of having California fruit judged at point of shipment, the higher standard would apply to arrival, and we would be prepared to see the Chilean fruit meet the same standard, so long as the standards are the same.

But the essence of the bill in its present form, Mr. President, is injurious to consumers, raises prices, makes the fruit scarce, is in violation of GATT, and very unfair to a major port like the port of Philadelphia.

Mr. WARNER addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. WARNER. Mr. President, parliamentary inquiry. The present parliamentary situation is?

The PRESIDING OFFICER. The pending amendment is the Heinz amendment.

Mr. WARNER. The Senator from Virginia desires to discuss an amendment, and for that purpose he would send it to the desk. And he has every intention of withdrawing the amendment. He would just like to get brief comments from the managers. This would not take more than 5 minutes.

So I now ask unanimous consent that the pending amendment be set aside.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. WARNER. I thank the Chair.

AMENDMENT NO. 2373

Mr. WARNER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Virginia [Mr. WARNER] proposes an amendment numbered 2373.

Mr. WARNER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 803, on line 1, insert:

"SEC. 1496. CLOSED-SYSTEM AQUACULTURE.

"(a) In order to gain further knowledge of intensive water recirculating aquaculture systems, the Secretary may make grants for the purpose of further developing and expanding aquaculture research facilities at Virginia Polytechnic Institute and State University at Blacksburg, Virginia, and to conduct such programs as are necessary to do basic and applied research for intensive water recirculating aquaculture systems.

"(b) There is authorized, in the event the Secretary decides to take action under paragraph (a), to be appropriated the sum of $500,000, or such funds as are available, for the facility for fiscal years 1991 through 1995 to carry out the provisions of this section.".

Mr. WARNER. Mr. President, this amendment is included in the present House bill offered by my distinguished colleague, the Congressman from the Sixth Congressional District, Mr. OLIN, who is also a member of the House Committee on Agriculture. The House version also has a comparable provision for a grant to the University in the State of Illinois.

So I would like to address the amendment briefly and perhaps elicit from the managers of the bill their views.

This amendment is to the research title of the farm bill to seek authorization for appropriations for the purpose of gaining further knowledge of intensive water recirculating aquacultural systems.

I would like to point out in the House, the amendment would accomplish the objective in the same manner as this one presently being submitted to the Senate. Both the Commonwealth of Virginia and the Virginia Polytechnic Institute, one of our distinguished universities, have invested substantially in closed-system aquaculture, constructing the largest and most advanced research facility in the United States.

In Virginia, approximately 27,000 citizens work on fishing vessels and in fish processing plants. They produce more than 750 million pounds of fish products annually, valued at more than $1 billion. It is important to point out that such research would benefit—that is, the research to be performed under these amendments—not only Virginians, but those with a substantial investment in the aquacultural industry elsewhere in the United States.

It would do so by operating under the umbrella of the current system of the Department of Agriculture's National Center for Closed-System Aquaculture.

The Senator from Virginia, within the past 3 weeks, had a meeting attended by interested parties from my State who were in the private sector, as well as from representatives of the Department of Agriculture, and they all expressed interest and support for this type of an amendment.

The PRESIDING OFFICER. Will the Senator from Virginia suspend for a moment? He is entitled to be heard.

The Senator may continue.

Mr. WARNER. The Senator from Virginia thanks the Chair.

The reason the Department of Agriculture and others support this type of legislation is the increasing demand in the United States for fishery products. This increase in demand has created a growing trade deficit.

As a matter of fact, in 1987, the United States imported $8.8 billion in fish and fisheries products, while exporting products valued at $1.7 billion, incurring a $7.1 billion trade deficit. This trade deficit ranked second only to petroleum as an industrial trade imbalance.

Finally, again, I work closely with USDA officials on the issue. They indicated they would support my efforts to obtain authorization for funding for closed-system aquaculture at the Virginia Polytechnic Institute.

Some details on this proposed research are: A closed-system aquaculture is designed for high-valued species like striped bass, red drum, yellow perch, or shrimp. These species do not grow particularly well in pond systems. The systems will not compete with pond-raised catfish, but will add more species for consumers to enjoy.

The closed-system culture of species popular in the Northeast, like striped bass, will soon open new markets to pond-raised catfish. The commercial striped bass harvest has dropped from around 12 million pounds per year in the early seventies to virtually zero today. People in the Northeast love striped bass, and the closed-system aquaculture can keep that market alive.

Mr. President, I ask unanimous consent that this memorandum prepared by the Virginia Polytechnic Institute and State University accompany the remarks of the Senator from Virginia.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

VIRGINIA POLYTECHNIC INSTITUTE
AND STATE UNIVERSITY,
Blacksburg, VA, July 6, 1990.

Memo to: Mike Brown.
From: Larry Nielsen.
Subject: Complementary nature of pond and closed-system aquaculture.

Several excellent reasons show that closed-system aquaculture doesn't compete with pond culture, but actually complements it, as follows:

1. Closed-system aquaculture is designed for high-valued species, like striped bass, red drum, yellow perch, or shrimp. These species don't grow particularly well in pond systems. The systems won't compete with pond-raised catfish, but will add more species for consumers to enjoy.

2. Closed-system culture of species popular in the Northeast, like striped bass, will open new markets to pond-raised catfish. The commercial striped bass harvest has dropped from around 12 million pound per year in the early 1970s to virtually zero now. People in the Northeast love striped bass, though, and closed-system aquaculture can keep that market alive. Catfish sales have been low in the Northeast, but will have access to Northeast markets through the marketing channels developed by closed-system aquaculture. Thus, closed-system aquaculture will actually expand the marketing opportunities for pond-raised catfish.

3. The demand for fish, of many varieties, continues to rise. Early estimates are that 1989 consumption was 19.8 pounds per person, up from 15 pounds in 1988. No technique or species of fish culture can satisfy that demand. The best strategy is to cooperate, making all kinds of fish and seafood products readily available to all consumers.

4. We are also interested in culture of special animals, like endangered species. These must be cultured in closed-systems because each individual is so valuable, because we know nothing about their needs, and because each animal must be carefully monitored. As specific techniques are developed, some endangered species culture could move to ponds.

5. Much research, relevant both to pond culture and closed-system culture, can be performed better in closed systems. Nutritional studies in ponds, for example, are difficult because of the uncontrolled environment—feed can't be accounted, fish eat natural foods at the same time, other competitors and predators invade the ponds. But in closed systems, we can control these aspects much better (that is the idea). The results will produce better feeds, for both pond and closed-systems.

6. Closed-system production of fingerling fish would greatly help pond culture. If the fingerlings were available all year (which is possible with closed systems), then small fish could enter the ponds continuously, allowing a constant harvest. Now, pond aquaculturists need to slow down the growth of fish to spread out their harvest (which costs them money), and some even hold some fish overwinter so a harvestable supply will be available in spring (with a large overwinter mortality). Closed-systems are being worked on for production of red drum fingerlings now, at LSU.

7. Mississippi Gulf-Coast fisheries are suffering the same lower catches as Mid-Atlantic fisheries. Red drum catches, for example, are very low and have been eliminated in some places. This leaves coastal processing plants in bad condition. Closed-system aquaculture for other species, like red drum, could help re-vitalize those coastal fishing communities—in Mississippi and Virginia.

I hope this helps. Let me know. The Secretaries will know where to find me next week (through Tuesday, at least). After that, I'll need to check in. Louis Helfrich and George Libey, two of our aquaculturists, also are alerted and can help you, as needed.

Good luck.

Mr. WARNER. Mr. President, I would like very much to receive any comments from the managers of this bill. Again, I point out that a bill identical in every respect has been accepted by the House committee, and will be a part of the conference.

Mr. LEAHY. Mr. President, I listened to my distinguished colleague from Virginia. But as I told him earlier, for a number of reasons that I will not go into here, I cannot support it.

Maybe things will look better at the time we get to conference. As he said, it is in the House bill. I do not want the Senator to take that as carte blanche. I know he does not. But I cannot support it on this bill for a number of reasons I have gone into with the distinguished senior Senator from Virginia, my good friend.

It is going to be a long time before we go to conference, and I will be happy to discuss it more before then. But right now I could not support it.

Mr. WARNER. Mr. President, I fully understand the position taken by the distinguished manager. I just want to state, for the purposes of the RECORD, that it is my understanding, the

reason why at this time the amendment would not be acceptable is that the committee is uniformly applying this same policy decision to any other amendments of a like nature. Am I not correct on that?

Mr. LEAHY. I am doing my best to hold the line. I am Horatio at the bridge.

Mr. WARNER. I do not need poetry. I just need concurrence in the fact that there is a uniform application of a policy that would catch this amendment in the fishnet.

Mr. LEAHY. The distinguished Senator is right. But I remind him, just as Emerson spoke of a foolish consistency being the hobgoblin of little minds, he himself does not——

Mr. WARNER. The word is "small" minds, not "little" minds.

Mr. LEAHY. Whatever. Perhaps there is a different way to use it in New England or in Virginia.

Mr. President, I suggest also that he does not want this to be a forever and ever, totally inflexible rule, because that redounds against him at the time of the conference. So perhaps it might be better to say to the distinguished senior Senator that it is a rule breached, but infrequently, and only for good and noble cause. I know that he has expressed a good cause here. The effort he will have between now and the time of conference is to raise a good cause to the level of nobility.

Mr. WARNER. Mr. President, I fully understand the subtlety of the distinguished manager's remarks.

Does the comanager from Indiana have any further comments before the Senator from Virginia concludes his remarks?

Mr. LUGAR. Mr. President, I have listened with great interest to my distinguished colleague from Virginia.

I agree, and my understanding is that this would be an exception to policy. We would have great difficulty, with regard to consistency, in accepting this. I think the Senator knows that. The chairman modestly indicated that somewhere out there, there may be something that remotely is inconsistent with what we have done in the past, but it would not be prudent at this time to accept the Senator's amendment. We appreciate the contribution he has made to the debate, but on our side of the aisle we would not be prepared to accept the amendment.

Mr. WARNER. I thank the distinguished manager, and I hope at the time of the conference that the House bill provides a suitable hook on which to hang this and the matter can be set and concluded. It is in the interest of the United States, the trade deficit, and expanding requirements by consumers for fish products, and I think the amendment has considerable merit.

At this time I withdraw the amendment.

The amendment (No. 2373) was withdrawn.

Mr. LEAHY. Mr. President, regular order.

The PRESIDING OFFICER. The Senator from Vermont is recognized.

AMENDMENT NO. 2359

Mr. LEAHY. Am I correct in understanding that we are now back on the Heinz amendment?

The PRESIDING OFFICER. That is correct.

Mr. LEAHY. Mr. President, I keep hearing discussion that this amendment is going to be withdrawn. We have amendments that will require rollcall votes here. I might ask one of the proponents of the amendment—I see Senator SPECTER—is the amendment going to be withdrawn? If it is not, if nobody else is going to, I will move to table, so we can get on to other matters that will be requiring rollcall votes. Maybe I could ask the distinguished Senator from Pennsylvania, does he know, as one of the cosponsors or supporters of this amendment, whether it is going to be withdrawn?

Mr. SPECTER. I do not know that it is going to be withdrawn. My knowledge is that it is on the floor and pending.

Mr. LEAHY. Mr. President, I yield to the Senator from California.

Mr. WILSON. Pending before us is the Heinz amendment. In deference to the proponents of the amendment, I have been meeting with them, seeking to work out a problem. I am prepared to go forward at this point. If there is no change, and if there is no withdrawal of the amendment, or if there is no alteration of it, I would be compelled to move to table it.

I must say that I did not interrupt my colleague from Pennsylvania. I was not here at the time that Senator HEINZ offered his comments as he offered the amendment. I did hear my friend from Pennsylvania, Senator SPECTER, make some comments just now, and I feel compelled, very briefly, to set the record straight.

What is being proposed is a change in the committee bill. The committee bill simply has added some other commodities to the existing Federal marketing order requirements that relate to grape imports. It is not GATT filed. We settled that 2 years ago in the omnibus trade bill. Contrarily, USTR specifically suggested language that removed any doubt that the present law is violative of GATT, and the amendment that was made this year to the law that is proposed in the farm bill simply adds additional commodities.

The purpose of the market order, as with every marketing order, is to assure quality for the benefit of the consumer, as well as for the producer. It is primarily a benefit to the producer because it benefits the consumer. What we are talking about are quality standards. I do not think we need to debate this at length. I have been trying to extend courtesy to my friend from Pennsylvania, and when they are ready, I am prepared to go forward.

Mr. LEAHY. Mr. President, can I ask now whether the amendment is going to be withdrawn or not? If it is not, I am going to move to table. With fairness to all the Members, I want them to be able to get the hot line out. I think we have a lot of Members who are weary. The staff and I and others on the committee are going to have to spend an hour or two after we finish tonight. I want to know where we stand.

Mr. HEINZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. HEINZ. Will the Senator yield?

Mr. LEAHY. I will yield to the Senator, without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, I just say to my friend from Vermont that I want to thank him for his patience and understanding as the Senators from California and myself and Senator SPECTER have tried to resolve this issue and avoid putting the Senate to a vote. That may still be possible, indeed. What I would like to do, with the concurrence of my colleagues, which will be necessary to do what I am about to propose, is to withdraw this amendment. It may be that we will be able to work something out, in which case, if we are, we will be able to, I think handle that very quickly. If not, I would not anticipate that this amendment would reappear. So it would be this Senator's intention to ask unanimous consent to withdraw the pending amendment.

Mr. LEAHY. Mr. President, I will not object to that. To set the Senator's mind at ease, we obviously are going to end up being on this bill on tomorrow, so he has that time to work over. I commend the Senator for that, and I urge him to make his unanimous-consent request. I will not be objected to.

The PRESIDING OFFICER. The Senator has withdrawn his amendment.

Mr. HEINZ. I have to ask unanimous consent to do so.

Mr. MITCHELL. Mr. President, reserving the right to object, and I do not intend to object, I want to clarify one thing. We have been at this now for several hours, and we hope to resolve this. When the Senator from Pennsylvania said he would not offer this amendment, he seemed to emphasize "this" I ask the Senator in good faith, he is not talking about offering another amendment similar to this so that this would all have been wasted?

Mr. HEINZ. That is not my intention. We hope to be able, so there is no

misunderstanding, to offer an amendment that deals with this subject. Hopefully, it is one that our colleagues in California and ourselves will agree upon.

I must also state I have three other amendments related to this subject. It is not my intention at this point to offer any of them right now but like any other Member of the Senate I do have my right to do so. I am going to offer this amendment in slightly modified form. That is why I am withdrawing it.

Mr. MITCHELL. Mr. President, I am not going to object to the withdrawal. I merely make the points that the purpose of this is to get through the bill and get through the amendments. That was my hope, I was just concerned that the process now being followed was going to result in the same or a similar discussion tomorrow which would have rendered for naught the lengthy discussion tonight.

Mr. HEINZ. If the majority leader will yield, I think that is highly unlikely.

Mr. MITCHELL. I thank my colleague. Mr. President, I have no objection to the request.

Mr. HEINZ. Mr. President, I ask unanimous consent to withdraw my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2359) was withdrawn.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

AMENDMENT NO. 2374

(Purpose: To authorize the Secretary of Agriculture to permit alternative repayment rates for oilseed loans under certain conditions)

Mr. EXON. Mr. President I have good news for the U.S. Senate. I have an amendment that has been cleared on both sides. We will not have to set it aside to bring up other amendments.

Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Nebraska [Mr. EXON] proposes an amendment numbered 2374.

Mr. EXON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 309, between lines 9 and 10, insert the following:

"(j) IMPLEMENTATION.—The Secretary shall ensure that the program established under this section shall be implemented in such a manner that will:

(1) Minimize potential loan forfeitures;

(2) Minimize the accumulation of oilseed stocks by the Federal Government;

(3) Minimize the cost incurred by the Federal Government in storing oilseeds; and

(4) Allow oilseeds produced in the United States to be marketed freely and competitively, both domestically and internationally.

Mr. EXON. Mr. President, this amendment has been cleared on both sides. I will give a very brief explanation of what it is for the Senate.

This amendment has been cleared by the managers and the committee. It simply clarifies the oilseeds provisions with regard to how the program should be managed. It makes the oilseeds program consistent with the wheat and feed grains programs as to carryover stocks.

Soybeans are an important crop in Nebraska and elsewhere. As I have said on many occasions, I believe we should have loan rates that recognize the cost of production, loan rates that allow our farmers to "get their just due" from all their labor.

This farm bill establishes a $5.50 loan rate for soybeans with the option for reducing those rates if carryover stocks exceed specific levels. I am not proposing to change that. My amendment simply is designed to ensure that those carryover stocks do not exceed the established levels and force further reductions in the oilseeds loan rate.

I urge its immediate adoption. As I said, it has been cleared on both sides.

Mr. LUGAR. Mr. President, we are prepared to accept the amendment on our side.

Mr. LEAHY. Mr. President, with the sound of hallelujah chorus heard in the background of the Senate Agriculture Committee staff, it will be accepted. No further debate.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Nebraska.

The amendment (No. 2374) was agreed to.

Mr. EXON. Mr. President, I move to reconsider the vote.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. STEVENS. Mr. President, I inquire from the managers of the bill, I have suggested two small amendments to the bill, one dealing with the problem of forest stewardship incentives.

Mr. President, I did not see the distinguished leader on his feet. If he was seeking the floor I certainly would not wish to be interrupting his attempt to bring order out of chaos.

Mr. President, one of the amendments was dealing with the problem of forest stewardship incentives for the Alaska native corporations that own vast acreages, but trying to find some way to get them to participate in those incentives.

The other dealt with tree nurseries to deal with problems that exist in my State, particularly now after over a million and half acres have burned.

The PRESIDING OFFICER. Is the Senator from Alaska addressing a question to the Senator from Vermont?

Mr. STEVENS. It was my intention to do so. I did not mean to interrupt.

Mr. LEAHY. I am sorry, Mr. President. I did not realize the Senator from Alaska was addressing a question to me. I was discussing the bill with the two leaders. If he would be kind enough to repeat the question I will try to answer it.

Mr. STEVENS. My question was whether the two small amendments that my staff just discussed with both majority and minority staff have now been considered, to see whether or not they could be accepted. They deal with specific areas I think primarily applicable to Alaska, but there are some general aspects of the amendment.

Mr. LEAHY. Mr. President, I tell the distinguished Senator from Alaska, we understand on our side the amendment on tree seedlings creates no problem.

The amendment on the Alaska Native Corporation cost-sharing apparently has raised a preliminary objection from the administration and we are checking that out with them now.

Perhaps it might make it easier, assuming there is no objection on the Republican side, if the Senator from Alaska might do the tree seedling amendment; that would be it. And then let us see what the objections are from the administration on the other one.

Mr. STEVENS. If that would meet the approval of the managers of the bill, I am happy to offer the amendment at this time. I think it's noncontroversial.

Mr. LEAHY. The tree seedling one.

Mr. MITCHELL. Will the Senator withhold a moment?

Mr. STEVENS. Yes.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. MITCHELL. There will be no further rollcall votes this evening. I commend the managers. We made a great deal of progress and disposed of several amendments.

I have apologized to Senators who remained in expectation of votes. It was my understanding we were going to complete action on the amendment of the Senator from Pennsylvania this evening and all of us anticipated a vote would be necessary on that. The amendment was then withdrawn. So I see no purpose.

It is late and everybody is tired. We have been at this a few days. So I suggest that the amendment of the Senator from Alaska, and perhaps others,

could be accepted now, be taken, but there be no further rollcall votes.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. STEVENS. I yield.

Mr. DOLE. I indicate to the majority leader I think Senator LUGAR is aware, and I believe the manager, Senator LEAHY is aware that we have been trying to catch everyone as they come in. Staff has been going to anyone who has any notation on the calendar, trying to determine how many possible amendments there may be. We have a list of 42. That may mean 42 or it may mean 22 or it may mean 12 or it may mean 3.

So what we will try to do in the morning is to hotline, and then go back and check each Senator one on one, and then give the final list to the two managers for the information of the managers and the majority leader.

Mr. LEAHY. Mr. President, if the distinguished Republican leader would yield on that, I appreciate that and I would hope that is being done all the way around. I would hope once we had that list that perhaps, following a vote, the distinguished Senator form Indiana and I might be able to get time agreements on those that are going.

We have done a great deal of work here tonight, but there is no sense in having a number of Senators have to stand by while we are doing the unanimous-consent things, if we could figure out where we are going to go. It does not create an advantage for everyone. I have to stay, and I am willing to stay, and the Senator from Indiana will stay. It will make life easier for the rest of us who are getting weary of each other's company, understandably so.

AMENDMENT NO. 2375

The PRESIDING OFFICER. The clerk will report the amendment of the Senator from Alaska.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS], for himself and Mr. THURMOND, proposes an amendment numbered 2375.

At page 811, insert the following at line 19 and renumber subsection (2) through (5) appropriately:

"(2) develop and contract for the development of field arboretums, greenhouses, and tree nurseries, in cooperation with the State, to facilitate production and distribution of tree seeds and seedlings in States where the Secretary determines that there is an inadequate capacity to carry out present and future reforestation needs.".

Mr. STEVENS. Mr. President, I support the President's goal of planting a billion trees per year over the next decade. My amendment is designed to facilitate this goal.

In order to plant a billion trees every year, however, we need readily available basic tree growing infrastructure. We need arboretums, seed collection sites, greenhouses, and tree nurseries. Some regions have such forestation infrastructure, others do not.

My amendment authorizes the Secretary, in cooperation with State officials, to develop the basic tree-growing infrastructure in regions where adequate facilities to grow seedlings do not exist.

Many people overlook the need for this type of critical infrastructure. In Alaska, where we have 18 percent of the forested land in the Nation, there is almost no greenhouse or tree nursery capacity to grow the trees we need for reforestation.

And, we do have a great need to reforest large areas of my State. This year, as of today over 1.1 million acres of Alaska forests have been ravaged by 119 fires. By comparison, the Yellowstone fire burned 1.4 million acres. We have 2,600 people fighting these fires across the State. Every year Alaskans face similar acreage losses by fire.

Yet when it comes time to replant critical areas ravaged each year by fires, we have almost no capacity within the State to produce seedlings for reforestation.

My amendment allows the Secretary to cure such incapacity. I thank the bill managers and their staffs for their cooperation in clearing this amendment.

I will state just as succinctly as I may that this amendment would authorize the Secretary, in cooperation with State officials, to develop the basic tree-growing infrastructure in regions of our country where adequate facilities to grow seedlings do not exist.

As I point out, almost a million and a half acres of Alaska are burning today. We really do not have greenhouse or tree nursery capacity, despite the fact that we have almost 15 percent of the Nation's forests, and we would like to participate in the whole concept of planting a billion trees over the next decade. My amendment is designed to facilitate that goal.

I am appreciative of the fact that the managers have indicated it will be accepted. We have a substantial number of people fighting fires this year. We would like to turn it around and restore the areas that have been devastated by these fires and, I might add, that we all know about the devastation in Yellowstone and similar acreage all over the country.

We believe some of the seedlings developed under this program should be used in the areas where reforestation is possible following these terrible fires.

Mr. LUGAR. Mr. President, on our side of the aisle we commend the distinguished Senator from Alaska for a very important forestry provision and enthusiastically support his amendment.

Mr. LEAHY. Mr. President, this part-time tree farmer supports it also.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska [Mr. STEVENS].

The amendment (No. 2375) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I thank the managers of the bill. I just wish to raise the subject of the other amendment and I hope it will be discussed so that we can proceed with it. It also is a simple rationale.

In my State there are a series of Native corporations that own land that in other States might be owned in Tribal form or by individual Natives or Indians. Some of these areas are quite large because they are large tundra areas. We seek a forest stewardship incentive program for these people. Under the current program it is limited to those who own between 1,000 and 5,000 acres but the 1,000 and 5,000 acres in what we call the South 48 are entirely different from a half-million acres of tundra.

Their are still places where the tundra could support a forest if we had the help of the Federal Government to develop them for these Native people. My amendment would limit them to the same limit of any other landowner up to 5,000 acres. I am hopeful that the managers of the bill can explain that, and I will do my best to explain it, to the administration overnight so we might get it pursued tomorrow. I think it would be a very worthwhile program.

I might call to the attention of the Senate that these people now own almost 15 percent of my State. That area ought to be subject to the same kind of forest incentives that the balance of the country is.

Mr. LEAHY. Mr. President, the Senator from Alaska makes a good point. I will be happy to join in those talks with him tomorrow and see if we can get it cleared. As I said, I just felt, insofar as we were not going to finish tonight, the objection having been made by the administration, we ought to give them a chance.

Mr. STEVENS. Would the Senator have any objection to me putting that amendment in the RECORD so everyone would know what I am talking about?

Mr. President, I ask unanimous consent that the amendment be printed in the RECORD. I do not wish to propose it yet.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

At page 816 at the end of line 8 insert the following:

"Notwithstanding this paragraph, each Alaska Native corporation shall be eligible fo cost sharing assistance without the approval of the Secretary, provided the aggregate enrollment is not in excess of 5,000 acres.".

AMENDMENT NO. 2376

(Purpose: To make any provision relating to the recalculation of deficiency payment for the 1988 and 1990 barley crop years nondiscretionary)

Mr. LEAHY. Mr. President, I send an amendment to the desk on behalf of Mr. SYMMS and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. SYMMS, proposes an amendment numbered 2376.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

The amendment is as follows:

At the appropriate place in title IV, insert the following new section:

"SEC. 40. NONDISCRETIONARY AUTHORITY.

"Any provision of this Act relating specifically to the authority of the Secretary to adjust the payments due to producers of barley for the 1988 and 1989 crop years shall be nondiscretionary.".

Mr. SYMMS. Mr. President, because of the higher than expected national average barley price used to calculate the 1988 and 1989 barley deficiency payments, many barley growers ended up owing the Government back funds from their advanced payments. In some counties of Idaho, that repayment added up into the millions of dollars.

There has been an ongoing dispute over whether the inclusion of malt barley prices in that calculation was fair. Without addressing that debate, I have heard from the Department that, should Congress specifically address the question of the 1988 and 1989 repayment of barley deficiencies, it should be in the form of specific direction, and not merely discretionary authority. If Congress desires to have that payment recalculated, it should be weighed against the other expenditures of taxpayer funds that we intend to authorize, and not merely left to the Secretary to implement out of moneys that Congress has otherwise already earmarked.

My amendment does not authorize such repayment. But it does state that, should specific authorization for the repayment be incorporated into the bill, it shall not be discretionary, but rather, a specific instruction to the Secretary from Congress.

Mr. President, I thank the Chairman and the ranking member. I suggest we act on the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment?

If there be no further debate, the question is on agreeing to the amendment.

The amendment (No. 2376) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SYMMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2377

(Purpose: To establish a program within the Department of Agriculture for the eradication of pseudorabies in United States swine populations, and for other purposes)

Mr. HARKIN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Iowa [Mr. HARKIN], for himself, Mr. GRASSLEY, and Mr. DIXON, proposes an amendment numbered 2377.

Mr. HARKIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

The amendment is as follows:

On page 1081 of the bill, insert the new section:

SEC. 1947. PSEUDORABIES ERADICATION.

(a) FINDINGS.—Congress finds that efforts to eradicate pseudorabies in United States swine populations by the Department of Agriculture in cooperation with State agencies and the pork industry have a high priority and should be continued until pseudorabies is completely eradicated in the United States.

(b) ESTABLISHMENT OF PROGRAM.—The Secretary shall establish and carry out a program for the eradication of pseudorabies in United States swine populations.

(c) USE OF FUNDS FOR TESTING AND CONTROL OF DISEASES AND PESTS.—The Secretary shall ensure that not less than 65 percent of the funds appropriated for any animal or plant disease or pest eradication or control program administered by the Department of Agriculture shall be used for testing and screening of animals or plants and for other purposes directly related to the eradication or control of the animal or plant disease or pest.

(d) APPROPRIATIONS.—There are hereby authorized to be appropriated for each of the fiscal years ending September 30, 1991 through September 30, 1995, such sums as may be necessary for the purpose of carrying out the program established under this section.

Mr. HARKIN. Mr. President, I believe this amendment has been cleared on both sides.

Mr. President, pseudorabies is an acute, fatal disease affecting most species of domestic and wild animals. It is especially damaging to swine, in which it causes a variety of problems including death in newborn pigs and animals of all ages, and fetal death and abortion in pregnant animals.

Pseudorabies poses a serious economic threat to our Nation's pork producers. Overall, it has been estimated that the annual cost of pseudorabies to the pork industry is approximately $60 million a year. The annual cost of pseudorabies to the Iowa port industry alone is estimated to be well in excess of $20 million.

Pseudorabies eradication efforts have begun, relying on a cooperative program involving State and Federal funds and veterinarians and pork producers themselves, who are involved in helping to guide and carry out the program at all levels. Iowa pork producers have demonstrated that pseudorabies can be eradicated if producers are committed to the effort and if adequate resources are available for the task.

This amendment recognizes the importance of efforts to eradicate pseudorabies in U.S. swine populations and specifically authorizes and directs the Department of Agriculture to establish and carry out a program of pseudorabies eradication.

The amendment also provides that the Department of Agriculture shall use not less than 65 percent of the funds appropriated for animal and plant disease or pest eradication or control programs for testing and screening of animals or plants and for other purposes directly related to the eradication or control of the disease or pest.

This provision is included based on my examination of the current pseudorabies eradication program at USDA, which showed that too large a share of the funds appropriated for the program is being spent on administrative, overhead, and indirect expenses. Too little money is getting out to the States to assist in the actual eradication work.

Under this amendment at least 65 percent of the program funds would get to the State level to help defray the costs of testing, screening, and other items of expense directly related to the eradication or control of pseudorabies. This provision is very important in order to achieve more effective use of Federal dollars in the pseudorabies eradication effort.

Mr. President, I urge my colleagues to support this amendment and the eradication of this very serious threat to the U.S. pork industry.

Mr. President, I am joined in offering this amendment by Senator GRASSLEY and Senator DIXON.

I understand it has been accepted. I appreciate the managers of the bill accepting the amendment.

Mr. President, I yield the floor.

Mr. LUGAR. Mr. President, I would like to ask a point of inquiry as to

whether this is the same pseudorabies amendment that was offered and adopted by the Senate earlier this evening?

The PRESIDING OFFICER. The Senator from Indiana is correct. It appears to be an identical amendment.

Mr. LUGAR. Mr. President, in view of that I ask a point of clarification, because the Senator from Iowa was perhaps not present during that period of time. If that is the case, would the appropriate parliamentary procedure be to withdraw the amendment at this time?

Mr. HARKIN. Mr. President, I would like to take a look at the earlier amendment that was accepted to make sure it was the same as this one.

Mr. LUGAR. Mr. President, I suggest the absence of a quorum while the Senator examines the amendment.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HARKIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARKIN. Mr. President, I examined the amendment that was offered earlier. I had not been aware the managers had presented that earlier. I had one little question as to where it was inserted on the bill and I was told by the Parliamentarian it has no effect on the bill itself. I appreciate the managers offering it earlier, and I ask to withdraw the amendment.

The PRESIDING OFFICER. The Senator from Iowa has the right to withdraw his amendment and it is withdrawn.

The amendment (No. 2377) was withdrawn.

PLANTING FLEXIBILITY

Mr. BOND. Mr. President, throughout our debate on the Food, Agriculture, Conservation and Trade Act of 1990, we have heard many eloquent remarks concerning the need to provide farmers with additional planting flexibility. I too, have heard a great deal about flexibility; many Missouri farmers have expressed a strong desire to have greater latitude in making production decisions.

The existing myriad commodity programs make true planting flexibility an elusive goal. Efforts to give producers the ability to respond to agronomic or economic signals are constrained by comparisons of program crops to nonprogram crops, target prices to loan rates, and even marketing loans to nonrecourse loans. In the end, it has proven very difficult to balance the benefits of producing different crops.

My State of Missouri has been blessed with a very diverse agricultural sector and our economy is dependent upon a strong agricultural economy. Programmatic changes which increase producers' ability to respond to market signals benefit our economy. However, artificial incentives to produce a certain commodity lead to unfavorable market distortions.

The flexibility provisions approved by the Agriculture Committee are a step in the right direction. Producers will have limited ability to shift among program crops, nonprogram crops, and oilseeds. Flexible acres are eligible for price-support loans. Other provisions allow for zero-certification and the ability to plant oilseeds on a portion of the required acreage set-aside.

Last night, the Senate debated a flexibility amendment offered by the distinguished Senator from Iowa [Mr. GRASSLEY]. The amendment expanded upon the flexibility provisions adopted earlier by the Agriculture Committee. The amendment allowed for flex-acres to maintain deficiency payments and also permitted program crops to be grown on historic oilseed plantings.

As with most amendments, there were legitimate arguments on both sides. Analysis performed by the U.S. Department of Agriculture indicated the amendment, if adopted, would result in relatively small shifts between crops. The amendment did, however, attempt to bridge the existing gap between the corn and soybean programs. Producers who do not have a program crop acreage base remain eligible for the Agriculture Committee-passed marketing loan program.

Mr. President, I think it is important to note the concerns which Missouri cotton and rice producers have with regard to planting flexibility. I understand, and share, their concern over potential fluctuations in both production and price.

After a great deal of thought I decided to support the Grassley flexibility amendment. I did so pledging to monitor both its implementation, and effects, very closely. In the vent that the Grassley amendment had been approved, and even with the committee-passed flexibility provisions, I will not hesitate to seek modifications which rectify artificial supply and demand distortions. Our intent was to improve producers' ability to respond to market signals, not increase their reliance on Government programs.

Mr. LUGAR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DURENBERGER. Mr. President, I ask unanimous consent the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2378

Mr. DURENBERGER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Minnesota, [Mr. DURENBERGER], proposes an amendment numbered 2378.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

SECTION 1. (a) FINDINGS.—The Congress finds that—

(1) Federal policy, as reflected in the Food, Agriculture, Conservation and Trade Act of 1990, to protect the Nation's wetlands and ground water from loss or degradation is of vital importance to American agriculture and to the country as a whole;

(2) Wetlands reduce floods, improve ground and surface water quality, and provide recreational areas and habitat for fish and wildlife;

(3) Ground water provides drinking water to 50 percent of Nation's population or 117 million Americans, and that 97 percent of Americans in rural areas rely on untreated ground water for their household needs;

(4) Government regulations protecting and preventing ground water from contamination and wetlands from loss or degradation have been developed piecemeal by several different Departments and agencies and as a result are complex and confusing often leaving landowners uncertain as to their duties and obligations and the resources at risk;

(5) There is a need for a national strategy that coordinates and stengthens the nation's ground water and wetlands protection efforts; and

(6) Key conservation provisions in the Food, Agriculture, Conservation, and Trade Act of 1990 go a long way toward protecting wetlands and ground water, and any new legislation involving wetlands and ground water protection should recognize these gains.

(b) SENSE OF THE CONGRESS.—It is the sense of the Congress that—

(1) Federal agricultural policy should reflect environmental policy and concerns;

(2) Wetlands loss or degradation and ground water contamination should be discouraged by Federal, State and local governments; and

(3) The upcoming reauthorization of the Federal clean water programs should—

(A) emphasize a policy designed to prevent wetlands loss and ground water contamination.

(B) provide consistent and understandable regulations that will give landowners greater certainty as to their duties and responsibilities for protecting wetlands and ground water; and

(C) strengthen the Nation's ground water and wetlands protection laws.

Mr. DURENBERGER. Mr. President, the Agriculture Committee has done, I think, what many people think is a very, very special job on the issue of wetlands, struggling with the swampbuster provisions of the 1985 bill, struggling with some of the imple-

mentation of swampbusters, struggling with the conservation reserve program, and trying to draw within the jurisdiction of the committee a balance, if you will, in both of these areas beween wetlands preservation, the traditional American orientation toward agricultural production, and to try to help begin the process of setting a new and a sensible course for wetlands in America.

The State that I represent, the State of Minnesota, has lost more than half of its original 18 million acres of wetlands. We are probably one of the States in the country that the national policy up until this last decade has hurt the most, in terms of ground water quality, in terms of a lot of other of the natural amenities of rural America.

So, Mr. President, I am pleased that the amendment which I am presenting this evening has been worked over closely with the chairman and the ranking member of the Agriculture Committee.

As the amendment states, the key conservation provisions in the farm bill go a long way toward protecting wetlands and groundwater. This amendment in addition, though, urges that any new legislation involving wetlands and groundwater protection recognize those gains but continue the process of defining a new national direction so that farmers in this country who are our original environmentalists, if you will, can feel that they are playing an important role in developing wetland and groundwater protection in the future.

There is no question but what there is a need for a coordinated national strategy that prevents groundwater contamination and wetlands loss. Such a strategy will provide landowners needed regulatory certainty and protect those precious resources. This amendment, a sense-of-the-Senate resolution, is a very important first step toward that goal.

Mr. President, in recent months I have toured Minnesota listening to my constituents' concerns about wetlands and ground water. As you can imagine, these issues are very important to Minnesotans since the State has lost over half of its original 18 million acres of wetlands. And, because 90 percent of the State's population depends on ground water for their drinking water.

On my tours I saw landowners preserving and enhancing their wetlands or protecting their drinking water sources from contamination. Experts showed me the latest scientific technologies on ground water protection and wetlands mitigation.

Yet, one thing I heard from landowner and expert alike, is that Federal ground water and wetlands regulations have been developed on a piecemeal basis, by different Departments and agencies and, as a result, are complex and confusing, often leaving landowners uncertain as to their duties and obligations. Unfortunately, this uncertainty places these precious resources at risk.

Numerous Federal agencies have an interest in how a landowner cares for wetlands. The Environmental Protection Agency, the Agricultural Stabilization and Conservation Service, the U.S. Army Corps of Engineers, the Soil Conservation Service, and the U.S. Fish and Wildlife Service all have a significant piece of the wetlands agenda. There is a comparable list for ground water. The EPA, SCS, ASCS, and U.S. Geological Survey all have duties protecting ground water. And, Mr. President, this ignores all the applicable State laws.

It is clear to anyone who looks at these issues or who must handle constituent complaints, that Americans want to obey the law, they want to protect wetlands and ground water, but get frustrated with the unwieldy and often inconsistent regulations.

Thus, Mr. President, today I am offering an amendment to the 1990 farm bill that, in resolution form, will take the Nation an important step closer to a comprehensive national strategy to prevent ground water contamination and wetlands loss. My goal is to set the ball moving toward coordinated Federal protection laws so that landowners, farmer and city dweller like, have greater certainty as to their responsibilities, and most importantly ground water contamination and wetlands loss.

In drafting this amendment I worked very closely with the chairman and ranking member of the Agriculture Committee. Their input was very useful, because as my amendment states, the key conservation provisions in the farm bill go a long way toward protecting wetlands and ground water. My amendment urges any new legislation involving wetlands and ground water protection to recognize these gains.

Mr. President, protecting the Nation's wetlands and ground water from loss or degradation is of vital importance to the country. Wetlands reduce floods, improve ground and surface water quality, and provide recreational areas and habitat for fish and wildlife. Ground water provides drinking water to 50 percent of the Nation's population or 117 million Americans—97 percent of Americans in rural areas rely on untreated ground water for their household needs.

To conclude, there is a need for a coordinated, national strategy that prevents ground water contamination and wetlands loss. Such a strategy will provide landowners needed regulatory certainty and protect these precious resources. My amendment is a very important first step toward this goal.

I am very grateful to my colleagues on the Agriculture Committee, especially the leadership of that committee, for their willingness to accept this amendment.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. LUGAR. Mr. President, on our side we very much appreciate the leadership of the distinguished Senator from Minnesota in the areas of conservation generally, and in the specific areas of ground water and wetlands protection. In this amendment he has made a most useful suggestion for a national ground water and wetlands protection strategy.

Without outlining the entirety of the Senator's amendment, I would say it appears to this Senator to be very comprehensive and very helpful in guiding our understanding and our thinking on these issues. So we enthusiastically support the amendment.

The PRESIDING OFFICER. Is there further debate?

Does the Senator from Vermont seek recognition?

The Senator from Vermont.

Mr. LEAHY. Mr. President, I understand there are some drafting difficulties with this. I do not have objections to the amendment, but I understand there are some problems.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I ask unanimous consent it be in order to modify the amendment of the distinguished Senator from Minnesota by adding at the beginning of it these words:

At the end of title XII, add the following:

And then with the rest following as it is in the amendment offered by the distinguished Senator.

The PRESIDING OFFICER. The Senator from Minnesota has the right to modify his amendment.

Mr. DURENBERGER. Mr. President, I suggest the modification stated by my colleague from Vermont.

The PRESIDING OFFICER. The amendment is so modified.

The amendment (No. 2378), as modified, is as follows:

At the end of title XII, add the following:

SECTION 1. (a) FINDINGS.—The Congress finds that—

(1) Federal policy, as reflected in the Food, Agriculture, Conservation and Trade Act of 1990, to protect the Nation's wetlands and ground water from loss or degradation is of vital importance to American agriculture and to the country as a whole;

(2) Wetlands reduce floods, improve ground and surface water quality, and provide recreational areas and habitat for fish and wildlife;

(3) Ground water provides drinking water to 50 percent of the Nation's population or 177 million Americans, and that 97 percent of Americans in rural areas rely on untreated ground water for their household needs;

(4) Government regulations protecting and preventing ground water from contamination and wetlands from loss of degradation have been developed piecemeal by several different Departments and agencies and as a result are complex and confusing often leaving landowers uncertain as to their duties and obligations and the resources at risk;

(5) There is a need for a national strategy that coordinates and strengthens the Nation's ground water and wetlands protection efforts; and

(6) Key conservation provisions in the Food, Agricluture, Conservation, and Trade Act of 1990 go a long way toward protecting wetlands and ground water, and any new legislation involving wetlands and ground water protection should recognize these gains.

(b) SENSE OF THE CONGRESS.—It is the sense of the Congress that—

(1) Federal agricultural policy should reflect environmental policy and concerns;

(2) Wetlands loss or degradation and ground water contamination should be discouraged by Federal, State and local governments; and

(3) The upcoming reauthorization of the Federal clean water programs should—

(A) emphasize a policy designed to prevent wetlands loss and ground water contamination.

(B) provide consistent and understandable regulations that will give landowners greater certainty as to their duties and responsibilities for protecting wetlands and ground water; and

(C) strengthen the Nation's ground water and wetlands protection laws.

The PRESIDING OFFICER. Is there further debate?

If there be no further debate, the question is on agreeing to the amendment of the Senator from Minnesota.

The amendment (No. 2378), as modified, was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

USE OF PESTICIDES ON MINOR AGRICULTURAL CROPS

Mr. INOUYE. Mr. President, I am pleased to be an original cosponsor of this important legislation designed to manage the use of pesticides on minor agricultural crops.

All of Hawaii's agricultural industries are considered minor crops. Even sugar, our largest crop in terms of acreage and value, is considered a minor crop.

Mr. President, many of these industries are involved in pesticide registration for use on their crops. It is not uncommon for such a process to span over a period of 3 to 5 years. What concerns me is what these farmers do in the interim while they await approval. Many of them are small family farmers that rely on the sale of their crops to survive.

Chemical pesticides are one means of controlling pests. Other techniques involving biological control and management practices to break the life cycle of pests are also essential. These strategies, referred to as integrated pest management, are the long term approaches to pest control.

I believe, that through proper regulation, we can ensure that chemical application on minor crops continues to maintain standards that are environmentally sound while ensuring effective pest control and producing hardy and safe agricultural products. In all candor, I believe that this amendment will effectively accomplish this important objective.

In closing, I would like to acknowledge the assistance of the staff of the Senate Agricultural Committee in the drafting of this amendment. Further, I would like to acknowledge the major role that my late colleague, Senator Spark Matsunaga played in the drafting of this legislation.

SECTION 209, TITLE XI, THE FARMER-TO-FARMER PROGRAM

Mr. KERRY. Mr. President, last year, Chairman LEAHY and I discussed the initiation of a Farmer-to-Farmer Program to Poland during consideration of the Support for East European Democracy [SEED] legislation. Funded in the Foreign Assistance Act for fiscal year 1990, the program is currently underway and implemented by Volunteers in Overseas Cooperative Assistance [VOCA]. To date, 23 farmer volunteers have assisted in the revitalization of farmer cooperatives and building new private agribusiness. In Poland, these unpaid American advisers have helped establish new private agricultural cooperatives, created marketing and processing facilities, privatized State-owned agricultural enterprises, improved dairy production and milk handling, and strengthened rural cooperative banks.

Unlike many of our other assistance programs to Poland, the VOCA Farmer-to-Farmer Program is in full stride and delivering not only essential technical advice, but bringing the goodwill of the American people to Polish farmers during this time of great economic stress.

One of these volunteers, Robert Foster, is a Vermonter who is an officer of Agri-Mark, Inc., a large dairy cooperative headquartered in Lawrence, MA. He is the first dairy farmer to visit Poland to help its dairy and grain farmers set up an American-style farmer marketing cooperative. Progress in Poland, he says, will take time. But he also notes that the country is running out of time as its economic situation worsens. He is hopeful that something can be done in the very short future to provide a better standard of living for the Polish people. I am inserting in the RECORD at the end of this statement a recent article in the Journal published for the dairy farm families of Agri-Mark, Inc.

As we consider the 1990 farm bill, I wanted to encourage my colleagues to support a small provision in the legislation which continues the Farmer-to-Farmer Program and expands its authority to work in Eastern Europe. This program sends experienced American farmers and agriculturalists to work hand-in-hand with farmers overseas. Administered by a small VOCA staff, the program is cost-effective and people-oriented in helping others help themselves. Through this and other VOCA programs, 800 volunteers have worked in 87 developing countries. They have passed along American know-how and technology at the request of farmer organizations who want to adopt new practices and technologies and demonstrate a willingness to implement the recommendations by the short-term American volunteers.

The Farmer-to-Farmer Program should remain nongovernmental, grassroots, and volunteer-based program through Volunteers in Overseas Cooperative Assistance, rather than become another government-directed assistance effort.

I want to encourage my colleagues to support this excellent program in S. 2830.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE SEARCH FOR CONTROL

(By Douglas DiMento)

The eastern European country of Poland has recently undergone drastic changes as its political and economic systems, once so closely intertwined, try to make the difficult transition from Communism to a more democratic, free-market structure. In September of 1989 the country's first non-Communist led government since World War II, with many ofificals being recently elected to national positions, took office with promises of sweeping reforms designed to improve the quality of life for the country's people.

Last month, on May 13, more government officials competed for office through elections, largely on the state and local level. The long-term plan is to replace Poland's inefficient, centralized economy with one which is more market oriented.

The price the people are paying for this switch in economic and political philosophy is high. Both the public and private sectors, historically reliant on the state to provide for them, are now forced to develop their own skills at finding a market for the manufactuerd or agricultural products they produce. Inflation in Poland during the past year has varied between 500% and 1000% per months, recently stabilizing at 10%. Consumer prices have skyrocketed, with Poles spending 75-80% of their income on food. The average Polish worker makes the U.S. equivalent of $52.00 per months.

The country's farmers are, perhaps, in a more precarious position than many of its people. The government has eliminated price controls on food and other items and is depending on its farmers to increase production. At the same time, subsidies for farm goods and equipment have ended, causing prices of those materials to be sold at near free-market value. Since last summer tractor prices have doubled, electricity prices have quadrupled, and fertilizer and pesticide prices have increased ten times over. Farmers are therefore reluctant to heed the government's wishes and expand given the rapid rise in prices and considerable uncertainty about the long-term outlook for farm equipment and prices.

Many of the country's farm families, representing one-third of Poland's 38 million people, believe that their government is trying to force a farm shake-out and drive inefficient farmers out of business. They may be right. The size of the average Polish farm is 15 acres and provides only enough food to feed three people—figures the government wants improved.

The country is searching for answers to its economic and social problems. But, after working for years within a system which stressed working for the good of the state instead of one's self, marketing concepts are very difficult for the people to understand. Educating the Poles about these concepts is complicated by the fact that there are often not words within their language which accurately convey the same meanings which are attached to those concepts in the U.S.

The end result is that Poland's people are now seen as pioneers of a new era. The political and social frameworks presently being formed are being carefully crafted for future generations.

U.S. VOLUNTEERS SENT OVERSEAS

It was Agri-Mark member Robert Fosters good fortune to find himself right in the middle of this chaos. He accepted an invitation by the Volunters for Overseas Cooperative Assistance (VOCA) to be the very first U.S. dairy farmer to visit Poland to help its dairy and grain farmers set up an American-style farmer marketing cooperative. He would work, along with one other volunteer, as a consultant to Rural Solidarity, a Polish political organization of indepdendent farmers which is trying to help the country's agricultural sector make the transition to a new Poland.

Foster's visit would be used to break ground for a wave of American volunteers to this European country. So, in late February of this year, he set out, along with six other specialists, for a three week stay in Poland after two days of orientation in Washington.

MISSION WOULD BE DIFFICULT

Foster's mission, right from the start, was thought to be a difficult one. Poland's farmers were known to be unhappy with the Communist-style cooperatives. Control of the Communist form of cooperative flows from the top of the organizational structure downward just the opposite of control of American cooperatives like Agri-Mark where farmers, through their elected representatives and Resolution Committee, set general cooperative policy for the Board of Directors and management staff to follow.

In Poland the state or the Communist party makes the rules for the people to follow. The people at the top set policy which is "good for the people" and those people are strongly encouraged to abide by those policies.

"Individualism was discouraged in the past," notes Foster. "All of the country's rules and regulations were geared towards making it difficult for someone who did not want to conform with Communist thought."

Even though faced with a rapidly changing political environment, Foster found the country's people to be very kind and eager to learn from what he had to say. During his first three days in Poland he found himself meeting government officials and other dignitaries. Being one of the first American dairy farmer and cooperative officials to arrive in their country with the express purpose of helping farmers through farmer-to-farmer contact made for a very warm welcome.

Foster travelled to southeastern Poland with Roy Wiebe, the retired CEO of Western Farmers Supply Cooperative from Forest Grove, Oregon. Together they worked with Rural Solidarity officials and travelled throughout the Rzeszow region, a heavily agricultural area in southeastern Poland which got its name from the city of Rzeszow, population 126,000. It was here that Foster and Wiebe were based, taking day trips arranged by Rural Solidarity to speak to farmers and community leaders throughout the region.

VISITED SEVERAL DAIRY FARMS

Polish dairy farms are quite a bit different from their American counterparts. They are more diversified, with each farmer raising chickens, pigs, produce, and fruits such as raspberries. The average dairy farmer milks only four or five cows housed in a stanchion-like setup. Only one of the seven dairy farms Foster visited had water bowls. On the other farms each dairy farmer carried buckets of drinking water from his courtyard well to his cows several times a day.

"When they asked me what they could do to increase milk production, one of the first things I told them was that their cows needed more water," says Foster. "After all, milk is over 75% water. Therefore, water is extremely important."

He noted, however, that good water supplies are hard to find in Poland. Most of the rivers and streams he saw seemed heavily polluted from human and industrial waste and years of heavy agricultural and other chemical use. The quality of water, according to Foster, is very suspect in his mind. He was happy to find that Polish farmers recognize that they have a major environmental problem and are searching for ways to solve it.

Most Polish dairy farmers use milking machines to harvest milk from their small herds two or three times a day. Once milking is completed the milk is put into various size cans which are left by the roadside, rain or shine, for pick-up and delivery to a processing plant.

Foster visited the office of one dairy farmer cooperative and was told that only one-third of its members refrigerate milk on the farm in ordinary refrigerators. All of the other dairy farmers he met during his visit just milked the cows, set the milk by the roadside, and hoped that it would be picked up some time that day.

"The quality of milk appears to be quite poor in Poland," admits Foster. "Because of the poor milk quality they are also limited as to what type of dairy products they can manufacture from the milk."

This Vermont farmer tried to impress upon Polish farmers the need to produce better quality milk and the importance of refrigeration. He saw the poor quality of the milk supply as the largest single obstacle in the way of successful milk marketing by the country's dairymen.

Foster visited a Polish/Soviet style dairy marketing cooperative which had over 5,000 members. Its largest producer shipped 200 pounds of milk per day to the co-op. The average farmer in this cooperative had a herd average of roughly 10,000 pounds, and it is interesting to note that this co-op had milk quality standards and premiums for its members.

These farmers receive premiums if the raw count of the milk they shipped to the co-op is less than 20 million, and are penalized if their milk has a raw count of more than 60 million! For comparison purposes, AgriMark's milk quality standards mandate that the raw count of members' milk must not exceed 50,000 and members receive a premium for milk with a raw count of 10,000 or below.

Milk prices received by Polish dairymen vary between a U.S. equivalent of $15.00 to $16.00/cwt. Although this may seem high, one has to remember that inflation in this country has been rampant.

Foster noted that the average size of the farms he visited was about 10 to 14 acres. Some of the land was used for pasture and the rest for crops for both the farm animals and the table. Approximately 95% of the dairy cows are artifically bred. This may be due to the fact that the state veterinarians provide the service for little or no cost. While genetics are important, Foster feels that improved management practices probably would have a greater economic impact.

"When I visited what would be equivalent to one of our Cooperative Research Centers, I was told that I was crazy if I thought that first calving at 24 months and herd averages of 21,000 pounds were possible." says Foster. "When I started talking to them about our herd (Foster Brothers Farm milks 330 cows with a herd average over 21,000 pounds), I almost got the impression that they thought I was stretching the truth."

FACE PROBLEMS SIMILAR TO U.S. DAIRYMEN

Polish farmers are quick to point out that the price of milk has not increased as much as their expenses have risen, and were looking for Foster and Wiebe to help them find markets for their milk. As mentioned, Foster saw milk quality as a major marketing problem. He also had to repeatedly explain to the Polish farmers that he was there to provide technical assistance and guidance for them—not financial backing.

"One of the first questions they asked wherever I went was 'What kind of money do you have for us?' " says Foster. "I tried to impress upon them that if Americans were to provide them with money there would be strings attached. Therefore, I encouraged them to find ways of helping themselves, ways of identifying and solving marketing and other problems on their own."

Foster says that the dairy farmers, co-op managers, politicians and government officials did not understand financial balance sheets, niche marketing, or market demand. They also had no idea what a lease was as land, property, or machinery has never been leased in their country since everything was always provided by the state.

"I saw leasing as a good way for many of the farmers to get together and work on some of their problems," says Foster. "If they formed an American-style dairy cooperative they could lease trucks for picking up milk, dairy processing equipment, and

maybe some additional land for growing the crops needed for increased milk production. They had trouble understanding many marketing concepts and ideas we take for granted in the U.S."

INTERESTED IN COOPERATIVE STRUCTURE

Since many of Poland's recent problems have been caused by the switch from Communism to a market economy, the large majority of the farmers that Foster met had questions related to marketing.

Still, the farmers were very interested in what Foster had to say about the structure of American cooperatives and listened carefully when he discussed his experiences with Agri-Mark.

"They asked excellent questions," reports Foster. "I was very impressed with their desire to listen and learn. Much of what I had to say was new to them, but I think that it helped to open their eyes to a world beyond their own village or region."

During a talk before 70-90 farmers who belonged to a cooperative, Foster related that when the co-op manager spoke he was loudly booed by the audience. The farmers, it seem, felt that the manager was running an inefficient and ineffective cooperative. This manager then put Foster on the spot by asking him what he would do if he was plant manager.

Foster thought for a second, knowing that what he would say was going to have a great impression on his audience. Then he began to discuss ways in which these farmers could work to operate a better cooperative for both the Polish farmer and consumer.

He encouraged farmers to refrigerate their milk to help improve milk quality. Since their milk was refrigerated, the co-op would not have to pick it up everyday and could cut transportation costs significantly. It then followed, said Foster, that the co-op could produce more, better quality products for consumers while also saving money. The extra money could then be invested in the processing plant to further reduce processing costs and improve milk quality. Because of the cost savings and the better quality products that could be marketed effectively, the ultimate result would be more money returned to the farmer.

"Most agreed that everyone had a part to play in making for a better tomorrow," he says.

The largest single idea which this Agri-Mark member tried to instill in the Polish farmers was that American cooperatives work from the bottom up rather than from the top down. The co-op exists to service its member-owners. Using Agri-Mark as an example of a regional cooperative (many Polish cooperatives are also regional), Foster explained how cooperative officials are elected and how policy is formed. He stressed to them the importance of electing a Board of Directors who would then hire a professional general manager to run the business of the co-op.

The topic of hiring of a general manager provoked a lot of questions from the audience. Since many of the Polish/Soviet co-ops had a director/general manager who was also a farmer, these dairymen were unsure of what to look for. "What characteristics should we look for in a general manager?", they asked. "What type of personality should he possess?"

Look for a person who is honest, sincere, and understands financial records and how they should be used to manage the co-op, they were told. Look for someone who understands the market and the potential for new products.

Polish farmers hope that an American-style cooperative system will provide them with a steady market and a higher price for their milk—much like their U.S. counterparts.

Many of the old centrally operated cooperative structures are being changed and downsized, though in Poland's horticultural industry member-owned cooperatives thrived. Somehow they missed the centralized planning which dominated many of the other agricultural sections.

"The apple orchards that I and other members of the volunteer team visited were on par with anything here in the U.S.," reports Foster, "Most of the orchards had dwarf and semi-dwarf trees. Many used U.S. varieties. It was interesting to discover that there was an active on-the-job training program in the U.S. for Polish orchardists."

"When I asked how they harvested their typical two or three acre plots of grain, I was told that all they had to use to do the job were huge Russian combines of which I saw five or six," says Foster. Since most of the resources went to large collective farms in the past, small scale agricultural machines were not developed and produced. Thus farmers either had to farm by use of horse and plow or join a collective farm if they wanted to utilize the machinery. Now, with the movement towards a free-market system, the pressure to join collective farms has lessened. There is still a need for small-scale farm machinery and parts but the new market oriented economy should move to fill that demand.

"The bad news is that oftentimes the old cooperatives of the past 40 years have been poorly managed and top heavy," Foster notes. "But the good news is that they know they need to change their cooperative structure and are hoping that the American form of a cooperative will work better for them."

Polish farmers were eager to learn about U.S. cooperatives and management practices. They were also eager to learn all they could about the way U.S. farms operate. When Roy Wiebe told a group of Polish farmers that hired help on U.S. farms is often paid $5.00 to $7.00 per hour plus some sort of living arrangement, several people in the audience jumped out of their chairs, anxious for Roy to find work for them in the U.S. Though we smile at reports of this meeting, the economic situation in Poland is serious. Foster feels that U.S. dairy farms, facing a labor shortage, may be able to hire some of the Polish farmers to work in the U.S. for the benefit of both parties.

"American dairy farmers need labor, and the Poles need the training and work experience," says Foster, who is working to develop on-the-job training programs for Poles on U.S. farms.

The experience of travelling to Poland and working with Polish farmers was one which Robert Foster will never forget. Though it was a sacrifice of time spent away from his own farm, he feels fortunate that the other members of his family farm operation were able to shoulder the additional burden while he was away. And now, back in the U.S., Foster feels very lucky to be a citizen of the United States of America.

"So many things which we take for granted are not available to people in other countries," he says. "You hear about it but what it really means doesn't sink in until you see it for yourself."

Progress in Poland, says Foster, will take time. But he also notes that the country is running out of time as its economic situation worsens. He is hopeful that something can be done in the very short future to provide a better standard of living for the Polish people.

"Private farms will continue to exist and hopefully be structured and modernized. Ideally, cooperatives which are member owned and directed will replace the old structure and seize new marketing opportunities for the Polish farmers," says Foster.

All Agri-Mark members can be proud of the fact that one of their fellow cooperative members helped to revitalize the cooperative movement in Poland and worked to put control of cooperatives in the hands of the farmers rather than the government.

TALLADEGA NATIONAL FOREST

Mr. HEFLIN. Mr. President, in the early 1920's, a native of Massachusetts named Benton MacKaye developed the idea for the Appalachian Trail, a hiking trail running from Georgia to Maine. At the same time, Benton MacKaye proposed that a spur trail be built from north Georgia into the mountains of east Alabama.

The Appalachian Trail was built and is now one of the greatest recreational assets in the United States. However, the spur trail into Alabama was never built.

Sixty years later, in 1985, the Alabama Hiking Association began working on a plan to complete that long proposed spur trail by connecting the 100 mile-long Pinhoti Trail in the Talladega National Forest of east Alabama to the Appalachian Trail.

The efforts of the Alabama Hiking Association have led to a unique opportunity to expand the Talladega National Forest to the northeast, along the beautiful mountain ridges that lie along the proposed route for the trail.

To people in Alabama and the Southeast, this opportunity is as significant as the well publicized efforts to expand the White Mountain National Forest of New Hampshire and Maine. I fully support the effort to expand the Talladega National Forest. I support it because it is important to the plan to link Alabama to the Appalachian Trail. I also support it because the expansion will protect some of Alabama's most beautiful mountain ridges and because the expansion will provide a much needed addition to the public hunting lands in a State where so many people enjoy hunting.

Therefore, I have included in the farm bill, language to expand the purchase boundary of the Talladega National Forest. This language is necessary to make it absolutely clear that Congress intends for the U.S. Forest Service to utilize the $3 million that have been previously appropriated to expand the Talladega National Forest by purchasing land along the ridges where the proposed trail will run.

I want it to be clear that Congress intends that the purchase boundary of the Talladega National Forest should be expanded up to U.S. Highway 278 in southern Cherokee County and that the expansion boundaries should in-

clude Oakey Mountain, the Terrapin Creek Valley north of Oakey Mountain, Big and Little Tank Ridge, Wilson Ridge, Maxwell Gap, Augusta Mine Ridge, Lanie Gap, Lanie Hollow, Wolf Ridge, Rock Quarry Mountain, High Point, and the part of Davis Mountain that lies south of U.S. Highway 278. By further explanation, it is our intent that the expansion include the physical features set out above plus the following: the north half of section 34, Township 12 south Range 11 east—between the north end of Beecham Lake and the Cherokee County line—all of section 27, section 30, section 31 and section 33 in Township 12 south, Range 11 east, and all of section 4, Township 13 south, Range 11 east.

This is an important project for Alabama. I would like to thank my colleagues for supporting this most worthwhile project and for helping us expand the Talladega National Forest.

HEFLIN-MC CONNELL RURAL DEVELOPMENT AMENDMENT

Mr. CONRAD. Mr. President, I am pleased to rise today to join Senators HEFLIN and MCCONNELL in introducing a rural economic development amendment to the farm bill.

Last year I proposed the idea of a Rural Development Task Force to Senator MITCHELL. The Senate leadership welcomed that suggestion, and 33 Senators joined together in a broad bipartisan show of support for rural America.

This show of support could not come at a better time. The needs of rural America have been neglected for far too long. Rural America is facing severe economic decline. Unemployment, underemployment, poverty, and outmigration are increasingly serious problems in rural counties throughout the Nation.

Simultaneously, rural areas have faced declining support from the Federal Government. Rural development programs were cut 70 percent during the decade of the 1980's. We can no longer afford to lose the people who are leaving our rural areas because they fear those areas have few opportunities to offer them.

The mandate for action is clear. The Federal Government can help. It is time to look to the future and begin investing in rebuilding rural America. This legislation is a start. Authorizing $300 million of assistance cannot address every rural development need, but the provisions of this amendment will help promote rural recovery.

Most rural areas lack access to resources that would enable them to diversify their economic base. From discussions I have had with North Dakotans, I have learned the problem is not only the cost of capital, but its availability.

I believe it is time Congress acts to address the problem of inadequate capital for rural small business. To meet this objective, last May I introduced the "Rural Investment Fund Act of 1989," which is incorporated in this amendment.

This legislation creates a Rural Business Investment Fund to provide lines of credit to local, regional, and State entities for the capitalization of revolving loan funds that are matched by other sectors. These revolving loan funds will help compensate for the lack of private investment in rural communities and help create job opportunities.

In addition to investing in job creation, this amendment calls for the advancement of telecommunications for our communities, and the rebuilding of our rural water and sewer systems. It sets the stage for greater coordination of development efforts conducted at the local, State, and Federal level. It also encourages partnerships between the public and private sectors.

Through these partnerships we can start successfully addressing the challenges facing rural America. We can stop the brain drain of our young people from rural towns. We can transform ghost towns into robust communities.

I urge my colleagues to support this amendment.

MORNING BUSINESS

Mr. LEAHY. Mr. President, I now ask unanimous consent there be a period of morning business with Senators permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

VISIT OF THE LATVIAN PRIME MINISTER

Mr. BYRD. Mr. President, on May 4, 1990, the freely elected legislature of the Republic of Latvia reasserted that country's independence from the Soviet Union after 50 years of occupation. Today I want to pay tribute to two individuals who were instrumental in the Latvian drive for free elections and the subsequent declaration of independence. Mr. Ivars Godmanis was elected Prime Minister by the Latvian Parliament on May 7, and is making his first official visit to our country this week. Accompanying the Prime Minister is the Foreign Minister, Mr. Janis Jurkans.

Prime Minister Godmanis is an educator by trade. He holds degrees in both physics and mathematics and was a senior instructor at the University of Latvia. He has been a leader in the Popular Front of Latvia, the largest of the grass-roots independence movements. Mr. Godmanis coordinated nationwide election activities for last December's local elections. Those elections laid the groundwork for the free parliamentary elections in March of this year. After being elected to the Parliament as a Deputy, he was selected Chairman of the Popular Front faction, and then in May he was chosen Prime Minister. Before being selected as Foreign Minister, Mr. Jurkans held numerous administrative posts in the capital city of Riga and also taught at the University of Latvia. He has a degree in English language and literature and served as the cochairman and senior adviser of the Foreign Relations Committee of the Popular Front of Latvia.

I consider it to be a pleasure to welcome these two courageous individuals to the United States and to the Senate tomorrow.

We all know the history of how the three independent and democratic countries of Latvia, Lithuania, and Estonia were illegally annexed by the Soviet Union. This summer marks the 50th anniversary of that forced annexation. It was 50 years ago that Stalin implemented the secret Molotov-Ribbentrop Pact and stole the freedom of the Baltic people. The invasion, deportations, forced labor, and concentration camps claimed the lives of one-third of the population of the Baltic nations. Now the brave people of those nations have started down the road to independence and we must do what we can to help and encourage them.

During the five decades since the tragic events of 1940, the United States has steadfastly refused to recognize Soviet sovereignty over these three countries and we have loudly proclaimed our commitment to Baltic self-determination. Every U.S. President has reaffirmed this policy. In light of this continuing commitment, I think it is very unfortunate that President Bush has chosen—up to now, at least—not to meet with Prime Minister Godmanis. But now is the time to push the difficult question of Baltic independence forward. These freely elected governments are struggling against incredible odds to establish themselves as the rightful representatives of Latvian, Lithuanian, and Estonian sovereignty.

So, it is not the time to push the difficult question of Baltic independence on to the back burner. The United States should take whatever steps we can take to support them, and meeting with the elected head of the Latvian Government would be an appropriate show of that support. We have called for the return of freedom to Latvia for 50 years, and now it is time at least to shake hands with the leaders of that country, sit down with them and encourage them. It is time for us to acknowledge the efforts of these brave Latvians.

I am particularly dismayed with the President's decision after his meeting in May with the Lithuanian Prime Minister. I cannot imagine why Mr.

Godmanis should not be accorded similar treatment. The country is not large but so what? If anything, the Latvian situation calls for a stronger show of support. Unlike Lithuania, with a homogeneous population, ethnic Latvians make up only 53 percent of the population in their own country, so that is tough. They have succeeded in their drive for independence with the support of a sizable portion of the non-Latvian population, but they still face strong opposition from the large ethnic Russian work force and the substantial number of Russian military personnel in Latvia.

I do not pretend to know why the President has chosen not to meet with Prime Minister Godmanis. But, I do know that we have called for Latvian independence for 50 years and now, with victory possible, we seem unable to make even the slightest gesture of support for fear of upsetting Mr. Gorbachev.

We stuck to our guns when it came to a united Germany. We did exactly what we should do when it came to a united Germany remaining within NATO and we realized that goal. Why can we not stick to the policy, the right policy of the last 50 years, and demand the freedom of the Baltic nations?

Mr. President, I yield the floor.

TERRY ANDERSON AND HIS CAPTORS

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,957th day that Terry Anderson has been held in captivity in Beirut.

I would also like to bring to the attention of the Senate an incisive and revealing article from yesterday's Washington Post. The piece sheds light upon the motivations of those who are believed to be Terry Anderson's captors. In particular, it focuses on the efforts of one Imad Mugniyeh, a terrorist by trade who in the mid-1980's adopted the practice of hostage-taking as a means for gaining the release of his brother-in-law and 14 others from Kuwaiti prison. According to experts on Lebanon, little is known about Mr. Mugniyeh. This has been hugely frustrating, however, because what we do know is that he is a key figure in the hostage ordeal and will most likely play a critical role in the hostages' release.

I ask unanimous consent that the article regarding Mr. Mugniyeh be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, July 24, 1990]

BOMBS, HOSTAGES: A FAMILY LINK

(By Caryle Murphy)

KUWAIT.—Part of the puzzle behind the seizure of Western hostages in Lebanon has been the close relationship between Imad Mugniyeh, reputedly the mastermind of the kidnappings, and a man under sentence of death in this Persian Gulf emirate.

The condemned prisoner, Mustafa Youssef Badreddin, is related to Mugniyeh by marriage—his sister is Mugniyeh's wife. But the deepest tie binding the two Lebanese-born Shiite Moslems is thought to be a comradeship forged in their secret, deadly missions of terrorism.

The Mugniyeh connection is important in the larger hostage puzzle, analysts say, partly because he may not be entirely under the control of Iran, which is believed to have great influence with Lebanese Shiite extremist groups. Even if the Iranians pressured him to release the remaining six American hostages—at least two of whom are thought to be under Mugniyeh's direct control—he might resist without some guarantee on the release of Badreddin.

Mugniyeh and Badreddin were part of the Iranian-backed terrorism network in Lebanon, according to U.S., Israeli and Lebanese sources, but analysts are not sure whether they were directly involved in the 1983 bombings of the U.S. and French marine barracks and U.S. Embassy that left more than 350 dead.

Analysts say, however, that there is little doubt Mugniyeh and Badreddin helped plan December 1983 bombings in Kuwait against the U.S. and French embassies there that killed five people and injured more than 80.

"Badreddin was the bombmaster, and Mugniyeh, apparently, the organizer," according to Martin Kramer, a Tel Aviv University specialist on Lebanon. He suspects this partnership may have begun with the 1983 bombings against U.S. and French facilities in Lebanon, but he said he has not seen hard evidence to confirm this role.

This partnership ended abruptly, however, when Badredin was arrested here after the Kuwait bombings. Mugniyeh has been trying ever since to get his friend and brother-in-law out of prison, using the tactic of hostage-taking, analysts said.

Mugniyeh orchestrated a wave of kidnappings of Americans in Lebanon—including CIA station chief William Buckley, Associated Press journalist Terry Anderson and others—that started in early 1984, not long after the Kuwait bombers were arrested, Kramer said. U.S. officials also hold Mugniyeh partly responsible for the 1985 hijacking of TWA Flight 847, in which a U.S. seaman was slain. He operated under the cover of a shadowy organization known as Islamic Jihad, which most analysts say is little more than an alias for the Mugniyeh clan and its allies.

Through it all, Mugniyeh has tenaciously held to one basic demand—freedom for Badreddin and 14 others convicted of the bombings in exchange for release of the Western hostages.

At first, Mugniyeh did not publicize his demand that the 15 be released in exchange for the hostages. "He wanted to do a secret deal," Kramer said. The link was first made in May 1985, in a statement by Islamic Jihad to a Beirut newspaper. Ten days later, an Iraqi Shiite attempted to assassinate Kuwait's emir.

Kuwait, despite subtle pressure from the U.S., French and West Germany governments, reportedly has refused even to discuss swapping the 15 for hostages. Kuwaiti officials have argued that convicted saboteurs should not be equated with innocent hostages. They also want to show a hard line against terrorism since Kuwait was the target of numerous Iranian-supported terrorist actions during the Iran-Iraq war.

But the Mideast's shifting alliances often open doors that once seemed permanently closed. Kuwait's recent warming of relations with Iran has prompted speculation here that it might now be willing to consider a compromise on the fate of Badreddin and the other prisoners.

According to unconfirmed reports here, Iranian Foreign Minister Ali Akbar Velayati, whose country has funded Mugniyeh's and Badreddin's past activities, raised the issue of the 15 prisoners with Kuwaiti officials during a recent visit here, reportedly to see if Kuwait would show flexibility.

Such flexibility might be possible now, some observers argue, since Kuwait's new detente with Iran holds the promise of greater domestic security. The wartime Iranian subversion, according to a Kuwaiti official who asked not to be named, now seems over.

"I think the main purpose of [Velayati's] visit was to assure us that the past has gone. It shows they have goodwill and want mutual cooperation," he said.

The Kuwaiti official denied, however, that Velayati raised the matter of the 15 prisoners and insisted that his government's position on them had not changed.

Kuwait's ruler, Sheik Jabir Ahmed Sabah, has declined to carry out the death sentences imposed on Badreddin and two others, apparently in the belief the executions could set off a new wave of terrorism against Kuwait, according to a Kuwaiti familiar with his views.

He also has permitted the prisoners' families to come from Lebanon to visit them in prison. Twelve of the 15 are Iraqis and are believed to be members of the fundamentalist Shiite Dawa Islamiya movement. The other three, including Badreddin, are Lebanese. Two others in the original group were released after completing five-year sentences for their roles in the 1983 bombings.

Kramer said that short of releasing the prisoners, there are steps Kuwait could take "such as commuting the death sentences and cutting into" some of the longer sentences, which range from 10 years to life.

A mysterious figure, Mugniyeh is believed to be in his 30s and is thought to come from the southern Lebanese village of Tir Dibba. By the early 1980s, while in Beirut, he reportedly had been recurited by Force 17, the special security apparatus of the mainstream Fatah faction of the Palestine Liberation Organization.

Mugniyeh was trained in a Fatah camp near Beirut airport, according to a Lebanese source who visited it in 1981. This source speculated that Mugniyeh—and perhaps Badreddin—learned from Fatah bomb makers the techniques of encasing explosives in household cooking-gas canisters, thereby enhancing the destructiveness of the blast. This technique was later used to deadly effect in the 1983 bombings of the U.S. Embassy and marine barracks in Lebanon.

"He had a lot of ability and rose quickly," Kramer said of Mugniyeh. But when the PLO was forced out of Lebanon after the 1982 Israeli invasion, Mugniyeh was out of a job. He linked up with Iranian Revolutionary Guards in Lebanon and became part of the loose, Iranian-supported Shiite organization Hezbollah.

"After the PLO left, he was for hire," said one Lebanese source who knew Mugniyeh during the early 1980s. "That was how the Iranians used him."

HUMAN RIGHTS ABUSES IN PERU

Mr. CRANSTON. Mr. President, I rise today to speak briefly about the alarming escalation of human rights abuses in Peru. In recent weeks, we have received numerous reports of kidnapings and disappearances carried out by the Peruvian Security Forces.

Amnesty International has documented over 6,000 cases of disappearances and extrajudicial kilings by the Peruvian Security Forces since they effectively declared war on terrorist and other groups in 1983. An inordinate amount of these incidences have occurred over the past year. Rape and torture by Government forces in their intimidation campaign against anti-Government proponents are among the widely reported abuses.

Despite evidence of culpability, the security forces are rarely prosecuted or convicted of these heinous abuses. And unless Government officials decide to hold the military responsible for these actions, it is likely that the military will continue to operate without impunity. This is no way for democracy to flourish.

While the country has a well-known problem with the "Sendero Luminoso" terrorist organization, the incidences of human rights abuses I will speak about today are the work of the Peruvian Security Forces.

On June 10, 1990, human rights worker Guadalupe Ccallocunto Olano was abducted and dragged barefoot from her home in the city of Ayacucho, Peru. Her four children stood by crying as armed men put a pistol to their mother's head and ordered her into the street.

Sra. Ccallocunto Olano has a long history of opposing the abuses by the military, and is a champion of the rights of the many victims of the security forces who have disappeared. She has not been seen since the night of June 10. Repeated appeals to Peruvian Government officials have proved fruitless. There is clear evidence that the security forces are responsible for her forced disappearance. The streets of Ayacucho are heavily patrolled by the Peruvian Security Forces, and it is unthinkable that a large contingent of armed men could have carried out such an act undetected by them. Also, in the days previous to her kidnaping, a coworker of Sra. Ccallocunto Olano was also abducted by the security forces and interrogated by them about her activities.

Nonetheless, the army and military police continue to deny knowledge of her whereabouts. There is increasing fear that Guadalupe will never surface.

More recently, on July 20, human rights lawyer Carlos Fernando Colonias Arteaga was shot and killed in Ayacucho. He was a lawyer at the University San Cristobal. The cases of Sra. Ccallocunto Olano and Carlos Arteaga are but two of a terribly long list of victims—many of them human rights activists—of the Peruvian Security Forces.

Mr. President, we cannot ignore these events, sanctioning their occurrence through inaction. Nor can we allow the Peruvian Government to stand idly by while the security forces run roughshod over the human rights of the Peruvian people, all in the name of democracy. We must urge the Peruvian Government to investigate each and every case of human rights abuse, and prosecute to the fullest extent of the law those responsible for these terrible crimes.

Newly inaugurated President Fujimori has a challenge ahead in dealing with the enormous debt and poverty of his country; in combating corruption of public officials, and in eliminating the scourge of illegal drugs. But he must be urged to make human rights a top priority in his new government, establishing a clear commitment to internationally recognized standards of human rights. The security forces must be held accountable for their actions. The terrorism of groups and individuals cannot be used as a pretext for the use of terrorist methods by the state.

Mr. President, recently, Mr. Aryeh Neier, executive of the highly respected Human Rights Watch, testified at a hearing on proposed United States military training for Peru held by two subcommittees of the Senate Committee on Foreign Relations. What he said made a lot of sense. Let me just quote a few extracts from his statement.

At the very least, Neier said:

If there is going to be any assistance to the Peruvian Armed Forces or to the Peruvian police, we feel that it should be prohibited until first the Government has provided an accounting of those persons who were detained by the police and the armed forces during 1989 and 1990, and disappeared. We are not talking here about past abuses. We are talking about the immediate abuses, the current abuses. Let them account for those detentions and disappearances.

Second, we have been calling on the Peruvian military and police for a long time, and we think it ought to be embodied in legislation that deals with any assistance, that the Government should establish a central registry of all detentions so that family members can be notified immediately in the case of arrest of a relative. That would be a very important measure to prevent detentions from eventuating in disappearances.

Third, that the International Committee of the Red Cross should be granted access to all places of detention, including police stations and army barracks. The ICRC does have a presence in Peru and does have access to the prisons. But it does not have access to police stations and to army barracks, and those are the places where persons accused of security violations are tortured and where the detentions result in disappearnces. And access by the International Committee of the Red Cross to those places, which is something the United States pushed for, let us say, in the case of Nicaragua, and constantly criticized the Sandinistas for not allowing the International Committee of the Red Cross access to pre-trial detention places. It ought to insist on the same in the case of a government that is going to be going to be receiving $36 million in military aid, and has received $19 million in police aid. It ought to insist on that kind of access as a means of preventing torture and disappearances.

And then we think that the United States ought to call on the Government of Peru as one of the conditions (for aid) to take steps to bring to justice military officers who have been responsible for gross abuses of human rights, such as the massacre in Cayara. Cayara was a massacre in which the Peruvian military not only killed some 28 to 30 persons and then a large number of additional persons were not acounted for, but subsequently some nine different witnesses to the Cayara massacre were killed during the course of the investigation of what took place. And the prosecutor who was in charge, a man named Carlos Escobar, who was doing a very good job, a meticulous job and a job that any prosecutor any place would be proud to undertake, was hounded out of the country to the point that he had to obtain political asylum in the United States, or had to come to the United States for political asylum last year.

The Peruvian Government, we think, as a condition for military aid, must undertake the kind of investigation into that massacre and other episodes of the sort that Carlos Escobar was undertaking, and this time make sure that those military officers who were responsible face prosecution and punishment. And the Government should be required to purge from the ranks those military officers who have been directly responsible for the abuses of the past.

Mr. President, Guadalupe Ccallocunto Olano and Carlos Arteaga may be gone—but they must not be allowed to be forgotten. The United States can provide much-needed assistance to the new Fujimori government. But I believe that until action is taken to eliminate these documented human rights abuses by the military, our aid to them should be administered with an eye-dropper. As with other countries around the world, the United States must stand on the side of democracy and justice—not of oppression—and provide assistance only when demonstrated change has occurred. The thousands who have suffered and died for their rights in Peru deserve nothing less.

STRATEGIC ARMS REDUCTION TREATY

Mr. CRANSTON. Mr. President, I rise today to offer my support for the Strategic Arms Reduction Treaty [START] which is undergoing final negotiation and which has been the target of criticism—much of it specious—from the Republican right.

I regret that the negotiations were not able to reach accord on all the treaty provisions before the June summit in Washington. Unfortunately, this has meant that the remaining

provisions have been targeted by the political right as purported evidence of a U.S. inclination to "giveaways" in dealing with the Soviet Union. This thinking needlessly complicates the process. It inhibits U.S. negotiators from acting freely in completing the treaty, as they become increasingly sensitive to unwarranted attacks about excessive concessions on the unresolved provisions.

It is troubling that so many of arms control's shopworn opponents have raised their voices in criticism of this treaty before the final product is before us. Even more disturbing, however, is the fact that the provisions which are being assailed so roundly do not threaten the security or strategic position of the United States.

Consider the issue of Soviet SS-18 heavy missiles. While the United States has secured an agreement to reduce these heavy ICBM's by 50 percent, the United States and the Soviet Union need still to agree on measures to restrict modernization of the fleet beyond its present capability.

Opponents of the treaty allege that permitting continued modernization of the Soviet SS-18 fleet will lead to a severe disadvantage for the United States in heavy ICBM capability allowing the Soviet Union to maintain an impressive first strike capability. They further claim that the expected reduction in SS-18's will be rendered meaningless by the increased accuracy of the force over the past 8 years.

The START Treaty provisions do allow for continued modernization of strategic forces—both for the United States and the Soviet Union. The treaty prohibits production of new weapons and also bans the increase in numbers of any existing weapons systems. Modernization of the suspect Soviet SS-18's will most likely be allowed—the Soviets are naturally reluctant to limit this system while no parallel restriction for an equivalent United States system has been offered. However, modernization of SS-18's will be limited to testing and production on a level which, as Secretary of State Baker has stated, is designed to prevent the Soviets from "ever seriously upgrading the missile from its present capabilities."

In considering the allegations surrounding the increased accuracy of the SS-18, I do not dispute the fact that the SS-18 has been made more accurate. However, I question the persistent focus by critics of this treaty on the disputable capability of this weapon rather than on the historic 50 percent reduction of SS-18's achieved by U.S. negotiators. Whether the missile is more accurate or not, it is clearly better to worry about monitoring and verifying 154 SS-18's than 308.

More importantly, claims that this reduction has been rendered meaningless because the SS-18 force has been made more accurate and lethal do not take into consideration the additional provision which will reduce the aggregate throw-weight of heavy ICBM's by 50 percent of the current Soviet level. This massive, overall reduction in throw-weight—that is, the yield of the missile—significantly reduces the general destruction the Soviets could inflict on United States populations, cities, and military targets. Further, this provision will prevent the Soviets from building large, single-warhead missiles in order to satisfy the 4,900 limit on numbers of heavy ICBM's allowed under START.

On the issue of cruise missiles, there is an equally vociferous antiarms-control contingent claiming that the United States agreed unnecessarily to limit air and sea-launched cruise missile range and numbers to the Soviet advantage.

Mr. President, the United States currently holds an overwhelming advantage in cruse missiles, particularly the sea-launched variety. The United States did agree to limit all air-launched cruise missiles with a range of 375 miles or more under START as requested by the Soviets, rather than including only those missiles with a range greater than 500 miles. No upper limit for range was set, however, contrary to the reports being made by conservative arms control critics.

This provision was necessary for clarifying the kinds of ALCM's which would be accountable under the bomber counting rules whereby a bomber carrying long range ALCM's either counts as carrying 10 cruise missiles, or only 1. There is no U.S. giveaway here. On the contrary, as a result of its tough negotiating on this provision, the United States gained concessions which have eased the way for the deployment by our country of new, conventionally armed cruise missiles such as the highly accurate Tacit Rainbow.

On the issue of sea-launched cruise missiles [SLCM's] treaty opponent argue that Secretary Baker "played a strong U.S. hand weakly" by agreeing to limits on SLCM's. Having read a profusion of articles and reports on START, I find this continuous treaty-bashing tiresome. Conservatives repeatedly claim that the Administration made a bad deal on cruise missiles—this is just not so. Current Pentagon plans are for construction of 758 tomahawk missiles—well below the 880 limit imposed by START. The United States currently has 358 of these missiles, and the Soviet Union has none. In this era of mutual fiscal constraints, the likelihood that either side will build the full fleet of 880 is slim. In addition, the agreement stands outside the treaty as politically binding only and is not verifiable—at the request of the U.S. Navy.

I do not see anything weak about the U.S. position here. Anyone familiar with the START Treaty proceedings knows that the sea-launched cruise missile issue had hindered successful completion of the treaty over the past 8 years. I believe Secretary Baker made a wise decision in negotiating this issue as part of the treaty. He effectively eased Soviet concerns that the United States would try and exploit its SLCM advantage, without giving away anything that jeopardizes our security.

A third hotly contested issue is the alleged U.S. failure to resolve the Backfire bomber question. Arms control opponents will tell you that in failing to limit further modernization and production of the Soviet Backfire fleet, we have left open a loophole the Soviets will surely exploit. This is especially so, the argument runs, as a significant number of Backfire bombers remain targeted on U.S. naval vessels.

Mr. President, the Backfire bomber debate is an old one. It goes back to the 1970's. The Soviets have consistently maintained that the Backfire is not a strategic bomber because of its nonintercontinental range. The United States has stated that as it can be refueled in flight—allowing it to reach the United States—the Backfire is an intercontinental bomber and should be subject to the same restrictions as other strategic bombers.

During the SALT II process, the United States negotiating team obtained a statement from then-Soviet Premier Brezhnev that the Backfire's refueling capabilities would not be upgraded to allow them to function as intercontinental strategic bombers, and that the Soviets would only build 30 of these bombers per year. Obviously, this was never tested as SALT II was not ratified.

Under START, the Soviets appear ready to make a similar statement with regard to the Backfire's refueling capability. The two sides have yet to agree on a ceiling for production of these bombers. What has been decided is that the Backfire will be limited either under START or the conventional armed force reduction agreement [CFE]. There is no question about that. Should the Soviets maintain the nonstrategic role of the Backfire, thereby categorizing it as a conventional bomber, its numbers will still be limited—and to a more severe degree—in the CFE agreement. Again, there is no U.S. giveaway.

Some critics have suggested that achieving effective verification of and compliance with the provisions in START is impossible. I maintain that while verification of this treaty poses a challenge, it is not an insurmountable one. There is no verification regime which will be 100 percent effec-

tive in preventing cheating. However, START will most definitely make it much more costly, which in itself makes it unlikely that cheating will occur.

Moreover, the extensive system of inspections and monitoring outlined for START should go a long way toward limiting the degree of treaty violations reported under other agreements in the past. The advances in national technical means and the growing atmosphere of cooperation and coordination of data between the United States and the Soviet Union should lend itself to a verification process exempt from many of the problems envisaged by the conservatives.

For example, there has been speculation that as numbers of weapons are reduced, stockpiling will occur. All sides of the political spectrum agree that it is very difficult to monitor covert production and storage. However, such covert activity would be costly. In addition, if missiles are simply stored or stockpiled, one cannot train with them or test them for reliability, thus making their military utility questionable.

Although the final verification regime is incomplete, it contains an array of measures to prevent cheating. These include: 12 kinds of onsite inspections; continuous monitoring of mobile ICBM production facilities; short-notice inspections at facilities related to strategic offensive arms; verification of the numbers of warheads deployed on ballistic missiles; the ban of encryption, encapsulation, or jamming of transmissions of telemetric data related to tests or launches of ICBM's and SLBM's; electronic "tagging" of nondeployed ICBM's for mobile launchers and on-board technical measurements of ICBM's and SLBM's. In order to monitor compliance with the treaty, both sides have agreed to establish a joint compliance and inspection committee.

The START Treaty represents the first real chance to actually reduce strategic nuclear weapons. United States negotiators made history in obtaining Soviet compliance with the proposed 50 percent reduction in heavy ICBM's—arguably the most lethal and dangerous weapons in the collective nuclear arsenal—and in the 30 percent reductions in other warheads. In addition, the bomber counting rules included in START will clearly favor the larger bomber force of the United States. It will also unquestionably contribute to increased stability for both sides.

And yet as the old saying goes, "there's no one more blind than he who wishes not to see." The anti-arms-control contingent continues to throw up stumbling blocks to successful completion of the treaty process. One argument suggests that current unrest in the Soviet Union has created an unstable, unpredictable command and control system for the Soviet Armed Forces.

Reports from the intelligence community effectively counter this. The possibility of ethnic takeovers of Soviet missile sites or a rogue Soviet special rocket force is remote at best. Whatever the outcome of political and ethnic unrest in the Soviet Union, we can remain confident that the Soviet Union's nuclear arsenal will remain under the strict control of that country's senior political leadership. Each weapon in the Soviet Union's nuclear arsenal is under the strong, and redundant, command-and-control system of their general staff. This includes sophisticated permissive action links to prevent the unauthorized launch of a nuclear weapon. The nuclear arsenal is controlled in the field by elite troops dominated by ethnic Russians, who report directly through the general staff to the Soviet political leadership.

It is clear that concerns about the START Treaty expressed by the conservatives are misplaced. We have before us an environment of increasing cooperation and trust in the arms control arena. We cannot let ourselves be drawn into ruminations about old threats and adversaries. The alternative to START is the loss of the opportunity to achieve what will be the first successfully ratified strategic arms agreement with the Soviets in 18 years. The START Treaty allows us to "trust, but verify."

The threat of a nuclear Armageddon has diminished considerably, yet the increasingly improbable Soviet military threat should not make us complacent about our quest to reduce nuclear weapons. New international security concerns are emerging, and as long as the threat from nuclear weapons exist, I am committed to do what I can to rid the world of their destructive potential. I believe the START Treaty is just that—a start; a chance to reduce the threat of nuclear war. It is not a perfect treaty—but it is a much needed step forward. And while I would have liked to have seen even deeper cuts in weapons numbers, I know that follow-on negotiations already in the preliminary stages of discussion promise to pick up where START leaves off.

Mr. President, continued nitpicking on this treaty is counterproductive. It inhibits the opportunity to enhance our national security through further reducing the Soviet military threat. I believe the administration should move swiftly to conclude negotiation of the remaining provisions, and to present the treaty for Senate ratification.

I intend to give my full support to this treaty. I urge my colleagues on both sides of the aisle to examine its provisions closely, certain that as they do so they will conclude—as I have—that the START Treaty provides an incomparable opportunity to reduce the bloated United States and Soviet nuclear arsenals, thus contributing to the stability and security of the United States and the world.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 10:13 a.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1677. An act to require the Federal Communications Commission to reinstate restrictions on advertising during children's television, to enforce the obligation of broadcasters to meet the educational and informational needs of the child audience, and for other purposes;

H.R. 1699. An act to award congressional gold medals to Frank Capra, James Stewart, and Fred Zinnemann;

H.R. 3719. An act to establish the Florida Keys National Marine Sanctuary, and for other purposes;

H.R. 4238. An act to amend the Public Health Service Act to extend various programs with respect to vaccine-preventable diseases;

H.R. 4982. An act to promote the study of mathematics and science in elementary and secondary schools, to provide training for mathematics and science teachers, and for other purposes;

H.R. 5040. An act to extend the authorizations of appropriations for the Tribally Controlled Community College Assistance Act of 1978 and the Navajo Community College Act;

H.R. 5112. An act to amend the Public Health Service Act to extend certain programs for health care services in the home;

H.R. 5113. An act to amend the Public Health Service Act to revise and extend the program for the prevention and control of injuries;

H.E. 5146. An act to amend the Public Health Service Act to revise and extend the program regarding organ transplantation; and

H.R. 5275. An act to amend the Congressional Award Act to temporarily extend the Congressional Award Board, and to otherwise revise such act.

The message also announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 69. A concurrent resolution to urge the development and implementation of a comprehensive United States oceans and Great Lakes policy; and

H. Con. Res. 227. A concurrent resolution concerning the establishment of national initiatives to promote confidence among the people of Hong Kong.

ENROLLED BILL SIGNED

At 2:23 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

H.R. 2843. An act to establish the Tumacacori National Historical Park in the State of Arizona.

The enrolled bill was subsequently signed by the President pro tempore [Mr. BYRD].

At 3:06 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House having proceeded to reconsider the bill (H.R. 770) to entitle employees to family leave in certain cases involving a birth, an adoption, or a serious health condition and to temporary medical leave in certain cases involving a serious health condition, with adequate protection of the employees' employment and benefit rights, and to establish a commission to study ways of providing salary replacement for employees who take any such leave, returned by the President of the United States with his objections, to the House of Representatives, in which it originated, it was; Resolved, That the said bill do not pass, two-thirds of the House of Representatives not agreeing to pass the bill.

The message also announced that the House had passed the following bill, in which it requests the concurrence of the Senate:

H.R. 4039. An act to amend the Public Health Service Act to establish a program for the prevention of disabilities, and for other purposes.

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 1699. An act to award congressional gold medals to Frank Capra, James Stewart, and Fred Zinnemann; to the Committee on Banking, Housing, and Urban Affairs.

H.R. 3719. An act to establish the Florida Keys National Marine Sanctuary, and for other purposes; to the Committee on Commerce, Science, and Transportation.

H.R. 5275. An act to amend the Congressional Award Act to temporarily extend the Congressional Award Board, and to otherwise revise such act; to the Committee on Governmental Affairs.

The following concurrent resolutions were read, and referred as indicated:

H. Con. Res. 69. A concurrent resolution to urge the development and implementation of a comprehensive United States oceans and Great Lakes policy; to the Committee on Commerce, Science, and Transportation.

H. Con. Res. 227. A concurrent resolution concerning the establishment of national initiatives to promote confidence among the people of Hong Kong; to the Committee on Foreign Relations.

MEASURES PLACED ON THE CALENDAR

The following bills were read the first and second times by unanimous consent, and placed on the calendar:

H.R. 1677. An act to require the Federal Communications Commission to reinstate restrictions on advertising during children's television, to enforce the obligation of broadcasters to meet the educational and informational needs of the child audience, and for other purposes.

H.R. 5040. An act to extend the authorizations of appropriations for the Tribally Controlled Community College Assistance Act of 1978 and the Navajo Community College Act.

H.R. 5113. An act to amend the Public Health Service Act to revise and extend the program for the prevention and control of injuries.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-3333. A communication from the Comptroller General of the United States, transmitting, pursuant to law, the deferrals of budget authority in military construction programs that should have been, but were not, reported to the Congress by the President for 1990; pursuant to the order of January 30, 1975, as modified on April 11, 1986, referred jointly to the Committee on Appropriations and the Committee on the Budget.

EC-3334. A communication from the Secretary of Defense, transmitting, pursuant to law, certification that the Johnston Atoll Chemical Agent Disposal System has adequate storage capacity for chemical munitions; to the Committee on Armed Services.

EC-3335. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the financial statements of the Export-Import Bank of the United States for the years ended September 30, 1989 and 1988, and reports on the bank's internal control structure and on its compliance with applicable laws and regulations; to the Committee on Banking, Housing, and Urban Affairs.

EC-3336. A communication from the Chairman of the Prospective Payment Assessment Commission, transmitting, pursuant to law, the report, Hospital Outpatient Services: Background Report; to the Committee on Finance.

EC-3337. A communication from the Secretary of Energy, transmitting, pursuant to law, the annual report to Congress on the Clean Coal Technology (CCT) Demonstration Program for 1989; to the Committee on Energy and Natural Resources.

EC-3338. A communication from the Assistant Secretary of the United States Department of Interior, transmitting, pursuant to law, a notice on leasing systems for the Western Gulf of Mexico, sale 125, scheduled to be held in August 1990; to the Committee on Energy and Natural Resources.

EC-3339. A communication from the Secretary of the Interior, transmitting, pursuant to law, the study report on the Desoto Trail; to the Committee on Energy and Natural Resources.

EC-3340. A communication from the Deputy Associate Director for Collection and Disbursement, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain off-shore lease revenues where a refund or recoupment is appropriate; to the Committee on Energy and Natural Resources.

EC-3341. A communication from the Deputy Associate Director for Collection and Disbursement, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain off-shore lease revenues; to the Committee on Energy and Natural Resources.

EC-3342. A communication from the Deputy Associate Director for Collection and Disbursement, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain offshore lease revenues; to the Committee on Governmental Affairs.

EC-3343. A communication from the Deputy Associate Director for Collection and Disbursement, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-3344. A communication from the Assistant Secretary of the Army (Civil Works), transmitting, pursuant to law, a revision to the second report on projects of elements of projects which have been authorized but for which no funds have been obligated for construction during the preceding ten full fiscal years; to the Committee on Environment and Public Works.

EC-3345. A communication from the Chairman of the National Research Council, transmitting, pursuant to law, a report entitled "Truck Weight Limits: Issues and Options"; to the Committee on Environment and Public Works.

EC-3346. A communication from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to amend the Social Security Act to increase the annual limit on the temporary assistance that may be provided to citizens of the United States returned from foreign countries; to the Committee on Finance.

EC-3347. A communication from the Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the sixty day period to July 19, 1990; to the Committee on Foreign Relations.

EC-3348. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-245 adopted by the Council on July 10, 1990; to the Committee on Governmental Affairs.

EC-3349. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law,

copies of D.C. Act 8-244 adopted by the Council on July 10, 1990; to the Committee on Governmental Affairs.

EC-3350. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-243 adopted by the Council on July 10, 1990; to the Committee on Governmental Affairs.

EC-3351. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-242 adopted by the Council on July 10, 1990; to the Committee on Governmental Affairs.

EC-3352. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-241 adopted by the Council on July 10, 1990; to the Committee on Governmental Affairs.

EC-3353. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-240 adopted by the Council on July 10, 1990; to the Committee on Governmental Affairs.

EC-3354. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-239 adopted by the Council on July 10, 1990; to the Committee on Governmental Affairs.

EC-3355. A communication from the Vice President of Farm Credit Bank of Springfield, transmitting, pursuant to law, the annual report for the Farm Credit Banks of Springfield Retirement Plan for January 1, 1989, through December 31, 1989; to the Committee on Governmental Affairs.

EC-3356. A communication from the Manager of Employee Benefits of the Ninth Farm Credit District, transmitting, pursuant to law, the annual report of the retirement plan and trust agreement for employees of the associations and banks of the Ninth Farm Credit District for the year ended December 31, 1989; to the Committee on Governmental Affairs.

EC-3357. A communication from the Acting Director of Administration, National Labor Relations Board, transmitting, pursuant to law, notice of a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-3358. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a list of reports issued by the General Accounting Office during the month of June 1990; to the Committee on Governmental Affairs.

EC-3359. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-249 adopted by the Council on July 10, 1990; to the Committee on Governmental Affairs.

EC-3360. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-248 adopted by the Council on July 10, 1990; to the Committee on Governmental Affairs.

EC-3361. A communication from the Chairman of the Council on the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-247 adopted by the Council on July 10, 1990; to the Committee on Governmental Affairs.

EC-3362. A communication from the Attorney General of the United States, transmitting, pursuant to law, the annual report of the Attorney General of the United States for fiscal year 1988; to the Committee on the Judiciary.

EC-3363. A communication from the Secretary of Commerce, transmitting a draft of proposed legislation to amend title 35, United States Code, to strengthen the legitimate rights of patent owners vis-a-vis infringers and licensees; to the Committee on the Judiciary.

EC-3364. A communication from the President and Executive Director of the National Mining Hall of Fame and Museum, transmitting, pursuant to law, the 1989 audited financial statement of the National Mining Hall of Fame and Museum; to the Committee on the Judiciary.

EC-3365. A communication from the Assistant Comptroller General of the United States (Human Resources Division), transmitting, pursuant to law, a report entitled "Rural Hospitals: Factors That Affect Risk of Closure"; to the Committee on Labor and Human Resources.

EC-3366. A communication from the Secretary to the Railroad Retirement Board, transmitting, pursuant to law, notice of the determination that it is in the public interest to award contracts to the two low responsive and responsible bids for data entry services to convert source documents to magnetic tape used to generate payments to annuitants and claimants; to the Committee on Labor and Human Resources.

EC-3367. A communication from the Chairman and Members of the Railroad Retirement Board, transmitting, pursuant to law, the annual report on the actuarial status of the railroad retirement system for the period 1990 to 2014; to the Committee on Labor and Human Resources.

EC-3368. A communication from the Chairman of the Advisory Committee on Student Financial Assistance, transmitting, pursuant to law, a report entitled "Ensuring Access: Challenges in Student Aid in the 1990's"; to the Committee on Labor and Human Resources.

EC-3369. A communication from the Secretary of Education, transmitting, pursuant to law, the report with respect to the recommendations contained in the report of the National Advisory Council on Educational Research and Improvement; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BIDEN, from the Committee on the Judiciary, with an amendment in the nature of a substitute:

S.J. Res. 183. Joint resolution proposing an amendment to the Constitution relating to a Federal balanced budget (Rept. No. 101-391).

By Mr. JOHNSTON, from the Committee on Energy and Natural Resources, with amendments and an amendment to the title:

S. 2841. A bill to authorize the appropriation of $2.5 million to complete the renovation of the Guam Memorial Hospital (Rept. No. 101-392).

By Mr. HOLLINGS, from the Committee on Commerce, Science, and Transportation, with amendments:

S. 1974. A bill to require new televisions to have built in decoder circuitry (Rept. No. 101-393).

By Mr. NUNN, from the Committee on Armed Services, without amendment:

S. 2905. An original bill to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes.

S. 2906. An original bill to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes.

S. 2907. An original bill to provide for the utilization, force structure, and preservation of personnel of the Reserve components, for procurement for such components, and for other purposes.

S. 2908. An original bill to provide transition assistance for military personnel involuntarily discharged or released from active duty, and for other purposes.

S. 2909. An original bill expressing the sense of the Congress relating to the reduction of nuclear risk, requiring the Secretary of Defense to report on measures to reduce such risk, and for other purposes.

S. 2910. An original bill to authorize appropriations for fiscal year 1991 drug interdiction and counter-drug activities of the Department of Defense, to allow the Department of Defense to provide additional support to State and local agencies for such activities, and for other purposes.

S. 2911. An original bill to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense related activities of the Department of Energy, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes.

S. 2912. An original bill to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes.

S. 2913. An original bill to authorize certain construction at military installations for fiscal year 1991, and for other purposes.

S. 2914. An original bill to authorize funds for the Department of Energy national security programs, the Defense Nuclear Facilities Safety Board, civil defense; to authorize expenditures by the Panama Canal Commission, and for other purposes.

S. 2915. An original bill to amend title 10, United States Code, to require the Secretary of Defense to establish a strategic environmental research program.

S. 2916. An original bill to amend title 10, United States Code, to encourage the development and transfer of critical technologies and to improve acquisition activities of the Department of Defense, to authorize acquisitions and dispositions for the National Defense Stockpile for fiscal year 1991, and for other purposes.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. JOHNSTON, from the Committee on Energy and Natural Resources:

Paul L. Ziemer, of Indiana, to be an Assistant Secretary of Energy (Environment, Safety, and Health);

Calvin A. Kent, of Texas, to be Administrator of the Energy Information Administration; and

David H. Leroy, of Idaho, to be Nuclear Waste Negotiator.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. GLENN, from the Committee on Governmental Affairs:

Barbara Everitt Bryant, of Michigan, to be Director of the Census; and

Stephen Anthony Trodden, of Virginia, to be Inspector General, Department of Veterans Affairs.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HARKIN:

S. 2898. A bill to improve counseling services for elementary school children; to the Committee on Labor and Human Resources.

By Mr. MOYNIHAN (for himself, Mr. CHAFEE and Mr. RIEGLE):

S. 2899. A bill to amend title IV of the Social Security Act to make improvements in the foster care maintenance payments program, and for other purposes; to the Committee on Finance.

By Mr. McCAIN:

S. 2900. A bill to provide for the settlement of the water rights claims of the Fort McDowell Indian Community in Arizona and for other purposes; to the Select Committee on Indian Affairs.

By Mr. PRYOR (for himself, Mr. BENTSEN, Mr. BOREN, Mr. RIEGLE, Mr. DASCHLE, Mr. DURENBERGER, Mr. DANFORTH, Mr. BAUCUS, Mr. MOYNIHAN, Mr. ROCKEFELLER, Mr. BREAUX and Mr. JEFFORDS):

S. 2901. A bill to amend the Internal Revenue Code of 1986 to simplify the application of the tax laws with respect to employee benefit plans, and for other purposes; to the Committee on Finance.

By Mr. PRYOR:

S. 2902. A bill to amend the Internal Revenue Code of 1986 to clarify portions of the Code relating to church and welfare benefit plans, to modify certain provisions relating to participants in such plans, to reduce the complexity of and to bring workable consistency to the applicable rules, to promote retirement savings and benefits, and for other purposes; to the Committee on Finance.

By Mr. BOND (for himself, Mr. DODD, Mr. ROBB, Mr. BRYAN, Mr. EXON, Mr. LOTT, Mr. LIEBERMAN, Mrs. KASSEBAUM, Mr. DANFORTH, Mr. STEVENS, Mr. KOHL, Mr. McCONNELL, Mr. PRESSLER, Mr. RIEGLE, Mr. BIDEN, Mr. BURNS, Mr. McCAIN, Mr. SHELBY, Mr. BOSCHWITZ, Mr. SIMON, and Mr. D'AMATO):

S. 2903. A bill to establish a National Commission on Financial Institution Reform, Recover, and Enforcement; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. INOUYE:

S. 2904. A bill to require the Secretary of Commerce to make additional frequencies available for commercial assignment in order to promote the development and use of new telecommunications technologies, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. NUNN: from the Committee on Armed Services:

S. 2905. An original bill to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes; placed on the calendar.

S. 2906. An original bill to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes; placed on the calendar,

S. 2907. An original bill to provide for the utilization, force structure, and preservation of personnel of the Reserve components, for procurement for such components, and for other purposes; placed on the calendar.

S. 2908. An original bill to provide transition assistance for military personnel involuntarily discharged or released from active duty, and for other purposes; placed on the calendar.

S. 2909. An original bill expressing the sense of the Congress relating to the reduction of nuclear risk, requiring the Secretary of Defense to report on measures to reduce such risk, and for other purposes; placed on the calendar.

S. 2910. An original bill to authorize appropriations for fiscal year 1991 drug interdiction and counter-drug activities of the Department of Defense, to allow the Department of Defense to provide additional support to State and local agencies for such activities, and for other purposes; placed on the calendar.

S. 2911. An original bill to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense related activities of the Department of Energy, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes; placed on the calendar.

S. 2912. An original bill to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes; placed on the calendar.

S. 2913. An original bill to authorize certain construction at military installations for fiscal year 1991, and for other purposes; placed on the calendar.

S. 2914. An original bill to authorize funds for the Department of Energy national security programs, the Defense Nuclear Facilities Safety Board, civil defense; to authorize expenditures by the Panama Canal Commission, and for other purposes; placed on the calendar.

S. 2915. An original bill to amend title 10, United States Code, to require the Secretary of Defense to establish a strategic environmental research program; placed on the calendar.

S. 2916. An original bill to amend title 10, United States Code, to encourage the development and transfer of critical technologies and to improve acquisition activities of the Department of Defense, to authorize acquisitions and dispositions for the National Defense Stockpile for fiscal year 1991, and for other purposes; placed on the calendar.

By Mr. MACK:

S. 2917. A bill to impose additional sanctions against countries that repeatedly provide support for international terrorism, and for other purposes; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HARKIN:

S. 2898. A bill to improve counseling services for elementary school children; to the Committee on Labor and Human Resources.

ELEMENTARY SCHOOL COUNSELING DEMONSTRATION ACT

● Mr. HARKIN. Mr. President, I rise to introduce the Elementary School Counseling Demonstration Act which would establish professional counseling program where they are needed most—in our elementary schools. I want to commend Congressman PURSELL for introducing a companion measure in the House.

The Elementary School Counseling Demonstration Act would address this need by providing demonstration grants to local school authorities to establish counseling programs. Grants would be available for 3 years at a maximum $200,000 per school per year. The program would be authorized at $5 million annually for 5 years.

My bill calls upon local businesses, labor organizations, higher education representatives, and community groups to participate in a school's program. Parents are also expected to be a part of the counseling process, and would participate in the implementation and evaluation of their child's counseling.

Today, children represent the poorest population group in our society. They are more likely to be physically and sexually abused, live in dysfunctional families or violent homes, watch their parents and older brothers and sisters use and abuse drugs and alcohol, and be left alone while parents work or are otherwise outside their home.

Children who lack the skills to cope with these problems often suffer emotional and behavioral disorders as well as academic difficulties at school. Some become adults who turn to drugs to find solutions to their childhood crises.

We have to teach kids at a young age that drugs create problems, they don't solve them.

We need to provide our children with more constructive and healthier ways to deal with their problems—before they turn to alcohol and drugs.

The best way to prevent young people from resorting to drugs is to provide them the skills to deal with

their day-to-day problems. Through enhanced counseling programs, schools can offer our children these coping skills. These skills provide children with the tools needed to deal more effectively with problems and circumstances which they often live with and do not have the power to change.

However, counselor ratios of some 1 to 850, the national average for elementary guidance programs, limit counselors' abilities to provide comprehensive programs to deal adequately with the emotional needs of their students.

Experts in the field maintain that a ratio of 1 counselor to 250 students is optimal for providing counselors sufficient time to more effectively serve children. This ratio allows counselors to conduct small group sessions, classroom prevention programs, and consultation with teachers, administrators, and parents.

Theory has been put to practice in Iowa.

And it works.

In 1988, the Des Moines Public Schools established the "Smoother Sailing" pilot program which was designed to decrease the counselor to student ratio to 1 to 250. Smoother Sailing now operates in 10 Des Moines elementary schools. During the 1988–1989 school year, it was totally funded by donations from the Des Moines business community. This pilot project provides an enhanced elementary school counseling program for students in kindergarten through fifth grade.

Smoother Sailing reaches our young people in elementary schools, before they've been exposed to drugs in junior high or high school.

Its purpose is straightforward: provide young people with ready access to counselors, so they can get the help they need.

I've spent one of my workdays in two Smoother Sailing schools, working side-by-side with the school administrators, guidance counselors, teachers and students involved with this early intervention program. Most importantly, I observed the children learning life-coping skills to handle the violence, confusion, and trauma in their lives. They were learning how to communicate with adults and peers as well as learning how to resist and refuse drugs.

From my work with Smoother Sailing, I know now that the slogan "Just say No" is not enough. We must help our children make the right choice.

Early research confirms my findings. In 1989, the Iowa test of basic skills was applied to students in the 10 Smoother Sailing schools and compared with students in 18 Des Moines schools with regular guidance programs, where the typical counselor caseload ranged from 500 to 800 students.

The Smoother Sailing kids won hands down. Early research showed that the low counselor/student ratio of 1 to 250 raised student achievement, improved self-esteem, and reduced the frequency and intensity of discipline problems in the 10 schools.

Other positive results include greater staff morale and collaboration between teachers and support staff; increased parent involvement in developmental and academic matters concerning their children; and an overall improved school climate, producing feelings of personal empowerment, hope and accomplishment.

And it's a model program that achieves the perfect mix of private and public, and local and national resources.

Smoother Sailing proved to me how important early intervention programs are to the war on drugs. To stop the spread of drugs, we must reach our children before the drug dealers do.

Smoother Sailing should serve as a model program for Iowa and the rest of the Nation. The Elementary School Counseling Demonstration Act expands the principles and objectives of Smoother Sailing to the entire Nation, and provides a modest Federal contribution for programs like Smoother Sailing in Iowa and elsewhere.

Enhanced elementary counseling does work. It will greatly reduce the dropout rate, help the classroom teacher, and provide a higher standard of educational excellence that we need to compete in the next century.

With a small investment now, we will reap huge rewards in the future. And the principal beneficiaries will be our children.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2898

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Elementary School Counseling Demonstration Act".

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) elementary school children are being subjected to unprecedented social stresses, including fragmentation of the family, drug and alcohol abuse, child abuse, poverty, and violence. Experts indicate that intervention at an early age is the most beneficial;

(2) an increasing number of elementary school children are exhibiting symptoms of distress, such as substance abuse, emotional disorders, academic underachievement, disruptive behavior, juvenile delinquency, and suicide;

(3) elementary school counselors can contribute to the personal growth, educational development, and emotional well-being of elementary school children by providing professional counseling, intervention, and referral services;

(4) the average ratio of elementary school counselors to students is one for every one thousand;

(5) when there is one counselor to every one thousand students, elementary school counseling programs are seldom adequate; and

(6) the Federal Government can help reduce the risk of academic, social, and emotional problems among elementary school children by stimulating the development of model elementary school counseling programs.

(b) PURPOSE.—It is the purpose of this Act to enhance the availability and quality of counseling services for elementary school children by providing grants to local educational agencies to establish effective and innovative elementary school counseling programs that can serve as national models.

SEC. 3. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated $5,000,000 for each of the fiscal years 1991, 1992, 1993, 1994, and 1995.

SEC. 4. APPLICATIONS.

(a) IN GENERAL.—A grant under this Act may be made only to a local educational agency that submits an application at such time, in such manner, an accompanied by such information as the Secretary may reasonably require.

(b) NOTIFICATION OF STATE EDUCATIONAL AGENCY.—Before submitting an application to the Secretary, a local educational agency must provide the State educational agency with an opportunity to review and comment on the program in its application. The comments of the State educational agency shall be appended to the application upon submission to the Secretary.

(c) CONTENTS.—Each application shall—

(1) describe the elementary school population to be targeted by the program, the particular counseling needs of that population, and the current counseling resources available for meeting those needs;

(2) describe the acivities, services, and training to be provided by the program and the specific approaches to be used to meet the counseling needs described in paragraph (1);

(3) describe the methods to be used to evaluate the outcomes and effectiveness of the program;

(4) describe the collaborative effort to be undertaken with institutions of higher education, businesses, labor organizations, community groups, or other public or private entities to enhance the program;

(5) describe collaborative efforts with institutions of higher education which specifically seek to enhance or improve graduate programs specializing in the preparation of elementary school counselors;

(6) document that the applicant has the personnel qualified to develop, implement, and administer the program;

(7) describe how any diverse cultural populations would be served through the program.

(8) assure that the funds made available under this Act for any fiscal year will be used to supplement and, to the extent practicable, increase the level of funds that would otherwise be available from non-Federal sources for the program described in the application, and in no case supplant such funds from non-Federal sources; and

(9) assure that the applicant will appoint an advisory board composed of parents, counselors, other pupil services personnel,

teachers, school administrators, and community leaders to advise the local educational agency on the design and implementation of the program.

SEC. 5. AWARD OF GRANTS.

(a) GENERAL AUTHORITY.—From the sums appropriated under section 3 in any fiscal year, the Secretary shall make grants to local educational agencies with approved applications to initiate or expand school counseling programs for elementary school children.

(b) PRIORITY.—In approving applications, the Secretary shall give special consideration to programs that—

(1) demonstrate the greatest need for new or additional counseling services among the children in the elementary schools of the applicant;

(2) propose the most promising and innovative approaches for initiating or expanding elementary school counseling; and

(3) show the greatest potential for replication and dissemination.

(c) EQUITABLE DISTRIBUTION.—In approving grants under this Act, the Secretary shall ensure an equitable geographic distribution among the regions of the United States and among urban, suburban, and rural areas.

(d) DURATION.—Grants may be awarded for a period not to exceed three years.

(e) MAXIMUM GRANT.—Grants may not exceed $200,000 per fiscal year.

SEC. 6. REQUIREMENTS FOR THE USE OF FUNDS.

(a) IN GENERAL.—Funds shall be used to initiate or expand elementary school counseling programs that comply with the requirements in subsection (b).

(b) PROGRAM REQUIREMENTS.—Each program assisted under this Act shall—

(1) be comprehensive;

(2) use a developmental, preventive approach to counseling;

(3) increase the range, availability, quantity, and quality of counseling services in the elementary schools of the local educational agency;

(4) maintain a counselor to student ratio in the elementary schools of the local educational agency that does not exceed one to two hundred and fifty;

(5) provide counseling services only through school counselors who hold a Master's degree in counseling and are licensed or certified by the State in which they work or, in States without licensure or certification, by a national board with broad acceptance as a certifying agency;

(6) use innovative approaches to increase children's understanding of peer and family relationships, work and self, decisionmaking, academic and career planning, and social responsibilities;

(7) provide counseling services that are well-balanced among classroom group and small group counseling, individual counseling, and consultation with parents, teachers, administrators, and other pupil services personnel;

(8) include inservice training for school counselors, other pupil services personnel, teachers, and instructional staff;

(9) involve parents of participating students in its design, implementation, and evaluation;

(10) involve collaborative efforts with institutions of higher education, businesses, labor organizations, community groups, or other public or private entities to enhance the program;

(11) ensure that school counselors paid from funds made available under this Act spend at least 85 per centum of their total work time in direct service to students (parents and teachers) and no more than 15 per centum on administrative tasks (associated with the guidance and counseling program); and

(12) evaluate annually the effectiveness and outcomes of the counseling services and activities funded under this Act.

SEC. 7. NATIONAL ADMINISTRATION.

(a) OFFICE OF SCHOOL COUNSELING.—The Secretary shall establish an Office of School Counseling in the Department of Education to administer, review, and monitor the programs funded under this Act, to assist in carrying out the requirements of this section, and to provide a national focal point for information and technical assistance on the counseling needs of elementary and secondary school children. The Office shall be headed by a Director who shall be a person of recognized professional qualifications and experience in the field of developmental school counseling.

(b) DATA COLLECTION, RESEARCH, AND EVALUATION.—The Director shall compile the evaluations of the programs under this Act conducted by local educational agencies and shall regularly collect such data as the Secretary finds necessary to develop a profile of the use and impact of funds under this Act. At the end of the grant period, but in no case later than January 30, 1995, the Secretary shall issue a research and evaluation report.

(c) DISSEMINATION.—The Secretary shall make the programs funded under this Act available for dissemination, either through the National Diffusion Network or other appropriate means.

(d) LIMIT ON ADMINISTRATION.—Not more than 5 per centum of the sums appropriated under section 3 in any fiscal year may be used to carry out the provisions of this section.

SEC. 8. DEFINITIONS.

Except as otherwise provided, for purposes of this Act—

(1) the term "comprehensive" means, with respect to counseling services, a program in which (A) a counselor uses a range of individual and group techniques and counseling resources in a planned way to meet the personal, social, educational, and career development needs of all elementary children in a school and (B) a counselor works directly with children, parents, teachers, and other school personnel to create an optimal positive learning environment and personal growth opportunities for all children;

(2) the term "developmental" means, with respect to a counseling program, a systematically planned program that (A) provides appropriate counseling and guidance interventions to foster the social, emotional, physical, moral, and cognitive growth of elementary school children; (B) provides direct intervention services to help children cope with family, social, and academic problems; and (C) supports and enhances the efforts of parents, teachers, and other school personnel to provide children maximum opportunity to acquire competence and skill in self-understanding and appreciation, interpersonal interaction, educational achievement and literacy, and career awareness and personal decision making;

(3) the term "Director" means the Director of the Office of School Counseling in the United States Department of Education;

(4) the term "elementary school" has the meaning given that term in section 1471(8) of the Elementary and Secondary Education Act of 1965;

(5) the term "local educational agency" has the meaning given that term in section 1471(12) of the Elementary and Secondary Education Act of 1965;

(6) the term "parent" has the meaning given that term in section 1471(14) of the Elementary and Secondary Education Act of 1965;

(7) the term "pupil services personnel" has the meaning given that term in section 1471(17) of the Elementary and Secondary Education Act of 1965;

(8) the term "Secretary" means the United States Secretary of Education; and

(9) the term "State educational agency" has the meaning given that term in section 1471(23) of the Elementary and Secondary Education Act of 1965.●

By Mr. MOYNIHAN (for himself, Mr. CHAFEE, and Mr. RIEGLE):

S. 2899. A bill to amend title IV of the Social Security Act to make improvements in the foster care maintenance payments program, and for other purposes; to the Committee on Finance.

FOSTER CARE MAINTENANCE PAYMENTS FOR ABANDONED CHILDREN

Mr. MOYNIHAN. Mr. President, in the 1980's, a crack cocaine epidemic hit. In an instant, the most vulnerable members of our society—infants—faced unprecedented perils: exposure to cocaine while still in the womb and then abandonment by their mothers.

Some 100,000 to 375,000 children per year are prenatally exposed to illicit drugs. And current figures might understate the problem, since most hospitals do not test pregnant women for substance abuse.

Drug-exposed children face daunting problems. In utero, they may suffer from brain-damaging strokes and hemorrhages. They are more likely to suffer from premature delivery, low birthweight, and withdrawal symptoms. And as they grow, drug-exposed infants experience behavior and development problems.

What happens to these misfortunate children? One-half enter foster care or are put up for adoption. But drug-exposed babies are not much in demand. And already we are running out of foster families. In Chicago, Newark, and Washington, DC, critical shortages of foster families have been reported, especially for children with special needs. In my own city of New York I witnessed a sad reminder of this problem just last year: at the Church Street office of the Human Resources Administration, I saw children sleeping on fold-out cots and even on desks, because beds could not be found for them in foster homes. For these children, home was a makeshift shelter in an airless office building. We can provide better.

The irony is that these children, so unwanted, are the very children who need us the most.

We ought to encourage the adoption of drug-exposed children. Yet we do not. Federal adoption assistance is available for certain special needs children now defined in terms of their ethnic background, age, membership in a sibling group, or mental or physical handicap. Drug-exposed children are not considered to have special needs. But of course they do. They are not eligible for Federal adoption assistance. They very much should be.

A second, related, tragedy has emerged: an increase in the number of abandoned children. Drug-addicted mothers are deserting their children. In New York City, some 500 children are abandoned each month. Six thousand each year. The no-parent family has arrived.

And these children are doubly abandoned. Not only have their mothers foresaken them, but so has the Federal Government. Under current law, abandoned children are often ineligible for Federal Foster Care payments, Adoption Assistance and Medicaid.

Without Foster Care or Adoption Assistance, these babies are left to languish, often in the hospitals where they were abandoned. The costs to treat these children are staggering. At a June 28 hearing of the Finance Committee, Secretary Sullivan showed us a bill for one such child. It went on for page after page. Some $698,000.

Mr. President, I am introducing a bill today with Senators CHAFEE and RIEGLE that would provide some modest help. The bill would expand the definition of special needs children to include those who, because of prenatal exposure to drugs or alcohol, suffer from medical problems or physical, mental or emotional handicaps. Under this legislation, children suffering from the effects of prenatal drug exposure would become eligible for Federal adoption assistance programs. We would also make abandoned children eligible for federally matched Foster Care payments and, if the children were determined to have special needs, for federally matched monthly adoption assistance payments. As a result of this eligibility, children would qualify for Medicaid.

The bill also includes a proposal to authorize up to ten states to conduct child welfare demonstration projects. Participating states would receive their federal funds in equal quarterly installments and could use them to design and administer new child welfare programs. The programs would ideally emphasize such services as: family preservation, family reunification, and timely adoption assistance for children with unresolvable family problems. The results of these demonstration projects would give us information about how best to improve child welfare services, foster care and adoption assistance.

In closing, Mr. President, I ask that the needs of our most vulnerable children not be overlooked. For, as drug exposure and abandonment imperil our children, so they do our Nation. I ask unanimous consent that a copy of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2899

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FOSTER CARE MAINTENANCE PAYMENTS FOR ABANDONED CHILDREN.

Section 472(a) of the Social Security Act (42 U.S.C. 672(a)) is amended—

(1) in the matter preceding paragraph (1), by inserting "or with respect to a child who is an abandoned child," after "(specified in section 406(a)),";

(2) in paragraph (1)—

(A) by inserting "(A)" after "(1)", and

(B) by inserting ", or (B) in the case of an abandoned child, a judicial determination has been made that no parent or legal guardian has maintained any contact with the child" before the semicolon; and

(3) in paragraph (4)—

(A) by striking "or" at the end of subparagraph (A),

(B) by striking the period at the end of subparagraph (B) and inserting ", or"; and

(C) by adding at the end of the paragraph the following new subparagraph:

"(C) is an abandoned child, and a judicial determination has been made that the financial circumstances of any parent or legal guardian of the child cannot be determined because of the abandonment.".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall become effective on October 1, 1990.

SEC. 2. ADOPTION ASSISTANCE FOR ABANDONED CHILDREN.

(a) IN GENERAL.—Paragraph (2) section 473(a) of the Social Security Act (42 U.S.C. 673(a)) is amended—

(1) in subparagraph (A)—

(A) by striking "or" at the end of clause (ii),

(B) by inserting "or" at the end of clause (iii); and

(C) by adding at the end of the subparagraph the following new clause:

"(iv) is an abandoned child, and the judicial determinations described in paragraphs (1)(B) and (4)(C) of section 472(a) were made at the time the adoption proceedings were initiated, and"; and

(2) in subparagraph (B)(iii), by striking "subparagraph (A)(ii) or (A)(iii)" and inserting "clause (ii), (iii), or (iv) of subparagraph (A)".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall become effective on October 1, 1990.

SEC. 3. DRUG EXPOSED CHILDREN INCLUDED IN DEFINITION OF SPECIAL NEEDS.

(a) IN GENERAL.—Section 473(c)(2)(A) of the Social Security Act (42 U.S.C. 673(c)(2)(A)) is amended by inserting ", including medical conditions or physical, mental, or emotional handicaps due to drug or alcohol exposure before birth" after "physical, mental or emotional handicaps".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall become effective on October 1, 1990.

SEC. 4. CHILD WELFARE DEMONSTRATION PROJECTS.

Part E of title IV of the Social Security Act (42 U.S.C. 470-479) is amended by adding at the end the following:

"SEC. 480. DEMONSTRATION PROJECTS.

"(a) IN GENERAL.—In order to grant States the flexibility and resources necessary to develop innovative policies and appropriate service networks to preserve and strengthen families with children at risk of needing placement outside their home, to reunite children with their families within 2 years if an out-of-home placement is found to be necessary, and to place children in adoptive homes or other permanent arrangements, including guardianships and placements with relatives, in a timely fashion if reunification with their families is impossible, and to provide for the evaluation of innovative State programs and the assessment of the impact of such programs on children and families, the Secretary may authorize not more than 10 States to conduct demonstration projects, which may be carried out throughout the State or in limited areas of the State, in accordance with this section.

"(b) CONSIDERATION OF APPLICATIONS.—The Secretary shall consider all applications received from States desiring to conduct demonstration projects under this section.

"(c) CONTENTS OF APPLICATIONS.—

"(1) GENERAL RULES.—Each application by a State to conduct a demonstration project under this section shall—

"(A) propose a project designed to—

"(i) provide, in accordance with paragraph (2), preventive services and assistance to families which have problems that may lead to the removal of a child from the family;

"(ii) promote, in accordance with paragraph (3), the treatment of family problems leading to the reunification of children with their families within 2 years after the time it becomes necessary to remove the child from the family;

"(iii) facilitate, in accordance with paragraph (4), the timely and permanent placement of children who are in foster care or who have been abandoned at or shortly after birth; or

"(iv) address, in accordance with paragraph (5), any combination of child welfare services issues;

"(B) specify the area or areas of the State in which the project is to be conducted;

"(C) contain a commitment by the State—

"(i) to carry out the project during a period of not less than 5 consecutive fiscal years beginning with fiscal year 1992; or

"(ii) if the State will not be able to properly plan the project before the beginning of fiscal year 1992, to plan the project during fiscal year 1992 and carry out the project during a period of not less than 4 consecutive fiscal years beginning with fiscal year 1993;

"(D) specify the number of children in foster care in the State, the average length of stay of children in such care, and the types of placements;

"(E) specify the provisions of part B and this part which, but for subsection (g)(1), would prevent the State from conducting the demonstration project;

"(F) identify who will receive services under the project; and

"(G) contain such other information as the Secretary may require by regulation.

"(2) PROJECTS FOCUSING ON PROVIDING CHILD WELFARE SERVICES TO FAMILIES.—Each application by a State to conduct a demonstration project under this section of the

type described in paragraph (1)(A)(i) shall outline the services and procedures the State will offer to prevent family dissolution whenever possible. In addition, each such application by a State shall include the following:

"(A) CASE PLANS.—A commitment by the State to provide each child with a case plan developed in consultation with family members.

"(B) MEASURES TO INFORM FAMILIES ABOUT HOW TO MAINTAIN PROGRESS TOWARD ADDRESSING PROBLEMS THAT CAUSED REFERRAL.—A description of the measures to be employed by the State to ensure that families are informed about what they must do to maintain satisfactory progress in addressing the problems that caused the family situation to be reported to the State.

"(C) MEASURES TO KEEP SINGLE PARENTS REQUIRING DRUG OR ALCOHOL TREATMENT WITH THEIR CHILDREN.—A description of the measures to be employed by the State to keep single parents and their young children together while the single parent participates in required drug or alcohol treatment.

"(D) DRUG AND ALCOHOL TREATMENT MEASURES.—A description of the measures to be employed by the State to ensure that drug and alcohol treatment programs are made available to parents who are substance abusers.

"(E) MEASURES TO COORDINATE FAMILY WELFARE FUNDING AND SERVICES.—A description of the measures to be employed by the Governor of the State to coordinate the funding of, and the services and benefits provided by programs which provide services to families with children at risk of being placed in the care of a child welfare, mental health, or juvenile justice agency, including the following programs:

"(i) The State's child welfare services program carried out under the State plan approved under part B.

"(ii) The maternal and child health block grant program under title V.

"(iii) The job opportunities and basic skills training program carried out pursuant to section 402(a)(19) and part F.

"(iv) Medical assistance furnished to pregnant women and children under the State plan approved under title XIX.

"(v) The drug treatment programs of the State.

"(vi) The mental health services programs of the State.

"(vii) Any new services for children and families that the State deems necessary to meet the needs of all family members in order to carry out the purposes of this section.

"(viii) Such other programs as the State deems appropriate.

"(3) FAMILY REUNIFICATION PROJECTS.—

"(A) APPLICATION REQUIREMENTS.—Each application by a State to conduct a demonstration project under this section of the type described in paragraph (1)(A)(ii) shall include the following:

"(i) DESCRIPTION OF PROPOSED PROCEDURES TO ASSIST FAMILY REUNIFICATION.—A description of how the State will—

"(I) design a treatment plan for addressing the family problems that led to removal of the child;

"(II) involve all family members in executing the plan;

"(III) coordinate the programs and resources necessary to address the problem that led to removal of the child;

"(IV) reunify the child with the family within 2 years; and

"(V) implement administrative and judicial review of foster care and for termination of parental rights, and any planned changes to laws and procedures that would ensure timely hearings and decisions leading to permanent placements within 2 years.

"(ii) REASONS WHY PROPOSED PROCEDURES WOULD RESULT IN EARLIER FAMILY REUNIFICATION.—A discussion of why the particular procedures proposed in the application would be likely to result in earlier family reunification than is achieved under the present policies and procedures of the State.

"(iii) ASSURANCE OF INCREASED PAYMENTS TO FOSTER FAMILIES.—An assurance that payments to foster families will be increased sufficiently to ensure an adequate number of foster parents.

"(B) COMMITMENT BY STATE TO PERMANENTLY PLACE WITHIN 2 YEARS A NEGOTIATED PERCENTAGE OF CHILDREN IN FOSTER CARE.—

"(i) IN GENERAL.—The Secretary shall not approve an application to conduct a demonstration project under this section of the type described in paragraph (1)(A)(ii) unless the State has made a commitment to permanently place a percentage of the children entering or already in foster care, as negotiated between the State and the Secretary, within 2 years after such children first receive services under the demonstration project.

"(ii) WAIVER.—The Secretary may waive the application of clause (i) to a State if the State documents that the average length of time that children are in temporary arrangements has been reduced.

"(4) PERMANENT PLACEMENT PROJECTS.—Each application by a State to conduct a demonstration project under this section of the type described in paragraph (1)(A)(iii) shall describe how the State will expeditiously permanently place children who are in foster care, are boarder babies, were abandoned at or shortly after birth, have parents addicted to drugs, or were severely abused. In addition, each such application by a State shall include the following:

"(A) PROCEDURES FOR FOSTER CARE REVIEW AND TERMINATION OF PARENTAL RIGHTS.—A description of the laws and procedures in effect in the State for administrative and judicial review of foster care and for termination of parental rights, and any planned changes to such laws and procedures that would ensure timely hearings and decisions, including laws and procedures that would achieve permanent placement of children in foster care within 2 years, and of boarder babies before they attain the age of 4 months.

"(B) INTERPRETATION OF 'REASONABLE EFFORTS'.—A statement that the State does not interpret section 471(a)(15) as limiting the authority of the State to initiate procedures to terminate in a timely manner the parental rights of the parents of foster children.

"(5) PROJECTS ADDRESSING OTHER CHILD WELFARE ISSUES.—Each application by a State to conduct a demonstration project under this section of the type described in paragraph (1)(A)(iv) shall describe a project designed to test an innovative approach to any number of significant child welfare services issues, which may include—

"(A) avoiding out-of-home placements;

"(B) achieving speedy reunification of families from which it has been necessary to remove a child;

"(C) reducing the time it takes to permanently place children who have been removed from their families;

"(D) permitting children to remain with, or be quickly reunited with, their parents while their parents receive treatment for substance abuse; and

"(E) identifying risk factors which would allow child welfare agencies to identify and treat families that are likely to have children who require protective services.

"(d) ADMINISTRATIVE PROVISIONS.—

"(1) IN GENERAL.—Within 12 months after the date of the enactment of this section—

"(A) the Secretary shall prepare and transmit to each State a detailed explanation of the requirements for participation in the demonstration program established by this section;

"(B) any State interested in conducting a demonstration project under this section shall transmit to the Secretary a letter of intent containing a tentative description of the project; and

"(C) the Secretary shall, subject to paragraph (4), approve not more than 10 applications which meet the applicable requirements of subsection (c).

"(2) SPECIAL PREFERENCE RULE.—Subject to paragraph (4), the Secretary shall approve applications submitted to conduct demonstration projects under this section which meet the applicable requirements of subsection (c) so that at least 50 percent of such applications propose projects described in subsection (c)(1)(A)(ii).

"(3) DISTRIBUTION OF DEMONSTRATIONS BY STATE POPULATION.—The Secretary shall provide that in approving applications to conduct demonstration projects under this section that—

"(A) at least 2 and not more than 4 of such applications approved are the applications of States with populations of less than 1.5 million;

"(B) at least 3 and not more than 5 of such applications approved are the applications of States with populations between 1.5 and 7 million; and

"(C) at least 2 and not more than 4 of such applications approved are the applications of States with populations over 7 million.

"(4) DISTRIBUTION OF DEMONSTRATIONS BY REGION.—The Secretary shall provide that in approving applications to conduct demonstration projects under this section that no more than 4 of such applications shall be approved for any one geographical region (as determined by the Secretary) of the country.

"(5) FREEDOM OF STATES TO SELECT AREAS IN WHICH TO CONDUCT DEMONSTRATION.—The Secretary may not require any State to conduct a project under this section in any area of the State not specified in the application therefor.

"(6) CERTIFICATION REQUIRED.—The Secretary shall not approve the application of a State to conduct a demonstration project under this section unless the State certifies that all cost savings resulting from the project will be used to provide child welfare services (within the meaning of section 425(a)(1)) to families.

"(e) GRANTS.—

"(1) IN GENERAL.—The Secretary shall make grants in accordance with this subsection to each State whose application to conduct a demonstration project under this section is approved by the Secretary, in accordance with a contract prepared by the Secretary (in consultation with the entity or entities selected pursuant to subsection (f)) which specifies the duties of the Secretary, the State, and the entity selected to evaluate the project in achieving the purpose described in subsection (a).

"(2) USE OF GRANTS.—Each State which receives funds under the demonstration program under this section may use such funds

to improve the provision of child welfare, foster care, and adoption assistance services in any manner that the State deems appropriate.

"(3) ANNUAL GRANTS.—The Secretary shall make grants to States under paragraph (1) for each fiscal year for which the State is authorized to conduct a demonstration project under this section.

"(4) AMOUNT OF GRANT TO INCLUDE STATE DEMONSTRATION BONUS.—

"(A) CALCULATION OF AMOUNT OF GRANT.—The amount of the grant to be paid under paragraph (1) to a State for a fiscal year shall be an amount equal to the applicable percentage of the sum of—

"(i) the amounts paid to the State for fiscal year 1991 pursuant to sections 423 and 474 (other than for adoption assistance payments under section 473 and for expenses for the proper and efficient administration of the provisions of the State plan relating to adoption assistance);

"(ii) the portion of the amount (if any) by which the amounts appropriated for the fiscal year for payments to States under part B exceed the amounts so appropriated for fiscal year 1991, that would be payable to the State pursuant to such part if the State were not authorized to conduct a demonstration project under this section; and

"(iii) 20 percent of the amount that would have been payable to the State for the immediately preceding fiscal year pursuant to section 423 if the State were not authorized to conduct a demonstration project under this section.

"(B) APPLICABLE PERCENTAGE DEFINED.—

"(i) As used in subparagraph (A), the term 'applicable percentage' means, with respect to a State and a fiscal year, the quotient set forth in clause (ii) as determined by the Secretary after taking into account the estimates made under subsection (f)(2)(B) for the fiscal year with respect to the State.

"(ii) The quotient set forth in this clause is—

"(I) the number of children in the areas in which the State is conducting a demonstration project under this section with respect to whom the State would have made foster care maintenance payments under section 472 for the fiscal year if the Secretary had approved the State plan under this part for the fiscal year and the State were not authorized to conduct the project; divided by

"(II) the total number of children in the State with respect to whom the State would have so made such payments for the fiscal year.

"(5) NOTIFICATION TO STATES OF AMOUNT OF GRANTS.—On the 1st day of each fiscal year for which a State is to be made a grant under paragraph (1), the Secretary shall notify the State of the amount of the grant.

"(6) GRANTS TO BE PAID IN EQUAL QUARTERLY INSTALLMENTS.—The Secretary shall pay each grant under paragraph (1) in equal quarterly installments.

"(7) SUPPLEMENTARY PAYMENT.—Within 3 months after the end of each fiscal year with respect to which estimates are made under subsection (f)(2)(B) with respect to a State, the Secretary shall—

"(A) take such estimates into account in determining the amount that would have been payable to the State under section 474 for the fiscal year (other than for adoption assistance payments under section 473 and for expenses for the proper and efficient administration of the provisions of the State plan relating to adoption assistance) if the Secretary had approved the State plan under this part for the fiscal year and the State were not authorized to conduct a demonstration project under this section; and

"(B) pay the State the amount (if any) by which—

"(i) the amount determined under subparagraph (A); exceeds

"(ii) the amount paid to the State pursuant to section 474 for fiscal year 1991 (other than for adoption assistance payments under section 473 and for expenses for the proper and efficient administration of the provisions of the State plan relating to adoption assistance).

"(f) EVALUATION OF DEMONSTRATION PROJECTS.—

"(1) SELECTION OF EVALUATING ENTITY.—the Secretary shall—

"(A) publish in the Commerce Daily a request for applications from entities that are capable of, and interested in performing the functions described in paragraph (2); and

"(B) in time for such an entity to participate in the development of contracts under subsection (e)(1), enter into a contract with 1 or more entities to perform such functions.

"(2) FUNCTIONS OF EVALUATING ENTITY.—The functions of the entity or entities selected by the Secretary pursuant to paragraph (1) are—

"(A) to assist the Secretary and the States in devising a detailed plan for the evaluation of demonstration projects conducted under this section;

"(B) within 30 days after the end of each fiscal year, to submit a report to the Secretary, with respect to each such project, that estimates in accordance with the data collection provisions of the contract described in subsection (e)(1)—

"(i) the number of children in the areas in which the State is conducting a demonstration project under this section with respect to whom the State would have made foster care maintenance payments under section 472 for the fiscal year if the Secretary had approved the State plan under this part for the fiscal year and the State were not authorized to conduct the project; and

"(ii) the average length of time for which such payments would have been so made with respect to such children;

"(C) prepare in accordance with paragraph (3), and submit to the Secretary, with respect to each such project, interim reports that evaluate the costs and benefits of the project; and

"(D) prepare in accordance with paragraph (3), and submit to the Secretary, with respect to each such project, a final report that—

"(i) describes in detail, and documents, the ways in which the project has changed the provision of preventive services, child welfare, foster care, reunification services, and adoption assistance services in the State; and

"(ii) evaluates the costs and benefits of the project.

"(3) EVALUATION REQUIREMENTS.—In evaluating a demonstration project conducted by a State under this section, the entity or entities selected by the Secretary to perform the evaluation shall—

"(A) collect such information as may be necessary to analyze the impact of the project on—

"(i) foster care placement rates;

"(ii) child development and behavior (including academic performance, intellectual development, and health); and

"(iii) family relationships;

"(B) collect such other information on outcomes as the Secretary or the State deems appropriate; and

"(C) use currently acceptable scientific methods.

"(4) DUTY OF STATES TO PROVIDE INFORMATION.—Each State which conducts a demonstration project under this section shall provide the entity or entities selected by the Secretary to evaluate the project with such information with respect to the project and the State programs carried out pursuant to part B and this part as the entity or entities may request under the contract described in subsection (e)(1) entered into by the Secretary, the entity, and the State.

"(5) COSTS OF EVALUATIONS.—The Secretary shall pay the costs incurred during each fiscal year by any State in assisting the evaluation of the demonstration project conducted by the State under this section, to the extent that such costs exceed the amount (estimated by the Secretary) that the State would have expended during the fiscal year to comply with the data reporting requirements of part B and this part if the Secretary had approved the State plans under such parts for the fiscal year and the State were not authorized to conduct the project.

"(g) APPLICABILITY OF PART B AND OTHER SECTIONS OF THIS PART.—During the period in which a State is conducting a demonstration project under this section—

"(1) part B (other than section 427) and the other sections of this part (other than the provision of section 471(a)(1) requiring the State plan to provide for adoption assistance in accordance with section 473, paragraphs (8), (12), (13), (15), and (16) of section 471(a), and sections 473 and 479) shall not apply to the State; and

"(2) the State shall, for purposes of section 402(a)(20), be deemed to have in effect a State plan approved under this part.

"(h) PROHIBITION AGAINST IMPAIRMENT OF ENTITLEMENT TO FOSTER CARE BENEFITS.—A State may not carry out a demonstration project under this section in a manner which impairs the entitlement of any qualified child to foster care benefits under a State plan approved under this part.".

Mr. CHAFEE. Mr. President, I am pleased to join Senators MOYNIHAN and RIEGLE in introducing legislation that would expand the Foster Care and Adoption Assistance Programs to provide services for abandoned children.

The future of our country depends on how well we care for our children. Our children must be physically and mentally prepared not only to keep America economically competitive, but also to provide a safe and stable environment for their own children. We cannot ask our children to keep the American dream alive if we don't give them a fighting chance to reach their full potential. We must plan for the future by taking a good hard look at the status of our children today.

Earlier this month, Congressman MACHTLEY and I hosted a forum entitled, "Our Children's Future: Measuring Up To Challenge." I was astounded by some of the testimony presented to us.

We heard about the familiar problems of drug and alcohol abuse. But we also heard about a frightening new problem—the increasing number of

children who are being abandoned. Babies are born and left in hospitals to become "boarder babies," in other words they live in the hospital because they have no place else to go. These babies often suffer from developmental and mental impairments because their mothers abused drugs or alcohol during their pregnancies. Far too many suffer from the emotional trauma of having no parent to love or care for them.

Doctors and nurses can provide treatment to help these children overcome drug addiction, low birth weight, and many other developmental problems. But health care providers cannot provide a loving and stable home to these children.

As I listened to the panelists at our forum, I became fearful that we are raising a generation of children composed in part of youngsters ill equipped to form familial bonds, to be receptive to formal and informal education, and to lead successful and productive lives. These abandoned children do not choose their parents. They had no control over their mother's drug use. They could not influence their mother's decision to leave them.

Although the Foster Care Program was created to assist vulnerable children, the program has failed these abandoned children. Under current law, a child's eligibility for foster care is linked to his or her mother's eligibility for aid to families with dependent children [AFDC]. Since there is no way to determine whether an abandoned child's mother is AFDC eligible, the child is ineligible for foster care maintenance payments, Medicaid, and adoption assistance.

In other words, these children are abandoned twice: once by their mother and again by a system that is not flexible enough to respond to their special needs.

Our legislation would address this problem by extending foster care and adoption assistance to children determined by a court to be abandoned. Thus, under our legislation, a "crack baby" abandoned by his or her mother would no longer have to "board" in the pediatric ward. Temporary foster care placement could be found and a permanent home for the child would be sought.

Our legislation also includes a demonstration project, authored by Congresswoman JOHNSON of Connecticut, which would allow States to explore innovative ways of keeping families together and preventing unnecessary foster care placement. Hopefully, services designed to preserve families will help some mothers and fathers learn how to be better parents so that they can raise happier, healthier, and more productive members of our society.

Mr. President, I urge my colleagues to join Senators MOYNIHAN, RIEGLE, and me in our efforts to ensure that abandoned children receive appropriate services to help them overcome their physical or emotional difficulties. Our Nation cannot afford to let them fall through the cracks.

By Mr. McCAIN:

S. 2900. A bill to provide for the settlement of the water rights claims of the Fort McDowell Indian Community in Arizona, and for other purposes; to the Select Committee on Indian Affairs.

FORT MCDOWELL INDIAN COMMUNITY WATER RIGHTS SETTLEMENT ACT

● Mr. McCAIN. Mr. President, today I am introducing legislation to authorize the settlement of the water rights claims of the Fort McDowell Indian Community in Arizona. The bill I am introducing is identical to H.R. 5063 which was sponsored by my good friend, the chairman of the House Committee on Interior and Insular Affairs, Mr. UDALL.

This settlement has been under negotiation for over 5 years and reflects the efforts of the Fort McDowell Indian Community, the city of Phoenix, the city of Mesa, the city of Tempe, other municipalities and counties, the State of Arizona, the Salt River project, the Roosevelt Water Conservation District, the Central Arizona Water Conservation District, the towns of Prescott, Camp Verde, Clarkdale, and Cottonwood, the Yavapai Apache Indian community, and the Yavapai Prescott Indian community. I commend and congratulate everyone for their efforts and their success. I also want to extend particular appreciation to Secretary Lujan, and the many employees of the Department of the Interior who have been involved in bringing about this settlement.

Mr. President, this is not a perfect bill. There are still some very difficult issues to be resolved. On July 17, 1990, the Select Committee on Indian Affairs held a joint hearing on H.R. 5063 with the House Committee on Interior and Insular Affairs. We heard testimony from a wide range of witnesses and a number of issues were identified which will require resolution before we can proceed with this bill. By introducing the bill today, I am hoping that we can expedite the process of agreeing on necessary amendments and completing action before this Congress adjourns. I am committed to working closely with my colleagues and all of the interested parties to find acceptable solutions to the outstanding issues.

Among the issues yet to be resolved is the amount of the Federal contribution to this settlement. The tribe has developed a careful analysis which indicates a Federal contribution of about $23 million. The Department of the Interior is reviewing this proposal. A timely response will assist the Congress, the tribe, and all parties in fashioning final legislation.

Another unresolved issue relates to the possible use of surplus water from the 1984 settlement of Ak Chin Indian water rights. The bill makes this water available as a potential source for Fort McDowell. Many, including the San Carlos Apache Tribe and some agricultural water users, believe that any Ak Chin surplus water should be put to use in other settlements. The Fort McDowell tribe, and others, believe that any Ak Chin surplus should be available, as needed, to settle Indian water claims.

The bill contains a provision which would repeal section 304(c)(3) of the Colorado River Basin Project Act to allow for the transfer of ground water to provide additional sources for the Fort McDowell settlement. This provision of the bill is the subject of substantial disagreement by a wide range of interested parties. The entire issue of transferring ground water in Arizona has been vigorously debated in the State legislature for quite some time. Indications are that the legislature may be reaching a consensus on this issue. All parties seem to agree that the State should be afforded every opportunity to resolve this issue. A full repeal of section 304(c)(3) may hinder progress toward a State solution. It has been suggested that we consider a one-time exemption from section 304(c)(3) which is carefully tailored to the specific facts of the Fort McDowell settlement. I want to assure everyone that we will carefully consider all constructive proposals for resolving this difficult issue.

My colleagues will note that the settlement authorizes the development of ground water for transfer to the Fort McDowell Indian Community. Several alternatives are described in the bill. As we continue to work on the legislation I want to make sure we do not preclude the potential for developing other alternatives which may be hydrologically, environmentally, and economically viable.

There are many other issues to be resolved, but I don't want to belabor my colleagues. Let me simply reiterate that enormous progress has been made toward a settlement. I believe that the remaining areas of disagreement can be fairly resolved in the coming weeks and I am firmly committed to working with everyone to secure final passage of the necessary legislation prior to adjournment.

Mr. President, I ask unanimous consent that the bill and the section-by-section summary be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2900

Be it enacted by the Senate and House of Representatives of the United States of America in Congress Assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Fort McDowell Indian Community Water Rights Settlement Act of 1990."

SEC. 2. CONGRESSIONAL FINDINGS AND DECLARATIONS.

(a) The Congress finds that—

(1) it is the policy of the United States, in fulfillment of its trust responsibility to Indian tribes, to promote Indian self-determination and economic self-sufficiency, and to settle, wherever possible, the water rights claims of Indian tribes without lengthy and costly litigation;

(2) meaningful Indian self-determination and economic self-sufficiency depend on development of viable Indian reservation economies;

(3) quantification of rights to water and development of facilities needed to utilize tribal water supplies effectively is essential to the development of viable Indian reservation economies, particularly in arid Western States;

(4) on September 15, 1903, the United States Government established a reservation for the Fort McDowell Indian Community in Arizona north of the confluence of the Salt and Verde Rivers tributary to the Gila River;

(5) the United States, as trustee for the Community, obtained water entitlements for the Community pursuant to the Kent Decree of 1910; however, continued uncertainty as to the full extent of the Community's entitlement to water has severely limited the Community's access to water and financial resources necessary to develop its valuable agricultural lands and frustrated its efforts to reduce its dependence on Federal program funding and achieve meaningful self-determination and economic self-sufficiency.

(6) proceedings to determine the full extent and nature of the Community's water rights and damages thereto are currently pending before the United States District Court in Arizona, the United States Claims Court, the Superior Court of the State of Arizona in and for Maricopa County, as part of the General Adjudication of the Gila River System and Source, and before various Federal agencies under the Federal Tort Claims Act.

(7) recognizing that final resolution of pending litigation will take many years and entail great expense to all parties, continue economically and socially damaging limits to the Community's access to water, prolong uncertainty as to the availability of water supplies and seriously impair the long-term economic planning and development of all parties, the Community and neighboring non-Indian communities have sought to settle their disputes to water and reduce the burdens of litigation;

(8) after more than five years of negotiation, which include participation by representatives of the United States Government, the Community and neighboring non-Indian communities of the Salt River Valley, who are all party to the General Adjudication of the Gila River System and Source, the parties have entered into an agreement to resolve all water rights claims between and among themselves, to quantify the Community's entitlement to water, and to provide for the orderly development of the Community's lands;

(9) pursuant to the agreement, the neighboring non-Indian communities will transfer rights to approximately twelve thousand acre-feet of surface water to the Community; provide for the means of firming existing water supplies of the Community, and make substantial additional contributions to carry out the agreement's provisions; and

(10) to advance the goals of Federal Indian policy and to fulfill the trust responsibility of the United States to the Community, it is appropriate that the United States participate in the implementation of the agreement and contribute funds for the rehabilitation and expansion of existing reservation irrigation facilities so as to enable the Community to utilize fully its water entitlements in developing a diverse, efficient reservation economy.

(b) Therefore, the Congress declares the purposes of this Act; (1) to approve, ratify and confirm the agreement entered into by the Community and its neighboring non-Indian communities, (2) to authorize and direct the Secretary of the Interior to execute and perform such agreement, and (3) to authorize the actions and appropriations necessary for the United States to fulfill its legal and trust obligations to the Community as provided in the agreement and this Act.

SEC. 3. DEFINITIONS

For purposes of this Act—

(a) "Agreement" means that agreement between and among the Fort McDowell Indian Community; the State of Arizona; the Salt River Project Agricultural Improvement and Power District; the Salt River Valley Water User's Association; the Roosevelt Water Conservation District; the Arizona cities of Chandler, Glendale, Mesa, Phoenix, Scottsdale, and Tempe, and the Arizona town of Gilbert; and the Central Arizona Water Conservation District, together with all exhibits thereto.

(b) "CAP" means the Central Arizona Project, a reclamation project authorized under title III of the Colorado River Basin Project Act of 1968 (43 U.S.C. 1521 et seq.).

(c) "CAWCD" means the Central Arizona Water Conservation District organized under the laws of the State of Arizona, which is the contractor under a contract with the United States, dated December 15, 1972, for the delivery of water and repayment of costs of the Central Arizona Project.

(d) "Community" means the Fort McDowell Indian Community, a community of Yavapai Indians organized under section 16 of the Indian Reorganization Act of June 18, 1934 (48 Stat. 987 (25 U.S.C. 476)), and duly recognized by the Secretary.

(e) "Kent Decree" means the decree dated March 1, 1910, entered in Patrick T. Hurley versus Charles F. Abbott, and others, Case Numbered 4564, in the District Court of the Third Judicial District of the Territory of Arizona in and for the County of Maricopa, and all decrees supplemented thereto.

(f) "RWCD" means the Roosevelt Water Conservation District, an irrigation district organized under the laws of the State of Arizona.

(g) "Secretary" means the Secretary of the United States Department of the Interior.

(h) "SRP" means the Salt River Project Agricultural Improvement and Power District, a political subdivision of the State of Arizona, and the Salt River Valley Water User's Association, an Arizona corporation.

SEC. 4 KENT DECREE REGULATION.

(a) To permit the Community to more fully utilize its water rights under the Kent Decree as provided in the Agreement and subsection (b) of this section, the agreement between the United States and the Salt River Valley Water User's Association dated June 3, 1935, relating to the Verde River Storage Works, and the agreement among the Salt River Water User's Association, Phelps Dodge Corporation, and the Defense Plant Corporation dated March 1, 1944, including the rights to Verde River Storage, are hereby ratified, confirmed and declared to be valid.

(b) The Secretary is authorized and directed to contract with SRP, for a period of not more than twenty-five years from the date the authorization contained in section 9(b) of this Act become effective, for the utilization of up to three thousand acre-feet of the existing storage entitlement of the United States and SRP behind Bartlett and Horseshoe Dams on the Verde River for the reregulation of the Community's entitlement to water under the Kent Decree. This storage space shall be for seasonal regulation only, with no annual carry-over past October 1 of any calendar year.

SEC. 5. RATIFICATION AND CONFIRMATION OF CONTRACTS.

(a) The contract between the Salt River Valley Water User's Association and Roosevelt Water Conservation District dated October 24, 1924, together with all amendments thereto and any extension thereto entered into pursuant to the Agreement, is ratified, confirmed, and declared to be valid.

(b) The Secretary is authorized and directed to revise the subcontract of the Roosevelt Water Conservation District for agricultural water service from CAP to include an addendum substantially in the form of exhibit "10.3.2" to the Agreement and to execute the subcontract as revised. Notwithstanding any other provision of law, the Secretary shall approve the conversions of agricultural water to municipal and industrial uses authorized by the addendum at such time as the conditions authorizing such conversions, as set forth in the addendum, are found to exist.

(c) At such time as the authorizations in section 9 become effective, the lands within the RWCD shall be free from the ownership limitations of federal reclamation law and all full cost pricing provisions of Federal law.

(d) Neither the Salt River Valley Water User's Association nor the Salt River Project Agricultural Improvement and Power District shall become subject to the provisions of the Reclamation Reform Act of 1982 (43 U.S.C. 390aa et seq.) by virtue of either its participation in the settlement or its execution and performance of the Agreement, including but not limited to any exchanges provided for in the Agreement.

(e) At such time as the authorization in section 9 become effective, the lands within the SRP shall be free from the ownership limitations of Federal reclamation law and all full cost pricing provisions of Federal law.

SEC. 6. OTHER WATER.

(a) The Secretary is authorized and directed to acquire for the Community thirteen thousand nine hundred and thirty three acre-feet of water, having a CAP municipal and industrial priority or better, from one or more of the following sources:

(1) Water acquired for and in excess of the amounts necessary for delivery to the Ak Chin Indian Community as specified in the Act of October 19, 1984, 98 Stat. 2698.

(2) CAP water permanently relinquished by the Harquahala Valley Irrigation District pursuant to contract with the Secretary.

(3) CAP municipal and industrial water and CAP Indian priority water permanently

relinquished by the City of Prescott, the Prescott-Yavapai Tribe, the Camp Verde Yavapai-Apache Tribe, the Cottonwood Water Company and the Camp Verde Water Company pursuant to contract with the Secretary. Any water acquired by the Secretary pursuant to this paragraph (3) shall be acquired with the consent of the contracting entity and shall be assigned to the Community in partial satisfaction of the Secretary's obligation under this section.

(i) Providing the Secretary first acquires at least seven thousand acre-feet of CAP water from one or more of the entities named in subsection (a)(3), the Secretary is authorized and directed to acquire, by purchase from willing sellers, land and water rights in the Big Chino Valley of the Verde River watershed, in an amount sufficient to replace all water permanently relinquished pursuant (a)(3). Prior to acquiring such land and water rights, the Secretary shall determine to his satisfaction that the exercise of the water rights will not have an adverse impact on the flow of the Verde River. The Secretary is further authorized and directed to construct diversion, collection, and transmission facilities sufficient to deliver the water to a point near Sullivan Lake in Yavapai County, Arizona (hereinafter referred to as the "Sullivan Lake delivery point").

(ii) If the Secretary acquires the CAP contract or subcontracts of the Camp Verde Yavapai-Apache Tribe, the Cottonwood Water Company or the Camp Verde Water Company, the Secretary is authorized to construct transmission facilities from the Sullivan Lake delivery point to a point on the Verde River below Perkinsville, or such other point above or below Perkinsville, as the Secretary determines is feasible for the delivery of replacement water to such entity or entities.

(iii) If the Secretary acquires the CAP contract or subcontract of the Prescott Yavapai Tribe or the City of Prescott, the Secretary is authorized to construct transmission facilities from the Sullivan Lake delivery point to a point in the southeast quarter of section 22, township 16 north, range 2 west, G&SRB&M, in Yavapai County, Arizona, or to such other point in the Little Chino Valley, Yavapai County, Arizona, as the Secretary determines is feasible in order to deliver replacement water to such entity or entities.

(iv) The Secretary is authorized to contract to deliver replacement water to the entities who relinquish CAP water to the Secretary for the benefit of the Community. No replacement water may be delivered to any entity other than those identified in subsection (a)(3) or used directly or indirectly outside Yavapai County, Arizona.

(v) The entities which relinquish CAP water to the Community pursuant to subsection (c) shall not be required to repay costs incurred by the United States pursuant to subsection (a)(3)(i). The entities identified in subsection (a)(3)(ii) and (a)(3)(iii), respectively, shall repay the United States so much of the cost of the undertakings identified in those subsections as the parties and the United States shall agree.

(vi) There is authorized to be appropriated such sums as may be necessary to reimburse the City of Prescott for the costs advanced by the City of Prescott after January 1, 1988, for the purpose of determining the hydrology of the Big Chino Valley, Yavapai County, Arizona.

(b) If the Secretary acquires water pursuant to subsection (a)(3), the Secretary shall exclude, for the purpose of determining the allocation and repayment of costs of the CAP as provided in Article 9.3 of Contract No. 14-06-W-245 between the United States and CAWCD dated December 15, 1972, and any amendment or revision thereof, the costs associated with such water from CAWCD's repayment obligation and such costs shall not be non-reimbursable.

(c) If water is acquired pursuant to subsection (a)(3) hereof, there is authorized to be appropriated such sums as may be necessary to pay the costs of acquiring the replacement source identified in subsection (a)(3)(i).

(d) The Secretary shall, in the exercise of the authorities provided in subsection (a), comply with all applicable environmental law.

(e) Water acquired by the Secretary for the Fort McDowell Indian Community pursuant to this section shall be delivered to the Community as provided for in the Agreement. Any remaining water acquired by the Secretary pursuant to this section shall be used only in the settlement of water rights claims of other Indian tribes having claims to the surface water of the Salt and Verde River system.

SEC. 7. WATER DELIVERY CONTRACT AMENDMENTS; WATER LEASE.

(a) The Secretary is authorized and directed to amend the CAP water delivery contract between the United States and the Community dated December 11, 1980 (herein referred to as the "Community CAP Delivery Contract"), as follows:

(1) to extend the term of such contract to December 31, 2099, and to provide for its subsequent renewal upon terms and conditions to be agreed upon by the parties prior to the expiration of the extended term thereof;

(2) to authorize the Community to lease the CAP water to which the Community is entitled under the Community CAP Delivery Contract to the cities specified in and under the terms and conditions of the Project Water Leases set forth in exhibits "20.1" to the Agreement for a term commencing January 1, 2000, and ending December 31, 2099.

(b) Notwithstanding any other provision of law, the amendments to the Community CAP Delivery Contract set forth in the Agreement and the terms and conditions of the Project Water Leases set forth in the Agreement are hereby authorized, approved, and confirmed.

(c) The United States shall not impose upon the Community the operation, maintenance and replacement charges described and set forth in the Community CAP Delivery Contract or any other charge with respect to CAP water delivered or required to be delivered to the lessees of the Project Water Leases herein authorized.

(d) The Community and the Secretary shall lease to the cities, for a term commencing on January 1, 2000, and ending December 31, 2099, and for such consideration as may be agreed upon, to be paid by the cities to the Community, upon those terms reflected in the Project Water Leases set forth in exhibit "20.1" to the Agreement, up to four thousand three hundred acre-feet of CAP water to which the Community is entitled under the Community CAP Delivery Contract. The Project Water Leases shall specifically provide that—

(1) the cities, each in accordance with its obligations under the Project Water Leases, shall pay all operation, maintenance and replacement costs of such water to the United States, or, if directed by the Secretary, to the Central Arizona Water Conservation District.

(2) except as otherwise provided in the Project Water Leases, the cities shall not be obligated to pay water service capital charges or municipal and industrial subcontract charges or any other charges or payment for such CAP water other than the operation, maintenance, and replacement costs and lease payments as set forth in this subsection.

(e) For the purpose of determining the allocation and repayment of costs of the CAP as provided in Article 9.3 of Contract Numbered 14-06-245 between the United States of America and the Central Arizona Water Conservation District dated December 15, 1972, and any amendment or revision thereof, the costs associated with the delivery of CAP water pursuant to the Project Water Leases referred to in subsection (d) shall be nonreimbursable, and such costs shall be excluded from CAWCD's repayment obligation.

(f) Notwithstanding any other provision of statutory or common law, the Community may, with the approval of the Secretary, lease water provided to the Community under section 6 of this Act for its fair market value for a term not to exceed one hundred years as provided in the Agreement but in no event for use outside Pima, Pinal or Maricopa Counties, State of Arizona.

(g) Except as authorized by this section, no water received by the Community or its members pursuant to the Agreement may be sold, leased, transferred, or in any way used off of the Community's reservation.

SEC. 8. FORT McDOWELL INDIAN COMMUNITY DEVELOPMENT FUND.

(a) As soon as practicable, the Community shall establish the Fort McDowell Indian Community Development Fund into which shall be deposited—

(1) by the Secretary, the funds appropriated pursuant to subsection (c) of this section; and

(2) by the State of Arizona, $2,000,000 required by paragraph 21.4 of the Agreement.

(b) The Secretary is directed, pursuant to the authority of the Colorado River Basin Project Act (43 U.S.C. 1501 et seq.) to design and construct new facilities for the delivery of water to Community reservation lands at a cost which shall not exceed the cost for such design and construction which would have been incurred by the Secretary in the absence of the Agreement and this Act;

(c) There is hereby authorized to be appropriated such sums as may be necessary, which the Secretary shall deposit into the Community Development Fund for the Community to use in the design and construction of facilities to put to beneficial use the Community's water entitlement and/or other economic and community development on the Fort McDowell Indian Reservation.

(d) As of the date the authorizations contained in section 9(b) of this Act become effective, the Community, in its discretion, may use the Development Fund, principal and income, to fulfill the purposes of the Agreement and this Act: *Provided*, That no amount of the Federal or State appropriations deposited into the Development Fund may be used to make per capita payments to members of the Community.

(e) As of the date the authorizations contained in section 9(b) of this Act become effective—

(1) the Secretary shall have no further duties or responsibilities with respect to the

administration of, or expenditures from, the Development Fund, and

(2) the United States shall not be liable for any claim or cause of action arising from the Community's use and expenditure of moneys from the Development Fund.

SEC. 9. SATISFACTION OF CLAIMS.

(a) The benefits realized by the Community's members under this act shall constitute full and complete satisfaction of all members' claims for water rights of injuries to water rights under Federal and State laws (including claims for water rights in ground water, surface water, and effluent) from time immemorial to the effective date of this Act, and for any and all future claims of water rights (including claims for water rights in ground water, surface water, and effluent) from and after the effective date of this Act.

(b) The Community and the Secretary on behalf of the United States are authorized, as part of the performance of the obligations under the Agreement, to execute a waiver and release of all present and future claims of water rights or injuries to water rights (including water rights in ground water, surface water, and effluent), from time immemorial to the effective date of this Act, and any and all future claims of water rights (including water rights in ground water, surface water, and effluent), from and after the effective date of this Act, which the Community and its members may have, against the United States, the State of Arizona or any agency or political subdivision thereof, or any other person, corporation, or municipal corporation, arising under the laws of the United States or the State of Arizona; except for the Community's claims solely against the United States in the United States Claims Court and the Community's Federal Tort Claims Act claims.

(c) Except as provided in the Agreement, the United States shall not assert any claim against the State of Arizona or any political subdivision thereof, or any other person, corporation, or municipal corporation, arising under the laws of the United States or the State or Arizona in its own right or on behalf of the Community based upon—

(1) water rights or injuries to water rights of the Community and its members; or

(2) water rights or injuries to water rights held by the United States on behalf of the Community and its members.

(d) In the event the authorizations contained in paragraph (b) of this section do not become effective pursuant to section 11(a), the Community shall retain the right to assert past and future water rights claims as to all reservation lands.

SEC. 10. MISCELLANEOUS PROVISIONS.

(a) In the event any party to the Agreement should file a lawsuit in Federal District Court relating only and directly to the interpretation or enforcement of the Agreement, naming the United States of America or the Community as parties, authorization is hereby granted to join the United States of America and/or the Community in any such litigation, and any claim by the United States of America or the Community to sovereign immunity from such suit is hereby waived.

(b) The United States of America shall make no claims for reimbursement of costs arising out of the implementation of this Act or the Agreement against any lands within the Fort McDowell Indian Reservation, and no assessment shall be made with regard to such costs against such lands.

(c) Water received by entities other than the Community pursuant to the Agreement shall not affect any future allocation or reallocation of the CAP supply.

(d) To the extent the Agreement does not conflict with the provisions of this Act, such Agreement is hereby approved, ratified, and confirmed. The Secretary is authorized and directed to execute and perform such Agreement. The Secretary is further authorized to execute any amendments to the Agreement and perform any action required by any amendments to the Agreement which may be mutually agreed upon by the parties.

(e) As of the date the authorizations contained in section 9(b) of this act become effective, section 302(a) of the Colorado River Basin Project Act (43 U.S.C. 1522(a)) shall no longer apply to the Community.

(f) As of the date the authorizations contained in section 9(b) of this Act become effective, section 304(c)(3) of the Colorado River Basin Project Act (43 U.S.C. 1524(c)(3)) shall be repealed. This subsection does not authorize transportation of water pumped within the exterior boundary of a Federal reclamation project established prior to September 30, 1968, pursuant to the Act of June 17, 1902 (32 Stat. 388; 43 U.S.C. 391), as amended and supplemented, across project boundaries.

SEC. 11. EFFECTIVE DATE.

(a) The authorizations contained in section 9(b) of this Act shall become effective as of the date the Secretary causes to be published in the Federal Register a statement of findings that:

(1) the Secretary has signed a contract with the SRP for the storage and reregulation of the Community's Kent Decree water pursuant to section 4;

(2) the Roosevelt Water Conservation District subcontract for agricultural water service from CAP has been revised and executed as provided in section 5(b);

(3) the Secretary has acquired water pursuant to section 6 and made it available for delivery for the benefit of the Community;

(4) the funds required for the purpose of section 8(b) have been appropriated;

(5) the funds authorized by section 8(c) have been appropriated and deposited into the Community Development Fund;

(6) the State of Arizona has appropriated and deposited into the Community Development Fund the $2,000,000 required by paragraph 21.4 of the Agreement;

(7) the stipulation which is attached to the Agreement as exhibit "19.5" has been approved;

(8) the Agreement has been modified to the extent it is in conflict with this Act and has been executed by the Secretary.

(b) If the actions described in paragraphs (1), (2), (3), (4), (5), (6), (7), and (8) of subsection (a) have not occurred by December 31, 1993, sections 4, 5, 7, 8(a), 8(b), 8(c), 9(b), 9(c), 10(a), 10(b), 10(c), 10(d), 10(e), and 10(f) and any contracts entered into pursuant to those provisions shall not thereafter be effective, and any funds appropriated pursuant to section 8(c) shall revert to the Treasury, and any funds appropriated pursuant to paragraph 21.4 of the Agreement shall revert to the State of Arizona.

SEC. 12. OTHER CLAIMS.

Nothing in this Agreement or this act shall be construed in any way to quantify or otherwise affect the water rights, claims or entitlements to water of any Arizona Indian tribe, band or community, other than the Community.

SECTION-BY-SECTION ANALYSIS

SEC. 1.—SHORT TITLE

"Fort McDowell Indian Community Water Rights Settlement Act of 1990"

SEC. 2. CONGRESSIONAL FINDINGS AND DECLARATIONS

This section lists findings that:

(1) the policy of the United States, in fulfillment of its trust responsibility to Indian tribes, is to promote Indian self-determination and economic self-sufficiency and to settle Indian water rights claims without lengthy and costly litigation;

(2) meaningful self-determination and economic self-sufficiency depend on development of viable Indian reservation economies;

(3) quantifying rights to water and developing facilities to use water supplies is essential to development of viable reservation economies, particularly in arid States;

(4) the U.S. established the Ft. McDowell reservation on September 15, 1903, north of the confluence of the Salt and Verde rivers in Arizona;

(5) the U.S. obtained water entitlements for the Community pursuant to the Kent Decree of 1910; however, uncertainty as to the full extent of the Community's water entitlement has adversely affected its ability to develop the reservation's agricultural and other resources and reduce its reliance on Federal program funding;

(6) litigation to determine the full extent of the Community's water rights and damages thereto is pending in Federal District and Claims Courts, before Federal agencies and in the General Adjudication of the Gila River System and Source in Arizona Superior Court;

(7) rather than endure the costs and uncertainty of lengthy litigation, the Community and neighboring non-Indian communities have sought to settle their disputes to water by negotiation;

(8) after more than five years' of negotiations, including participation by representatives of the United States, the Community and neighboring non-Indian communities in the Salt River Valley have entered into an agreement to resolve all water claims between and among themselves, quantify the Community's entitlement to water and provide for development of the Community's lands;

(9) the agreement provides for the non-Indian communities to transfer to the Community rights to approximately 12,000 acre-feet of surface water; provide for the means of firming existing Community water supplies; and make substantial additional contributions to carry out the agreement's provisions;

(10) it is appropriate that the United States participate in implementation of the agreement and contribute funds for the rehabilitation and expansion of existing reservation irrigation facilities to enable the Community to use its water fully in developing a diverse and efficient economy.

Congress therefore declares the purposes of this Act:

(1) to approve, ratify and confirm the agreement entered into by the Community and its neighboring non-Indian communities;

(2) to authorize and direct the Secretary to execute and perform the agreement; and,

(3) to authorize the actions and appropriations necessary for the United States to fulfill its legal and trust obligations to the Community as provided in the agreement and this Act.

SEC. 3. DEFINITIONS

This section defines the terms "Agreement"; "Central Arizona Project" (CAP); "Central Arizona Water Conservation District" (CAWCD); "Fort McDowell Indian Community" (Community) "Kent Decree"; "Roosevelt Water Conservation District" (RWCD); "Secretary"; and, "Salt River Project Agricultural Improvement and Power District and Salt River Valley Water Users' Association" (SRP).

SEC. 4. KENT DECREE REREGULATION

This section confirms existing agreements between the United States and the Salt River Project and among the SRP, Phelps Dodge Corporation and the Defense Plant Corporation regarding storage of water behind Horseshoe and Bartlett Dams on the Verde River.

The Secretary is required to contract with SRP for the storage of up to 3,000 acre-feet of the Community's water entitlement under the Kent Decree for seasonal regulation.

SEC. 5. RATIFICATION AND CONFIRMATION OF CONTRACTS

This section (a) ratifies and confirms a 1924 contract between the SRP and the Roosevelt Water Conservation District;

(b) requires the Secretary to revise RWCD's CAP water service contract consistent with the Agreement regarding conversions of agricultural water to municipal and industrial water;

(c) provides that RWCD lands shall be free from the ownership limitations of Federal reclamation law and all full cost pricing provisions of Federal law as of the date the Community's claims are waived pursuant to section 9;

(d) bars the application of the Reclamation Reform Act of 1982 to the SRP by virtue of its participation in the settlement or its execution and performance of the Agreement;

(e) provides that lands with SRP shall be free from the ownership limitations of Federal reclamation law and all full cost pricing provisions of Federal law as of the date the Community's claims are waived pursuant to section 9.

SECTION 6. OTHER WATER

This section requires the Secretary to acquire for the Community 13,933 acre-feet of water, having a CAP municipal and industrial priority or better, from one or more of three sources:

(1) water acquired for and in excess of the amounts necessary for delivery to the Ak-Chin Indian Community as specified in the Ak-Chin water settlement of October 19, 1984;

(2) CAP water voluntarily and permanently relinquished by the Harquahala Valley Irrigation District pursuant to contract with the Secretary;

(3) CAP municipal and industrial water and CAP Indian priority water voluntarily and permanently relinquished by the City of Prescott, the Prescott-Yavapai Indian Tribe, the Camp Verde Yavapai-Apache Tribe, the Cottonwood Water Company and the Camp Verde Water Company pursuant to contract with the Secretary.

Provided he acquires at least 7,000 acre-feet from the sources identified in (3), the Secretary is authorized to purchase land and water rights in the Big Chino Valley to replace the water acquired, and to construct facilities to deliver the replacement water. The entities relinquishing water are required to share the costs of the delivery systems pursuant to an agreement to be negotiated with the Secretary.

The costs associated with the acquisition of this water shall be excluded from the determination of allocation and repayment of CAP costs as provided in the master repayment contract between the United States and the CAWCD.

There is authorized to be appropriated amounts necessary to pay the costs of acquiring replacement water and to reimburse the City of Prescott for costs advanced by the City for determining the hydrology of the Big Chino Valley.

The Secretary is required to deliver water acquired for the Community as provided in the Agreement. Any remaining acquired water shall be used only in the settlement of water rights claims of other tribes to the surface water of the Salt and Verde River system.

The Secretary is required to comply with all applicable environmental law in exercising his authority under this section.

SEC. 7. WATER DELIVERY CONTRACT AMENDMENTS; WATER LEASE

This section authorizes the Secretary to take the actions necessary to implement provisions in the Agreement which provide for the cities to lease the Community's CAP entitlement of 4,300 acre-feet for 99 years.

The United States is barred from imposing on the Community the operation, maintenance and repair charges associated with the delivery of the leased water; the cities shall pay such OM&R costs in accordance with their leases, but pay no other charges associated with the leased water.

The costs associated with the delivery of CAP water pursuant to the leases are to be nonreimbursable and excluded from CAWCD's repayment obligation under its master repayment contract with the United States.

Notwithstanding any other provision of law, the Community may, with the approval of the Secretary, lease water it receives under Section 6 for its fair market value for no more than 100 years as provided in the Agreement but only for use within Pima, Pinal or Maricopa Counties, Arizona.

SEC. 8. FORT MC DOWELL INDIAN COMMUNITY DEVELOPMENT FUND

Subsection (a) requires the Community to establish a Community Development Fund into which shall be deposited:

(1) by the Secretary, the funds appropriated pursuant to subsection (c); and,

(2) by the State of Arizona, $2,000,000 required by the Agreement.

Subsection (b) directs the Secretary, pursuant to existing authority of the Colorado River Basin Project Act, to design and construct new facilities for the delivery of water to Community reservation lands at a cost not to exceed that which would have been incurred by the Secretary for such design and construction in the absence of the Agreement or this Act.

Subsection (c) authorizes appropriations of $ for the Community to use in the design and construction of facilities to put to beneficial use the Community's water entitlement and/or other economic and community development on the reservation.

The Community may use the development fund, principal and interest, when its claims waiver becomes effective pursuant to sections 9 and 11, provided that no part of the federal or state appropriations to the fund may be used to make per capita payments to members of the Community.

When the claims waiver is effective, the Secretary shall have no further duties or responsibilities with respect to the development fund, nor shall the United States be liable for any claim or cause of action arising from the Community's use and expenditure of moneys from the fund.

SEC. 9. SATISFACTION OF CLAIMS

This section provides that the benefits to the Community's members from this settlement constitute full satisfaction of their claims for water rights or injuries to water rights under Federal and State laws, from time immemorial to the effective date of this Act and thereafter.

The Community and the Secretary on behalf of the United States are authorized, as part of the performance of the Agreement, to execute a waiver and release of all past, present and future claims of water rights or injuries to water rights the Community and its members may have against the United States, the State of Arizona or anyone else under State and Federal law, except for the Community's claims solely against the United States in the United States Claims Court and the Community's Federal Tort Claims Act claims.

Except as provided in the Agreement, the United States shall not assert, in its own right or on behalf of the Community, any claims against the State of Arizona or anyone else based upon water rights or injuries to water rights of the Community and its members.

In the event the authorization for the waiver of claims in this section does not become effective pursuant to section 11(a), the Community shall retain the right to assert past and future water rights claims as to all reservation lands.

SEC. 10. MISCELLANEOUS PROVISIONS

This section—

(a) authorizes the joinder of the United States and/or the Community in any litigation filed in Federal District court by any party to the Agreement relating only and directly to the interpretation and enforcement of the Agreement and waives any claim by the United States and the Community to sovereign immunity from such suit;

(b) bars the United States from claiming any reimbursement or making any assessment of costs arising out of implementation of this Act or the Agreement against any lands within the Fort McDowell Indian Reservation;

(c) exempts water received by entities other than the Community pursuant to the Agreement from having any effect on any future alocation or reallocation of the CAP supply;

(d) approves, ratifies and confirms the Agreement to the extent it does not conflict with the provisions of this Act, directs the Secretary to execute and perform the Agreement and to execute any amendments to it which may be mutually agreed to by the parties;

(e) deems section 302(a) of the Colorado River Basin Project Act (which provides for withdrawal of Community lands for Orme Dam and reservoir), no longer applicable to the Community as of the effective date of the Community's waiver of claims under section 9;

(f) repeals section 304(c)(3) of the Colorado River Basin Project Act (which requires the Secretary and any CAP contractor to agree that a surplus of groundwater exists and that drainage is or was required as a precondition to pumping ground water from within the service area of one CAP contractor for use outside that contractor's service area) as of the effective date of the Commu-

nity's waiver of claims under section 9. Such repeal does not authorize transportation of water pumped from within the boundaries of the pre-1968 federal reclamation project across the project's boundaries.

SEC. 11. EFFECTIVE DATE.

This section provides that the claims waiver provision in section 9(b) shall become effective as of the date the Secretary publishes in the Federal Register a notice of findings that the following actions have occurred:

(1) the Secretary has contracted with SRP for the storage and reregulation of the Community's Kent Decree water pursuant to section 4;

(2) the Roosevelt Water Conservation District subcontract for agricultural water service from CAP has been revised and executed as provided in section 5(b);

(3) the Secretary has acquired other water pursuant to section 6 and made it available for delivery for the benefit of the Community;

(4) Congress has appropriated funds under authority of the Colorado River Basin Project Act necessary for the Secretary to design and construct new facilities for the delivery of water to Community reservation lands pursuant to section 8(b);

(5) Congress has appropriated and the Secretary has deposited into the Community's Development Fund the funds authorized by section 8(c);

(6) $2,000,000 appropriated by the State of Arizona has been deposited into the Community's Development Fund as required by the Agreement and section 8(a)(2);

(7) the stipulation which is attached to the Agreement as exhibit "19.5" has been approved;

(8) the Agreement has been modified to the extent it is in conflict with this Act and has been executed by the Secretary.

If the actions described in paragraphs 1 through 8 have not occurred by December 31, 1993, this Act shall not be effective and any contracts entered into pursuant to it shall not thereafter be effective, and any funds appropriated for deposit into the Community Development Fund shall revert to the Treasury and the State of Arizona, respectively.

SEC. 12. OTHER CLAIMS.

This section states that nothing in the Agreement or this Act shall be construed in any way to quantify or otherwise affect the water rights, claims or entitlements to water of any Arizona Indian tribe, band or community, other than the Community.

By Mr. PRYOR (for himself, Mr. BENTSEN, Mr. BOREN, Mr. RIEGLE, Mr. DASCHLE, Mr. DURENBERGER, Mr. DANFORTH, Mr. BAUCUS, Mr. MOYNIHAN, Mr. ROCKEFELLER, Mr. BREAUX, and Mr. JEFFORDS):

S. 2901. A bill to amend the Internal Revenue Code of 1986 to simplify the application of the tax laws with respect to employee benefit plans, and for other purposes; to the Committee on Finance.

EMPLOYEE BENEFITS SIMPLIFICATION ACT

Mr. PRYOR. Mr. President, I stand today to introduce the Employee Benefits Simplification Act. I am joined in this effort by 10 of my fellow Finance Committee members, Chairman BENTSEN and Senators BOREN, RIEGLE, DASCHLE, DURENBERGER, DANFORTH, BAUCUS, MOYNIHAN, ROCKEFELLER, and BREAUX. In addition, we are joined by Senator JEFFORDS of the Labor Committee.

Since 1974, the private pension system has become increasingly complex as Congress and the executive branch have added layer upon layer of complexity and regulation. This bill attempts to peel back a few of those layers.

Obviously, this bill does not solve all the problems of complexity in the private pension system. It should be seen, however, as the first positive step toward simplification. I anticipate that as the process unfolds, we will find additional pension rules ripe for simplification. I look forward to working with all interested parties to rationalize and simplify the existing pension rules.

With this in mind, the Finance Committee on Private Retirement Plans and Oversight of the Internal Revenue Service will hold a hearing on August 3 to discuss this bill and its companion bill, the Church Retirement Benefits Simplification Act. I look forward to those discussions.

In drafting this legislation, we have attempted to juggle the often conflicting policy goals of simplification, flexibility, and worker protection. I believe we have reached the proper balance.

No one can say that this legislation is "pro-business" or "pro-labor" in its approach. It is "pro-simplicity" and should have a positive effect on the entire pension system for everyone involved. No one benefits from complexity in the system and everyone recognizes that. I expect that we will receive support from big business, small business, labor, State and local governments. I suspect also that we will receive some criticism for not doing enough or maybe doing too much. That is good. That is healthy. This is a difficult subject that is best served by strong and thorough debate.

It is my sincere hope that after discussing the Employee Benefits Simplification Act on August 3, the Finance Committee will choose to include the bill in budget reconciliation this year.

Mr. President, I ask unanimous consent to place in the RECORD a copy of the legislation and a description of the bill prepared by my staff.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2901

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; AMENDMENT OF 1986 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Employee Benefits Simplification Act".

(b) AMENDMENT OF 1986 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1986.

TITLE I—NONDISCRIMINATION PROVISIONS

SEC. 101. DEFINITION OF HIGHLY COMPENSATED EMPLOYEES.

(a) IN GENERAL.—Paragraph (1) of section 414(q) (defining highly compensated employee) is amended to read as follows:

"(1) IN GENERAL.—The term 'highly compensated employee' means any employee who—

"(A) was a 5-percent owner at any time during the year or the preceding year, or

"(B) has compensation for the year from the employer in excess of $50,000.

The Secretary shall adjust the $50,000 amount under subparagraph (B) at the same time and in the same manner as under section 415(d), except that the amount applicable for any year under subparagraph (B) shall be the amount in effect for the calendar year with respect to which compensation is determined for such year under paragraph (7)."

(b) SPECIAL RULE WHERE NO EMPLOYEES TREATED AS HIGHLY COMPENSATED.—Paragraph (2) of section 414(q) is amended to read as follows:

"(2) SPECIAL RULE IF NO EMPLOYEE DESCRIBED IN PARAGRAPH (1).—If no employee is treated as a highly compensated employee under paragraph (1), the employee who has the highest compensation for the year shall be treated as a highly compensated employee. The preceding sentence shall not apply for purposes of section 401 (k) or (m)."

(c) CONFORMING AMENDMENTS.—

(1) Paragraphs (4), (5), (8), and (12) of section 414(q) are hereby repealed.

(2)(A) Section 414(r) is amended by adding at the end thereof the following new paragraph:

"(9) EXCLUDED EMPLOYEES.—For purposes of this subsection, the following employees shall be excluded:

"(A) Employees who have not completed 6 months of service.

"(B) Employees who normally work less than 17½ hours per week.

"(C) Employees who normally work not more than 6 months during any year.

"(D) Employees who have not attained the age of 21.

"(E) Except to the extent provided in regulations, employees who are included in a unit of employees covered by an agreement which the Secretary of Labor finds to be a collective bargaining agreement between employee representatives and the employer. Except as provided by the Secretary, the employer may elect to apply subparagraph (A), (B), (C), or (D) by substituting a shorter period of service, smaller number of hours or months, or lower age for the period of service, number of hours or months, or age (as the case may be) specified in such subparagraph."

(B) Subparagraph (A) of section 414(r)(2) is amended by striking "subsection (q)(8)" and inserting "paragraph (9)".

(d) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall apply to years beginning after December 31, 1990.

(2) ELECTION FOR 1991.—An employer may elect not to have the amendments made by this section apply to years beginning in 1991.

SEC. 102. DEFINITION OF COMPENSATION.

(a) IN GENERAL.—Paragraph (1) of section 414(s) (defining compensation) is amended to read as follows:

"(1) IN GENERAL.—Except as provided in this subsection, the term 'compensation' means, with respect to any year, the amount of wages shown on the W-2 form for the calendar year in which the year begins."

(b) WAGES SHOWN ON W-2 FORM.—Section 414(s)(3) is amended to read as follows:

"(3) WAGES ON W-2 FORM.—For purposes of this subsection—

"(A) IN GENERAL.—The term 'wages shown on the W-2 form' means, with respect to any individual, the amount a person is required to include under section 6051(a)(3) on the statement required to be furnished by such person to such individual under section 6051(a).

"(B) SPECIAL RULES FOR SELF-EMPLOYED INDIVIDUALS.—In the case of an employee within the meaning of section 401(c)(1), the employee's earned income for the calendar year in which the year begins shall be substituted for the wages shown on the W-2 form. For purposes of the preceding sentence, the term 'earned income' has the meaning given such term by section 401(c)(2) (without regard to any exclusion under section 911).

"(C) SPECIAL RULE FOR FISCAL YEARS.—If compensation is being determined for a period other than a calendar year, the employer shall substitute for wages shown on the W-2 form the amount which would be shown on the W-2 form if it covered such other period."

(c) CERTAIN DEFERRALS WHICH MAY BE TREATED AS COMPENSATION.—Section 414(s)(2) (relating to employer may elect to treat certain deferrals as compensation) is amended—

(1) by striking "or 403(b)" and inserting ", 403(b), or 457, or any amount which is not includible in the gross income of an employee under subsection (h) or section 501(c)(18)", and

(2) by adding at the end the following new sentence: "An election under this paragraph shall apply for purposes of all applicable provisions, to all employees, and to all amounts described in the preceding sentence, and, once made, may be revoked only with the consent of the Secretary."

(d) ELECTION TO USE BASE PAY.—Section 414(s) is amended by redesignating paragraph (4) as paragraph (5) and by inserting after paragraph (3) the following new paragraph:

"(4) ELECTION TO USE BASE PAY.—An employer may elect, in lieu of wages shown on the W-2 form, to determine an employee's compensation solely by reference to that portion of the employee's compensation attributable to such employee's base pay. Such election shall apply for purposes of all applicable provisions and to all employees and, once made, may be revoked only with the consent of the Secretary."

(e) PROVISIONS USING UNIFORM COMPENSATION DEFINITION.—

(1) HIGHLY COMPENSATED EMPLOYEES.—Paragraph (7) of section 414(q) (defining compensation) is amended to read as follows:

"(7) COMPENSATION.—For purposes of this subsection—

"(A) IN GENERAL.—Except as provided in subparagraph (B), the term 'compensation' has the meaning given such term by subsection (s), except that an employer may not elect to use base pay under subsection (s)(4).

"(B) WAGES DETERMINED ON BASIS OF PRECEDING YEAR.—Notwithstanding subsection (s)(3), compensation for any year shall be determined on the basis of the wages shown on the W-2 form—

"(i) with respect to which the last date for furnishing such form under section 6051(a) occurs during the first 3 months of such year, or

"(ii) if clause (i) does not apply, for the calendar year preceding the calendar year in which such year begins."

(2) BENEFIT AND CONTRIBUTION LIMITS.—Section 415(c)(3) is amended—

(A) by striking "paragraph (1)" in the matter preceding subparagraph (A) and inserting "paragraph (1) and subsections (b) and (e)",

(B) by striking subparagraphs (A) and (B) and inserting:

"(A) IN GENERAL.—The term 'participant's compensation' means the compensation (as defined in section 414(s)) of the participant from the employer for the year.", and

(C) by redesignating subparagraph (C) as subparagraph (B).

(f) TREATMENT OF FAMILY MEMBERS.—Section 414(q)(6)(A) is amended—

(1) by striking "or of a highly compensated employee in the group consisting of the 10 highly compensated employees paid the greatest compensation during the year", and

(2) by striking "or highly compensated employee" in clause (ii) thereof.

(g) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall apply to years beginning after December 31, 1990.

(2) ELECTION FOR 1991.—An employer may elect not to have the amendments made by this section apply to years beginning in 1991.

SEC. 103. MODIFICATIONS OF COST-OF-LIVING ADJUSTMENTS.

(a) IN GENERAL.—Section 415(d) (relating to cost-of-living adjustments) is amended to read as follows:

"(d) COST-OF-LIVING ADJUSTMENTS.—

"(1) IN GENERAL.—The Secretary shall adjust annually—

"(A) the $90,000 amount in subsection (b)(1)(A), and

"(B) in the case of a participant who separated from service, the amount taken into account under subsection (b)(1)(B),

for increases in the cost-of-living in accordance with regulations prescribed by the Secretary.

"(2) METHOD.—

"(A) IN GENERAL.—The regulations prescribed under paragraph (1) shall provide for adjustment procedures which are similar to the procedures used to adjust benefit amounts under section 215(i)(2)(A) of the Social Security Act.

"(B) PERIODS FOR ADJUSTMENT OF DOLLAR AMOUNT.—For purposes of paragraph (1)(A)—

"(i) IN GENERAL.—The adjustment with respect to any calendar year shall be based on the increase in the applicable index as of the close of the calendar quarter ending September 30 of the preceding calendar year over such index as of the close of the base period.

"(ii) BASE PERIOD.—For purposes of clause (i), the base period is the calendar quarter beginning October 1, 1986.

"(C) For purposes of paragraph (1)(B), the base period is the last calendar quarter of the calendar year preceding the calendar year in which the participant separated from service.

"(3) ROUNDING.—Any amount determined under paragraph (1) (or by reference to this subsection) shall be rounded to the nearest $1,000, except that the amounts under sections 402(g)(1) and 408(k)(2)(C) and (8) shall be rounded to the nearest $100."

(b) EFFECTIVE DATE.—The amendments made by this section apply to adjustments with respect to calendar years beginning after December 31, 1990.

SEC. 104. MODIFICATION OF ADDITIONAL PARTICIPATION REQUIREMENTS.

(a) GENERAL RULE.—Section 401(a)(26)(A) (relating to additional participation requirements) is amended to read as follows:

"(A) IN GENERAL.—In the case of a trust which is a part of a defined benefit plan, such trust shall not constitute a qualified trust under this subsection unless on each day of the plan year such trust benefits at least the lesser of—

"(i) 25 employees of the employer, or

"(ii) the greater of—

"(I) 40 percent of all employees of the employer, or

"(II) 2 employees (or if there is only 1 employee, such employee)."

(b) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendment made by this section shall apply to years beginning after December 31, 1990.

(2) ELECTION.—A plan may elect to have the amendment made by this section apply as if such amendment was included in the amendment made by section 1112(b) of the Tax Reform Act of 1986. Such election shall be made at such time, and in such form, as the Secretary of the Treasury may prescribe.

SEC. 105. NONDISCRIMINATION RULES FOR QUALIFIED CASH OR DEFERRED ARRANGEMENTS AND MATCHING CONTRIBUTIONS.

(a) ALTERNATIVE METHODS OF SATISFYING SECTION 401(k) NONDISCRIMINATION TESTS.—Section 401(k) (relating to cash or deferred arrangements) is amended by adding at the end thereof the following new paragraph:

"(11) ALTERNATIVE METHODS OF MEETING NONDISCRIMINATION REQUIREMENTS.—

"(A) IN GENERAL.—A cash or deferred arrangement shall be treated as meeting the requirements of paragraph (3)(A)(ii) if such arrangement—

"(i) meets the contribution requirements of subparagraph (B) or (C), and

"(ii) meets the notice requirements of subparagraph (D).

"(B) MATCHING CONTRIBUTIONS.—

"(i) IN GENERAL.—The requirements of this subparagraph are met if, under the arrangement, the employer makes matching contributions on behalf of each employee who is not a highly compensated employee not less than—

"(I) 100 percent of the elective contributions of the employee to the extent such elective contributions do not exceed 3 percent of the employee's compensation, and

"(II) 50 percent of the elective contributions of the employee to the extent that such elective contributions exceed 3 percent but do not exceed 5 percent of the employee's compensation.

"(ii) RATE FOR HIGHLY COMPENSATED EMPLOYEES.—The requirements of this subparagraph are not met if, under the arrangement, the matching contribution with respect to any elective contribution of a highly compensated employee at any level of compensation is greater than that with respect to an employee who is not a highly compensated employee.

"(iii) ALTERNATIVE PLAN DESIGNS.—If the matching contribution with respect to any

elective contribution at any specific level of compensation is not equal to the percentage required under clause (i), an arrangement shall not be treated as failing to meet the requirements of clause (i) if—

"(I) the level of an employer's matching contribution does not increase as an employee's elective contributions increase, and

"(II) the aggregate amount of matching contributions with respect to elective contributions not in excess of such level of compensation is at least equal to the amount of matching contributions which would be made if matching contributions were made on the basis of the percentages described in clause (i).

"(C) NONELECTIVE CONTRIBUTIONS.—The requirements of this subparagraph are met if, under the arrangement, the employer is required, without regard to whether the employee makes an elective contribution or employee contribution, to make a contribution to a defined contribution plan on behalf of each employee who is not a highly compensated employee and who is eligible to participate in the arrangement in an amount equal to at least 3 percent of the employee's compensation.

"(D) NOTICE REQUIREMENT.—An arrangement meets the requirements of this paragraph if, under the arrangement, each employee eligible to participate is, within a reasonable period before any year, given written notice of the employee's rights and obligations under the arrangement which—

"(i) is sufficiently accurate and comprehensive to appraise the employee of such rights and obligations, and

"(ii) is written in a manner calculated to be understood by the average employee eligible to participate.

"(E) OTHER REQUIREMENTS.—

"(i) WITHDRAWAL AND VESTING RESTRICTIONS.—An arrangement shall not be treated as meeting the requirements of subparagraph (B) or (C) unless the requirements of subparagraphs (B) and (C) of paragraph (2) are met with respect to employer contributions.

"(ii) SOCIAL SECURITY AND SIMILAR CONTRIBUTIONS NOT TAKEN INTO ACCOUNT.—An arrangement shall not be treated as meeting the requirements of subparagraph (B) or (C) unless such requirements are met without regard to subsection (l), and, for purposes of subsection (l), employer contributions under subparagraph (B) or (C) shall not be taken into account.

"(F) OTHER PLANS.—An arrangement shall be treated as meeting the requirements under subparagraph (A)(i) if any other plan maintained by the employer meets such requirements with respect to employees eligible under the arrangement."

(b) ALTERNATIVE METHODS OF SATISFYING SECTION 401(m) NONDISCRIMINATION TESTS.—Section 401(m) (relating to nondiscrimination test for matching contributions and employee contributions) is amended by redesignating paragraph (10) as paragraph (11) and by adding after paragraph (9) the following new paragraph:

"(10) ALTERNATIVE METHOD OF SATISFYING TESTS.—

"(A) IN GENERAL.—A defined contribution plan shall be treated as meeting the requirements of paragraph (2) with respect to matching contributions if the plan—

"(i) meets the contribution requirements of subparagraph (B) or (C) of subsection (k)(11),

"(ii) meets the notice requirements of subsection (k)(11)(D), and

"(iii) meets the requirements of subparagraph (B).

"(B) LIMITATION ON MATCHING CONTRIBUTIONS.—The requirements of this subparagraph are met if—

"(i) matching contributions on behalf of any employee may not be made with respect to an employee's contributions or elective deferrals in excess of 6 percent of the employee's compensation,

"(ii) the level of an employer's matching contribution does not increase as an employee's contributions or elective deferrals increase, and

"(iii) the matching contribution with respect to any highly compensated employee at a specific level of compensation is not greater than that with respect to an employee who is not a highly compensated employee."

(c) DISTRIBUTION OF EXCESS CONTRIBUTIONS.—

(1) Subparagraph (C) of section 401(k)(8) (relating to arrangement not disqualified if excess contributions distributed) is amended by striking "on the basis of the respective portions of the excess contributions attributable to each of such employees" and inserting "on the basis of the amount of contributions by, or on behalf of, each of such employees".

(2) Subparagraph (C) of section 401(m)(6) (relating to method of distributing excess aggregate contributions) is amended by striking "on the basis of the respective portions of such amounts attributable to each of such employees" and inserting "on the basis of the amount of contributions on behalf of, or by, each such employee".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to years beginning after December 31, 1990.

TITLE II—DISTRIBUTIONS

SEC. 201. TAXABILITY OF BENEFICIARY OF EMPLOYEES' TRUST.

(a) IN GENERAL.—So much of section 402 (relating to taxability of beneficiary of employees' trust) as precedes subsection (g) thereof is amended to read as follows:

"SEC. 402. TAXABILITY OF BENEFICIARY OF EMPLOYEES' TRUST.

"(a) TAXABILITY OF BENEFICIARY OF EXEMPT TRUST.—Except as otherwise provided in this section, any amount actually distributed to any distributee by any employees' trust described in section 401(a) which is exempt from tax under section 501(a) shall be taxable to the distributee, in the taxable year of the distributee in which distributed, under section 72 (relating to annuities).

"(b) TAXABILITY OF BENEFICIARY OF NONEXEMPT TRUST.—

"(1) CONTRIBUTIONS.—Contributions to an employees' trust made by an employer during a taxable year of the employer which ends within or with a taxable year of the trust for which the trust is not exempt from tax under section 501(a) shall be included in the gross income of the employee in accordance with section 83 (relating to property transferred in connection with performance of services), except that the value of the employee's interest in the trust shall be substituted for the fair market value of the property for purposes of applying such section.

"(2) DISTRIBUTIONS.—The amount actually distributed or made available to any distributee by any trust described in paragraph (1) shall be taxable to the distributee, in the taxable year in which so distributed or made available, under section 72 (relating to annuities), except that distributions of income of such trust before the annuity starting date (as defined in section 72(c)(4)) shall be included in the gross income of the employee without regard to section 72(e)(5) (relating to amount not received as annuities).

"(3) GRANTOR TRUSTS.—A beneficiary of any trust described in paragraph (1) shall not be considered the owner of any portion of such trust under subpart E of part I of subchapter J (relating to grantors and others treated as substantial owners).

"(4) FAILURE TO MEET REQUIREMENTS OF SECTION 410(B).—

"(A) HIGHLY COMPENSATED EMPLOYEES.—If 1 of the reasons a trust is not exempt from tax under section 501(a) is the failure of the plan of which it is a part to meet the requirements of section 401(a)(26) or 410(b), then a highly compensated employee shall, in lieu of the amount determined under this subsection, include in gross income for the taxable year with or within which the taxable year of the trust ends an amount equal to the vested accrued benefit of such employee (other than the employee's investment in the contract) as of the close of such taxable year of the trust.

"(B) FAILURE TO MEET COVERAGE TESTS.—If a trust is not exempt from tax under section 501(a) for any taxable year solely because such trust is part of a plan which fails to meet the requirements of section 401(a)(26) or 410(b), this subsection shall not apply by reason of such failure to any employee who was not a highly compensated employee during—

"(i) such taxable year, or

"(ii) any preceding period for which service was creditable to such employee under the plan.

"(C) HIGHLY COMPENSATED EMPLOYEE.—For purposes of this paragraph, the term 'highly compensated employee' has the meaning given such term by section 414(q).

"(c) TAXABILITY OF BENEFICIARY OF CERTAIN FOREIGN SITUS TRUSTS.—For purposes of subsections (a) and (b), a stock bonus, pension, or profit-sharing trust which would qualify for exemption from tax under section 501(a) except for the fact that it is a trust created or organized outside the United States shall be treated as if it were a trust exempt from tax under section 501(a).

"(d) RULES APPLICABLE TO ROLLOVERS FROM EXEMPT TRUSTS.—

"(1) EXCLUSION FROM INCOME.—If—

"(A) any portion of the balance to the credit of an employee in a qualified trust is paid to either the employee or the employee's spouse,

"(B) the distributee transfers any portion of the property received in such distribution to an eligible retirement plan, and

"(C) in the case of a distribution of property other than money, the amount so transferred consists of the property distributed,

then such distribution (to the extent so transferred) shall not be includible in gross income for the taxable year in which paid.

"(2) MAXIMUM AMOUNT WHICH MAY BE ROLLED OVER.—Paragraph (1) shall not apply to any amount transferred to the extent such amount exceeds the fair market value of all the property the distributee receives in the distribution, reduced by the portion of the distribution which is allocable to employee contributions (other than accumulated deductible employee contributions within the meaning of section 72(o)(5)).

"(3) TRANSFER MUST BE MADE WITHIN 60 DAYS OF RECEIPT.—Paragraph (1) shall not apply to any transfer of a distribution made after the 60th day following the day on

which the distributee received the property distributed.

"(4) TRANSFER TREATED AS ROLLOVER CONTRIBUTION UNDER SECTION 408.—For purposes of this title, a transfer resulting in any portion of a distribution being excluded from gross income under paragraph (1) to an eligible retirement plan described in clause (i) or (ii) of paragraph (8)(C) shall be treated as a rollover contribution described in section 408(d)(3).

"(5) REQUIRED DISTRIBUTIONS NOT ELIGIBLE FOR ROLLOVER TREATMENT.—Paragraph (1) shall not apply to any distribution to the extent such distribution is required under section 401(a)(9).

"(6) SALES OF DISTRIBUTED PROPERTY.—For purposes of this subsection—

"(A) TRANSFER OF PROCEEDS FROM SALE OF DISTRIBUTED PROPERTY TREATED AS TRANSFER OF DISTRIBUTED PROPERTY.—The transfer of an amount equal to any portion of the proceeds from the sale of property received in the distribution shall be treated as the transfer of property received in the distribution.

"(B) PROCEEDS ATTRIBUTABLE TO INCREASE IN VALUE.—The excess of fair market value of property on sale over its fair market value on distribution shall be treated as property received in the distribution.

"(C) DESIGNATION WHERE AMOUNT OF DISTRIBUTION EXCEEDS ROLLOVER CONTRIBUTION.—In any case where part or all of the distribution consists of property other than money, the taxpayer may designate—

"(i) the portion of the money or other property which is to be treated as attributable to employee contributions, and

"(ii) the portion of the money or other property which is to be treated as included in the rollover contribution.

Any designation under this subparagraph for a taxable year shall be made not later than the time prescribed by law for filing the return for such taxable year (including extensions thereof). Any such designation, once made, shall be irrevocable.

"(D) TREATMENT WHERE NO DESIGNATION.—In any case where part or all of the distribution consists of property other than money and the taxpayer fails to make a designation under subparagraph (C) within the time provided therein, then—

"(i) the portion of the money or other property which is to be treated as attributable to employee contributions, and

"(ii) the portion of the money or other property which is to be treated as included in the rollover contribution,

shall be determined on a ratable basis.

"(E) NONRECOGNITION OF GAIN OR LOSS.—In the case of any sale described in subparagraph (A), to the extent that an amount equal to the proceeds is transferred pursuant to paragraph (1), neither gain nor loss on such sale shall be recognized.

"(7) SPECIAL RULE FOR FROZEN DEPOSITS.—

"(A) IN GENERAL.—The 60-day period described in paragraph (3) shall not—

"(i) include any period during which the amount transferred to the employee is a frozen deposit, or

"(ii) end earlier than 10 days after such amount ceases to be a frozen deposit.

"(B) FROZEN DEPOSITS.—For purposes of this subparagraph, the term 'frozen deposit' means any deposit which may not be withdrawn because of—

"(i) the bankruptcy or insolvency of any financial institution, or

"(ii) any requirement imposed by the State in which such institution is located by reason of the bankruptcy or insolvency (or threat thereof) of 1 or more financial institutions in such State.

A deposit shall not be treated as a frozen deposit unless on at least 1 day during the 60-day period described in paragraph (3) (without regard to this paragraph) such deposit is described in the preceding sentence.

"(8) DEFINITIONS.—For purposes of this subsection—

"(A) EMPLOYEE CONTRIBUTIONS.—The term 'employee contributions' means—

"(i) the excess of the amounts considered contributed by the employee (determined by applying section 72(f)), over

"(ii) any amounts previously distributed to the employee which were not includible in gross income (determined without regard to this paragraph).

"(B) QUALIFIED TRUST.—The term 'qualified trust' means an employees' trust described in section 401(a) which is exempt from tax under section 501(a).

"(C) ELIGIBLE RETIREMENT PLAN.—The term 'eligible retirement plan' means—

"(i) an individual retirement account described in section 408(a),

"(ii) an individual retirement annuity described in section 408(b) (other than an endowment contract),

"(iii) a qualified trust, and

"(iv) an annuity plan described in section 403(a).

"(e) OTHER RULES APPLICABLE TO EXEMPT TRUSTS.—

"(1) ALTERNATE PAYEES.—

"(A) ALTERNATE PAYEE TREATED AS DISTRIBUTEE.—For purposes of subsection (a) and section 72, an alternate payee who is the spouse or former spouse of the participant shall be treated as the distributee of any distribution or payment made to the alternate payee under a qualified domestic relations order (as defined in section 414(p)).

"(B) ROLLOVERS.—If—

"(i) any amount is paid or distributed to an alternate payee by reason of any qualified domestic relations order (within the meaning of section 414(p)),

"(ii) the recipient transfers any portion of the property the recipient receives in such distributions to an eligible retirement plan described in clause (i) or (ii) of subsection (d)(8)(C), and

"(iii) in the case of a distribution of property other than money, the amount so transferred consists of the property distributed.

then the portion of the distribution so transferred shall be treated as a distribution to which subsection (d) applies.

"(2) DISTRIBUTIONS BY UNITED STATES TO NONRESIDENT ALIENS.—The amount includible under subsection (a) in the gross income of a nonresident alien with respect to a distribution made by the United States in respect of services performed by an employee of the United States shall not exceed an amount which bears the same ratio to the amount includible in gross income without regard to this paragraph as—

"(A) the aggregate basic pay paid by the United States to such employee for such services, reduced by the amount of such basic pay which was not includible in gross income by reason of being from sources without the United States, bears to

"(B) the aggregate basic pay paid by the United States to such employee for such services.

In the case of distributions under the civil service retirement laws, the term 'basic pay' shall have the meaning provided in section 8331(3) of title 5, United States Code.

"(3) CASH OR DEFERRED ARRANGEMENTS.—For purposes of this title, contributions made by an employer on behalf of an employee to a trust which is a part of a qualified cash or deferred arrangement (as defined in section 401(k)(2)) shall not be treated as distributed or made available to the employee nor as contributions made to the trust by the employee merely because the arrangement includes provisions under which the employee has an election whether the contribution will be made to the trust or received by the employee in cash.

"(4) NET UNREALIZED APPRECIATION.—

"(A) AMOUNTS ATTRIBUTABLE TO EMPLOYEE CONTRIBUTIONS.—For purposes of subsection (a) and section 72, the amount actually distributed to any distributee from a trust described in subsection (a) shall not include any net unrealized appreciation in securities of the employer corporation attributable to amounts contributed by the employee (other than deductible employee contributions within the meaning of section 72(o)(5)). This subparagraph shall not apply to a partial distribution to which subsection (d) applies.

"(B) AMOUNTS ATTRIBUTABLE TO EMPLOYER CONTRIBUTIONS.—In the case of any lump sum distribution which includes securities of the employer corporation, subparagraph (A) shall apply to the net unrealized appreciation attributable to that part of the distribution which consists of securities of the employer corporation attributable to amounts other than the amounts contributed by the employee. In accordance with rules prescribed by the Secretary, a taxpayer may elect, on the return of tax on which a lump sum distribution is required to be included, not to have this subparagraph and subparagraph (A) apply to such distribution.

"(C) DETERMINATION OF AMOUNTS AND ADJUSTMENTS.—For purposes of subparagraphs (A) and (B), net unrealized appreciation and the resulting adjustments to basis shall be determined in accordance with regulations prescribed by the Secretary.

"(D) LUMP SUM DISTRIBUTION.—For purposes of this paragraph—

"(i) IN GENERAL.—The term 'lump sum distribution' means the distribution or payment within one taxable year of the recipient of the balance to the credit of an employee which becomes payable to the recipient—

"(I) on account of the employee's death,

"(II) after the employee attains age 59,

"(III) on account of the employee's separation from service, or

"(IV) after the employee has become disabled (within the meaning of section 72(m)(7)),

from a trust which forms a part of a plan described in section 401(a) and which is exempt from tax under section 501 or from a plan described in section 403(a). Subclause (III) of this clause shall be applied only with respect to an individual who is an employee without regard to section 401(c)(1), and subclause (IV) shall be applied only with respect to an employee within the meaning of section 401(c)(1). For purposes of this clause, a distribution to two or more trusts shall be treated as a distribution to one recipient. For purposes of this paragraph, the balance to the credit of the employee does not include the accumulated deductible employee contributions under the plan (within the meaning of section 72(o)(5)).

"(ii) AGGREGATION OF CERTAIN TRUSTS AND PLANS.—For purposes of determining the

balance to the credit of an employee under subparagraph (A)—

"(I) all trusts which are part of a plan shall be treated as a single trust, all pension plans maintained by the employer shall be treated as a single plan, all profit-sharing plans maintained by the employer shall be treated as a single plan, and all stock bonus plans maintained by the employer shall be treated as a single plan, and

"(II) trusts which are not qualified trusts under section 401(a) and annuity contracts which do not satisfy the requirements of section 404(a)(2) shall not be taken into account.

"(iii) COMMUNITY PROPERTY LAWS.—The provisions of this paragraph shall be applied without regard to community property laws.

"(iv) AMOUNTS SUBJECT TO PENALTY.—This paragraph shall not apply to amounts described in subparagraph (A) of section 72(m)(5) to the extent that section 72(m)(5) applies to such amounts.

"(v) BALANCE TO CREDIT OF EMPLOYEE NOT TO INCLUDE AMOUNTS PAYABLE UNDER QUALIFIED DOMESTIC RELATIONS ORDER.—For purposes of this paragraph, the balance to the credit of an employee shall not include any amount payable to an alternate payee under a qualified domestic relations order (within the meaning of section 414(p)).

"(vi) TRANSFERS TO COST-OF-LIVING ARRANGEMENT NOT TREATED AS DISTRIBUTION.—For purposes of this paragraph, the balance to the credit of an employee under a defined contribution plan shall not include any amount transferred from such defined contribution plan to a qualified cost-of-living arrangement (within the meaning of section 415(k)(2)) under a defined benefit plan.

"(vii) LUMP-SUM DISTRIBUTIONS OF ALTERNATE PAYEES.—If any distribution or payment of the balance to the credit of an employee would be treated as a lump-sum distribution, then, for purposes of this paragraph, the payment under a qualified domestic relations order (within the meaning of section 414(p)) of the balance to the credit of an alternate payee who is the spouse or former spouse of the employee shall be treated as a lump-sum distribution. For purposes of this clause, the balance to the credit of the alternate payee shall not include any amount payable to the employee.

"(E) DEFINITIONS.—For purposes of this paragraph—

"(i) SECURITIES.—The term 'securities' means only shares of stock and bonds or debentures issued by a corporation with interest coupons or in registered form.

"(ii) SECURITIES OF THE EMPLOYER.—The term 'securities of the employer corporation' includes securities of a parent or subsidiary corporation (as defined in subsections (e) and (f) of section 425) of the employer corporation.

"(f) WRITTEN EXPLANATION TO RECIPIENTS OF DISTRIBUTIONS ELIGIBLE FOR ROLLOVER TREATMENT.—

"(1) IN GENERAL.—The plan administrator of any plan shall, when making an eligible rollover distribution, provide a written explanation to the recipient of the provisions under which such distribution will not be subject to tax if transferred to an eligible retirement plan within 60 days after the date on which the recipient received the distribution.

"(2) DEFINITIONS.—For purposes of this subsection—

"(A) ELIGIBLE ROLLOVER DISTRIBUTION.—The term 'eligible rollover distribution' means any distribution any portion of which may be excluded from gross income under subsection (d) of this section or subsection (a)(4) of section 403 if transferred to an eligible retirement plan in accordance with the requirements of such subsection.

"(B) ELIGIBLE RETIREMENT PLAN.—The term 'eligible retirement plan' has the meaning given such term by subsection (d)(8)(C)."

(b) CONFORMING AMENDMENTS.—

(1) Paragraph (1) of section 55(c) is amended by striking "shall not include any tax imposed by section 402(e) and".

(2) Paragraph (8) of section 62(a) (relating to certain portion of lump-sum distributions from pension plans taxed under section 402(e)) is hereby repealed.

(3) Paragraph (4) of section 72(o) (relating to special rule for treatment of rollover amount) is amended by striking "sections 402(a)(5), 402(a)(7)" and inserting "sections 402(d)".

(4) Subparagraph (B) of section 101(b)(2) (relating to nonforfeitable rights) is amended by striking "section 402(e)(4)" and inserting "section 401(k)(10)(B)(ii)".

(5) Paragraph (2) of section 219(d) (relating to recontributed amount) is amended by striking "section 402(a)(5), 402(a)(7)" and inserting "section 402(d)".

(6) Paragraph (20) of section 401(a) is amended by striking "qualified total distribution described in section 402(a)(5)(E)(i)(I)" and inserting "distribution to a distributee on account of a termination of the plan of which the trust is a part".

(7) Section 401(a)(28)(B) (relating to coordination with distribution rules) is amended by striking clause (v).

(8) Subclause (IV) of section 401(k)(2)(B)(i) is amended by striking "section 402(a)(8)" and inserting "section 402(e)(3)".

(9) Subparagraph (B)(ii) of section 401(k)(10) (relating to distributions must be lump-sum distributions) is amended to read as follows:

"(ii) LUMP SUM DISTRIBUTION.—For purposes of this subparagraph, the term 'lump sum distribution' means any distribution of the balance to the credit of an employee immediately before the distribution."

(10) Section 402(g)(1) is amended by striking "subsections (a)(8)" and inserting "subsections (e)(3)".

(11) Section 402(i) is amended by striking ", except as otherwise provided in subparagraph (A) of subsection (e)(4)".

(12) Section 402(j) is amended by striking "(a)(1) or (e)(4)(J)" and inserting "(e)(4)".

(13) Subparagraph (B) of section 403(a)(4) is amended to read as follows:

"(B) CERTAIN RULES MADE APPLICABLE.—Rules similar to the rules of section 402(d) shall apply for purposes of subparagraph (A)."

(14) Subparagraph (B) of section 403(b)(8) (relating to special rules for partial distributions) is hereby repealed.

(15) Subparagraph (C) of section 403(b)(8) is amended to read as follows:

"(C) CERTAIN RULES MADE APPLICABLE.—Rules similar to the rules of paragraphs (2), (3), (4), (6), and (7) of section 403(d) shall apply for purposes of subparagraph (A)."

(16) Section 406(c) (relating to termination of status as deemed employee not to be treated as separation from service for purposes of limitation of tax) is hereby repealed.

(17) Section 407(c) (relating to termination of status as deemed employee not to be treated as separation from service for purposes of limitation of tax) is hereby repealed.

(18) Paragraph (1) of section 408(a) is amended by striking "section 402(a)(5), 402(a)(7)" and inserting "section 402(d)".

(19) Clause (ii) of section 408(d)(3)(A) is amended by striking "of a qualified total distribution (as defined in section 402(a)(5)(E)(i))" and inserting "(as defined in section 402(d)(1))".

(20) Subparagraph (B) of section 408(d)(3) (relating to limitations) is amended by striking the second sentence thereof.

(21) Subparagraph (F) of section 408(d)(3) (relating to frozen deposits) is amended by striking "section 402(a)(6)(H)" and inserting "section 402(d)(7)".

(22) Subclause (I) of section 414(n)(5)(C)(iii) is amended by striking "section 402(a)(8)" and inserting "section 402(e)(3)".

(23) Clause (i) of section 414(q)(7)(B) is amended by striking "402(a)(8)" and inserting "402(e)(3)".

(24) Paragraph (2) of section 414(s) (relating to employer may elect to treat certain deferrals as compensation) is amended by striking "402(a)(8)" and inserting "402(e)(3)".

(25) Subparagraph (A) of section 415(b)(2) (relating to annual benefit in general) is amended by striking "sections 402(a)(5)" and inserting "sections 402(d)".

(26) Subparagraph (B) of section 415(b)(2) (relating to adjustment for certain other forms of benefit) is amended by striking "sections 402(a)(5)" and inserting "sections 402(d)".

(27) Paragraph (2) of section 415(c) (relating to annual addition) is amended by striking "sections 402(a)(5)" and inserting "sections 402(d)".

(28) Subparagraph (B) of section 457(c)(2) is amended by striking "section 402(a)(8)" in clause (i) thereof and inserting "section 402(e)(3)".

(29) Section 691(c) (relating to coordination with section 402(e)) is amended by striking paragraph (5).

(30) Subparagraph (B) of section 871(a)(1) (relating to income other than capital gains) is amended by striking "402(a)(2), 403(a)(2), or".

(31) Paragraph (1) of section 871(b) (relating to imposition of tax) is amended by striking "section 1, 55, or 402(e)(1)" and inserting "section 1 or 55".

(32) Paragraph (1) of section 871(k) is amended by striking "section 402(a)(4)" and inserting "section 402(e)(2)".

(33) Subsection (b) of section 877 (relating to alternative tax) is amended by striking "section 1, 55, or 402(e)(1)" and inserting "section 1 or 55".

(34) Subsection (b) of section 1441 (relating to income items) is amended by striking "section 402(a)(2), 403(a)(2), or".

(35) Paragraph (5) of section 1441(c) (relating to special items) is amended by striking "section 402(a)(2), 403(a)(2), or".

(36) Subparagraph (A) of section 3121(v)(1) is amended by striking "section 402(a)(8)" and inserting "section 402(e)(3)".

(37) Subparagraph (A) of section 3306(r)(1) is amended by striking "section 402(a)(8)" and inserting "section 402(e)(3)".

(38) Subsection (a) of section 3405 is amended by striking "PENSIONS, ANNUITIES, ETC.—" from the heading thereof and inserting "PERIODIC PAYMENTS.—".

(39) Subsection (b) of section 3405 (relating to nonperiodic distribution) is amended—

(A) by striking "the amount determined under paragraph (2)" from paragraph (1)

thereof and inserting "an amount equal to 10 percent of such distribution"; and

(B) by striking paragraph (2) (relating to amount of withholding) and redesignating paragraph (3) as paragraph (2).

(40) Paragraph (4) of section 3405(d) (relating to qualified total distributions) is hereby repealed.

(41) Paragraph (8) of section 3405(d) (relating to maximum amounts withheld) is amended to read as follows:

"(8) MAXIMUM AMOUNT WITHHELD.—The maximum amount to be withheld under this section on any designated distribution shall not exceed the sum of the amount of money and the fair market value of other property (other than securities of the employer corporation) received in the distribution. No amount shall be required to be withheld under this section in the case of any designated distributions which consists only of securities of the employer corporation and cash (not in excess of $200) in lieu of financial shares. For purposes of this paragraph, the terms 'securities' and 'securities of the employer corporation' have the meanings given such terms by section 402(e)(4)(E)."

(42) Subparagraph (A) of section 4973(b)(1) is amended by striking "sections 402(a)(5), 402(a)(7)' and inserting "sections 402(d)".

(43) Section 4980A(c) (relating to special rule where taxpayer elects income averaging) is amended by striking paragraph (4).

(44) Paragraph (2) of section 6428(d) (relating to special rule for tax imposed by section 402(e)) is hereby repealed.

(45) Subparagraph (C) of section 7701(j)(1) is amended by striking "section 402(a)(8)" and inserting "section 402(e)(3)".

(c) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by this section shall apply to distributions after December 31, 1990.

(2) RETENTION OF CERTAIN TRANSITIONAL RULES.—Notwithstanding any other provisions of this section, the amendments made by this section shall not apply to distributions to employees described in section 1122 (h)(3) or (h)(5) of the Tax Reform Act of 1986.

SEC. 202. QUALIFIED PLANS MUST PROVIDE FOR TRANSFERS OF CERTAIN DISTRIBUTIONS TO OTHER PLANS.

(a) QUALIFICATION REQUIREMENT.—Section 401(a) (relating to requirements for qualification) is amended by adding after paragraph (30) the following new paragraph:

"(31) CERTAIN DISTRIBUTIONS MUST BE MADE IN FORM OF TRANSFER TO OTHER PLAN.—A trust shall not constitute a qualified trust under this section unless the plan of which it is a part meets the requirements of section 417A."

(b) TRANSFER REQUIREMENTS.—

(1) IN GENERAL.—Subpart B of part I of subchapter D of chapter 1 (relating to special rules) is amended by adding at the end thereof the following new section:

"SEC. 417A. REQUIRED TRANSFERS OF CERTAIN PLAN DISTRIBUTIONS.

"(a) GENERAL RULE.—A plan meets the requirements of this section only if all applicable distributions from the plan are made in the form of a direct trustee-to-trustee transfer to an eligible transferee plan.

"(b) APPLICABLE DISTRIBUTION.—For purposes of this section—

"(1) IN GENERAL.—The term 'applicable distribution' means any distribution from a plan in excess of $500 which, without regard to this section, would be distributed directly to a participant or to the beneficiary of a participant.

"(2) EXCEPTIONS.—The term 'applicable distribution' shall not include any of the following:

"(A) Any distribution described in section 72(t)(2)(A) (other than clause (i) or (ii) thereof) or section 72(t)(2)(D).

"(B) Any distribution on or after the date the employee attains age 55.

"(C) Any distribution on or after the death of the employee other than to the surviving spouse of the employee.

"(D) In the case of a profit-sharing or stock bonus plan, a distribution upon hardship of the employee.

"(E) Any distribution of any employee contribution other than accumulated deductible contributions (within the meaning of section 72(o)(5)).

"(F) Any distribution the proceeds of which are used to repay any loan to the employee from the plan with respect to which the employee is in default.

"(c) ELIGIBLE TRANSFEREE PLAN.—For purposes of this section—

"(1) IN GENERAL.—The term 'eligible transferee plan' means an individual retirement plan designated by the employee in such form, and at such time, as the transferor plan may prescribe.

"(2) DESIGNATION BY PLAN.—

"(A) IN GENERAL.—Each plan shall provide a method for the designation of an eligible transferee plan if an employee does not designate a plan under paragraph (1).

"(B) DESIGNATION BY TRUSTEE.—The trustee shall designate the eligible transferee plan under the method prescribed under subparagraph (A) in cases—

"(i) where the employee does not designate, or

"(ii) where the transfer in accordance with an employee's designation is not practicable.

"(3) TRANSFERS TO QUALIFIED TRUSTS.—Except as otherwise provided in regulations, an eligible transferee plan shall include an employee's trust described in section 401(a) and exempt from tax under section 501(a) which is designated as provided in paragraph (2) and which—

"(A) is part of a defined contribution plan, and

"(B) provides for the acceptance of the distribution from the transferor plan.

"(d) SPECIAL RULES FOR TREATMENT OF TRANSFERS.—

"(1) WITHDRAWALS BEFORE DUE DATE.—

"(A) IN GENERAL.—For purposes of this title, if, during the distribution period with respect to any applicable distribution, the employee receives a distribution from the eligible transferee plan of any portion of the applicable distribution (and any income allocable thereto), the distribution from the eligible transferee plan shall, for purposes of this title, be treated as if it were a distribution from the transferor plan in the taxable year of receipt by the employee.

"(B) DISTRIBUTION PERIOD.—For purposes of this paragraph, the term 'distribution period' means the period beginning on the date of the transfer and ending on the due date (including extensions) for the return of tax for the taxable year of the employee in which the date of transfer occurs.

"(2) SPOUSAL BENEFICIARIES.—For purposes of this section, in the case of an applicable distribution to the surviving spouse of an employee, the surviving spouse shall be treated in the same manner as an employee.

"(e) REPORTS.—

"(1) NOTICE TO EMPLOYEES.—The trustee of a plan shall notify each employee before any applicable distribution of the requirements of this section, including the time and manner of making a designation under subsection (c)(1).

"(2) AMOUNTS TRANSFERRED.—The trustee of a transferor plan shall notify the employee of the amount of any direct trustee-to-trustee transfer."

(2) CONFORMING AMENDMENT.—The table of sections for subpart B of part I of subchapter D of chapter 1 is amended by inserting after the item relating to section 417 the following new item:

"Sec. 417A. Required transfers of certain plan distributions."

(c) EXCLUSION FROM INCOME.—

(1) IN GENERAL.—Subsection (e) of section 402 (relating to taxability of beneficiary of employees' trust), as amended by section 201, is amended by adding at the end the following new paragraph:

"(5) DIRECT TRUSTEE-TO-TRUSTEE TRANSFERS.—In the case of a plan described in section 401(a) to which the requirements of section 417A apply, any amount transferred in a direct trustee-to-trustee transfer in accordance with section 417A shall not be includible in gross income for the taxable year of such transfer."

(2) DIRECT TRANSFERS FROM EMPLOYEE ANNUITIES.—

(A) QUALIFIED ANNUITY PLANS.—

(i) Paragraph (2) of section 404(a) (relating to employees' annuities) is amended by striking "(27)" and inserting "(27), and (31)".

(ii) Subsection (a) of section 403 (relating to taxability of beneficiary under a qualified annuity plan) is amended by adding at the end the following new paragraph:

"(5) DIRECT TRANSFERS TO INDIVIDUAL RETIREMENT PLANS.—Rules similar to the rules of sections 402(e)(5) and 417A shall apply with respect to annuity contracts described in paragraph (1), and such contracts shall, for purposes of section 417A(c)(3), be treated in the same manner as a trust described in such section."

(B) ANNUITY CONTRACTS PURCHASED BY SECTION 501(C)(3) ORGANIZATIONS OR PUBLIC SCHOOLS.—Subsection (b) of section 403 (relating to taxability of beneficiary under annuity purchased by section 501(c)(3) organization or public school) is amended by adding at the end the following new paragraph:

"(13) DIRECT TRUSTEE-TO-TRUSTEE TRANSFERS.—Rules similar to the rules of sections 401(a)(31) and 417A and section 402(e)(5) shall apply with respect to annuity contracts described in paragraph (1), and such contracts shall, for purposes of section 417A(c)(3), be treated in the same manner as a trust described in such section."

(d) OTHER AMENDMENTS.—

(1) CERTAIN TRANSFERS NOT TREATED AS REDUCTIONS IN BENEFITS.—Section 411(d)(6)(B) (relating to accrued benefit not to be decreased by amendment) is amended by adding at the end the following new sentence: "Except as otherwise provided in regulations, the requirements of clause (ii) shall not be treated as violated solely by reason of a direct trustee-to-trustee transfer required by section 417A."

(2) SERVICE DISREGARDED WHERE DISTRIBUTION IS PERMITTED.—

(A) IN GENERAL.—Subparagraph (B) of section 411(a)(7) (relating to effect of certain distributions) is amended—

(i) in the matter preceding clause (i), by striking "he has received";

(ii) in clause (i), by inserting "the employee has received" after "(i)", and by striking "or";

(iii) in clause (ii), by inserting "the employee has received" after "(ii)", and by striking "receive." and inserting "receive, or";

(iv) by inserting after clause (ii) the following:

"(iii) a direct trustee-to-trustee transfer described in section 417A has been made from the plan."; and

(v) in the last sentence, by striking "Clause (ii)" and inserting "Clauses (ii) and (iii)".

(B) BUYBACK RULES.—Subparagraph (C) of section 411(a)(7) (relating to repayment of subparagraph (B) distributions) is amended by adding at the end the following new sentence: "For purposes of this subparagraph, a direct trustee-to-trustee transfer referred to in subparagraph (B)(iii) with respect to a participant shall be treated as a distribution received by the participant."

(3) NOTICE TO RECIPIENTS OF DISTRIBUTIONS ELIGIBLE FOR ROLLOVER TREATMENT.—Paragraph (1) of section 402(f) (relating to written explanation to recipients of distributions eligible for rollover treatment) is amended—

(A) by striking "when making an eligible rollover distribution, provide a written explanation to the recipient" and inserting "when making an eligible rollover distribution or a direct trustee-to-trustee transfer, provide to the recipient of the distribution or the person with respect to whom the transfer is made a written explanation of"; and

(B) by inserting ", or the income tax consequences of a direct trustee-to-trustee transfer provided in accordance with the applicable requirements of sections 417A, 403(e)(5), and 403(b)(13), respectively." before the end period.

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to distributions in plan years beginning after December 31, 1991.

SEC. 203. REQUIRED DISTRIBUTIONS.

(a) IN GENERAL.—Section 401(a)(9)(C) (defining required beginning date) is amended to read as follows:

"(C) REQUIRED BEGINNING DATE.—For purposes of this paragraph—

"(i) IN GENERAL.—The term 'required beginning date' means April 1 of the calendar year following the later of—

"(I) the calendar year in which the employee attains age 70, or

"(II) the calendar year in which the employee retires.

"(ii) EXCEPTION.—Subclause (II) of clause (i) shall not apply—

"(I) except as provided in section 409(d), in the case of an employee who is a 5-percent owner (as defined in section 416) with respect to the plan year ending in the calendar year in which the employee attains age 70, or

"(II) for purposes of section 408(a)(6) or (b)(3).

"(iii) ACTUARIAL ADJUSTMENT.—In the case of an employee to whom clause (i)(II) applies who retires in a calendar year after the calendar year in which the employee attains age 70, the employee's accrued benefit shall be actuarially increased to take into account the period after age 70 in which the employee was not receiving any benefits under the plan.

"(iv) EXCEPTION FOR GOVERNMENTAL AND CHURCH PLANS.—Clauses (ii) and (iii) shall not apply in the case of a governmental plan or church plan. For purposes of this clause, the term 'church plan' means a plan maintained by a church for church employees, and the term 'church' means any church (as defined in section 3121(w)(3)(A)) or qualified church-controlled organization) as defined in section 3121(w)(3)(B))."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to years beginning after December 31, 1990.

TITLE III—MISCELLANEOUS PROVISIONS

SEC. 301. TREATMENT OF LEASED EMPLOYEES.

(a) REPLACEMENT OF HISTORICAL TEST WITH CONTROL TEST.—Subparagraph (C) of section 414(n)(2) is amended to read as follows:

"(C) such services are performed by such person under the control of the recipient."

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1983.

SEC. 302. ELIMINATION OF HALF-YEAR REQUIREMENTS.

(a) IN GENERAL.—Each of the following provisions are amended by striking "age 59½" and inserting "age 59":

(1) Section 72(q)(2)(A).
(2) Section 72(q)(3)(B)(i).
(3) Section 72(q)(3)(B)(ii).
(4) Section 72(t)(2)(A)(i).
(5) Section 72(t)(4)(A)(ii)(I).
(6) Section 72(t)(4)(A)(ii)(II).
(7) Section 72(v)(2)(A).
(8) Section 403(b)(7)(A)(ii).
(9) Section 403(b)(11)(A).
(10) The heading for section 403(b)(11).
(11) Section 4978(d)(1)(B).

(b) OTHER PROVISIONS.—Each of the following provisions are amended by striking "70½" and inserting "70":

(1) Section 219(d)(1).
(2) The heading for section 219(d)(1).
(3) Section 401(a)(9)(B)(iv)(I).
(4) Section 401(a)(9)(C).
(5) Section 408(b).

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to years beginning after December 31, 1990.

SEC. 303. PLANS COVERING SELF-EMPLOYED INDIVIDUALS.

(a) AGGREGATION RULES.—Section 401(d) (relating to additional requirements for qualification of trusts and plans benefiting owner-employees) is amended to read as follows:

"(d) CONTRIBUTION LIMIT ON OWNER-EMPLOYEES.—A trust forming part of a pension or profit-sharing plan which provides contributions or benefits for employees some or all of whom are owner-employees shall constitute a qualified trust under this section only if, in addition to meeting the requirements of subsection (a), the plan provides that contributions on behalf of any owner-employee may be made only with respect to the earned income of such owner-employee which is derived from the trade or business with respect to which such plan is established."

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to years beginning after December 31, 1990.

SEC. 304. FULL-FUNDING LIMITATION OF MULTIEMPLOYER PLANS.

(a) FULL-FUNDING LIMITATION.—

Section 412(c)(7)(C) (relating to full-funding limitation) is amended—

(1) by inserting "or in the case of a multiemployer plan," after "paragraph (6)(B),", and

(2) by inserting "AND MULTIEMPLOYER PLANS" after "PARAGRAPH (6)(B)" in the heading thereof.

(b) VALUATION.—Section 412(c)(9) is amended—

(1) by inserting "(3 years in the case of a multiemployer plan)" after "year", and

(2) by striking "ANNUAL VALUATION" in the heading and inserting "VALUATION".

(c) CONFORMING AMENDMENTS.—

(1) Section 302(c)(7) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1082(c)(7) is amended—

(A) by inserting "or in the case of a multiemployer plan," after "paragraph (6)(B),", and

(B) by inserting "AND MULTIEMPLOYER PLANS" after "PARAGRAPH (6)(B)" in the heading thereof.

(2) Section 302(c)(9) of such Act (29 U.S.C. 1082(c)(9)) is amended—

(A) by inserting "(3 years in the case of a multiemployer plan)" after "year", and

(B) by striking "ANNUAL VALUATION" in the heading and inserting "VALUATION".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to years beginning after December 31, 1990.

SEC. 305. AFFILIATION REQUIREMENTS FOR EMPLOYERS JOINTLY MAINTAINING A VOLUNTARY EMPLOYEES' BENEFICIARY ASSOCIATION.

(a) IN GENERAL.—For purposes of Treasury Regulations § 1.501(c)(9)-2(a)(1), employers meeting the requirements of subsection (b) shall be treated as affiliated.

(b) REQUIREMENTS.—The requirements of this subsection are met with respect to employers if such employers—

(1) are in the same line of business,

(2) act jointly to perform tasks which are integral to the activities of each of the employers, and

(3) act jointly to such an extent that the joint maintenance of a voluntary employees' beneficiary association is not a major part of the employers' joint activities.

SEC. 306. TREATMENT OF CERTAIN GOVERNMENTAL PLANS.

(a) TREATMENT OF CERTAIN EXCESS BENEFIT PLANS UNDER SECTION 457.—Section 457(f)(2) (relating to tax treatment of participants where plan or arrangement of employer is not eligible) is amended by striking "and" at the end of subparagraph (C), by striking the period at the end of subparagraph (D) and inserting ", and", and by adding at the end thereof the following new subparagraph:

"(E) a governmental plan (or, as determined by the Secretary, a separable part of such plan) maintained by an employer solely for the purpose of providing benefits for certain employees in excess of the limitations on contributions and benefits imposed by section 415 on plans to which section 415 applies, without regard to whether the plan (or separate part) is funded.".

(b) EXEMPTION FOR SURVIVOR AND DISABILITY BENEFITS.—Paragraph (2) of section 415(b) is amended by adding at the end thereof the following new subparagraph:

"(I) EXEMPTION FOR SURVIVOR DISABILITY BENEFITS.—Subparagraph (B) of paragraph (1), subparagraph (C) of this paragraph, and paragraph (5) shall not apply to—

"(i) income received from a governmental plan as a pension, annuity, or similar allowance as the result of the recipient becoming disabled by reason of personal injuries or sickness, or

"(ii) amounts received from a governmental plan by the beneficiaries, survivors, or the estate of an employee, if such payments result from the death of the employee.".

(c) COMPENSATION LIMIT.—Section 415(b) is amended by adding at the end thereof the following new paragraph:

"(11) SPECIAL RULE FOR GOVERNMENTAL PLANS.—In the case of a governmental plan (as defined in section 414(d)), subparagraph (B) of paragraph (1) shall not apply.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1986.

SEC. 307. MODIFICATIONS OF SIMPLIFIED EMPLOYEE PENSIONS.

(a) INCREASE IN NUMBER OF ALLOWABLE PARTICIPANTS FOR SALARY REDUCTION ARRANGEMENTS.—Section 408(k)(6)(B) is amended by striking "25" each place it appears in the text and heading thereof and inserting "100".

(b) MODIFICATION OF PARTICIPATION REQUIREMENTS.—Section 408(k)(2)(B) is amended to read as follows:

"(B) has at least 1 year of service (as determined under section 411(a)(5)) with the employer, and".

(c) REPEAL OF PARTICIPATION REQUIREMENT.—Section 408(k)(6)(A) is amended by striking clause (ii) and by redesignating clauses (iii) and (iv) as clauses (ii) and (iii), respectively.

(d) ALTERNATIVE TEST.—Clause (iii) of section 408(k)(6)(A) is amended by adding at the end thereof the following new flush sentence:

"The requirements of this subparagraph are met if the employer makes contributions to the simplified employee pension meeting the requirements of section 401(k)(11)(C).".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to years beginning after December 31, 1990.

SEC. 308. CONTRIBUTIONS ON BEHALF OF DISABLED EMPLOYEES.

(a) ALL DISABLED PARTICIPANTS RECEIVING CONTRIBUTIONS.—Section 415(c)(3)(C) is amended by adding at the end thereof the following: "If a defined contribution plan provides for the continuation of contributions on behalf of all participants described in clause (i) for a fixed or determinable period, this subparagraph shall be applied without regard to clauses (ii) and (iii).".

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to years beginning after December 31, 1990.

SEC. 309. DISTRIBUTIONS UNDER RURAL COOPERATIVE PLANS.

(a) DISTRIBUTIONS AFTER AGE 59.—Section 401(k)(7) is amended by adding at the end thereof the following new subparagraph:

"(C) SPECIAL RULE FOR CERTAIN DISTRIBUTIONS.—A rural cooperative plan which includes a qualified cash or deferred arrangement shall not be treated as violating the requirements of section 401(a) merely by reason of a distribution to a participant after attainment of age 59.".

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in the amendments made by section 1011(k)(9) of the Technical and Miscellaneous Revenue Act of 1988.

SEC. 310. REPORTS OF PENSION AND ANNUITY PAYMENTS.

(a) AMENDMENTS RELATED TO DEFINITION OF INFORMATION RETURN.—

(1) Subparagraph (A) of section 6724(d)(1) is amended—

(A) by redesignating clauses (iv) through (vii) as clauses (vi) through (ix),

(B) by inserting after clause (iii) the following new clause:

"(v) section 6047(d) (relating to reports by employers, plan administrators, etc.),",

(C) by redesignating clauses (i) through (iii) as clauses (ii) through (iv), and

(D) by inserting before clause (ii) (as so redesignated) the following new clause:

"(i) section 408(i) (relating to individual retirement account and simplified employee pension reports),".

(2) Paragraph (1) of section 6724(d) is amended by adding at the end thereof the following new sentence: "For purposes of clauses (i) and (v) of subparagraph (A), such term shall include only those statements filed with the Secretary with respect to information required to be supplied to both the Secretary and the recipient of the payment.".

(b) AMENDMENTS RELATED TO DEFINITION OF PAYEE STATEMENT.—

(1) Paragraph (2) of section 6724(d) is amended—

(A) by redesignating subparagraphs (H) through (S) as subparagraphs (J) through (U),

(B) by inserting after subparagraph (G) the following new subparagraph:

"(I) section 6047(d) (relating to reports by employers, plan administrators, etc.),",

(C) by redesignating subparagraphs (A) through (G) as subparagraphs (B) through (H), and

(D) by inserting before subparagraph (B) (as so redesignated) the following new subparagraph:

"(A) section 408(i) (relating to individual retirement account and simplified employee pension reports),".

(2) Paragraph (2) of section 6724(d) is amended by adding at the end thereof the following new sentence: "For purposes of subparagraphs (A) and (I), such term shall only include statements with respect to information required to be supplied to both the Secretary and the recipient of the payment.".

(c) AMENDMENTS RELATED TO REPORTS OF DESIGNATED DISTRIBUTION.—

(1) Subsection (i) of section 408 is amended by inserting "aggregating $10 or more" after distributions".

(2) Section 6047(d)(1) is amended by adding at the end thereof the following sentence: "However, no returns or reports shall be required with respect to payments of designated distributions aggregating less than $10 to any person in any year.".

(d) TECHNICAL AMENDMENTS.—

(1) Paragraph (1) of section 6047(f) is amended by striking "section 6652(e)" and inserting "sections 6652(e), 6721, and 6722".

(2) Subsection (e) of section 6652 is amended by adding at the end thereof the following: "However, failures to file returns and statements also describes in section 6724(d)(1) or 6724(d)(2) shall be subject to penalties under part II of chapter 68B of this subtitle, and not under this section.".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to returns and statements required to be filed after December 31, 1990.

SEC. 311. DATE FOR ADOPTION OF PLAN AMENDMENTS.

If any amendment made by this Act requires an amendment to any plan, such plan amendment shall not be required to be made before the first plan year beginning on or after January 1, 1992, if—

(1) during the period after such amendment takes effect and before such first plan year, the plan is operated in accordance with the requirements of such amendment, and

(2) such plan amendment applies retroactively to such period.

EMPLOYEE BENEFITS SIMPLIFICATION ACT

TITLE I—NONDISCRIMINATION PROVISIONS

Section 101—Definition of highly compensated employee

Under present law, an employee is treated as highly compensated with respect to a year if during the year or the preceding year the employee (1) was a 5-percent owner of the employer, (2) received more than $75,000 (indexed at $85,485 for 1990) in annual compensation from the employer, (3) received more than $50,000 (indexed at $56,990 for 1990) in annual compensation from the employer and was a member of the top 20 percent of employees by compensation, or (4) was an officer of the employer with compensation above a certain amount. An employer is treated as having at least one officer if there is no officer of the employer with compensation in excess of the applicable amount.

The bill provides that an employee is highly compensated with respect to a year if the employee (1) was a 5-percent owner of the employer at any time during the year or the preceding year, or (2) has compensation for the year in excess of $50,000. As under present law, the $50,000 threshold is adjusted for cost-of-living increases in the same manner as the limitations on contributions and benefits using a base period beginning October 1, 1986 (sec. 415(d)). However, the bill provides that the dollar limit applicable for any year is the amount in effect for the calendar year with respect to which compensation is determined under the bill.

For example, assume highly compensated employees are being determined for the 1991 plan year in the case of a calendar year plan. Under the bill, 1990 compensation is used to make this determination. Thus, the $50,000 figure as adjusted for 1990 ($56,990) is the applicable dollar limit, not $50,000 as adjusted for 1991.

Under the bill, if no employee is a 5-percent owner or has compensation in excess of $50,000, then the employee with the highest compensation for the year is treated as a highly compensated employee. This special rule does not apply for purposes of the nondiscrimination rules applicable to elective deferrals, matching contributions, and employee contributions (secs. 401(k) and (m)).

Under present law, all family members of (1) a 5-percent owner or (2) a highly compensated employee in the group consisting of the 10 highest paid highly compensated employees are treated as a single highly compensated employee and all the compensation of the family members is treated as compensation of that highly compensated employee. The bill applies the family member aggregation rule only in the case of family members of a 5-percent owner.

This provision is effective for years beginning after December 31, 1990.

Section 102—Definition of compensation

Present law contains a number of definitions of compensation for pension and employee benefit purposes. In general, these definitions are based on compensation within the meaning of the rules relating to limits on contributions and benefits (sec. 415(c)(3)). This definition generally includes only those amounts that are currently includible in gross income and thus, for example, does not include elective deferrals and other salary reduction amounts. For purposes of identifying an employer's highly compensated employees, compensation is defined as under the rules relating to limits on contributions and benefits, except that

elective deferrals and other salary reduction contributions are included (section 414(a)). For other purposes, including applying the applicable nondiscrimination rules, compensation is generally defined as under the rules relating to limits on contributions and benefits; however, an employer may elect to include elective deferrals and other salary reduction amounts in the definition of compensation (section 414(s)). Present law also provides that the Secretary of the Treasury may provide, by regulations, for alternative methods of determining compensation. The Secretary has issued proposed and temporary regulations under this provision.

The bill simplifies the definition of compensation by generally providing a uniform statutory definition of compensation that is used for all purposes, including testing for nondiscrimination, the definition of highly compensated employee, and the limits on contributions and benefits. In general, the bill provides that compensation means, with respect to any year, the amount of wages shown on an employee's W-2 for the calendar year in which the year begins. In the case of a self-employed individual, the individual's earned income (within the meaning of sec. 401(c)(2)) for the calendar year in which the year begins is substituted for the wages shown on the W-2 form. If compensation is being determined for a period other than a calendar year (e.g., in the case of a fiscal year plan), the employer is to use the amount that would be shown on the W-2 form if it covered such period.

The bill modifies the employer election to take salary reduction contributions into account by (1) permitting deferrals under sections 457, 414(h)(2), and 501(c)(18) to be taken into account and (2) providing that an election to take salary reduction into account is to apply for all purposes, to all employees, and to all salary reduction. In addition, such an election is revocable only with the consent of the Secretary. Thus, for example, an employer could not elect to take into account elective deferrals for purposes of the limits on contributions and benefits and exclude them for purposes of identifying highly compensated employees.

The bill permits an employer to elect to use base pay for all purposes other than identifying highly compensated employees instead of W-2 compensation. An employer making such an election may also elect to take into account employee elective and salary reduction contributions. It is intended that base pay is defined generally as under the proposed regulations. Thus, subject to the applicable facts and circumstances, the employer could exclude from the definition of compensation, on a consistent basis, certain types of compensation, including (but not limited to) one or more of the following: any type of additional compensation for employees working outside their regularly scheduled tour of duty (such as overtime pay, premiums and bonuses for individual performance). The resulting definition may not discriminate in favor of highly compensated employees.

In addition, it is intended that, as under the proposed regulations, for the limited purposes of applying the nondiscrimination requirements with respect to the availability of elective contributions to eligible employees under a cash or deferred arrangement (Treas. reg. sec. 1.401(k)-1(e)(1)(ii)) and with respect to the availability of employee contributions and the availability of matching contributions under a defined contribution plan (Treas. reg. sec. 401(m)-1(c)(1)), any reasonable definition of compensation, such as regular or base salary or wages, is treated as nondiscriminatory and may be used. This special rule does not apply for any other purpose, including application of the actual deferral percentage test (section 401(k)(3)) or the actual contribution percentage test (section 401(m)(2)).

Solely for purposes of the definition of a highly compensated employee, the bill provides that the compensation of an employee for any year is determined on the basis of wages shown on the W-2 (1) that is required to be furnished no later than the end of the first 3 months of the year or (2) if (1) does not apply, for the calendar year preceding the calendar year in which the year begins. For example, in the case of a plan year beginning November 1, 1991, compensation for the plan year is wages shown on the W-2 required to be furnished in January, 1992.

The provision is effective for years beginning after December 31, 1990.

Section 103—Modifications of cost-of-living adjustments

Under present law, the cost-of-living adjustments to the limitations on contributions and benefits under qualified plans are made in accordance with procedures consistent with the adjustment of benefits under the Social Security Act. The bill provides that the cost-of-living adjustment with respect ot any calendar year is based on the increase in the applicable index as of the close of the calendar quarter ending September 30 of the calendar year. In addition, the bill provides that, after cost-of-living adjustments, the resulting dollar limits are generally rounded to the nearest $1,000. Under the bill, dollar limits relating to elective deferrals and elective contributions to simplified employee pensions (SEPs) are rounded to the nearest $100.

The cost-of-living adjustment provisions apply to adjustments with respect to calendar years beginning after December 31, 1990.

Section 104—Modification of additional participation requirements

Under present law, a plan is not a qualified plan unless it benefits no fewer than the lesser of (1) 50 employees or (2) 40 percent of all employees of an employer (sec. 401(a)(26)). This minimum participation rule cannot be satisfied by aggregating comparable plans, but can be applied separately to different lines of business. Certain employees may be disregarded in applying the rule.

The bill provides that the minimum participation rule applies only to defined benefit pension plans. In addition, the bill provides that a defined benefit plan does not satisfy the rule unless it benefits no fewer than the lesser of (1) 25 employees or (2) the greater of (a) 40 percent of all employees of the employer or (b) 2 employees (or 1 employee if there is only 1 employee). The separate line of business and excludable employee rules apply as under present law. As an illustration of the operation of the modification of the minimum participation rule, assume that an employer has 150 nonexcludable employees. Under present law, any plan of the employer is required to cover a minimum of 50 employees. Under the bill, any defined benefit plan of the employer is required to cover a minimum of 25 employees.

In the case of an employer with only 2 employees, a plan satisfies the present-law minimum participation rule if the plan covers 1 employee. However, under the bill, a plan satisfies the minimum participation rule only if it covers both employees.

The provision is effective for years beginning after December 31, 1990. However, an employer may elect to apply the provision as if it were included in section 1112(b) of the Tax Reform Act of 1986 (P.L. 99-514).

Section 105—Nondiscrimination rules for qualified cash or deferred arrangements and matching contributions

In general

Under present law, the special nondiscrimination test applicable to qualified cash or deferred arrangements is satisfied if the actual deferral percentage under a cash or deferred arrangement for eligible highly compensated employees for a plan year is equal to or less than either (1) 125 percent of the actual deferral percentage of all nonhighly compensated employees eligible to defer under the arrangement, or (2) the lesser of 200 percent of the actual deferral percentage of all eligible nonhighly compensated employees or the actual deferral percentage for all eligible nonhighly compensated employees plus 2 percentage points. A cash or deferred arrangement that satisfies the special nondiscrimination test is deemed to satisfy the general nondiscrimination requirement applicable to qualified plans (section 401(a)(4)).

In addition, under present law, a special nondiscrimination test is applied to employer matching contributions and employee contributions (section 401(m)). This special nondiscrimination test is similar to the special nondiscrimination test applicable to qualified cash or deferred arrangements. An employer matching contribution means any employer contribution made on account of (1) an employee contribution or (2) an elective deferral under a qualified cash or deferred arrangement or a tax-sheltered annuity contract.

The bill adds alternative methods of satisfying the special nondiscrimiantion requirements applicable to elective deferrals and employer matching contributions. Under these safe harbor rules, a cash or deferred arrangement is treated as satisfying the actual deferral percentage test if the plan of which the arrangement is a part (or any other plan of the employer maintained with respect to the employees eligible to participate in the cash or deferred arrangement) meets (1) one of two contribution requirements and (2) a notice requirement. A plan satisfies the safe harbor with respect to matching contributions if (1) the plan meets the contribution and notice requirements under the safe harbor for cash or deferred arrangements and (2) the plan satisfies a special limitation on matching contributions. These safe harbors permit a plan to satisfy the special nondiscrimination tests through plan design, rather than through the testing of actual contributions to the plan.

Safe harbor for cash or deferred arrangements

Contribution requirements—A plan satisfies the contribution requirements under the safe harbor rule for qualified cash or deferred arrangements if the plan either (1) satisfies a matching contribution requirement or (2) the employer makes a contribution to the plan of at least 3 percent of an employee's compensation on behalf of each nonhighly compensated employee who is eligible to participate in the arrangement without regard to whether the employee makes an elective contribution under the arrangement. Under both tests, contributions

may also be made to highly compensated employees.

A plan satisfies the matching contribution requirement if, under the arrangement: (1) the employer makes a matching contribution on behalf of each nonhighly compensated employee that is not less than (a) 100 percent of the employee's elective contributions up to 3 percent of compensation and (b) 50 percent of the employee's elective contributions from 3 to 5 percent of compensation; and (2) the level of match for highly compensated employees is not greater than the match rate for nonhighly compensated employees. Alternatively, if the matching contribution requirement is not satisfied at some level of employee compensation, the requirement is deemed to be satisfied if (1) the level of employer matching contributions does not increase as employee elective contributions increase and (2) the aggregate amount of matching contributions with respect to elective contributions up to that level of compensation at least equals the amount of matching contributions required under the general safe harbor rule.

Under the safe harbor, an employee's rights to employer matching contributions or nonelective contributions used to meet the contribution requirements are required to be 100 percent vested.

An arrangement does not satisfy the contribution requirements with respect to nonelective contributions unless the requirements are met without regard to the permitted disparity rules (sec. 401(1)), and nonelective contributions used to satisfy the contribution requirements are not taken into account for purposes of determining whether a plan of the employer satisfies the permitted disparity rules. It is intended that this rule applies to matching contributions as well.

Employer matching and nonelective contributions used to satisfy the contribution requirements of the safe harbor rules are subject to the restrictions on withdrawals that apply to an employee's elective deferrals under a qualified cash or deferred arrangement (sec. 401(k)(2) (B) and (C)).

The contribution requirement may be satisfied with either matching or nonelective contributions to the cash or deferred arrangement or with contributions to another plan maintained by the employer for the same employees eligible to participate in the cash or deferred arrangement.

Notice requirement—The notice requirement is satisfied if each employee eligible to participate in the arrangement is given written notice within a reasonable period before any year of the employee's rights and obligations under the arrangement. This notice must be sufficiently accurate and comprehensive to appraise the employee of his or her rights and obligations and must be written in a manner calculated to be understood by the average employee eligible to participate.

Alternative method of satisfying special nondiscrimination test for matching contributions

The bill provides a safer harbor method of satisfying the special nondiscrimination test applicable to employer matching contributions. Under this safe harbor, a plan is treated as meeting the special nondiscrimination test if (1) the plan meets the contribution and notice requirements applicable under the safe harbor method of satisfying the special nondiscrimination requirement for qualified cash or deferred arrangements, and (2) the plan satisfies a special limitation on matching contributions.

The limitation on matching contributions is satisfied if (1) matching contributions on behalf of any employee may not be made with respect to employee contributions or elective deferrals in excess of 6 percent of compensation and (2) the level of an employer's matching contribution does not increase as an employee's contributions or elective deferrals increase.

Distribution of excess contributions—Present law provides that, in the case of elective deferrals or matching contributions that do not satisfy the special nondiscrimination requirements, such excess contributions are required to be distributed to highly compensated employees on the basis of the respective portions of the excess contributions attributable to such highly compensated employees. Under the bill, the total amount of excess contributions is determined in the same manner as under present law, but the distribution of excess contributions is required to be made on the basis of the amount of contribution by, or on behalf of, each highly compensated employee. Thus, under the bill, excess contributions are deemed attributable first to those highly compensated employees who have made the greatest dollar amount of elective deferrals under the plan.

For example, assume that an employer maintains a qualified cash or deferred arrangement under section 410(k). Assume further that the actual deferral percentage ("ADP") for the eligible nonhighly compensated employees is 2 percent. In addition, assume the following facts with respect to the eligible highly compensated employees.

Employees	Compensation	Deferral	Deferral (percent)
A	$200,000	$7,000	3.5
B	200,000	7,000	3.5
C	70,000	7,000	10.0
D	70,000	5,250	7.5
E	70,000	2,100	3.0
F	70,000	1,750	2.5

Under these facts the highly compensated employees' ADP is 5 percent, which fails to satisfy the special nondiscrimination requirements.

Under present law, the highly compensated employees with the highest deferral percentages would have their deferrals reduced until the ADP of the highly compensated employees is 4 percent. Accordngly, C and D would have their deferrals reduced to $4,025 (i.e., a deferral percentage of 5.75 percent). The reduction thus is $2,975 for C and $1,225 for D, for a total reduction of $4,200.

Under the bill, the amount of the total reduction is calculated in the same manner as under present law so that the total reduction remains $4,200. However, this total reduction of $4,200 is allocated to highly compensated employees based on the employees with the largest contributions. Accordingly, A, B, and C would each be reduced by $1,400 from $7,000 to $5,600.

Effective date

The provisions relating to the special nondiscrimination tests applicable to qualified cash or deferred arrangements and matching contributions are applicable to years beginning after December 31, 1990.

TITLE II DISTRIBUTION RULES

In general

Under present law, distributions from tax-favored retirement arrangements are generally includible in gross income when received (except to the extent the distribution represents a return of the individual's own contributions, i.e., basis). Special rules apply in certain circumstances. For example, certain distributions from tax-favored retirement arrangements may be rolled over tax free to another tax-favored retirement arrangement, lump-sum distributions from a qualified plan qualify for special 5-year forward averaging, and a taxpayer is not required to include in income certain amounts received from a qualified plan to the extent that the amounts are attributable to net unrealized appreciation in employer securities. Such unrealized appreciation is includible in income when the securities are sold.

The bill expands the circumstances in which a distribution may be rolled over tax free and eliminates 5-year averaging for lump sum distributions from qualified plans. The bill also provides that certain distributions are required to be transferred directly into another tax-free retirement arrangement in a trustee-to-trustee transfer.

Section 201—Rollovers

Under present law, a total or partial distribution of the balance to the credit of an employee under a qualified plan, a qualified annuity plan, or a tax-sheltered annuity may, under certain circumstances, be rolled over tax free to an individual retirement arrangement (IRA) or another qualified plan or annuity. A rollover of a partial distribution is permitted if (1) the distribution equals at least 50 percent of the balance to the credit of the employee, (2) the distribution is not one of a series of periodic payments, (3) the distribution is made on account of the employee's separation from service (in the case of employees other than self-employed individuals), or disability (in the case of self-employed individuals only), and (4) the employee elects rollover treatment. In addition, the surviving spouse of the employee may roll distributions over to an IRA in the same way as if the distribution were made to the employee. Employee contributions and minimum required distributions may not be rolled over.

Under the bill, any distribution to the employee or the surviving spouse of the employee (other than a minimum required distribution (section 401(a)(9)) may be rolled over tax free to an IRA or another qualified plan or annuity. As under present law, employee contributions cannot be rolled over.

Special rules for lump-sum distributions

Under present law, a taxpayer may elect to have 5-year forward averaging apply to a lump-sum distribution from a qualified plan. Such an election may be made with respect to a distribution received on or after the employee attains age 59½ and only one election may be made with respect to an employee.

Prior to the Tax Reform Act of 1986, 10-year forward averaging was available with respect to lump-sum distributions. In addition, the portion of a lump-sum distribution attributable to contributions prior to January 1, 1974, could qualify for treatment as long-term capital gains. The Tax Reform Act replaced 10-year averaging with 5-year averaging and phased out capital gains treatment. The Tax Reform Act provided transition rules which preserved prior-law treatment in the case of certain distributions with respect to individuals who attained age 50 before January 1, 1986.

Under present law, a taxpayer is not required to include in gross income amounts received in the form of a lump-sum distribution to the extent that the amounts are at-

tributable to net unrealized appreciation in employer securities. Such unrealized appreciation is includible in income when the securities are sold. Such treatment applies to employer securities attributable to employee contributions, regardless of whether the distribution is a lump-sum distribution.

The bill repeals the special 5-year forward averaging rule. The original intent of the income averaging rules for pension distributions was to prevent a bunching of taxable income because a taxpayer received all of the benefits in a qualified plan in a single taxable year. Liberalization of the rollover rules increases the flexibility of taxpayers in determining the time of the income inclusion of pension distributions, and eliminates the need for special rules to prevent bunching of income. The bill preserves the transition rules adopted in the Tax Reform Act. The bill also retains the present-law treatment of net unrealized appreciation on employer securities and generally retains the definition of lump-sum distribution solely for such purpose.

The provisions are effective with respect to distributions after December 31, 1990.

Section 202—Transfers of Pre-Retirement Distributions to IRAs

The bill provides that certain distributions that would otherwise be distributed to an employee or the surviving spouse of the employee are to be transferred in a trustee-to-trustee transfer to an IRA or other eligible transferee plan rather than distributed to the employee or surviving spouse. In general, an applicable distribution is any distribution in excess of $500 other than (1) distributions in the form of substantially equal periodic payments (as defined under sec. 72(t)), (2) a distribution made after the employee attains age 55, (3) a distribution attributable to the employee being disabled (as defined in sec. 72(m)(7)), (4) distributions of deductible dividends on employer securities (sec. 404(k)), (5) distributions to an alternate payee, (6) hardship distributions from a profitsharing or stock bonus plan, or (7) distributions of employee contributions.

The transfer requirement applies only to amounts, that, but for the transfer requirement, would otherwise be distributed to the recipient. Thus, for example, the transfer requirement does not apply to amounts that are deemed to be distributed under the rules relating to participant loans (sec. 72(p)). In addition, the transfer requirement applies after other rules relating to distributions. For example, if the plan is subject to the joint and survivor rules (secs. 401(a)(11) and 417) those rules would have to be complied with before the transfer is made.

The distribution may be transferred to an IRA or to a qualified defined contribution plan that provides for the acceptance of the transfer. The transfer is to be made to the IRA or qualified plan designated by the distributee within a reasonable period of time before the transfer in accordance with regulations. The plan is to provide a method by which the plan trustee is to designate the transferee plan in the event the distributee does not make a designation or transfer to the designated plan is impracticable.

Amounts transferred are includible in income when distributed from the transferee plan in accordance with the rules applicable to the transferee plan. However, if the distributee withdraws all or a portion of the amount transferred by the due date (including extensions) for filing the distributee's tax return for the year the transfer was made, the distribution is treated for income tax purposes as if it had been made from the transferor plan. Thus, for example, if a distribution is transferred to an IRA and the employee makes a withdrawal of transferred amounts (plus income) from the IRA, the exemptions to the early distribution tax applicable to qualified plans (rather than the rules applicable to IRA withdrawals) apply. This rule is designed to prevent individuals who do not want the distribution to remain in a tax-favored arrangement from being disadvantaged by the transfer.

The plan trustee is required to notify employees of the requirements of the transfer rules and of the amount of any transfer. Once the transfer is made to the transferee trust, the employer is relieved of all responsibility for the amounts transferred.

A plan is not treated as violating the prohibition on reduction of accrued benefits (sec. 411(d)(6)) solely by reason of the transfer. For purposes of determining years of service and the buy-back rules (sec. 411(a)(7)), a transfer is treated as a distribution.

Similar rules apply to distributions from qualified annuities (sec. 403(a)) and tax-sheltered annuities (sec. 403(b)).

The provisions apply to distributions in plan years beginning after December 31, 1991.

Section 203—Required distributions from qualified plans

Under present law (as modified by the Tax Reform Act of 1986), distributions under all qualified plans, IRAs, tax-sheltered custodial accounts and annuities, and eligible deferred compensation plans of State and local governments are required to begin no later than April 1 of the calendar year following the calendar year in which the participant or owner attains age 70½, without regard to the actual date of separation from service. In the case of church plans and governmental plans, distributions are required to begin no later than April 1 of the calendar year following the calendar year in which the participant retires.

The bill repeals the rule that requires all participants in qualified plans to commence distributions by age 70½ without regard to whether the participant is still employed by the employer and, therefore, generally replaces it with the rule in effect prior to the Tax Reform Act. Thus, under the bill, distributions are required to begin by April 1 of the calendar year following the later of (1) the calendar year in which the employee attains age 70 of (2) the calendar year in which the employee retires. In the case of a 5-percent owner of the employer, distributions are required to begin no later than the April 1 of the calendar year following the year in which the 5-percent owner attains age 70. Distributions from an IRA are required to begin no later than April 1 of the calendar year following the year in which the IRA owner attains age 70.

In addition, in the case of an employee (other than a 5-percent owner) who retires in a calendar year after attaining age 70, the bill requires the employee's accrued benefit to be actuarially increased to take into account the period after age 70 in which the employee was not receiving benefits under the plan. Thus, under the bill, the employee's accrued benefit is required to reflect the value of benefits that the employee would have received if the employee had retired at age 70 and began receiving benefits at that time.

The actuarial adjustment rule and the rule requiring 5-percent owners to begin distributions after attainment of age 70 does not apply, under the bill, in the case of a governmental plan or church plan.

This provision applies to years beginning after December 31, 1990.

TITLE III—MISCELLANEOUS PROVISIONS

Section 301—Treatment of leased employees

Under present law, an individual performing services is treated as a leased employee of a service recipient for certain employee benefit purposes if (1) the individual is not a common law employee of the service recipient, (2) the services are provided pursuant to an agreement between the recipient and any other person, (3) the individual performs services for the recipient on a substantially full-time basis for a period of at least one year, and (4) the services are of a type historically performed in the business field of the recipient by employees. The bill replaces the historically performed test with a control test. Thus, under the bill, an individual is a leased employee of a service recipient if the services are performed by the individual under the control of the recipient.

The provision is effective for taxable years beginning after December 31, 1983.

Section 302—Elimination of half-year requirements

Under present law, a number of employee benefit plan rules refer to the age of an individual at a certain time. For example, distributions under a qualified pension plan are generally required to begin no later than the April 1 following the year in which an individual attains age 70½ (sec. 401(a)(9)). Similarly, an additional income tax on early withdrawals applies to certain distributions from qualified pension plans and IRAs prior to the time the participant or IRA owner attains age 59½ (sec. 72(t)).

The bill changes the half-year requirements to birthdate requirements. For example, those rules under present law that refer to age 59½ are changed to refer to age 59, and those that refer to age 70½ are changed to refer to age 70.

The provision applies in years beginning after December 31, 1990.

Section 303—Plans covering self-employed individuals

Prior to the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) different rules applied to retirement plans maintained by incorporated employers and unincorporated employers (such as partnerships and sole proprietors). In general, plans maintained by unincorporated employers were subject to special rules in addition to the other qualification requirements of the Code. Most, but not all, of this disparity was eliminated by TEFRA.

Under present law, certain special aggregation rules apply to plans maintained by owner-employees that do not apply to other qualified plans (sec. 401(d) (1) and (2)). The bill eliminates these special rules.

The provision applies to years beginning after December 31, 1990.

Section 304—Full funding limitation of multiemployer plans

Under present law, a deduction is allowed (within limits) for employer contributions to a qualified pension plan. No deduction is allowed for contributions in excess of the full funding limit. The full funding limit is the excess of the lesser of (1) 150 percent of a plan's current liability and (2) the plan's accrued liability over the value of the plan's assets. The bill provides that the 150 percent of current liability limitation does not

apply to multiemployer plans. Consistent with this change, the bill also repeals the present law annual valuation requirement for multiemployer plans and applies the prior law requirement that valuations be performed at least every 3 years.

The provision applies to years beginning after December 31, 1990. Consistent with this change, the bill also requires the plan valuation to be done on a tri-annual basis.

Section 305—Affiliation requirements for employers jointly maintaining a VEBA

Treasury regulations require that employees eligible to participate in a voluntary employees' beneficiary association ("VEBA") share an employment-related common bond. Under the regulations, employees employed by a "common employer (or affiliated employers)" are considered to have such a bond.

Under the bill, employers are considered affiliated for purposes of the VEBA rules if (1) such employers are in the same line of business, (2) the employers act jointly to perform tasks that are integral to the activities of each of the employers, and (3) such joint activities are sufficiently extensive that the maintenance of a common VEBA is not a major part of such joint activities.

Under the bill, employers are considered affiliated, for example, in the following circumstances: the employers participating in the VEBA are in the same line of business and belong to an association that provides to its members a significant amount of each of the following services: (1) research and development relating to the members' primary activity; (2) education and training of members' employees; and (3) public relations. In addition, the employers are sufficiently similar (e.g., subject to similar regulatory requirements) that the association's services provide material assistance to all of the employers. The employers also demonstrate the importance of their joint activities by having meetings at least annually attended by substantially all of the employers. Finally, the employers maintain a common retirement plan.

On the other hand, it is not intended that the mere existence of a trade association is a sufficient basis for the member-employers to be considered affiliated, even if they are in the same line of business. It is also not sufficient if the trade association publishes a newsletter and provides significant public relations services, but only provided nominal amounts, if any, of other services integral to the employers' primary activity.

A group of employers are also not considered affiliated under the bill by virtue of the membership of their employees in a professional association.

This bill is intended as a clarification of present law. However, this bill is not intended to create any inference as to whether any part of the Treasury regulations affecting VEBAs, other than the affiliated employer rule, is or is not present law.

Section 306—Treatment of certain governmental plans

Under present law, the limitations on benefits and contributions (section 415) generally apply to plans maintained by State and local governments. Several special rules apply to such plans, however, that provide greater limitations in some circumstances.

Under present law, unfunded deferred compensation plans maintained by State and local government employers are subject to certain limitations (sec. 457). For example, such plans generally may not permit deferred compensation in excess of $7,500 in a single year.

The limitations on contributions and benefits present special problems for plans maintained by State and local governments due to the special nature of the involvement and operation of such governments. The bill addresses these problems by providing that (1) section 457 does not apply to excess benefit plans maintained by a State or local government, (2) the compensation limitation on benefits under a defined benefit pension plan does not apply to plans maintained by a State or local government, and (3) the defined benefit pension plan limits do not apply to certain disability and survivor benefits provided under such plans. Excess plans maintained by a State or local government are subject to the same tax rules applicable to such plans maintained by private employers.

Under present law, benefits under a defined benefit plan generally may not exceed 100 percent of the participant's average compensation. However, because of the unique characteristics of state and local government employee plans, many long-tenured employees may be eligible to receive benefits in excess of their average compensation as a result of cost-of-living increases. The bill provides that the 100 percent of compensation limitation does not apply to plans maintained by State and local governments.

The provision is effective for taxable years beginning after December 31, 1986.

Section 307—Modifications to simplified employee pensions

Under present law, a simplified employee pension (SEP) is an individual retirement plan established by an employer for its employees that meets certain requirements. Employers with 25 or fewer employees may provide that contributions to a SEP are made on a salary reduction basis.

The bill conforms the eligibility requirements for SEP participation to the rules applicable to pension plans generally by providing that contributions to a SEP must be made with respect to each employee who has at least one year of service with the employer.

Under the bill, an employer meets the requirements of the 125 percent deferral percentage test if the employer makes a contribution to the plan of at least 3 percent of an employee's compensation on behalf of each nonhighly compensated employee who is eligible to participate in the arrangement without regard to whether the employee makes an elective contribution under the arrangement.

Employees' rights to employer nonelective contributions used to meet this test must be 100 percent vested.

The bill modifies the rules relating to salary reduction SEPs by providing that such SEPs may be established by employers with 100 or fewer employees. The bill also repeals the requirement that at least half of eligible employees actually participate in a salary reduction SEP.

The provision applies to years beginning after December 31, 1990.

Section 308—Contributions on behalf of disabled employees

Under present law, special limitations on contributions to a defined contribution plan apply in the case of certain disabled participants. In particular, the compensation of a disabled participant in a defined contribution plan is treated, for purposes of the limitations or contributions and benefits, as the compensation the participant received before becoming disabled if (1) the participant is permanently and totally disabled (within the meaning of sec. 22(c)(3)), (2) the participant is not a highly compensated employee, and (3) the employer elects to have this special rule apply.

The bill makes requirements (2) and (3) inapplicable if the defined contribution plan provides for the continuation of contributions on behalf of all participants who are permanently and totally disabled.

The provision applies to years beginning after December 31, 1990.

Section 309—Distributions from rural cooperative plans

Present law generally prohibits State or local governments or tax-exempt organizations from maintaining section 401(k) plans. This prohibition does not apply to "rural cooperative plans." In order to be a rural cooperative plan, a plan must be a pension plan. Thus, in-service distributions from a rural cooperative plan are not permitted prior to normal retirement age. This means, in turn, that unlike all other section 401(k) plans (other than certain pre-ERISA plans), rural cooperative plans are not permitted to make in service distributions after age 59½. Under the bill, rural cooperative plans are permitted to make such distributions, effective for plan years beginning after December 31, 1986.

Section 310—Reports of Pension and Annuity Payments

The penalty reform provisions of the Omnibus Budget Reconciliation Act of 1989 revised the penalties imposed for failures to file correct and timely information returns to IRS, and to provide statements to payees. This revised penalty structure applies to 18 different types of reportable payments. Section 6724(d)(1).

However, this developed, structure does not apply to reports of pension and annuity payments required under section 6047(d). It also does not apply to certain reports required by sections 408(i) and 408(*1*) relating to IRAs and SEPs.

The bill provides that the definition of "information return" under section 6724(d) includes reports of pension and annuity payments required by section 6047(d), and any report required under subsection (i) or (*1*) of section 408. Similarly, the definition of "payee statement" under section 6724(d)(2) is amended to include reports of pension and annuity payments required by section 6047(d) and any report required under subsection (i) or (*1*) of section 408. The bill provides that section 6652(3) is amended to delete reports of designated distributions from the scope of its $25 per day penalty.

Under present law, interest and dividend payments do not have to be reported if less than $10 is paid to a person in any year. Miscellaneous income need not be reported unless it exceeds $600. However, the law currently contains no dollar threshold for reports of "designated distributions"—primarily pension and annuity payments. The bill provides a $10 reporting threshold for designated distributions.

Section 311—Date for adoption of plan amendments

The bill provides that any plan amendments required by the bill are not required to be made before the first plan year beginning on or after January 1, 1992, if the plan is operated in accordance with the applicable provision and the amendment is retroactive to the effective date of the applicable provision.

Mr. JEFFORDS. Mr. President, today, my colleagues, Senators PRYOR, BENTSEN, BOREN, RIEGLE, DASCHLE, DURENBERGER, DANFORTH, BAUCUS, MOYNIHAN, ROCKEFELLER, BREAUX, and I are introducing a bill that develops an essential component or our national retirement income policy to help ensure that our retirement policy goals become a reality. Our bill encourages the portability of pension assets through facilitating the preservation of pension income for pension purposes and encouraging the creation of new pension plans.

Over and over, I have asked myself how do we best prepare as a country for the year 2025. Pension portability, through the preservation of pension assets and increased pension plan coverage, are the only ways to ensure that we successfully meet the challenge of our Nation's changing demographics—when today's baby boomers become tomorrow's senior citizens. We have some compelling obstacles to overcome. By the year 2025, the average life expectancy for a 65-year-old is expected to be 20 years. In addition the ratio of active workers to retirees will go from 4:1 to 2:1. Given these facts, intelligent public policy necessitates that we do all we can to ensure that baby boomers save now for when they retire. This means we as public policy makers must legislate in an unaccustomed way: With an eye toward results for the long term. We took that first step when we enacted the Employee Retirement Income Security Act in 1974. Unfortunately, the statistics since that time have proven we still have a way to go policywise—only 55 percent of the work force is covered by a pension plan. More importantly, only 42 percent of workers are actually participating in a plan.

The statistics are even more gruesome when we look at coverage in the retail and service sectors, where most of the job growth will be in the future, and coverage among small employers. In 1988, only 25 percent of employees in firms with less than 100 employees were covered by a pension plan.

Equally important, are two other trends: First, the substantial increase in the number of pension plan terminations; 16,000 defined benefit plans and 13,000 defined contribution plans were terminated in 1989. Second, the increase in the number of employees receiving preretirement lump sum distributions. Data from the Department of Labor and the Employee Benefit Research Institute reveal that most defined contribution plans provide for lump sum distributions—and over 40 percent of private defined benefit plans also provide for lump sum distributions. In addition, studies have shown that the number of defined benefit plans providing this option increases every year.

What does all this mean? That more and more employees are receiving cash-outs from pension plans. Moreover, the younger the workers, the smaller the earnings, the more likely it is that lump sum money will be spent. In fact, in this year alone we expect $9.6 billion in cashouts to be spent by workers. Only about 13 percent of individuals will roll over lump sum distributions into an IRA account.

If these trends continue, our present day retirement policy will become tomorrow's retirement disaster. We in Congress must do all we can to ensure that this doesn't happen.

The new distribution and coverage rulings contained in this bill are designed to reverse this disturbing trend. I have been advocating changes similar to these for the past 4 years. Similar provisions were passed twice by the House and marked up twice by the Senate Labor and Human Resources Committee only to be dropped eventually because they seemed by many to be unimportant. The statistics have proven, however, that in terms of retirement income, what did not seem so necessary in the past is critical for a secure tomorrow.

Our bill requires that rollovers of preretirement lump sum distributions of over $500 from pension plans, be transferred to another retirement plan or to an individual retirement account instead of cashed out directly into the hands of employees. While the bill allows these employees to make withdrawals from the IRA, hopefully the tax-exempt nature of future earnings will strongly encourage retention of the money in the trust.

In addition, our bill expands the current law rule for salary reduction simplified employee pensions [SEP's]. Congress created salary reduction SEP's in the Tax Reform Act of 1986, but at present they can only be used by companies with 25 or fewer employees and under restrictive circumstances. This bill allows the use of salary SEP's by companies with 100 or less employees. In addition, our bill contains a safe harbor nondiscrimination rule that ensures plan participation by all employees. Safe harbor rules for 401(k) plans are also included in the bill to encourage pension plan participation.

I am confident that the provisions in this bill will go a long way toward ensuring retirement income security for American workers. However, I do have some concerns about restrictions pertaining to voluntary employees' beneficiary association health plans that are contained in this bill. From a health policy perspective, I believe we should be encouraging employers to form and responsibly fund these arrangements.

Ideally, I would have liked to incorporate two additional distribution rules into this bill. First, I would allow employees to transfer aftertax contributions into another employer pension plan or into an IRA account. This idea is also advocated by Secretary of Labor Elizabeth Dole. In addition, I would allow plan sponsors the option of directly transferring the account of terminated participants into other pension plans or IRA's that provide for the same joint and survivor annuity and other distribution options as provided by the plan. According to data compiled by the Older Women's League, today almost three-fourths of the elderly living below poverty are women. More poor elderly women are living alone than ever before in our Nation's history. Unfortunately, this trend is likely to increase as the number of single, widowed, and divorced elderly women increases. At present, 70 percent of all older, nonmarried women depend on Social Security as their primary source of income. Allowing employers to voluntarily extend present day plan distribution options to rollovers into IRA's would be one way to help reverse this trend. In addition, I wish also to eventually add a provision to allow separate lines of business to maintain SEP's as well.

I will work to try to gain the consensus necessary to incorporate these provisions into our bill. But my primary objective will be to gain the support of my distinguished colleagues by helping everyone to understand how important it is that the Employee Benefits Simplification Act becomes law.

By Mr. PRYOR:

S. 2902. A bill to amend the Internal Revenue Code of 1986 to clarify portions of the code relating to church pension and welfare benefit plans, to modify certain provisions relating to participants in such plans, to reduce the complexity of and to bring workable consistency to the applicable rules, to promote retirement savings and benefits, and for other purposes; to the Committee on Finance.

CHURCH RETIREMENT BENEFITS SIMPLIFICATION ACT

Mr. PRYOR. Mr. President, I am also pleased to introduce today the Church Benefits Simplification Act of 1990—the "Act". The act, which is being introduced in conjunction with the Employee Benefits Simplification Act, also sponsored by me, provides much needed clarification of the rules that apply to church retirement and welfare benefit plans and brings consistency to those rules. In addition, the act resolves significant problems churches face in administering their retirement and welfare benefit programs under current law.

In developing this legislation, we have worked closely with leaders of the pension boards of 27 mainline Protestant, Catholic, and Jewish de-

nominations in developing this important legislation. The employee benefit programs of these mainline denominations are among the oldest programs in our country. Several date from the 1700's, and their median age is in excess of 50 years. These programs provide retirement and welfare benefits for several hundred thousand ministers and lay workers employed by thousands of churches and church ministry organizations serving the spiritual needs of over 66 million members.

Church retirement benefits programs began in recognition of a denomination's mission to care for its church workers in their advanced years. Several church retirement and welfare benefit programs were initially formed to provide relief and benefits for retired, disabled or impoverished ministers and families as particular cases of need were identified. As time passed, church denominations began to provide for the retirement needs of their ministers and lay workers on a current and systematic basis. Today, church retirement and welfare benefit programs provide benefits for ministers and lay workers employed in all forms of pastoral, healing, teaching, and preaching ministries and missions, including, among others, local churches, seminaries, old-age homes, orphanages, mission societies, hospitals universities, church camps and day care centers.

The goal of the Act is to clarify the rules that apply to church employee benefit plans. Under current law, these rules are generally lengthy and complex and are, for the most part, designed for for-profit, commercial employers. Most denominations are composed of thousands of work units, each having only a few employees, and the budgets of these work units are marginal at best. These organizations rely almost completely on contributions from the offering plate to support their missions, including the salaries and retirement and welfare benefits of their ministers and lay workers. Unlike for-profit business entities, churches cannot pass operating costs on to customers by raising prices. Churches are also much more loosely structured than most for-profit business organizations, and many denominations cannot impose requirements on their constituent parts. For example, hierarchically organized denominations may be able to control the provision of employee benefits to ministers and lay workers, while in congregational denominations, such control is typically more difficult. In addition, churches are tax-exempt and, unlike for-profit business organizations, have no need for tax deductions. Churches and church ministry organizations therefore lack the incentive of for-profit employers to maximize either the amount of the employer's tax deduction or the amount of income which the highly compensated employees who control a for-profit business can shelter from current taxation through plan contributions and tax-free fringe or welfare benefits.

Retirement and employee benefit tax laws do not always take the difference between churches and for-profit employers into account, with the result that churches have had to divert a significant amount of time and resources from their religious mission and ministries in attempting to identify and comply with rules that in many instances are unworkable or simply not needed for church employee benefit plans.

If the act becomes law, the reduction in administrative burdens and consequent savings in related costs now imposed on churches and church ministry organizations will outweigh and possible gain from an employee benefits policy perspective. Unlike the for-profit sector, where costs savings result in a better "bottom line" for shareholders, savings in the church sector will find their way into missions and ministries that help people who need help.

A study by Independent Sector, a national membership organization composed of over 600 tax-exempt organizations and corporate philanthropy departments, indicated that approximately half the funds contributed by churches was used in service to others. Religious congregations are the primary voluntary service providers for neighborhoods. Ninety-three percent of religious congregations have one or more programs in human services. Four-fifths of all religious congregations offer family counseling, and one third give meals or shelter to the poor. Some 78 percent donate for international relief or missionary activity, and two thirds sponsor hospices, health programs, hospitals or provide for the disabled, retarded or people in crisis. The Independent Sector study indicated that religious congregations made $8.5 billion in direct grants to other groups and paid $10.7 billion for education, human services and health programs. These figures are double the giving of all U.S. foundations and corporations combined.

It is my view that the Congress should do everything possible to ensure that churches can continue to maximize their contributions toward these important missions and ministries, rather than paying for costs of complying with rules that are unworkable or not needed for church employee benefit plans.

The cornerstone of the act is a recodification of the rules applicable to church retirement plans so that all of such rules in the Internal Revenue Code are identified, simplified and separated from the rules that apply to for-profit employers. Retirement plan issues unique to churches will thus not be inadvertently affected when Congress is considering future Code changes which are applicable to for-profit employers but not appropriate for churches.

The act would also ensure that church retirement plans, whether described in the new section 401A—applicable to what are now church section 401(a) plans—or section 403(b), are subject to the same coverage and related rules. In 1986, Congress determined that the section 403(b) plans of churches and so-called qualified church controlled organizations should not be subjected to the expense of complying with coverage and related rules. The act would extend this same relief to church section 401A plans and would also eliminate the troublesome qualified church controlled organization approach in favor of a provision that only subjects church-related hospitals and universities to applicable coverage and related rules. The act, consistent with the law that now applies to church section 401(a) plans, would also clarify that the coverage rules that will apply to the section 403(b) programs of church-related hospitals and universities are those that were applicable prior to the enactment of the Employee Retirement and Income Security Act of 1974.

The act also would resolve a number of other problems many church pension boards face under current law. For example, under present law there is a question as to whether self-employed ministers and chaplains who work for non-church employers are able to participate in their denomination's retirement and welfare benefit programs. The act would make it clear that such ministers may participate in such programs.

The act would also:

Restore QVEC's for church plans;

Solve several church employee "aggregation" problems;

For the first time, church plans will be subject to ERISA vesting schedules;

Provide relief that will result in better retirement income for foreign missionaries;

Simplify the required distribution rules that apply to church retirement plans;

Eliminate an unworkable requirement under the so-called section 403(b) catchup contribution rules; and

Make relief granted under section 457 consistent with coverage relief proposed for church retirement and welfare benefit plans.

As I noted earlier, the act is being introduced in conjunction with the Employee Benefits Simplifications Act. I intend to hold joint hearings on both pieces of legislation in the very near future. I urge my colleagues to join me in cosponsoring these two bills that to-

gether constitute significant pension legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2902

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE: AMENDMENT OF 1986 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Church Retirement Benefits Simplification Act of 1990".

(b) AMENDMENT OF 1986 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1986.

SEC. 2. NEW QUALIFICATION PROVISION FOR CHURCH PLANS.

(a) IN GENERAL.—Part I of subchapter D (relating to deferred compensation, etc.) of chapter 1 is amended by adding after section 401 the following new section:

"SEC. 401A. QUALIFIED CHURCH PLAN.

"(a) GENERAL RULE.—For purposes of the United States Code, including this title, a qualified church plan shall be treated as satisfying the requirements of section 401(a), and all references in (or pertaining to) this title and such Code to a plan described in section 401(a) shall include a qualified church plan. Except as otherwise provided in this section, no paragraph of section 401(a) shall apply to a qualified church plan.

"(b) DEFINITION OF QUALIFIED CHURCH PLAN.—A plan is a qualified church plan if such plan meets the following requirements:

"(1) CHURCH PLAN REQUIREMENT.—The plan is a church plan (within the meaning of section 414(e)), and the election provided by section 410(d) has not been made with respect to such plan.

"(2) EMPLOYEE CONTRIBUTIONS ARE NONFORFEITABLE.—An employee's rights in his accrued benefit derived from his own contributions are nonforfeitable.

"(3) VESTING REQUIREMENTS.—The plan satisfies the requirements of subparagraph (A) or (B).

"(A)10-YEAR VESTING.—A plan satisfies the requirements of this paragraph if an employee who has at least 10 years of service has a nonforfeitable right to 100 percent of his accrued benefit derived from employer contributions.

"(B) 5- TO 15-YEAR VESTING.—A plan satisfies the requirements of this paragraph if an employee who has completed at least 5 years of service has a nonforfeitable right to a percentage of his accrued benefit derived from employer contributions which percentage is not less than the percentage determined under the following table:

Years of Service:	*Nonforfeitable percentage*
5	25
6	30
7	35
8	40
9	45
10	50
11	60
12	70
13	80
14	90
15 or more	100

"(C) YEARS OF SERVICE.—For purposes of this paragraph, an employee's years of service shall be determined in accordance with any reasonable method selected by the plan.

"(4) FUNDING REQUIREMENTS.—The plan meets the funding requirements of section 401(a)(7) as in effect on September 1, 1974.

"(5) ADDITIONAL REQUIREMENTS.—

"(A) The plan meets the requirements of paragraphs (1), (2), (8), (9), (16), (17), (25), (27), and (30) of section 401(a); and

"(B) If the plan includes employees of an organization which is not a church, either the plan or such organization, at the option of the plan, shall also meet the requirements of sections 401(a)(3) and 401(a)(6) as in effect on September 1, 1974, 401(a)(4), 401(a)(5), and section 401(m).

"(c) DEFINITIONS AND SPECIAL RULES.—

"(1) CHURCH.—For purposes of this section, the term 'church' means a church or a convention or association of churches, including an organization described in section 414(e)(3)(A) and an organization described in section 414(e)(3)(B)(ii), other than—

"(A) An organization described in section 170(b)(1)(A)(ii) above the secondary school level (other than a school for religious training), or

"(B) an organization described in section 170(b)(1)(A)(iii),

"(i) which provides community service for inpatient medical care of the sick or injured (including obstetrical care); and

"(ii) not more than 50 percent of the total patient days of which during any year are customarily assignable to the categories of chronic convalescent and rest, drug and alcoholic, epileptic, mentally deficient, mental, nervous and mental, and tuberculosis, and care for the aged.

"(2) SATISFACTION OF TRUST REQUIREMENT.—A plan shall not fail to be described in this section merely because such plan is funded through an organization described in section 414(e)(3)(A), rather than through a trust.

"(3) CERTAIN SECTIONS APPLY.—Sections 401(b), 401(c), and 401(h) shall apply to a qualified church plan.

"(4) FAILURE OF ONE ORGANIZATION MAINTAINING PLAN NOT TO DISQUALIFY PLAN.—If one or more organizations maintaining the church plan fails to satisfy the requirements of subsection (b), such plan shall not be treated as failing to satisfy the requirements of this section with respect to other organizations maintaining such plan.

"(5) CERTAIN EMPLOYEES NOT CONSIDERED HIGHLY COMPENSATED AND EXCLUDED EMPLOYEES.—For purposes of this section, no employee shall be considered an officer, shareholder, person whose principal duties consist in supervising the work of other employees, or highly compensated employee if such employee during the year or the preceding year received compensation from the employer of less than $50,000. For purposes of this section, there shall be excluded from consideration employees described in section 410(b)(3)(A). The Secretary shall adjust the $50,000 amount under this paragraph at the same time and in the same manner as under section 415(d).

"(6) TIME FOR DETERMINATION OF APPLICABLE LAW.—Except where otherwise specified, the determination of whether a plan meets the requirements of subsection (b) shall be made in accordance with the provisions of this title as in effect immediately following enactment of the Church Retirement Benefits Simplification Act of 1990.".

(b) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendment made by this section shall be effective for years beginning after December 31, 1989, except that the provisions of section 401A(b)(3) shall be effective for years beginning after December 31, 1992. No regulation or ruling under section 401(a) issued after December 31, 1989, shall apply to a qualified church plan described in section 401A unless such regulation or ruling is specifically made applicable by its terms to qualified church plans.

(2) PRIOR YEARS.—A church plan (within the meaning of section 414(e)) shall not be deemed to have failed to satisfy the applicable requirements of section 401(a) for any year beginning prior to January 1, 1990.

SEC. 3. RETIREMENT INCOME ACCOUNTS OF CHURCHES.

(a) IN GENERAL.—Section 403(b)(9) is amended to read as follows:

"(9) RETIREMENT INCOME ACCOUNTS PROVIDED BY CHURCHES, ETC.—

"(A) AMOUNTS PAID TREATED AS CONTRIBUTIONS.—For purposes of this title—

"(i) a retirement income account shall be treated as an annuity contract described in this subsection, and

"(ii) amounts paid by an employer described in paragraph (1)(A) or by a church or a convention or association of churches, including an organization described in section 414(e)(3)(A) or an organization described in section 414(e)(3)(B)(ii), to a retirement income account shall be treated as amounts contributed by the employer for an annuity contract for the employee on whose behalf such account is maintained.

"(B) RETIREMENT INCOME ACCOUNT.—For purposes of this paragraph, the term 'retirement income account' means a program established or maintained by a church, a convention or association of churches, including an organization described in section 414(e)(3)(A), to provide benefits under section 403(b) for an employee described in paragraph (1) or an individual described in paragraph (13)(F), or his beneficiaries.".

(b) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendment made by this section shall be effective for years beginning after December 31, 1989.

(2) PRIOR YEARS.—A church plan (within the meaning of section 414(e)) shall not be deemed to have failed to satisfy the applicable requirements of section 403(b) for any year beginning prior to January 1, 1990.

SEC. 4. CONTRACTS PURCHASED BY A CHURCH.

(a) CLARIFICATION OF APPLICABLE NONDISCRIMINATION REQUIREMENTS.—Subparagraph (D) of section 403(b)(1) is amended to read as follows:

"(D) except in the case of a contract purchased by a church, such contract is purchased under a plan which meets the nondiscrimination requirements of paragraph (12)(A), and ".

(b) CERTAIN COVERAGE RULES APPLY.—Subparagraph (B) of section 403(b)(12) is amended to read as follows:

"(B) CERTAIN REQUIREMENTS.—If a contract purchased by a church is purchased under a church plan (within the meaning of section 414(e)) by:

"(i) an organization described in section 170(b)(1)(A)(ii) above the secondary school level (other than a school for religious training), or

"(ii) an organization described in section 170(b)(1)(A)(iii),

"(I) which provides community service for inpatient medical care of the sick or injured (including obstetrical care), and

"(II) no more than 50 percent of the total patient days of which during any year are customarily assignable to the categories of chronic convalescent and rest, drug and alcoholic, epileptic, mentally deficient, mental, nervous and mental, and tuberculosis, and care for the aged,

either the plan or such organization, at the option of the plan, shall meet the requirements of sections 401(a)(3) and 401(a)(6) as in effect on September 1, 1974, 401(a)(4), 401(a)(5), 401(a)(17), and 401(m).".

(c) SPECIAL RULES FOR CHURCHES.—Section 403(b) is amended by adding the following new paragraph at the end thereof:

"(13) DEFINITIONS AND SPECIAL RULES.—

"(A) CONTRACT PURCHASED BY A CHURCH.—For purposes of this subsection, the term 'contract purchased by a church' includes an annuity described in section 403(b)(1), a custodial account described in section 403(b)(7), and a retirement income account described in section 403(b)(9).

"(B) CHURCH.—For purposes of this subsection, the term 'church' means a church or a convention or association of churches, including an organization described in section 414(e)(3)(A) and an organization described in section 414(e)(3)(B)(ii).

"(C) VESTING.—In the case of a contract purchased by a church under a church plan (within the meaning of section 414(e))—

"(i) sections 403(b)(1)(C) and 403(b)(6) shall not apply;

"(ii) such contract is not described in this subsection unless an employee's rights in his accrued benefit under such contract which is attributable to contributions made pursuant to a salary reduction agreement are nonforfeitable; and

"(iii) such contract is not described in this subsection unless the plan satisfies the requirements of subclause (I) or (II).

"(I) A plan satisfies the requirements of this clause if an employee who has at least 10 years of service has a nonforfeitable right to 100 percent of his accrued benefit derived from employer contributions.

"(II) A plan satisfies the requirements of this clause if an employee who has completed at least 5 years of service has a nonforfeitable right to a percentage of his accrued benefit derived from employer contributions which percentage is not less than the percentage determined under the following table:

Years of Service	*Nonforfeitable percentage*
5	25
6	30
7	35
8	40
9	45
10	50
11	60
12	70
13	80
14	90
15 or more	100

"(III) For purposes of this clause, an employee's years of service shall be determined in accordance with any reasonable method selected by the plan.

"(D) FAILURE OF ONE ORGANIZATION MAINTAINING PLAN NOT TO DISQUALIFY PLAN.—In the case of a contract purchased by a church under a church plan (within the meaning of section 414(e)), if one or more organizations maintaining the church plan fails to satisfy the requirements of this section, such plan shall not be treated as failing to satisfy the requirements of this section with respect to other organizations maintaining such plan.

"(E) CERTAIN EMPLOYEES NOT CONSIDERED HIGHLY COMPENSATED AND EXCLUDED EMPLOYEES.—For purposes of this subsection, no employee for whom a contract is purchased by a church shall be considered an officer, shareholder, person whose principal duties consist in supervising the work of the other employees, or highly compensated employee if such employee during the year or the preceding year received compensation from the employer of less than $50,000. For purposes of this subsection, there shall be excluded employees described in section 410(b)(3)(A). The Secretary shall adjust the $50,000 amount under this subparagraph at the same time and in the same manner as under section 415(d).

"(F) CERTAIN MINISTERS MAY PARTICIPATE.—For purposes of this subsection, the term 'employee' shall include a duly ordained, commissioned, or licensed minister of a church in the exercise of his ministry who is a self-employed individual (within the meaning of section 401(c)(1)(B)) or any duly ordained, commissioned, or licensed minister of a church in the exercise of his ministry who is employed by an organization other than an organization described in section 501(c)(3). Such self-employed minister shall be treated as his own employer which is an organization described in section 501(c)(3) and which is exempt from tax under section 501(a) for the purpose of applying the provisions of this subsection. Such an employee who is employed by an organization other than an organization described in section 501(c)(3) shall be treated as employed by an organization described in section 501(c)(3) and which is exempt from tax under section 501(a) for the purpose of applying the provisions of this subsection. In determining the compensation of such self-employed minister for purposes of this subsection, the earned income (within the meaning of section 401(c)(2)) of such minister shall be substituted for 'the amount of compensation which is received from the employer' under section 403(b)(3). In determining the years of service of such self-employed minister for purposes of section 403(b)(4), there shall be included years and fractions of years in which such minister is a self-employed individual (within the meaning of section 401(c)(1)(B)) acting in the exercise of his ministry.

"(G) TIME FOR DETERMINATION OF APPLICABLE LAW.—Except where otherwise specified, the determination of whether a contract purchased by a church meets the requirements of this subsection shall be made in accordance with the provisions of this title as in effect immediately following enactment of the Church Retirement Benefits Simplification Act of 1990.".

(d) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by this section shall be effective for years beginning after December 31, 1989, except that the provisions of section 403(b)(13)(C)(iii) shall be effective for years beginning after December 31, 1992. No regulation or ruling issued under section 401(a) or 403(b) after December 31, 1989, shall apply to a contract purchased by a church unless such regulation or ruling is specifically made applicable by its terms to such contracts. For purposes of applying the exclusion allowance of section 403(b)(2) and the limitations of section 415, any contribution which is forfeitable pursuant to section 403(b)(13)(C) shall be treated as an amount contributed to the contract in the year for which such contribution is made and not in the year the contribution becomes nonforfeitable.

(2) PRIOR YEARS.—A church plan (within the meaning of section 414(e)) shall not be deemed to have failed to satisfy the applicable requirements of section 403(b) for any year beginning prior to January 1, 1990.

SEC. 5. CHANGE IN DISTRIBUTION REQUIREMENT FOR RETIREMENT INCOME ACCOUNTS.

(a) IN GENERAL.—Section 403(b)(11)(A) is amended to read as follows:

"(A) when the employee attains age 59½, separates from service, dies, or becomes disabled (within the meaning of section 72(m)(7) or, in the case of a retirement income account described in section 403(b)(9), within the meaning of section 401(k)(2)), or".

(b) EFFECTIVE DATE.—The amendment made by this section shall be effective for years beginning after December 31, 1988.

SEC. 6. REQUIRED BEGINNING DATE FOR DISTRIBUTIONS UNDER CHURCH PLANS.

(a) IN GENERAL.—The second sentence of section 401(a)(9)(C) is amended to read as follows:

"In the case of a governmental plan or church plan (within the meaning of section 414(e)), the required beginning date shall be the later of the date determined under the preceding sentence or April 1 of the calendar year following the calendar year in which the employee retires.".

(b) Section 401(a)(9)(C) is amended by striking out the third sentence thereof.

(c) EFFECTIVE DATE.—The amendment made by this section shall be effective as if included in the provision of P.L. 99-514 to which such amendment relates.

SEC. 7. PARTICIPATION OF MINISTERS IN CHURCH PLANS.

(a) IN GENERAL.—Section 414 is amended by adding the following new subsection:

"(u) SPECIAL RULES FOR MINISTERS.—Notwithstanding any other provision of this title, if a duly ordained, commissioned, or licensed minister of a church in the exercise of his ministry participates in a church plan (within the meaning of section 414(e)), then—

"(1) such minister shall be excluded from consideration for purposes of applying sections 401(a)(3), 401(a)(4), and 401(a)(5) as in effect on September 1, 1974, 401(a)(4), 401(a)(5), 401(a)(26), 401(k)(3), 401(m), 403(b)(1)(D) (including section 403(b)(12)), and 410 to any stock bonus, pension, profit-sharing, or annuity plan (including an annuity described in section 403(b) or a retirement income account described in section 403(b)(9)) described in this part. For purposes of this part, the church plan in which such minister participates shall be treated as a plan or contract meeting the requirements of section 401(a), 401A, or 403(b) (including section 403(b)(9)) with respect to such minister's participation; and

"(2) such minister shall be excluded from consideration for purposes of applying an applicable section to any plan providing benefits described in an applicable section. For purposes of this paragraph, the term 'applicable section' means section 79(d), section 105(h), paragraphs (1), (2), and (3) of section 120(c), section 125(b), section 127(b)(2), and paragraphs (2), (3), and (8) of section 129(d).".

(b) EFFECTIVE DATE.—The amendment made by this section shall be effective for years beginning before, on, or after December 31, 1989.

SEC. 8. CERTAIN RULES AGGREGATING EMPLOYEES NOT TO APPLY TO CHURCHES, ETC.

(a) IN GENERAL.—Section 414 is amended by adding the following new subsection:

"(v) CERTAIN RULES AGGREGATING EMPLOYEES NOT TO APPLY TO CHURCHES, ETC.—

"(1) IN GENERAL.—If the election provided by paragraph (3) is made, for purposes of sections 401(a)(3), 401(a)(4), and 401(a)(5) as in effect on September 1, 1974, 401(a)(4), 401(a)(5), 401(a)(17), 401(a)(26), 401(h), 401(m), 410(b), 411(d)(1), and 416, subsections (b), (c), (m), (o), and (t) of this section shall not apply to treat the employees of church-related organizations as employed by a single employer, except in the case of employees of church-related organizations which are not exempt from tax under section 501(a) and which have a common, immediate parent.

"(2) DEFINITION OF CHURCH-RELATED ORGANIZATION.—For purposes of this subsection, the term 'church-related organization' means a church or a convention or association of churches, an organization described in section 414(e)(3)(A), an organization described in section 414(e)(3)(B)(ii), or an organization, the employees of which would be aggregated with the employees of such organizations but for the election provided by paragraph (3).

"(3) ELECTION TO DISAGGREGATE.—The provisions of this subsection shall apply if a church-related organization makes an election for itself and other church-related organizations (in such form and manner as the Secretary may by regulations prescribe) on or before the last day of the plan year beginning on or after January 1, 1993.".

(b) EFFECTIVE DATE.—The amendment made by this section shall be effective as if included in the provisions of P.L. 93-406, P.L. 98-369, and P.L. 99-514 to which such amendment relates.

SEC. 9. QUALIFIED RETIREMENT CONTRIBUTIONS TO INCLUDE VOLUNTARY CONTRIBUTIONS PURSUANT TO CHURCH PLANS.

(a) IN GENERAL.—Section 219(e) is amended to read as follows:

"(e) DEFINITION OF QUALIFIED RETIREMENT CONTRIBUTION.—For purposes of this section—

"(1) QUALIFIED RETIREMENT CONTRIBUTION.—The term 'qualified retirement contribution' means—

"(A) any amount paid in cash for the taxable year by or on behalf of an individual to an individual retirement plan for such individual's benefit,

"(B) any amount contributed on behalf of any individual to a plan described in section 501(c)(18), and

"(C) any qualified voluntary employee contribution paid in cash by the individual for the taxable year.

"(2) QUALIFIED VOLUNTARY EMPLOYEE CONTRIBUTION.—

"(A) IN GENERAL.— The term 'qualified voluntary employee contribution' means any voluntary contribution—

"(i) which is made by an individual as an employee under a church plan, which plan allows an employee to make contributions which may be treated as qualified voluntary employee contributions under this section, and

"(ii) with respect to which the individual has not designated such contribution as a contribution which should not be taken into account under this section.

"(B) VOLUNTARY CONTRIBUTION.— For purposes of subparagraph (A), the term 'voluntary contribution' means any contribution which is not a mandatory contribution (within the meaning of section 411(c)(2)(C)).

"(C) DESIGNATION.— For purposes of determining whether or not an individual has made a designation described in subparagraph (A)(ii) with respect to any contribution during any calendar year under a church plan, such individual shall be treated as having made such designation if he notifies the plan administrator of such plan, not later than the earlier of—

"(i) April 15 of the succeeding calendar year, or

"(ii) the time prescribed by the plan administrator,

that the individual does not want such contribution taken into account under this section. Any designation or notification referred to in the preceding sentence shall be made in such manner as the Secretary shall by regulations prescribe and, after the last date on which such designation or notification may be made, shall be irrevocable for such taxable year.

"(3) DEFINITIONS.— For purposes of this subsection.—

"(A) CHURCH PLAN.— The term 'church plan' means any plan, within the meaning of section 414(e), described in section 401(a), 401A, or 403(b) (including section 403(b)(9)).

"(B) EMPLOYEE.—The term 'employee' shall include a self-employed individual (within the meaning of section 401(c)(1)(B)) who is a duly ordained, commissioned, or licensed minister of a church in the exercise of his ministry.".

(b) REPORTS TO BE CONSISTENT.— Section 219(f)(4) is amended to read as follows:

"(4) REPORTS.— The Secretary shall prescribe regulations which prescribe the time and the manner in which reports to the Secretary and plan participants shall be made by the plan administrator of a plan receiving qualified voluntary employee contributions. Such reports shall be consistent with those required of the administrator of an individual retirement plan.".

(c) AMENDMENT CONFORMING SECTION 72(o) WITH SECTION 219(e).—Section 702(o)(5)(A) is amended to read as follows:

"(A) DEDUCTIBLE EMPLOYEE CONTRIBUTIONS.— The term 'deductible employee contributions' means any qualified voluntary employee contribution (as defined in section 219(e)(2)) made after December 31, 1981, in a taxable year beginning after such date (other than contributions for taxable years beginning after December 31, 1986, and before January 1, 1990) and allowable as a deduction under section 219(a) for such taxable year.".

(d) CONTRIBUTION TO INDIVIDUAL RETIREMENT PLAN INCLUDES A QUALIFIED VOLUNTARY EMPLOYEE CONTRIBUTION.— Section 219(f) is amended by redesignating paragraph (7) as paragraph (9) and by adding after paragraph (6) the following new paragraph:

"(7) QUALIFIED VOLUNTARY EMPLOYEE CONTRIBUTIONS.— For purposes of this subsection, a contribution to an individual retirement plan shall be deemed to include a qualified voluntary employee contribution.".

(e) ROLLOVERS FROM IRAS TO QVECS AND VICE VERSA.—Section 219(f) is amended by adding the following new paragraph:

"(8) ROLLOVER AMOUNTS.—

"(A) GENERAL RULE.—If—

"(i) any portion of the balance to the credit of an employee in a plan described in subparagraphs (A), (B), or (C) of subsection (e)(1) is paid to him,

"(ii) the employee transfers any portion of the property he receives in such distribution to another plan described in such paragraphs of subsection (e)(1), and

"(iii) in the case of a distribution of property other than money, the property so transferred consists of the property distributed,

then such distribution (to the extent so transferred) shall not be includable in gross income for the taxable year in which paid.

"(B) TRANSFER MUST BE MADE WITHIN 60 DAYS OF RECEIPT.—Subparagraph (A) shall not apply to any transfer of a distribution made after the 60th day following the day on which the employee received the property distributed.

"(C) REQUIRED DISTRIBUTIONS NOT ELIGIBLE FOR ROLLOVER TREATMENT.—Subparagraph (A) shall not apply to any distribution to the extent such distribution is required under section 401(a)(9) or 403(b)(10).".

(f) ANNUAL ADDITIONS NOT TO INCLUDE QUALIFIED VOLUNTARY EMPLOYEE CONTRIBUTIONS.—The second sentence of section 415(c)(2) (relating to annual additions) is amended to read as follows: "For the purposes of this paragraph, employee contributions under subparagraph (B) are determined without regard to any rollover contributions (as defined in sections 402(a)(5), 403(a)(4), 403(b)(8), and 408(d)(3)), without regard to employee contributions to a simplified employee pension which are excludable from gross income under section 408(k)(6), and without regard to deductible employee contributions within the meaning of section 72(o)(5).".

(g) EFFECTIVE DATE.—The amendments made by this section shall be effective for taxable years beginning after December 31, 1989.

SEC. 10. SELF-EMPLOYED MINISTERS TREATED AS EMPLOYEES FOR PURPOSES OF CERTAIN WELFARE BENEFIT PLANS AND RETIREMENT INCOME ACCOUNTS.

(a) IN GENERAL.—Section 7701(a)(20) is amended to read as follows:

"(20) EMPLOYEE.—For the purpose of applying the provisions of section 79 with respect to group-term life insurance purchased for employees, for the purpose of applying the provisions of sections 104, 105, and 106 with respect to accident or health insurance or accident or health plans, for the purpose of applying the provisions of section 101(b) with respect to employees' death benefits, and for the purpose of applying the provisions of subtitle A with respect to contributions to or under a stock bonus, pension, profit-sharing, or annuity plan, and with respect to distributions under such a plan, or by a trust forming part of such a plan, and for purposes of applying section 125 with respect to cafeteria plans, the term 'employee' shall include a duly ordained, commissioned, or licensed minister of a church in the exercise of his ministry who is a self-employed individual (within the meaning of section 401(c)(1)(B)) or a full-time life insurance salesman who is considered an employee for the purpose of chapter 21, or in the case of services performed before January 1, 1951, who would be considered an employee if his services were performed during 1951.".

(b) EFFECTIVE DATE.—The amendment made by this section shall be effective for years beginning before, on, or after December 31, 1989.

SEC. 11. DEDUCTIONS FOR CONTRIBUTIONS BY CERTAIN MINISTERS TO RETIREMENT INCOME ACCOUNTS.

(a) IN GENERAL.—Section 404(a) is amended by adding the following new paragraph:

"(10) CONTRIBUTIONS BY CERTAIN MINISTERS TO RETIREMENT INCOME ACCOUNTS.—In case contributions are made by a minister described in section 403(b)(13)(F) to a retirement income account described in section 403(b)(9) and not by a person other than such minister, such contributions shall be treated as made to a pension trust which is exempt from tax under section 501(a) forming part of a plan which is described in section 401(a) and shall be deductible under this subsection to the extent such contributions do not exceed the exclusion allowance of such minister, determined under section 403(b)(2).".

(b) EFFECTIVE DATE.—The amendment made by this section shall be effective for years beginning after December 31, 1989.

SEC. 12. MODIFICATION FOR CHURCH PLANS OF RULES FOR PLANS MAINTAINED BY MORE THAN ONE EMPLOYER.

(a) IN GENERAL.—Section 413(c) is amended by adding the following new paragraph:

"(8) CHURCH PLANS MAINTAINED BY MORE THAN ONE EMPLOYER.—A church plan (within the meaning of section 414(e)) maintained by more than one employer and with respect to which the election provided by section 410(d) has not been made, which commingles assets solely for purposes of investment and pooling for mortality experience to provide to participants annuities computed with reference to the balance in the participants' accounts when such accounts become payable, shall not be treated as a single plan maintained by more than one employer under this subsection. The rules provided by this paragraph shall apply for purposes of applying section 403(b)(12) to such church plan.".

SEC. 13. SECTION 457 NOT TO APPLY TO DEFERRED COMPENSATION OF A CHURCH.

(a) IN GENERAL.—Paragraph (13) of 457(e) is amended to read as follows:

"(13) SPECIAL RULE FOR CHURCHES.—The term 'eligible employer' shall not include a church (within the meaning of section 401A(c)(1)).".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years begining after December 31, 1978.

SEC. 14. CHURCH PLAN MODIFICATION TO SEPARATE ACCOUNT REQUIREMENT OF SECTION 401(h).

(a) EXCEPTION TO SEPARATE ACCOUNT REQUIREMENT.—Section 401(h) is amended by adding the following new sentence at the end thereof: "Notwithstanding the preceding sentence, in the case of a pension or annuity plan that is a church plan (within the meaning of section 414(e)) which is maintained by more than one employer, paragraph (6) shall not apply to an employee who is a key employee for purposes of section 416 solely because such employee is described in section 416(i)(1)(A)(i) (relating to officers having an annual compensation greater than 150 percent of the amount in effect under section 415(c)(1)(A)).".

(b) APPLICATION OF SECTION 415(l).—Section 415(l) is amended by modifying paragraph (l) thereof to read as follows:

"(1) IN GENERAL.—For purposes of this section, the following shall be treated as an annual addition to a defined contribution plan for purposes of subsection (c):

"(A) contributions allocated to any individual medical account which is part of a pension or annuity plan; and

"(B) the actuarially determined amount of prefunding for the insurance value of benefits which are:

"(i) described in seciton 401(h);

"(ii) paid under a pension or annuity plan that is a church plan (within the meaning of section 414(e));

"(iii) paid under a plan maintained by more than one employer; and

"(iv) payable solely to an employee who is a key employee for purposes of section 415 solely because such employee is described in section 416(i)(1)(A)(i) (relating to officers having an annual compensation greater than 150 percent of the amount in effect under section 415(c)(1)(A)), his spouse, or his dependents.

Subparagraph (B) of section (c)(1) shall not apply to any amount treated as an annual addition under the preceding sentence.".

(c) EFFECTIVE DATE.—The amendment made by this section shall apply to years beginning after March 31, 1984.

SEC. 15. RULE RELATING TO INVESTMENT IN CONTRACT NOT TO APPLY TO FOREIGN MISSIONARIES.

(a) IN GENERAL.—The last sentence of section 72(f) is amended to read as follows: "The preceding sentence shall not apply to amounts which were contributed by the employer, as determined under regulations prescribed by the Secretary, to provide pension or annuity credits, to the extent such credits are attributable to services performed before January 1, 1963, and are provided pursuant to pension or annuity plan provisions in existence on March 12, 1962, and on that date applicable to such services, or to provide pension or annuity credits for foreign missionaries (within the meaning of section 403(b)(2)(D)(iii)).".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years beginning after December 31, 1989.

SEC. 16. REPEAL OF ELECTIVE DEFERRAL CATCH-UP LIMITATION FOR RETIREMENT INCOME ACCOUNTS.

(a) IN GENERAL.—Clause (iii) of section 402(g)(8)(A) is amended to read as follows:

"(iii) except in the case of elective deferrals under a retirement income account described in section 403(b)(9), the excess of $5,000 multiplied by the number of years of service of the employee with the qualified organization over the employer contributions described in paragraph (3) made by the organization on behalf of such employee for prior taxable years (determined in the manner prescribed by the Secretary).".

(b) EFFECTIVE DATE.—The amendment made by this section shall be effective as if included in the provision of P.L. 99-514 to which such amendment relates.

SEC. 17. CHURCH PLANS MAY ANNUITIZE BENEFITS.

(a) IN GENERAL.—A retirement income account described in section 403(b)(9), a church plan (within the meaning of section 414(e)) that is a plan described in section 401(a) or 401A, or an account comprised of qualified voluntary employee contributions described in section 219(e)(2) shall not fail to be described in such sections merely because it pays benefits to participants (and their beneficiaries) from a pool of assets administered or funded by an organization described in section 414(e)(3)(A), rather than through the purchase of annuities from an insurance company.

(b) EFFECTIVE DATE.—This provision shall be effective for years beginning before, on, or after December 31, 1989.

SEC. 18. CHURCH PLANS MAY INCREASE BENEFIT PAYMENTS.

(a) IN GENERAL.—A retirement income account described in section 403(b)(9), a church plan (within the meaning of section 414(e)) that is a plan described in section 401(a) or 401A, or an account comprised of qualified voluntary employee contributions described in section 219(e)(2) shall not fail to be described in such sections merely because it increases benefit payments to participants (and their beneficiaries) pursuant to a method not described in section 401(a)(9) or the regulations prescribed under such section.

(b) EFFECTIVE DATE.—This provision shall be effective for years beginning before, on, or after December 31, 1989.

SEC. 19. RULES APPLICABLE TO SELF-INSURED MEDICAL REIMBURSEMENT PLANS NOT TO APPLY TO PLANS OF CHURCHES.

(a) IN GENERAL.—Section 105(h) is amended by adding the following new paragraph:

"(11) PLANS OF CHURCHES.—This subsection shall not apply to a plan maintained by a church (within the meaning of section 401A(c)(1)).".

(b) EFFECTIVE DATE.—The amendment made by this section shall be effective for years beginning before, on, or after December 31, 1989.

By Mr. BOND (for himself, Mr. DODD, Mr. ROBB, Mr. BRYAN, Mr. EXON, Mr. LOTT, Mr. LIEBERMAN, Mrs. KASSEBAUM, Mr. DANFORTH, Mr. STEVENS, Mr. KOHL, Mr. MCCONNELL, Mr. PRESSLER, Mr. RIEGLE, Mr. BIDEN, Mr. BURNS, Mr. MCCAIN, Mr. SHELBY, Mr. BOSCHWITZ, Mr. SIMON, and Mr. D'AMATO):

S. 2903. A bill to establish a National Commission on Financial Institution Reform, Recovery, and Enforcement; to the Committee on Banking, Housing, and Urban Affairs.

NATIONAL COMMISSION ON FINANCIAL INSTITUTION REFORM, RECOVERY, AND ENFORCEMENT

● Mr. BOND. Mr. President, today Senator DODD, I, and 19 of our colleagues are introducing legislation setting up an independent commission to investigate the collapse of the savings and loan industry. Its duties shall be to identify the causes of the crisis, the causes of the fraud and abuse, and to recommend any changes in regulation, supervision, administration, or legislation needed to protect the safety and soundness of federally insured funds.

The bipartisan eight person Commission would be appointed by the President and congressional leadership. The President, the Senate majority leader and the House speaker would each appoint two members. The minority leaders of the Senate and House would each select one member. It is important to note that no current Members of Congress, administration officials, or State officials would be eligible to serve.

The Commission's report, which would be due on January 1, 1991, will help policymakers avoid similar mistakes in the future and should greatly aid our efforts to modernize our financial system and reform deposit insurance next year.

I do not believe it is productive for us, in Congress, to lob political grenades at each other as we discuss how

this scandal came about. American taxpayers deserve better government.

The current fingerpointing, demagoguery, and political posturing will only lead us to understand part of the savings and loan story. Left unexplored will be the bad policy decisions, poor regulatory practices, political maneuvering and just plain stupidity that have left us facing the largest financial scandal ever to beset this Nation.

There is a great need for an independent, bipartisan commission to make calm and careful assessments of what went wrong and what we ought to avoid in the future so we do not repeat this sad history. Ignoring this problem was a mistake. Ignoring its lessons would be a bigger mistake. An independent commission will review all the facts and report to the American people on the Basic Question—how did this happen?

We must prosecute the crooks who looted savings and loans and left taxpayers with the bill, but that is not enough. If we focus solely on prosecutions, we blind ourselves to the full picture of just how this fiasco took place.

Let us learn some useful policy lessons from the wreckage of the savings and loan industry. I encourage my colleagues to join us and cosponsor this legislation.

I ask unanimous consent that a copy of the legislation be printed in the RECORD following my statement.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2903

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ESTABLISHMENT.

There is established the National Commission on Financial Institution Reform, Recovery, and Enforcement.

SECTION 2. DUTIES OF THE COMMISSION.

The Commission shall—

(1) investigate and identify the causes of the savings and loan crisis, including consideration of the role of—

(A) State and Federal regulation, including capital and accounting standards;

(B) State and Federal supervision, including the number and quality of personnel;

(C) deposit insurance, including the changes in the amount insured and in technology;

(D) State and Federal asset powers legislation;

(E) macroeconomic changes and regional recessions; and

(F) competitive factors;

(2) investigate the causes of fraud and abuse in the savings and loan industry;

(3) recommended changes in the regulation and supervision of depository institutions in order to prevent a recurrence of the problems identified under paragraphs (1) and (2); and

(4) recommend any other administrative or legislative action necessary or appropriate to protect the safety and soundness of depository institutions and the Federal deposit insurance funds, as well as other Federal insurance programs.

SEC. 3. MEMBERSHIP.

(a) NUMBER AND APPOINTMENT.—The Commission shall be composed of 8 members appointed as follows:

(1) 2 individuals appointed by the President.

(2) 3 individuals appointed by the Speaker of the House of Representatives, 1 of whom shall be appointed upon the recommendation of the minority leader of the House of Representatives.

(3) 3 individuals appointed by the President pro tempore of the Senate, 2 of whom shall be appointed upon the recommendation of the majority leader of the Senate and 1 of whom shall be appointed upon the recommendation of the minority leader of the Senate.

(b) ELIGIBILITY.—No officer or employee of the United States or of any State may be appointed to be a member of the Commission.

(c) TERMS.—

(1) IN GENERAL.—Each member shall be appointed for the life of the Commission.

(2) VACANCY.—A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(d) PROHIBITION ON COMPENSATION.—

(1) IN GENERAL.—Except as provided in paragraph (2), members of the Commission shall serve without pay.

(2) TRAVEL EXPENSES.—Each member shall receive travel expenses, including per diem in lieu of subsistence, in accordance with sections 5702 and 5703 of title 5, United States Code.

(e) QUORUM.—A majority of the members of the Commission shall constitute a quorum but a lesser number may hold hearings.

(f) CHAIRPERSON.—The Chairperson of the Commission shall be elected by the Commission from among the members of the Commission.

(g) MEETINGS.—The Commission shall meet at the call of the Chairperson or a majority of the members.

SEC. 4. POWERS OF COMMISSION.

(a) HEARINGS AND SESSIONS.—

(1) IN GENERAL.—The Commission may, for the purpose of carrying out this title, hold hearings, sit and act at times and places, take testimony, and receive evidence as the Commission considers appropriate.

(2) ADMINISTRATION OF OATHS.—The Commission may administer oaths or affirmations to witnesses appearing before the Commission.

(b) POWERS OF MEMBERS AND AGENTS.—Any member or agent of the Commission may, if authorized by the Commission, take any action which the Commission is authorized to take by this section.

(c) SUBPOENA POWER.—

(1) IN GENERAL.—The Commission may issue subpoenas requiring the attendance and testimony of witnesses and the production of any evidence relating to any matter under investigation by the Commission.

(2) ADMINISTRATIVE ASPECTS OF SUBPOENA.—

(A) ATTENDANCE OR PRODUCTION AT DESIGNATED SITE.—The attendance of witnesses and the production of evidence may be required from any place within the United States at any designated place of hearing within the United States.

(B) FEES AND TRAVEL EXPENSES.—Persons served with a subpoena under this subsection shall be paid the same fees and mileage for travel within the United States that are paid witnesses in Federal courts.

(C) NO LIABILITY FOR OTHER EXPENSES.—The Commission and the United States shall not be liable for any expense, other than an expense described in subparagraph (B), incurred in connection with the production of any evidence under this subsection.

(3) FAILURE TO OBEY A SUBPOENA.—

(A) APPLICATION TO COURT.—If a person refuses to obey a subpoena issued under paragraph (1), the Commission may apply to a district court of the United States for an order requiring that person to appear before the Commission to give testimony or produce evidence, as the case may be, relating to the matter under investigation.

(B) JURISDICTION OF COURT.—The application may be made within the judicial district where the hearing is conducted or where that person is found, resides, or transacts business.

(C) FAILURE TO COMPLY WITH ORDER.—Any failure to obey the order of the court may be punished by the court as civil contempt.

(4) SERVICE OF SUBPOENAS.—The subpoenas of the Commission shall be served in the manner provided for subpoenas issued by a United States dis trict court under the Federal Rules of Civil Procedure for the United States district courts.

(5) SERVICE OF PROCESS.—All process of any court to which application is to be made under paragraph (3) may be served in the judicial district in which the person required to be served resides or may be found.

(d) OBTAINING OFFICIAL DATA.—

(1) AUTHORITY TO OBTAIN.—Notwithstanding any provision of section 552a of title 5, United States Code, the Commission may secure directly from any department or agency of the United States information necessary to enable the Commission to carry out this Act.

(2) PROCEDURE.—Upon request of the Chairperson of the Commission, the head of that department or agency shall furnish the information requested to the Commission.

(e) MAILS.—The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(f) ADMINISTRATIVE SUPPORT SERVICES.—Upon the request of the Commission, the Administrator of General Services shall provide to the Commission, on a reimbursable basis, the administrative support services necessary for the Commission to carry out its responsibilities under this title.

SEC. 5. STAFF OF COMMISSION; EXPERTS AND CONSULTANTS.

(a) STAFF.—Subject to such regulations as the Commission may prescribe, the Chairperson may appoint and fix the pay of such personnel as the Chairperson considers appropriate.

(b) APPLICABILITY OF CERTAIN CIVIL SERVICE LAWS.—The staff of the Commission may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of that title relating to classification and General Schedule pay rates, except that an individual so appointed may not receive pay in excess of the annual rate of basic pay payable for GS-18 of the General Schedule.

(c) EXPERTS AND CONSULTANTS.—Subject to rules prescribed by the Commission, the Chairperson may procure temporary and intermittent services under section 3109(b) of title 5, United States Code, but at rates for individuals not to exceed the annual

rate of basic pay payable for GS-18 of the General Schedule.

(d) STAFF OF FEDERAL AGENCIES.—Upon request of the Chairperson, the head of any Federal department or agency may detail, on a reimbursable basis, any of the personnel of that department or agency to the Commission to assist it in carrying out its duties under this Act.

SEC. 6. REPORT.

(a) REQUIRED.—The Commission shall submit a final report to the President and the Congress not later than January 1, 1991.

(b) CONTENTS.—The final report shall contain a detailed statement of the findings and conclusions of the Commission, together with such recommendations for legislation or administrative action as the Commission considers appropriate.

SEC. 7. TERMINATION.

The Commission shall terminate 30 days after submitting its final report.

SEC. 8. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated not to exceed $1,000,000 to carry out the purposes of this Act.●

● Mr. DODD. Mr. President, as the costs of the S&L crisis have grown like topsy, not a day goes by without a major story about the S&L debacle. Such stories have focused on the misuse of political influence, on the slowness of the cleanup and, more often than not, on the extravagant living or outright fraud by S&L officers.

This financial crisis is going to cost the Government upward of $200 billion, using present value costs. $200 billion. Money that should go to needy people and future generations who will bear much of the burden of the bailout.

The public deserves an accounting. The public needs to know who misused the political process and why the cleanup has not proceeded faster. We have already begun to address these problems. The Senate Ethics Committee is currently investigating whether there was any abuse of the political process and congressional and public scrutiny have clearly played a role in speeding up the cleanup.

The public also deserves to know that those who have ripped off the Government will pay for their crimes. The Wirth-Heinz amendment to the omnibus crime bill, the so-called S&L kingpin legislation, should assure that such people do jail time, as they should.

However, KIT BOND, CHUCK ROBB, and I, along with the other original cosponsors of this bill, want to assure that the public gets more than the crooks. We want to be sure the public gets the full story. We cannot allow the hunt for crooks and political cover to blind us from seeing the full picture of just how this fiasco occurred.

In order to get the full story, our legislation would establish an eight-member Commission to investigate and identify the causes of the savings and loan crisis. Among other areas, the Commission is directed to consider the role of:

State and Federal regulation, including capital and accounting standards;

State and Federal supervision, including the number and quality of personnel;

Deposit insurance, including the changes in the amount insured and in technology;

State and Federal asset powers legislation;

Macroeconomic changes and regional recessions; and

Competitive factors.

We believe an investigation of these factors will get to the bottom of how this disaster occurred—how these and other events combined to create the climate that permitted crooks and fast buck artists to get into the S&L business.

But our Commission has a forward-looking element as well. It would be required to recommend changes in the regulation and supervision of depository institutions to prevent a recurrence of the problems that caused the S&L mess and to recommend any other administrative or legislative action necessary to protect the safey and soundness of depository institutions and the Federal insurance funds.

While I believe that the FIRREA legislation passed by this Congress in 1989 addresses many of these problems, cleaning up the S&L mess is not our last job here. We are also concerned about the future of our banking industry. Banks have come under increasing pressures from other financial services providers, both domestically and internationally. The banking committees in both the Senate and House have been considering modernization legislation for the past decade, but have failed to develop a consensus on a solution. Clearly, the lessons of the S&L fiasco will be highly instructive as we consider the best way to modernize our financial services industries. With a final Commission report in hand by January 1, 1991, we will be far better equipped to attack this very difficult issue.

Given the urgency of this exercise, we plan to move this legislation as soon as possible.●

● Mr. ROBB. Mr. President, I am pleased to join my colleagues, Senators DODD, BOND, and others in introducing a bill to create the National Commission on Financial Institution Reform, Recovery, and Enforcement. This eight-member Commission is designed to do what the Financial Institutions Reforms, Recovery, and Enforcement Act of 1989—FIRREA, Public Law 101-73—did not do. It will study and report on our current crisis in the thrift industry and make recommendations for ways to avoid similar problems in the future.

Almost daily, the Nation's citizens have picked up the morning paper or received news from the electronic media and discovered another thrift institution going under due to mismanagement or criminal fraud. Moreover, projections of the cost of bailing out these institutions has risen from $50 billion, to $150 billion, to $325 billion, and now $500 billion over 40 years, and we have no guarantee the hemorrhaging is finally contained.

Since the American people are going to have to pay for this bailout, they have a right to a reasonable explanation of how we got here. Because no current official or employee of the United States or any State will be a member of the Commission, the American people should get as impartial a study of the problem as possible.

Mr. President, this bill charges the Commission with responsibility for investigating and identifying the causes of the savings and loan crisis. Among the important issues the Commission will consider are Federal and State regulation, including capital and accounting standards, and deposit insurance, as well as possible changes in the amount insured. It will also investigate the causes of fraud and abuse in the thrift industry and recommend changes in the regulation and supervision of depository institutions in order to prevent a recurrence of the problems identified by the Commission.

Most importantly, however, the Commission must recommend any other administrative or legislative action necessary to protect the safety and soundness of depository institutions and the Federal deposit insurance funds, taking into account other Federal insurance programs. This point is important because according to the Office of Management and Budget, the Federal Government is facing between $4 and $7 trillion in contingent liabilities. I hope the Commission's report will enable us to reduce the likelihood of expensive insurance bailouts in the future.

Finally, the American people will not have to wait long for the Commission's report. The bill requires the Commission to report to the President and the Congress by January 1, 1991, before the 102d Congress convenes. Mr. President, the American people need to know how we got into this mess and this bill will help us figure it out. I strongly urge prompt action on this bill.●

● Mr. KOHL. Mr. President, I rise today as an original cosponsor of the Bond bill to establish a national commission on the savings and loan crisis. I commend my colleague from Missouri for the foresight he has shown in introducing this measure.

Over the last half a year, we have heard plenty about the troubled thrift industry. We wring our hands and point our fingers with each new cost

estimate of the bailout and each new report of white collar crime.

In my opinion, the time for hand wringing and finger pointing is done. We have recognized the cost of the bailout. We have deplored the actions of those most responsible for thrift failures.

Now we need to look forward. We need to do everything we can to ensure that taxpayers never again become liable for the huge, unrecoverable losses of federally insured institutions.

The Bond bill takes the first step toward that goal. It sets up a bipartisan commission to look into the causes of the S&L crisis. This Commission won't be maneuvering for political advantage; it will be searching for answers. Its conclusions won't pit one region against another; they will map out a national plan for safeguarding the institutions that taxpayers ensure.

We must make a commitment never again to let taxpayers' dollars pay for unregulated greed and corruption. Fulfilling that commitment involves looking honestly at the mistakes that led to the S&L crisis. The Bond measure sets up a simple and fair mechanism to make sure this gets done. I urge my colleagues to support it.●

By Mr. INOUYE:

S. 2904. A bill to require the Secretary of Commerce to make additional frequencies available for commercial assignment in order to promote the development and use of new telecommunications technologies, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EMERGING TELECOMMUNICATIONS TECHNOLOGIES ACT

● Mr. INOUYE. Mr. President, I am introducing legislation today that should go a long way toward enhancing the growth and development of U.S. telecommunication technologies. The bill I offer today is called the Emerging Telecommunications Techologies Act of 1990. This bill is a companion to the reported version of the bill—H.R. 2965—introduced by Representative JOHN DINGELL, chairman of the House Committee on Energy and Commerce. The bill would direct the Secretary of Commerce, together with the President, to identify 200 megahertz of spectrum currently allocated for use by the Federal Government as being suitable for use by commercial users.

Since the passage of the Communications Act of 1934, the United States has taken a leadership role in allocating frequencies to promote the development of new technologies. This aggressive leadership role, however, has now put the United States in the difficult position of having no more spectrum left to give away. There is growing concern that the United States is facing a severe shortage of spectrum for the commercial development of the newest and most sophisticated technologies.

This comes at a time when the demand for new spectrum is exploding. A recent article in Business Week noted that, according to the International Telecommunications Union, as many new frequency assignments were recorded in the past decade as in all the previous 80 years of radio communications. Police, fire, ambulance, and other public safety entities need more spectrum to coordinate their rescue and safety activities. Trucking and shipping companies are looking for more spectrum to improve the efficiency of their transportation and delivery operations. Business executives need mobile services that will allow them to use phones, send faxes, and connect with computer databases in cars, planes, and trains. Radio broadcasters may soon want additional frequencies to allow them to transmit digital radio, producing sound quality as good as compact disks.

Unless the United States finds a way to accommodate these requests for new technologies, we will find that our users have a second-rate communications system, our public services operate inefficiently, and our industries move overseas. Even those services that are seen as luxury services today can drive economic progress. These are often the technologies that have allowed the United States to retain its leadership role in the field of communications.

Other countries are taking steps to allocate frequencies to accomodate these new technologies. For example, the British Government has recently allocated 200 megahertz of spectrum to new land mobile communications technologies. One of these new technologies, called Personal Communications Network, or PCN, could provide mobile service similar to cellular telephone service at much reduced rates, using smaller and more inexpensive hand-held phones. The Conference of European PTT's [CEPT] has recommended 20 megahertz be made available in Europe for Digital European Cordless Telephones [DECT]. Many of these allocations will require the military to vacate some spectrum. The Japanese are also taking steps to ensure that adequate spectrum is available for emerging technologies. The Japanese Government is expected to announce shortly a large allocation, possibly as much as 600 megahertz, for new commercial applications.

As a result of these foreign allocations, many U.S. companies are having more success developing and marketing their telecommunications products abroad than in the United States. Furthermore, unless the United States acts quickly to implement these new technologies, there is a danger that foreign manufacturers may gain an advantage in designing and developing the equipment to operate over these frequencies. These foreign companies would then be well-positioned to produce equipment for the U.S. market when the United States gets around to making the appropriate frequency allocation.

Freeing up new frequencies for these new technologies is thus becoming increasingly important for the U.S. economic future. At the same time, the United States must avoid reallocating frequencies that will impose unnecessary costs on our existing communications patterns or hamper our national defense capabilities. Certainly, we must be cautious about the effect of reallocating any frequencies that may be of critical importance to our national security interests. For these reasons, the bill I am introducing today contains several provisions to protect our national security.

For instance, in choosing the appropriate frequencies, the Secretary must avoid serious degradation of Government services and operations and limit excessive costs to civilian users of Government services. The Secretary of Commerce must submit a preliminary report of the frequencies to be reassigned. This report must be submitted to Congress and the President, and must undergo review by a Private Sector Advisory Committee, before a final report is made. The President has the authority to substitute frequencies if he finds that the reassignment would seriously jeopardize national defense, public health or safety, or other important governmental needs. Finally, the President may also reclaim frequencies previously reassigned to commercial purposes under certain circumstances.

This bill should help the United States to retain its leadership position in emerging technologies and promote the development of new services to the American public. I have scheduled a hearing on this bill on Thursday, August 2, at 2 p.m. I urge my colleagues to promote the objectives of this bill and to support its passage.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2904 *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Emerging Telecommunications Technologies Act of 1990".

SEC. 2. FINDINGS.

The Congress finds that—

(1) the Government currently reserves for its own use approximately 40 percent of the electromagnetic spectrum that is assigned

for use pursuant to the Communications Act of 1934;

(2) many of the reserved frequencies are unused by Government licensees;

(3) the public interest requires that many of the reserved frequencies be utilized more efficiently by government or commercial operators;

(4) additional frequencies are assigned for services that could be obtained more efficiently from commercial carriers or other vendors;

(5) scarcity of assignable frequencies for commercial use can and will—

(A) impede the development and commercialization of new telecommunications products and services;

(B) reduce the capacity and efficiency of the United States' telecommunications systems; and

(C) thereby adversely affect the productive capacity and international competitiveness of the United States economy;

(6) a reassignment of these frequencies can produce significant economic returns; and

(7) the Secretary of Commerce, the President, and the Federal Communications Commission should be directed to take appropriate steps to correct these deficiencies.

SEC. 3. NATIONAL SPECTRUM PLANNING.

(a) PLANNING ACTIVITIES.—The Assistant Secretary for Communications and Information and the Chairman of the Commission shall meet, at least biannually, to conduct joint spectrum planning with respect to the following issues:

(1) the future spectrum requirements for public and private uses;

(2) the spectrum allocation actions necessary to accommodate those uses; and

(3) actions necessary to promote the efficient use of the spectrum, including spectrum management techniques to promote increased shared use of the spectrum.

(b) REPORTS.—The Assistant Secretary for Communications and Information and the Chairman of the Commission shall submit an annual report to the Committee on Energy and Commerce of the House of Representatives, the Committee on Commerce, Science, and Transportation of the Senate, the Secretary, and the Commission on the joint spectrum planning activities conducted under subsection (a) and recommendations for action developed pursuant to such activities. The first annual report submitted after the date of the report by the private sector advisory committee under section 4(d)(4) shall include an analysis of and response to that committee report.

SEC. 4. IDENTIFICATION OF REALLOCABLE FREQUENCIES.

(a) IDENTIFICATION REQUIRED.—The Secretary shall, within 24 months after the date of the enactment of this Act, prepare and submit to the President and the Congress a report identifying, and recommending for reallocation, frequencies that—

(1) are assigned to Government stations pursuant to section 305(a) of the Act;

(2) are not required for the present or identifiable future needs of the Government;

(3) it is or will be feasible to make available for use under the Act (other than for Government stations under such section 305); and

(4) are most likely to have the greatest potential for commercial uses under the Act.

(b) MINIMUM AMOUNT OF SPECTRUM RECOMMENDED.—

(1) IN GENERAL.—The report required by subsection (a) shall identify (and recommend for reallocation) bands of frequencies that span a total of not less than 200 megahertz, that are located below 5 gigahertz, and that offer frequencies meeting the criteria specified in paragraphs (1) through (3) of subsection (a). If the report identifies (as meeting such criteria) bands of frequencies spanning more than 200 megahertz, the report shall identify (and recommend for reallocation) those bands (spanning not less than 200 megahertz) that meet the criteria specified in paragraph (4) of such subsection.

(2) MIXED USES PERMITTED TO BE COUNTED.—Frequencies which the Secretary's report recommends be partially retained for use by a Government station within a geographically limited area, but which are also recommended to be reallocated to be made available under the Act outside that area, may be counted toward the minimum spectrum required by paragraph (1) of this subsection, except that—

(A) the frequencies counted under this paragraph may not count toward more than 20 percent of the minimum required by paragraph (1) of this subsection; and

(B) a frequency may not be counted under this paragraph unless the geographically limited area for which it will be retained for Government use includes not more than 20 percent of the population of the United States.

(c) CRITERIA FOR IDENTIFICATION.—

(1) NEEDS OF THE GOVERNMENT.—In determining whether a frequency meets the criteria specified in subsection (a)(2), the Secretary shall—

(A) consider whether the frequency is used to provide a communications service that is or could be available from a commercial carrier or other vendor;

(B) seek to promote—

(i) the maximum practicable reliance on commercially available substitutes;

(ii) the sharing of frequencies in geographically separate areas (as permitted under subsection (b)(2));

(iii) the development and use of new communications technologies; and

(iv) the use of nonradiating communications systems where practicable; and

(C) seek to avoid—

(i) serious degradation of Government services and operations; and

(ii) excessive costs to civilian users of Government services.

(2) FEASIBILITY OF USE.—In determining whether a frequency meets the criteria specified in subsection (a)(3), the Secretary shall—

(A) assume such frequencies will be assigned by the Commission under section 303 of the Act over the course of not less than 15 years;

(B) assume reasonable rates of scientific progress and growth of demand for telecommunications services;

(C) determine the extent to which the reallocation or reassignment will relieve actual or potential scarcity of frequencies available for commercial use; and

(D) seek to include frequencies which can be used to stimulate the development of new technologies.

(3) COMMERCIAL USE.—In determining whether a frequency meets the criteria specified in subsection (a)(4), the Secretary shall consider—

(A) the extent to which equipment is available that is capable of utilizing the frequency;

(B) the proximity of frequencies that are already assigned for commercial use; and

(C) the activities of foreign governments in making frequencies available for experimentation or commercial assignment in order to support their domestic manufacturers of equipment.

(d) PROCEDURE FOR IDENTIFICATION OF REALLOCABLE FREQUENCIES.—

(1) SUBMISSION OF PRELIMINARY IDENTIFICATION TO CONGRESS.—Within 12 months after the date of the enactment of this Act, the Secretary shall prepare and submit to the Congress a report which makes a preliminary identification of reallocable frequencies which meet the criteria established by this section.

(2) CONVENING OF PRIVATE SECTOR ADVISORY COMMITTEE.—Not later than the date the Secretary submits the report required by paragraph (1) of this subsection, the Secretary shall convene a private sector advisory committee (A) to review the frequencies identified in such report, (B) to advise the Secretary with respect to the frequencies which should be included in the final report required by subsection (a) of this section, (C) to receive public comment on the Secretary's report and on the final report, and (D) to prepare and submit the report required by paragraph (4) of this subsection. The private sector advisory committee shall meet at least monthly until each of the actions required by section 5(a) have taken place.

(3) COMPOSITION OF COMMITTEE.—The private sector advisory committee shall be composed of representatives of—

(A) United States manufacturers of spectrum-dependent telecommunications equipment;

(B) commercial carriers;

(C) other users of the electromagnetic spectrum, including radio and television licensees; and

(D) other interested members of the public who are knowledgeable about the uses of the electromagnetic spectrum.

(4) RECOMMENDATIONS ON SPECTRUM ALLOCATION PROCEDURES.—The private sector advisory committee shall, not later than 36 months after the date of the enactment of this Act, submit to the Secretary, the Commission, the Committee on Energy and Commerce of the House of Representatives, and the Committee on Commerce, Science and Transportation of the Senate, a report containing such recommendations as the committee considers appropriate for the reform of the process of allocating the electromagnetic spectrum between civilian and Government use.

SEC. 5. WITHDRAWAL OF ASSIGNMENT TO GOVERNMENT STATIONS.

(a) IN GENERAL.—Within 6 months after receipt of the Secretary's report under section 4(a), the President shall—

(1) withdraw the assignment to a Government station of any frequency which the report recommends for reallocation;

(2) limit the assignment to a Government station of any frequency which the report recommends be made available for mixed use under section 4(b)(2);

(3) assign or reassign other frequencies to Government stations as necessary to adjust to such withdrawal or limitation of assignments; and

(4) notify the Commission and each House of Congress of the actions taken under this subsection.

(b) EXCEPTIONS.—

(1) AUTHORITY TO SUBSTITUTE.—If the President determines that a circumstance

described in paragraph (2) exists, the President—

(A) may substitute an alternative frequency or band of frequencies for the frequency or band that is subject to such determination and withdraw (or limit) the assignment of that alternative frequency or band in the manner required by subsection (a); and

(B) shall submit a statement of the reasons for taking the action described in subparagraph (A) to the Committee on Energy and Commerce of the House of Representatives, the Committee on Commerce, Science, and Transportation of the Senate, and other appropriate committees of the Congress.

(2) GROUNDS FOR SUBSTITUTION.—For purposes of paragraph (1), the following circumstances are described in this paragraph:

(A) the reassignment would seriously jeopardize the national defense interests of the United States;

(B) the frequency proposed for reassignment is uniquely suited to meeting important governmental needs; or

(C) the reassignment would seriously jeopardize public health or safety.

(3) CRITERIA FOR SUBSTITUTED FREQUENCIES.—For purposes of paragraph (1), a frequency may not be substituted for a frequency identified by the report of the Secretary under section 4(a) unless the substituted frequency also meets each of the criteria specified by section 4.

(c) LIMITATION ON DELEGATION.—Notwithstanding any other provision of law, the authorities and duties established by this section may not be delegated.

SEC. 6. DISTRIBUTION OF FREQUENCIES BY THE COMMISSION.

Not later than one year after the President notifies the Commission pursuant to section 5(a)(4), the Commission shall prepare and submit to the President and the Congress a plan for the distribution under the Act of the frequencies reallocated pursuant to the requirements of this Act. Such plan shall—

(1) not propose the immediate distribution of all such frequencies, but shall—

(A) reserve a significant portion of such frequencies for distribution more than 10 years after the date of enactment of this Act; and —

(B) gradually distribute the remainder over the course of not less than 10 years; and

(2) contain appropriate provisions to ensure—

(A) the availability of frequencies for new technologies and services in accordance with the policies of section 7 of the Act; and

(B) the availability of frequencies to stimulate the development of such technologies.

SEC. 7. AUTHORITY TO RECOVER REASSIGNED FREQUENCIES.

(a) AUTHORITY OF PRESIDENT.—Subsequent to the withdrawal of assignment to Government stations pursuant to section 5, the President may reclaim reassigned frequencies for reassignment to Government stations in accordance with this section.

(b) PROCEDURE FOR RECLAIMING FREQUENCIES.—

(1) UNALLOCATED FREQUENCIES.—If the frequencies to be reclaimed have not been allocated or assigned by the Commission pursuant to the Act, the President shall follow the procedures for substitution of frequencies established by section 5(b) of this Act.

(2) ALLOCATED FREQUENCIES.—If the frequencies to be reclaimed have been allocated or assigned by the Commission, the President shall follow the procedures for substitution of frequencies established by section 5(b) of this Act, except that the notification required by section 5(b)(1)(A) shall include—

(A) a timetable to accommodate an orderly transition for licensees to obtain new frequencies and equipment necessary for its utilization; and

(B) an estimate of the cost of displacing commercial licensees.

(c) COSTS OF RECLAIMING FREQUENCIES; APPROPRIATIONS AUTHORIZED.—The Government of the United States shall bear all costs of reclaiming frequencies pursuant to this section, including the cost of equipment which is rendered unuseable, the cost of relocating operations to a different frequency, and any other costs that are directly attributable to the reclaiming of the frequency pursuant to this section. There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this section.

(d) EFFECTIVE DATE OF RECLAIMED FREQUENCIES.—The Commission shall not withdraw licenses for any reclaimed frequencies until the end of the fiscal year following the fiscal year in which the President's notification is received.

(e) EFFECT ON OTHER LAW.—Nothing in this section shall be construed to limit or otherwise affect the authority of the President under section 706 of the Act.

SEC. 8. DEFINITIONS. 21As used in this Act:

(1) The term "Secretary" means the Secretary of Commerce.

(2) The term "Commission" means the Federal Communications Commission.

(3) The term "the Act" means the Communications Act of 1934.

(4) The term "commercial carrier" means any entity that uses a facility licensed by the Federal Communications Commission pursuant to the Communications Act of 1934 for hire or for its own use, but does not include Government stations licensed pursuant to section 305.

By Mr. MACK:

S. 2917. A bill to impose additional sanctions against countries that repeatedly provide support for international terrorism, and for other purposes; to the Committee on Finance.

ANTI-TERRORISM SANCTIONS ACT

● Mr. MACK. Mr. President, while the threat of a major war involving the United States is diminishing, the threat of terrorism against Americans remains a serious national security issue that we must continue to address. This bill, the Anti-Terrorism Sanctions Act of 1990, will require the President to remove most-favored-nation trade status from terrorist countries. It is the companion bill of H.R. 1515, introduced by Representative JOE BARTON of Texas, which now has 184 cosponsors.

Mr. President, I believe most Americans would be appalled to find out that nations such as Iran, Libya, and Syria enjoy most-favored-nation trade status. The Barton/Mack bill would end this situation. The bill applies only to countries that have been designated by the Secretary of State as having "repeatedly supports acts of international terrorism" under section 6(j) of the Export Administration Act. The countries currently on this list are Syria, Iran, Cuba, North Korea, and Libya.

I ask unanimous consent that the Anti-Terrorism Sanctions Act of 1990 be printed in the RECORD. There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2917

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Anti-Terrorism Sanctions Act of 1990".

SEC. 2. (a) Notwithstanding any other provision of law, with respect to any foreign country while it is listed pursuant to section 6(j) of the Export Administration Act of 1979 as a country that repeatedly provides support for international terrorism—

(1) the President shall terminate, withdraw, or suspend any portion of any trade agreement or treaty that relates to the provision of nondiscriminatory (most-favored-nation) trade treatment to such country;

(2) such country shall be denied nondiscriminatory (most-favored-nation) trade treatment by the United States and the products of such country shall be subject to the rates and duty set forth in column number 2 of the Harmonized Tariff Schedule of the United States;

(3) the provisions of title V of the Trade Act of 1974 (19 U.S.C. 2461, et seq.) shall not apply with respect to the products of such country;

(4) the provisions of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2701, et seq.) shall not apply with respect to the products of such country, during the period in which such identification is in effect; and

(5) the Secretary of Commerce may not consult with the government of that country under section 3(a)(9) of the International Travel Act of 1961 (22 U.S.C. 2123(a)(9)) regarding international travel and tourism.

(b)(1) The President may waive all, or any portion of, the provisions of subsection (a) with respect to any foreign country if the President determines that such a waiver would be in the best interests of the United States. The President shall submit to the Congress written notice of any waiver granted under this paragraph.

(2) Any waiver granted under paragraph (1) may be revoked by the President at any time.

(3)(A) Any waiver granted under paragraph (1) shall take effect only after the close of the thirty-day period that begins on the date on which the President submits to the Congress written notice of such waiver.

(B) The following days shall be excluded in determining the thirty-day period described in subparagraph (A)—

(i) the days on which either House of Congress is not in session because of an adjournment of more than three days to a day certain or an adjournment of the Congress sine die; and

(ii) any Saturday and Sunday, not excluded under clause (i), when either House of Congress is not in session.●

ADDITIONAL COSPONSORS

S. 930

At the request of Mr. DODD, the name of the Senator from Massachusetts [Mr. KENNEDY] was added as a cosponsor of S. 930, a bill to amend

the Occupational Safety and Health Act of 1970 to establish an Office of Construction, Safety, Health, and Education within OSHA, to improve inspections, investigations, reporting, and recordkeeping in the construction industry, to require certain construction contractors to establish construction safety and health programs and onsite plans and appoint construction safety specialists, and for other purposes.

S. 1651

At the request of Mr. McCAIN, the name of the Senator from Mississippi [Mr. COCHRAN] was added as a cosponsor of S. 1651, a bill to require the Secretary of the Treasury to mint coins in commemoration of the 50th anniversary of the United States Organization.

S. 1804

At the request of Mr. LAUTENBERG, the name of the Senator from New York [Mr. D'AMATO] was added as a cosponsor of S. 1804, a bill to amend title 23, United States Code, to reduce the amount of Federal highway funds allocated to any State that does not provide for the revocation or suspension of the driver's license of any individual convicted of a drug offense.

S. 2125

At the request of Mr. DODD, the name of the Senator from Michigan [Mr. RIEGLE] was added as a cosponsor of S. 2125, a bill to condition the availability of United States assistance for El Salvador.

S. 2342

At the request of Mr. HATCH, the name of the Senator from Hawaii [Mr. AKAKA] was added as a cosponsor of S. 2342, a bill to amend the Public Health Service Act to authorize additional grants for home health care demonstration projects, to require that applications be submitted to the chief executive officer of the State concerned in connection with such grants, and for other purposes.

S. 2709

At the request of Mr. BOSCHWITZ, the name of the Senator from Louisiana [Mr. JOHNSTON] was added as a cosponsor of S. 2709, a bill to amend the Internal Revenue Code of 1986 to provide that certain expenses of travel, meals, and lodging of members of the National Guard or reserve units of the Armed Forces will be allowable as deductions in computing adjusted gross income.

S. 2729

At the request of Mr. CHAFEE, the name of the Senator from Pennsylvania [Mr. HEINZ] was added as a cosponsor of S. 2729, a bill to amend the Coastal Barrier Resources Act, and for other purposes.

S. 2757

At the request of Mr. WALLOP, his name was added as a cosponsor of S. 2757, a bill to amend the Foreign Assistance Act of 1961 to authorize the provision of medical supplies and other humanitarian assistance to the Lithuanian people to alleviate suffering during the current emergency.

At the request of Mr. BYRD, his name was added as a cosponsor of S. 2757, supra.

S. 2793

At the request of Mr. AKAKA, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 2793, a bill to amend the United States Institute of Peace Act to honor the memory of the late Spark M. Matsunaga, U.S. Senator from the State of Hawaii, and for other purposes.

S. 2820

At the request of Mr. DODD, the name of the Senator from Hawaii [Mr. INOUYE] was added as a cosponsor of S. 2820, a bill to amend the Public Health Service Act to establish and expand grant programs for evaluation and treatment of parents who are substance abusers and children of substance abusers, and for other purposes.

S. 2844

At the request of Mr. MITCHELL, the name of the Senator from Maine [Mr. COHEN] was added as a cosponsor of S. 2844, a bill to amend the Public Health Service Act to provide for the establishment, with State loan repayment programs, of demonstration programs to recruit and train physicians and other health care personnel to provide medical services in rural communities, and for other purposes.

S. 2880

At the request of Mr. BURNS, the names of the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Texas [Mr. GRAMM], and the Senator from Utah [Mr. HATCH] were added as cosponsors of S. 2880, a bill to allow the Secretary of the U.S. Department of Agriculture or other appropriate official to protect persons engaged in a lawful hunt within a national forest or on other lands affected with a Federal interest; establishing an administrative civil remedy against individuals or groups intentionally obstructing, impeding, or interfering with the conduct of a lawful hunt; and for other purposes.

SENATE JOINT RESOLUTION 263

At the request of Mr. HELMS, the name of the Senator from Connecticut [Mr. LIEBERMAN] was added as a cosponsor of Senate Joint Resolution 263, a joint resolution to designate October 11, 1990, as "National Society of the Daughters of the American Revolution Centennial Day."

SENATE JOINT RESOLUTION 277

At the request of Mr. LUGAR, the name of the Senator from Oregon [Mr. HATFIELD] was added as a cosponsor of Senate Joint Resolution 277, a joint resolution designating October 6, 1990, as "German-American Day."

SENATE JOINT RESOLUTION 284

At the request of Mr. BYRD, the name of the Senator from Mississippi [Mr. LOTT] was added as a cosponsor of Senate Joint Resolution 284, a joint resolution to designate the week beginning September 16, 1990, as "National Give the Kids a Fighting Chance Week."

SENATE JOINT RESOLUTION 309

At the request of Mr. BIDEN, the names of the Senator from Idaho [Mr. SYMMS], and the Senator from Iowa [Mr. GRASSLEY] were added as cosponsors of Senate Joint Resolution 309, a joint resolution designating the month of October 1990 as "Crime Prevention Month."

SENATE JOINT RESOLUTION 351

At the request of Mr. BYRD, the names of the Senator from Indiana [Mr. LUGAR], the Senator from North Carolina [Mr. SANFORD], the Senator from Washington [Mr. ADAMS], the Senator from Illinois [Mr. DIXON], and the Senator from Nevada [Mr. BRYAN] were added as cosponsors of Senate Joint Resolution 351, a joint resolution to designate the month of May 1991, as "National Trauma Awareness Month."

SENATE CONCURRENT RESOLUTION 125

At the request of Mr. COHEN, the names of the Senator from California [Mr. WILSON], and the Senator from Hawaii [Mr. INOUYE] were added as cosponsors of Senate Concurrent Resolution 125, a concurrent resolution expressing the sense of Congress regarding adequate funding for long-term health care services provided through the medicare and medicaid programs.

SENATE CONCURRENT RESOLUTION 127

At the request of Mr. KENNEDY, the name of the Senator from Virginia [Mr. ROBB] was added as a cosponsor of Senate Concurrent Resolution 127, a concurrent resolution to express the sense of Congress that Greyhound Lines, Inc., and the Amalgamated Transit Union should pursue meaningful negotiations under the auspices of the Federal Mediation and Conciliation Service and the Secretary of Labor to resolve their dispute and restore vital transportation services to American communities.

SENATE CONCURRENT RESOLUTION 139

At the request of Mr. DECONCINI, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of Senate Concurrent Resolution 139, a concurrent resolution expressing the sense of the Congress with regard to a United States-Mexico Free Trade Agreement.

SENATE RESOLUTION 288

At the request of Mrs. KASSEBAUM, the name of the Senator from Alaska [Mr. MURKOWSKI] was added as a cosponsor of Senate Resolution 288, a resolution expressing the sense of the Senate regarding the reopening of uni-

versities in the West Bank and Gaza without delay.

SENATE RESOLUTION 296

At the request of Mr. ROTH, the names of the Senator from Idaho [Mr. SYMMS], the Senator from Alaska [Mr. MURKOWSKI], and the Senator from Connecticut [Mr. LIEBERMAN] were added as cosponsors of Senate Resolution 296, a resolution to express the sense of the Senate the support of Taiwan's membership in the General Agreement on Tariffs and Trade.

AMENDMENTS SUBMITTED

FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT OF 1990

BAUCUS AMENDMENT NO. 2353

Mr. BAUCUS (for himself, Mr. KERRY, Mr. DASCHLE, Mr. CONRAD, Mr. KOHL, Mr. BENTSEN, Mr. BURDICK, Mr. HARKIN, and Mr. FOWLER) proposed an amendment, which was subsequently modified, to the bill (S. 2830) to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to ensure consumers an abundance of food and fiber and reasonable prices, and for other purposes, as follows:

On page 19, strike lines 14 through 17 and insert the following:

"(b) RATE.—

"(1) IN GENERAL.—During the period beginning on January 1, 1991, and ending on December 31, 1995, the price of milk shall be supported at a rate that is not less than the support price for milk (or any price between the support price and the reduced support price, at the option of the Secretary), as established under this subsection.

"(2) SUPPORT PRICES.—The support price for milk shall be

"(A) for the 1991 calendar year, an amount equal to $10.10 per hundredweight for milk containing 3.67 percent milkfat, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31; and

"(B) for each of the 1991 through 1995 calendar years, an amount equal to the support price for the preceding calendar year, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31.

"(3) REDUCED SUPPORT PRICES.—The reduced support price for milk shall be—

"(A) for the 1991 calendar year, an amount equal to $10.10 per hundredweight for milk containing 3.67 percent milkfat, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31, less 4.8 percent, except that the reduced support price for a calendar year may not be less than the reduced support price for the preceding calendar year; and

"(B) for each of the 1991 through 1995 calendar years, an amount equal to the support price for the preceding calendar year, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending December 31, less 4.8 percent, except that the reduced support price for a calendar year may not be less than the reduced support price for the preceding calendar year.

Beginning on page 20, strike line 22 and all that follows through page 23, line 23.

On page 23, line 24, strike "(e)" and insert "(d)".

On page 24, line 4, strike "(f)(1)" and insert "(e)(1)".

On page 26, line 14, strike "(f)" and insert "(e)".

On page 74, strike lines 9 through 22 and insert the following:

"(B) PAYMENT RATE.—

"(i) MINIMUM PAYMENT RATE.—At the time of the announcement of the program established by this section for a crop, the Secretary shall establish a minimum payment rate for the crop. The minimum payment rate for the crop shall be the amount by which the established price (or any price between the established price and the reduced established price, at the option of the Secretary) exceeds the higher of—

"(I) the estimated national weighted average market price received by producers during the first 5 months of the marketing year for the crop, as determined by the Secretary; or

"(II) the loan level determined for the crop.

"(ii) FINAL PAYMENT RATE.—The final payment rate for the crop shall be the greater of—

"(I) the amount by which the established price (or any price between the established price and the reduced established price, at the option of the Secretary) exceeds the greater of—

"(aa) the national weighted average market price received by producers during the first 5 months of the marketing year for the crop, as determined by the Secretary; or

"(bb) the loan level determined for the crop; or

"(II) the minimum payment rate, but not to exceed the amount by which the established price for the crop exceeds the actual national weighted average market price received by producers during the first 5 months of the marketing year for the crop, as determined by the Secretary.

"(C) ESTABLISHED PRICES.—

"(i) IN GENERAL.—The established price for wheat shall be

"(I) for the 1991 crop, an amount equal to $4.00 per bushel, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31; and

"(II) for each of the 1991 crop through 1995 crops, an amount equal to the established price for the preceding crop, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31.

"(ii) REDUCED ESTABLISHED PRICES.—The reduced established price for wheat shall be—

"(I) for the 1991 crop, an amount equal to $4.00 per bushel, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31, less 4.3 percent, except that the reduced established price for a crop may not be less than the reduced established price for the preceding crop; and

"(II) for each of the 1991 through 1995 crops, an amount equal to the established price for the preceding crop, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31, less 4.3 percent, except that the reduced established price for a crop may not be less than the reduced established price for the preceding crop.

Beginning on page 122, strike line 8 and all that follows through page 123, line 20, and insert the following:

"(B) PAYMENT RATE.—

"(i) MINIMUM PAYMENT RATE.—At the time of the announcement of the program established by this section for a crop, the Secretary shall establish a minimum payment rate for the crop. The minimum payment rate for the crop shall be the amount by which the established price (or any price between the established price and the reduced established price, at the option of the Secretary) exceeds the higher of—

"(I) the estimated national weighted average market price received by producers during the first 5 months of the marketing year for the crop, as determined by the Secretary; or

"(II) the loan level determined for the crop.

"(ii) FINAL PAYMENT RATE.—The final payment rate for the crop shall be the greater of—

"(I) the amount by which the established price (or any price between the established price and the reduced established price, at the option of the Secretary) exceeds the greater of—

"(aa) the national weighted average market price received by producers during the first 5 months of the marketing year for the crop, as determined by the Secretary; or

"(bb) the loan level determined for the crop; or

"(II) the minimum payment rate, but not to exceed the amount by which the established price for the crop exceeds the actual national weighted average market price received by producers during the first 5 months of the marketing year for the crop, as determined by the Secretary.

"(C) ESTABLISHED PRICES.—

"(i) IN GENERAL.—The established price for corn, oats, grain sorghums, and barley shall be

"(I) for the 1991 crop, an amount equal to $2.75 per bushel for corn, $1.55 per bushel of oats, $2.61 per bushel for grain sorghums, and $2.36 per bushel for barley, adjusted (for each type of feed grain) to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31; and

"(II) for each of the 1991 crop through 1995 crops, an amount equal to the established price for the preceding crop, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31.

"(ii) REDUCED ESTABLISHED PRICES.—The reduced established price for corn, oats, grain sorghums, and barley shall be—

"(I) for the 1991 crop, an amount equal to $2.75 per bushel for corn, $1.55 per bushel of oats, $2.61 per bushel for grain sorghums, and $2.36 per bushel for barley, adjusted (for each type of feed grain) to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31, less 4.8 percent, except that the reduced established price for a crop may not be less than the reduced established price for the preceding crop; and

"(II) for each of the 1991 through 1995 crops, an amount equal to the established price for the preceding crop, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31, less 4.3 percent, except that the reduced established price for a crop may not be less than the reduced established price for the preceding crop.

Beginning on page 178, strike line 12 and all that follows through page 179, line 2, and insert the following:

"(B) PAYMENT RATE.—

"(i) MINIMUM PAYMENT RATE.—At the time of the announcement of the program established by this section for a crop, the Secretary shall establish a minimum payment rate for the crop. The minimum payment rate for the crop shall be the amount by which the established price (or any price between the established price and the reduced established price, at the option of the Secretary) exceeds the higher of—

"(I) the estimated national weighted average market price received by producers during the first 5 months of the marketing year for the crop, as determined by the Secretary; or

"(II) the loan level determined for the crop.

"(ii) FINAL PAYMENT RATE.—The final payment rate for the crop shall be the greater of—

"(I) the amount by which the established price (or any price between the established price and the reduced established price, at the option of the Secretary) exceeds the greater of—

"(aa) the national weighted average market price received by producers during the first 5 months of the marketing year for the crop, as determined by the Secretary; or

"(bb) the loan level determined for the crop; or

"(II) the minimum payment rate, but not to exceed the amount by which the established price for the crop exceeds the actual national weighted average market price received by producers during the first 5 months of the marketing year for the crop, as determined by the Secretary.

"(C) ESTABLISHED PRICES.—

"(i) IN GENERAL.—The established price for upland cotton shall be—

"(I) for the 1991 crop, an amount equal to $0.729 per pound, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31; and

"(II) for each of the 1991 crop through 1995 crops, an amount equal to the established price for the preceding crop, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31.

"(ii) REDUCED ESTABLISHED PRICES.—The reduced established price for upland cotton shall be—

"(I) for the 1991 crop, an amount equal to $0.729 per pound, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31, less 4.8 percent, except that the reduced established price for a crop may not be less than the reduced established price for the preceding crop; and

"(II) for each of the 1991 through 1995 crops, an amount equal to the established price for the preceding crop, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31, less 4.8 percent, except that the reduced established price for a crop may not be less than the reduced established price for the preceding crop.

On page 223, strike line 15 and all that follows through page 224, line 4, and insert the following:

"(B) PAYMENT RATE.—

"(i) MINIMUM PAYMENT RATE.—At the time of the announcement of the program established by this section for a crop, the Secretary shall establish a minimum payment rate for the crop. The minimum payment rate for the crop shall be the amount by which the established price (or any price between the established price and the reduced established price, at the option of the Secretary) exceeds the higher of—

"(I) the estimated national weighted average market price received by producers during the first 5 months of the marketing year for the crop, as determined by the Secretary; or

"(II) the loan level determined for the crop.

"(ii) FINAL PAYMENT RATE.—The final payment rate for the crop shall be the greater of—

"(I) the amount by which the established price (or any price between the established price and the reduced established price, at the option of the Secretary) exceeds the greater of—

"(aa) the national weighted average market price received by producers during the first 5 months of the marketing year for the crop, as determined by the Secretary; or

"(bb) the loan level determined for the crop; or

"(II) the minimum payment rate, but not to exceed the amount by which the established price for the crop exceeds the actual national weighted average market price received by producers during the first 5 months of the marketing year for the crop, as determined by the Secretary.

"(C) ESTABLISHED PRICES.—

"(i) IN GENERAL.—The established price for rice shall be

"(I) for the 1991 crop, an amount equal to $10.71 per hundredweight, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31; and

"(II) for each of the 1991 crop through 1995 crops, an amount equal to the established price for the preceding crop, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31.

"(ii) REDUCED ESTABLISHED PRICES.—The reduced established price for rice shall be—

"(I) for the 1991 crop, an amount equal to $10.71 per hundredweight, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31, less 4.8 percent, except that the reduced established price for a crop may not be less than the reduced established price for the preceding crop; and

"(II) for each of the 1991 through 1995 crops, an amount equal to the established price for the preceding crop, adjusted to reflect the percentage increase in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics for the 12-month period ending the preceding December 31, less 4.8 percent, except that the reduced established price for a crop may not be less than the reduced established price for the preceding crop.

ROTH (AND OTHERS) AMENDMENT NO. 2354

Mr. ROTH (for himself, Mr. METZENBAUM, Mr. PELL, Mr. REID, Mr. MOYNIHAN, Mr. CHAFEE, Mr. HEINZ, Mr. KERRY, and Mr. GORTON) proposed an amendment to the bill S. 2830, supra, as follows:

Beginning on page 253, strike line 1 and all that follows through page 303, line 16, and insert the following new title:

TITLE VII—PEANUTS

SEC. 701. REPEAL OF EXISTING PEANUT PROGRAM.

(a) MARKETING QUOTAS.—Part VI of subtitle B of title III of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1357-1359) is repealed.

(b) PRICE SUPPORT LEVELS.—The Agricultural Act of 1949 (7 U.S.C. 1441 et seq.) is amended—

(1) in section 101(b) (7 U.S.C. 1441(b)), by striking "and peanuts";

(2) in section 408(c) (7 U.S.C. 1428(c)), by striking "peanuts,"; and

(c) by repealing sections 108, 108A, and 108B (7 U.S.C. 1445c, 1445c-1, and 1445c-2).

SEC. 702. PRICE SUPPORT PROGRAM.

The Agricultural Act of 1949 (as amended by section 701(b)(3) of this Act) is further amended by inserting after section 107F (7 U.S.C. 1445b-5) the following new section:

"SEC. 108. PRICE SUPPORT PROGRAM FOR PEANUTS.

"(a) IN GENERAL.—Except as otherwise provided in this section, the prices of the 1991 and subsequent crops of peanuts shall be supported at such level as the Secretary determines to be appropriate.

"(b) FACTORS.—In making the determination, the Secretary shall take into consideration—

"(1) the factors specified in paragraphs (1) through (8) of section 401(b);

"(2) the cost of production;

"(3) any change in the index of prices paid by farmers for production items, interest,

taxes, and wage rates during the period beginning January 1 and ending December 31 of the calendar year immediately preceding the crop year for which the level of support is being determined;

"(4) the demand for peanuts for domestic edible use, peanut oil, and meal;

"(5) expected prices of other vegetable oils and protein meals; and

"(6) the demand for peanuts in foreign markets.

"(c) LIMITATION.—The level of price support determined by the Secretary for a crop of peanuts shall not result in a net loss to the Federal government in excess of the average net loss to the Federal government from supporting the 1987, 1988, and 1989 crops of peanuts.".

SYMMS AMENDMENT NO. 2355

Mr. SYMMS proposed an amendment to the bill S. 2830, supra, as follows:

Beginning on page 1051, line 21, strike all through line 2 on page 1056.

On page 1056, line 3, redesignate subsection (c) as subsection (b).

MITCHELL (AND OTHERS) AMENDMENT NO. 2356

Mr. MITCHELL (for himself, Mr. LEAHY, Mr. COCHRAN, Mr. LUGAR, Mr. DASCHLE, Mr. COHEN, Mr. PELL, Mr. DODD, Mr. CONRAD, Mr. SIMON, Mr. BRYAN, Mr. BURDICK, Mr. SANFORD, Mr. KOHL, Mr. SYMMS, Mr. REID, Mr. BOSCHWITZ, Mr. MCCONNELL, Mr. PRYOR, Mr. DIXON, Mr. CRANSTON, Mr. GRAHAM, and Mr. KERRY) proposed an amendment to the bill S. 2830, supra, as follows:

On page 1081, after line 10, add the following new title:

TITLE ____—FISH SAFETY

SEC. ____01. SHORT TITLE.

This title may be cited as the "Fish Safety Act of 1990".

SEC. ____02. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds that—

(1) fish are an important component of the flesh food supply of the United States and are processed and marketed by a large and diverse industry;

(2) the wholesomeness and safety of fish and fish products are important to the health and well-being of the people of the United States;

(3) the Department of Agriculture currently conducts inspection programs for all flesh food products other than fish products and has the technical expertise and work force capacity necessary to rapidly expand meat inspection programs to cover fish and fish products or to assist in efforts by States to accomplish that objective;

(4) heightened public awareness of the health benefits associated with eating fish and fish products, and greater diversity of products, have raised consumption rates and the demand for wholesome products;

(5) current Federal health inspection and monitoring programs are insufficient to ensure public confidence in the wholesomeness and safety of fish and fish products;

(6) the sale of unwholesome, adulterated, mislabeled, or deceptively packaged fish or fish products is hazardous to consumers;

(7) existing Federal standards are inadequate to maintain good fish and fish products handling and manufacturing practices, to ensure consistent fish and fish products packaging and labeling procedures, and to detect hazardous levels of contaminants in fish and fish products;

(8) the Federal Government, in cooperation with the States, has the responsibility of ensuring the wholesomeness and safety of all fish and fish products sold in interstate commerce for consumption in the United States;

(9) a public health-based inspection program is important for fish and fish products because of several factors, including—

(A) the fish habitat is often an uncontrolled environment;

(B) certain fish species tend to concentrate contaminants;

(C) deterioration of fish and fish products tends to occur more rapidly; and

(D) fish are consumed raw in some instances;

(10) deceptively labeled or packaged fish products can compete unfairly with properly labeled and packaged products to the detriment of consumers and the public generally; and

(11) in the past decade, various State and local agencies have issued warnings concerning the dangers of consuming certain types or species of fish, and the absence of Federal standards has made it difficult to assure that adequate standards are being applied nationwide.

(b) PURPOSE.—It is the purpose of this title—

(1) to expand current flesh food inspection programs administered by the Department of Agriculture to include fish and fish products and to assist those States desiring to implement the inspection and sampling program described in this title;

(2) to ensure the wholesomeness and safety of all fish and fish products in the United States through the development of a comprehensive safety program, that will include—

(A) a mandatory health-based program for the inspection of fish and fish products that will ensure that fish and fish products are properly labeled and packaged;

(B) the establishment and enforcement of safety and wholesomeness standards for fish and fish products;

(C) the monitoring and evaluation of fish and fish product safety risks;

(D) the scientific assessment of consumer health risks attributable to the consumption of adulterated fish and fish products;

(E) consumer education programs; and

(F) the proper storage, labeling, processing, handling, and packaging of fish and fish products; and

(3) to enhance public confidence in the wholesomeness and safety of fish and fish products, and protect the fish and fish products market by requiring the development of a comprehensive safety program.

SEC. ____03. FISH INSPECTION PROGRAM.

The Food Security Act of 1985 (7 U.S.C. 1281 note) is amended by adding at the end thereof the following new title:

"TITLE XIX—FISH INSPECTION PROGRAM

"SEC. 1901. DEFINITIONS.

"As used in this title:

"(1) ADULTERATED.—The term 'adulterated' means any fish product that—

"(A) bears or contains any poisonous or deleterious substance that may render such product injurious to health, except that if such substance is a naturally occurring part of the fish product, such product shall not be considered adulterated if the quantity of such substance does not ordinarily render such fish product injurious to human health;

"(B)(i) bears or contains any added poisonous or added deleterious substance (other than a substance that is a pesticide chemical, a food additive, or a color additive) that may, in the judgment of the Secretary, make such product unfit for human food;

"(ii) is, in whole or in part, a raw agricultural commodity and such commodity bears or contains any pesticide chemical which is unsafe within the meaning of section 408 of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 346a);

"(iii) bears or contains any food additive which is unsafe within the meaning of section 409 of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 348); or

"(iv) bears or contains any color additive which is unsafe within the meaning of section 706 of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 376), except that a fish product that is not otherwise considered to be adulterated under this clause or under clauses (ii) or (iii) shall be considered to be adulterated if the use of a pesticide chemical, food additive, or color additive in or on such article is prohibited by regulations promulgated by the Secretary in establishments;

"(C) consists in whole or in part of any filthy, putrid, or decomposed substance or is for any other reason unsound, unhealthy, unwholesome, or otherwise unfit for human food;

"(D) has been prepared, packed, or held under insanitary conditions that may have resulted in such fish product becoming contaminated with filth, or becoming injurious to human health;

"(E) is, in whole or in part, derived from any fish product identified as adulterated under the procedures described in section 1903(d);

"(F) is or was contained in a container that is composed, in whole or in part, of any poisonous or deleterious substance that may render the contents injurious to health;

"(G) has been intentionally subjected to radiation, except that the use of radiation in compliance with a regulation or exemption in effect under section 409 of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 348) shall not make such fish product adulterated under this subparagraph;

"(H)(i) has any valuable constituent, in whole or in part, omitted or abstracted therefrom;

"(ii) has any substance substituted, wholly or in part therefor;

"(iii) has damage or an inferiority concealed in any manner; or

"(iv) has substance added thereto or mixed or packed therewith so as to increase the bulk or weight, reduce the quality or strength, or make the appearance of such fish product better or of greater value than it actually is;

"(I) has been made or derived in whole or in part from fish harvested in a production area that has been closed under this title, or closed to commercial fishing for that species by any State or other appropriate authority for reasons related to food safety;

"(J) has been imported and is not in compliance with the requirements of section 1910;

"(K) has been processed by any establishment whose facilities or equipment, or the operation thereof, fail to meet the requirements of this title; or

"(L) has been handled by an establishment for which a certificate has not been

issued, or by an establishment no longer holding a certificate.

"(2) CAPABLE OF USE AS HUMAN FOOD.—The term 'capable of use as human food' shall apply to any fish product that is capable of being consumed by humans as food, unless it is denatured or otherwise identified as required by regulations promulgated by the Secretary to deter its use as human food, or unless it is naturally inedible by humans.

"(3) CERTIFICATE.—The term 'certificate' means any certificate, prescribed under regulations promulgated by the Secretary, for issuance by an inspector or other person performing official functions under this title.

"(4) COMMERCIAL FISHING VESSEL.—The term 'commercial fishing vessel' means a vessel that commercially engages in the catching, taking, or harvesting of fish or any activity that can reasonably be expected to result in the catching, taking, or harvesting of fish, capable of use as human food and intended for human consumption.

"(5) CONTAINER, PACKAGE.—The terms 'container' and 'package' include any box, can, tin, cloth, plastic, or other receptacle, wrapper, or cover.

"(6) ESTABLISHMENT.—The term 'establishment' means any fish processing vessel that is subject to the jurisdiction of the United States, or any building, premises, structure, or other facility located in any State or Territory that is used in the handling or processing of fish products. Such term shall not include—

"(A) recreational vessels, fish tender vessels, commercial fishing vessels, or aquaculture operations, unless any such vessels or operations process fish;

"(B) retail stores;

"(C) restaurants; or

"(D) contract or common carriers that transport fish products.

"(7) FISH.—The term 'fish' includes freshwater or marine finfish, mollusks, crustaceans, and other forms of aquatic animal life, including amphibians, whether from wild or cultured sources, other than birds or mammals.

"(8) FISH PROCESSING VESSEL.—The term 'fish processing vessel' means a vessel that commercially prepares fish products, other than by gutting, decapitating, salting, gilling, skinning, shucking, icing, freezing to the extent that such freezing is associated with other actions related to processing, or brine chilling.

"(9) FISH PRODUCT.—The term 'fish product' means any food product capable of use as human food derived in whole or in substantial part from fish, including unprocessed fish or any part thereof, excepting products which contain fish ingredients only in a relatively small proportion or that historically have not been considered by consumers as products of the fish food industry, and that are exempt from the definition of fish or fish product by the Secretary under such conditions as the Secretary may prescribe to ensure that the fish ingredients contained in such product are not adulterated and that such products are not represented as a fish product.

"(10) FISH TENDER VESSEL.—The term 'fish tender vessel' means a vessel that commercially supplies, stores, refrigerates, or transports fish products that are intended for human consumption, or materials directly related to fishing or the preparation of fish, to or from a commercial fishing vessel, fish processing vessel, fish tender vessel or a fish processing facility.

"(11) IMMEDIATE CONTAINER.—The term 'immediate container' includes any consumer package, or any other container in which fish products, not consumer packaged, are packed.

"(12) INSPECTOR.—The term 'inspector' means any individual appointed or authorized by the Secretary to make inspections, to review compliance, or to perform other functions under this title.

"(13) INTERSTATE COMMERCE.—The term 'interstate commerce' means commerce between any State or Territory, and any place outside thereof, or within any territory not organized with a legislative body.

"(14) LABEL.—The term 'label', with respect to fish products, means a display of written, printed, or graphic matter appearing on the immediate container (not including package liners) of any fish product.

"(15) LABELING.—The term 'labeling', with respect to fish products, means all labels and other written, printed, or graphic matter on any fish product or on any of the packages, containers, or wrappers of such article, or accompanying any fish product.

"(16) MISBRANDED.—The term 'misbranded' means any fish product—

"(A) the labeling of which is false or misleading in any manner;

"(B) if such fish product is offered for sale under the name of another food;

"(C) if the package of such fish product is so made, formed, or filled as to be misleading;

"(D) if the label of such fish product is not approved by the Secretary, or is not in a standard form that is approved by the Secretary, or otherwise is not in conformity with regulations promulgated by the Secretary;

"(E) if such fish product is an imitation of another food product, unless the label of such fish product bears, in type of uniform size and prominence, the word 'imitation' and immediately thereafter, the name of the food imitated;

"(F) such fish product does not bear a label disclosing—

"(i) the name and the place of business of the manufacturer, packer, or distributor; and

"(ii) an accurate statement of the quantity of such fish product in terms of weight, measure, or numerical count, except that reasonable variations may be permitted, and exemptions as to small packages or articles that are not in packages or other containers may be established by regulations promulgated by the Secretary;

"(G) if any word, statement, or other information required by or under the authority of this title to appear on the label or labeling of such fish product is not prominently placed on such product with such conspicuousness (as compared with other words, statements, designs, or devices, in such labeling) and in such terms as to render it likely to be read and understood by the ordinary individual under customary conditions of purchase and use;

"(H) if such fish product purports to be or is represented as a food for which a definition and standard of identity or composition has been prescribed by the regulations of the Secretary under section 1908 of this title unless—

"(i) such fish product conforms to such definition and standard; and

"(ii) the label of such product bears the name of the food specified in such definition and standard and, insofar as may be required by such regulations, the common names of optional ingredients (other than spices, flavoring, and coloring) present in such food;

"(I) if such fish product purports to be or is represented as a food for which a standard or standards of fill of the container of such product have been prescribed under regulations promulgated by the Secretary, and such fish product falls below the standard of fill of container that are applicable thereto, unless the label of such product bears, in such manner and form as such regulations require, a statement that it falls below such standard;

"(J) if such fish product is not subject to the provisions of subparagraph (H), unless its label bears—

"(i) the common or usual name of the food, if any such common or usual name exists; and

"(ii) in the case of a product that is fabricated from two or more ingredients, the common or usual name of each such ingredient, except that spices, flavorings, and colorings may, when authorized by the Secretary, be designated as spices, flavorings, and colorings without naming each and, to the extent that compliance with this clause is impracticable or results in deception or unfair competition, exemptions shall be established through regulations promulgated by the Secretary;

"(K) if such fish product bears or contains any artificial flavoring, artificial coloring, or chemical preservative, unless the fish product bears a label that states that fact, except that to the extent that compliance with the requirements of this subparagraph are impracticable, exemptions shall be established through regulations promulgated by the Secretary; or

"(L) if such fish product fails to bear on its package or immediate container, and in the case of nonconsumer packaged fish (if the Secretary so requires) directly thereon, as the Secretary may through regulations prescribe, the official mark, and such other information as the Secretary may require in such regulations to ensure that such fish product will not have false or misleading labeling and that the public will be informed of the manner of handling required to maintain the article in a wholesome condition.

"(17) OFFICIAL MARK.—The term 'official mark' means any official inspection legend or any other symbol, prescribed under regulations promulgated by the Secretary, to identify the establishment and the status of any fish product under this title.

"(18) OWNER OR OPERATOR.—The term 'owner or operator' means any person who owns, operates, leases, charters, or otherwise controls in whole or in part any establishment or vessel.

"(19) PERSON.—The term 'person' means any individual, partnership, corporation, establishment, importer of fish products, association, or other business unit.

"(20) PESTICIDE CHEMICAL, OTHER TERMS.—The terms 'pesticide chemical', 'food additive', 'color additive' and 'raw agricultural commodity' shall have the same meanings given such ters under the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, et. seq.).

"(21) PROCESS.—The terms 'process' and 'processing', with respect to fish products, means to prepare or manufacture such fish products by canning, cooking, smoking, filleting, fermenting, freezing to the extent that the freezing is associated with other actions related to processing, dehydrating, drying, and consumer packaging.

"(22) PROGRAM.—The term 'program' means all aspects of the inspection and sampling program for fish products established under this title.

"(23) RECREATIONAL VESSEL.—The term 'recreational vessel' means a vessel operated primarily for pleasure, or leased, rented or chartered to another for the pleasure of the leasee.

"(24) SECRETARY.—The term 'Secretary' means the Secretary of Agriculture.

"(25) SHIPPING CONTAINER.—The term 'shipping container' means any container used or intended for use in packaging a fish product packed in an immediate container.

"(26) STATE.—The term 'State' means any of the 50 States, the Commonwealth of Puerto Rico, the District of Columbia, Guam, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, and American Samoa.

"(27) TERRITORY.—The term 'Territory' means any territory or possession of the United States not included in the definition under paragraph (26).

"SEC. 1902. EXEMPTIONS AND EXCLUSIONS.

"(a) GENERAL EXEMPTIONS.—The Secretary shall, by regulation and under such conditions as the Secretary may prescribe, exempt from specific provisions of this title—

"(1) the processing by any individual of fish products raised or harvested by that individual exclusively for use by that individual or by the members of the household, the nonpaying guests, and the employees of that individual;

"(2) the custom processing, in any establishment or vessel, of fish products that the owner of such products will exclusively use, in the household of the owner, for the owner or the members of the household, the nonpaying guests, or the employees of the owner, if—

"(A) such establishment or vessel ensures that such fish products are segregated at all times from fish products processed for sale;

"(B) such fish products are plainly labeled or marked as "Not for Sale"; and

"(C) such establishments and vessels are maintained and operated in a sanitary manner;

"(3) any establishment or vessel that processes only fish products that are not intended for use as human food, if such fish products are, prior to their offer for sale or other disposition in commerce, not capable of use as human food.

"(4) the entry, or withdrawal from warehouse, for consumption in the United States of any fish product acquired outside the United States for consumption by the person entering or withdrawing it if—

"(A) the total amount of such fish product does not exceed 50 pounds as the Secretary may prescribe by regulation; or

"(B) the fish product is exempted by regulation because it was caught for other than commercial purposes in waters outside the United States; and

"(5) operations of types traditionally and usually conducted at retail stores or restaurants, when conducted at any retail store or restaurant or similar retail-type establishment for sale in normal retail quantities of fish products to consumers at such stores or restaurants.

"(b) EXCLUSIONS.—This title shall not apply to recreational vessels, commercial fishing vessels or fish tender vessels except where such vessels process fish.

"SEC. 1903. FEDERAL AND STATE COOPERATION.

"(a) STATE PROGRAMS.—

"(1) POLICY.—It is the policy of Congress to protect the consuming public from fish products that are adulterated or misbranded and to assist in the efforts of State and other government agencies to accomplish this objective.

"(2) INTRASTATE INSPECTION PROGRAMS.—

"(A) AUTHORITY OF SECRETARY.—

"(i) IN GENERAL.—The Secretary may, when the Secretary determines that it would effectuate the purposes of this title, cooperate with the appropriate State agency in any State that has enacted a mandatory State fish product inspection law that imposes inspection, sampling, sanitation and other requirements of the type described in this title, that are at least equal to those described in this title, to assist such State in developing and administering a State fish product inspection program with respect to all or certain classes of persons engaged in the State in processing fish products solely for sale or other distribution within such State.

"(ii) MARKS OR CERTIFICATES.—Each State program described in clause (i) applicable to fish products in intrastate commerce shall not permit such fish products to bear any official marks or certificates applicable to fish products in interstate commerce as authorized under this title, and any labels on such fish products shall clearly indicate that the fish product is for intrastate commerce only.

"(B) ADULTERATION.—Fish products processed or handled for intrastate commerce, as authorized under a program established under subparagraph (A), that are sold, transported, or delivered for introduction into, or offered for sale in interstate commerce shall be considered to be adulterated for purposes of this title.

"(C) WARNING NOTICE.—If the Secretary determines that a State fish product inspection program established under subparagraph (A) is not at least equal to the program established under this title, or that a State has failed to maintain or is not enforcing a fish product inspection program at least equal to the program established under this title, the Secretary shall promptly notify the chief executive officer of the State of such determination.

"(D) NOTICE.—If, after notification is provided to a State under subparagraph (C), and after the Secretary has consulted with the State and provided the State with an opportunity to promptly correct any deficiencies identified in such notification, the Secretary determines that a State fish product inspection program continues to have State standards that are not at least equal to those established under this title or that the State has failed to maintain or is not enforcing a program having standards at least equal to those established under this title, the Secretary shall—

"(i) promptly notify the chief executive officer of such State of such determination;

"(ii) discontinue assistance to such State under this title;

"(iii) advise the Commissioner of Food Drugs of such determination; and

"(iv) notwithstanding any other provision of this title, in the case of adulterated fish products that are being distributed or sold within such State that are determined to clearly endanger the public health, the Secretary shall immediately notify the chief executive officer of the State of such determination, and if the State does not take action to prevent such endangering of the public health within a reasonable period of time after the receipt of such notice, as determined by the Secretary, in light of the risk to public health, the Secretary may require that such State be subject to the provisions of this title as though the fish products were in interstate commerce until such time as the Secretary determines that the State has developed and will enforce requirements at least equal to those imposed under this title.

"(3) INTERSTATE COMMERCE.—

"(A) AUTHORITY OF THE SECRETARY.—

"(i) IN GENERAL.—The Secretary may, when the Secretary determines that it would effectuate the purposes of this title, cooperate with appropriate State agencies concerning the State administration of the inspection and sampling components of the program established under this title on behalf of the Secretary.

"(ii) REGULATIONS CONCERNING STATE ADMINISTRATION.—The Secretary shall promulgate regulations concerning the State administration of the sampling and inspection components as described in clause (i) on behalf of the Secretary.

"(iii) COOPERATION.—The Secretary may cooperate with other agencies of the Federal Government in implementing this title.

"(iv) EXAMINATIONS, ETC.—In carrying out this title, the Secretary shall conduct such examinations, investigations, and inspections as the Secretary determines practicable through any officer or employee of any State commissioned by the Secretary for such purpose. The Secretary shall monitor, investigate and evaluate each program administered under this paragraph on behalf of the Secretary by a State on an ongoing basis to assure that such programs comply with the regulations and other requirements of the Secretary. The Secretary shall be responsible for the enforcement of this title with respect to States that administer the program on behalf of the Secretary.

"(B) FINANCIAL ASSISTANCE.—

"(i) AUTHORITY.—The Secretary, in cooperating with State agencies under this paragraph, may provide such State agencies with—

"(I) advisory assistance in planning and otherwise developing an adequate State program under this paragraph; and

"(II) technical and laboratory assistance and training (including necessary curricular and instructional materials and equipment), and financial and other assistance necessary for the administration of a program under this paragraph.

"(ii) AMOUNT.—The amount to be contributed to any State by the Secretary for an approved State interstate commerce sampling and inspection program for any year shall not exceed 50 percent of the total cost of the cooperative program, and Federal funds utilized by the Secretary under such clause shall be allocated among the States desiring to cooperate under this paragraph on an equitable basis. Such cooperation and payment shall be contingent at all times on the demonstration that the State program is adequate to effectuate the sampling and inspection requirements of this title.

"(iii) WITHHOLDING OF ASSISTANCE.—The Secretary may promulgate regulations to provide for the withholding of Federal assistance under this subparagraph if the Secretary determines that the State is not effectively and properly administering the State program under this title. Such regulations may provide for the subsequent payment of any withheld assistance if the State, to the satisfaction of the Secretary, corrects any deficiencies determined by the Secretary to exist.

"(C) FEDERAL-STATE PARTNERSHIPS.—The Secretary shall establish procedures to enable States to apply to administer, on

behalf of the Secretary, an inspection and sampling program under this paragraph.

"(D) PLAN OF OPERATION.—Each State approved by the Secretary to administer an inspection and sampling program for the Secretary under this paragraph shall annually prepare and submit to the Secretary a plan of operation that shall contain such information as the Secretary shall by regulation require, including a description of—

"(i) the manner in which the State intends to administer the fish product inspection and sampling program consistent with the requirements of this title;

"(ii) the State plans for sampling fish products and for inspecting and monitoring establishments;

"(iii) State cost projections that contain the anticipated cost to the State in administering the program on behalf of the Secretary;

"(iv) the staffing, equipment, and other needs of the State to administer such program and the indicators of the expected performance of the State in the administration of the program;

"(v) the types of reports and other information that the State shall provide, as may be required by the Secretary; and

"(vi) the procedures that the State will utilize for the issuing and handling of advance Federal payments under this title, and for the financial recordkeeping concerning the Federal share of the total cost of the cooperative programs administered under this paragraph.

"(E) STANDARDS FOR FEDERAL-STATE COOPERATION.—

"(i) ESTABLISHMENT.—The Secretary shall establish standards for the efficient and effective administration of the sampling and inspection program by each State whose application and plan of operation has been approved under this paragraph.

"(ii) WARNING NOTICE.—If the Secretary determines that any State inspection and sampling program established under this paragraph is not at least equal to the program established under regulations promulgated by the Secretary, or that a State has failed to maintain or is not operating a program at least equal to the program established under this title, the Secretary shall promptly notify the chief executive officer of the State of such determination.

"(iii) DESIGNATION BY SECRETARY.—If, after issuing a notification under clause (ii) to a State and after consulting with such State and providing an opportunity for the State to promptly correct any deficiencies identified in such notification, the Secretary determines that a State inspection and sampling program operated under this paragraph does not have standards that are at least equal to those required under this title or that such State has failed to maintain or operate a program having standards at least equal to those under this title, the Secretary shall promptly notify the chief executive officer of such State of such determination and designate such State as one in which the Federal inspection program established under this title shall apply.

"(F) DEPUTIZATION OF STATE EMPLOYEES.—The Secretary may deputize specific State employees in States approved to administer the Federal inspection and sampling program on behalf of the Secretary under this paragraph, under an annual agreement with each participating State to carry out, on behalf of the Secretary, the inspection program established under this title.

"(4) ADVISORY COMMITTEES.—The Secretary may appoint advisory committees consisting of such representatives of appropriate State agencies as the Secretary and the State agencies may designate to consult with the Secretary concerning State and Federal programs with respect to fish product inspection and other matters within the scope of this title. Such advisory committees may conduct evaluations of State programs and attempt to obtain improved coordination and more uniformity among such State programs and between the Federal and State programs, and shall provide advice on the protection of consumers.

"(5) LOCAL COOPERATION.—The appropriate State agency with which the Secretary may cooperate under this subsection shall be a single agency in the State that is primarily responsible for the coordination of the State programs having objectives that are the same as the objectives of this title. If the State program includes performance of certain functions by a municipality or other subordinate governmental unit, such unit shall be considered to be a part of the State agency for purposes of this subsection.

"(b) DEVELOPMENT OF FEDERAL INSPECTION PROGRAM.—The Secretary shall develop and administer a comprehensive and efficient health-based inspection program for fish products designed to protect the consuming public from fish products that may be adulterated or misbranded.

"(c) FEDERAL PROGRAM REQUIREMENTS.—The inspection program established by the Secretary under subsection (b) shall—

"(1) be specifically designed to take into consideration the special characteristics of fish species and fish products;

"(2) be based on a comprehensive assessment of fish and fish products, and the processing and handling of such products, that identifies the hazards and assesses the severity of the hazards and risks, and that prescribes health-based standards for sanitation in the processing of fish products in establishments to ensure that fish products will not be adulterated or misbranded when delivered to the consumer;

"(3) be based on a consideration by the Secretary of all procedures utilized during the processing and distribution of fish including—

"(A) the identification and assessment of the severity of the potential health risks associated with fish, fish species, and fish products and with the processing and handling of such fish, species, and products;

"(B) a determination of the sources and specific points of potential contamination that may adulterate fish products; and

"(C) the potential for persistence and multiplication or concentration of contaminants in fish and fish products;

"(4) be based on the need to require procedures to prevent, eliminate or control potential contaminants that may adulterate fish and fish products and the need to monitor those procedures;

"(5) be specifically designed to take into consideration the distinctive characteristics, hazards, control points, and processing procedures related to different species of fish;

"(6) assure, through frequent, and unannounced or announced, inspections of establishments that the processing of fish products complies with the standards prescribed pursuant to this title and the regulations issued by the Secretary thereunder, including standards for good sanitation, manufacturing, processing, storage, temperature control, packaging, and handling, taking into consideration—

"(A) the nature and frequency of operations;

"(B) the adequacy of monitoring programs;

"(C) the history of compliance with this title;

"(D) the recommendations of the Model Seafood Surveillance Program;

"(E) the potential of the operations to affect human health based on the probability of fish, fish species, or fish products being susceptible to adulterants or otherwise having potential to affect public health;

"(F) the compliance of the establishment with other federal health and safety laws; and

"(G) such other factors as the Secretary may determine appropriate;

"(7) not require the freezing or cooking of fish or fish products that are intended for raw consumption unless the Secretary determines that such freezing or cooking is the only practical procedure available that will adequately prevent, eliminate, or control an identified source of adulteration in the specified fish species;

"(8) provide for the identification and classification of fish growing and harvesting areas in conjunction with the appropriate Federal and State agencies;

"(9) provide for the delegation, as described in this title, of certain inspection and sampling authorities to State governments and provide compensation to the States for carrying out such authority at a level not to exceed 50 percent of the total cost of the cooperative program;

"(10) provide for the sampling and inspection of fish products, and for the monitoring, and the taking of samples or readings, at such points, in such manner, and with such frequency as the Secretary determines necessary, taking into consideration the factors described in subparagraphs (A) through (G) of paragraph (6);

"(11) establish procedures (that may include requiring the marking of containers, packages or fish products, or by requiring such recordkeeping, lot processing, or other handling procedures as the Secretary determines appropriate) to assist the Secretary in determining sources of contamination, including determining which harvesting or growing areas are likely to produce fish that are adulterated; and

"(12) provide for the promulgation of regulations establishing rules for the identification, naming, labeling and fill of containers of fish products taking into consideration current industry practices and Federal regulations.

"(d) TOLERANCES.—

"(1) POISONOUS OR DELETERIOUS SUBSTANCES.—

"(A) IN GENERAL.—The Commissioner of Food and Drugs shall establish tolerances, except where such tolerances are established by the Administrator of the Environmental Protection Agency, that shall be applicable to poisonous or deleterious substances that may adulterate fish products under the definition of adulteration contained in subparagraphs (A) and (B) of section 1901(1), which shall be used by the Secretary to determine instances in which fish products will be considered adulterated under such subparagraphs. Any such tolerances shall be established at levels so that fish products are not injurious to health.

"(B) CONSULTATION.—Tolerances shall be established under subparagraph (A) in consultation with—

"(i) the National Academy of Sciences;

"(ii) the Environmental Protection Agency;

"(iii) the Centers for Disease Control;

"(iv) the Secretary of Agriculture;

"(v) the Secretary of Commerce; and

"(vi) the Interstate Shellfish Sanitation Conference.

"(C) BASIS.—Tolerances shall be established under subparagraph (A) based on a scientific analysis of the health risks attributable to the poisonous or deleterious substance for which the tolerance is being established.

"(D) TRADE REPRESENTATIVES.—The Commissioner of Food and Drugs shall consult and advise the United States Trade Representative concerning tolerances that may apply to international trade negotiations.

"(E) RECONSIDERATION.—The Commissioner of Food and Drugs or the Administrator of the Environmental Protection Agency shall review and reconsider any tolerances established under subparagraph (A) concerning fish products as new scientific information or new technologies become available.

"(2) CONTAMINANTS.—The Commissioner of Food and Drugs shall establish tolerances, except where such tolerances are established by the Administrator of the Environmental Protection Agency under the Federal Food, Drug and Cosmetic Act, for harmful chemicals, toxins, parasites, pathogenic microorganisms, viruses, bacteria, and other harmful agents, that may render fish products adulterated.

"(3) INDICATORS.—The establishment of tolerances under this subsection may include the use of indicators present in fish or fish products, including indicator organisms, from which it may reasonably be inferred that a hazardous or injurious contaminant or substance is present whenever the contaminant or a poisonous or deleterious substance itself cannot be cost-effectively detected.

"(e) CONSTRUCTION.—Nothing in this section shall be construed to preclude any State from establishing an additional fish products quality program for fish products grown or harvested in such State.

"SEC. 1904. GROWING AND HARVESTING AREAS.

"(a) IDENTIFICATION OF GROWING AREAS.—The Secretary of Commerce for waters under the exclusive jurisdiction of such Secretary, and appropriate State authorities for waters under the jurisdiction of such appropriate State authorities, shall establish a system for the identification and classification of growing and harvesting areas for fish in coastal areas and the Great Lakes.

"(b) MONITORING.—The Secretary shall sample and test fish products to determine if there is any significant instance or trend in the condition of such fish products that may pose a significant threat to the health and safety of consumers.

"(c) NOTICE.—

"(1) DETERMINATION.—If the Secretary determines that a significant instance or trend of the type described under subsection (b) exists, the Secretary shall notify the appropriate State or Federal agencies with authority to remedy such instance or trend. Such agencies shall include—

"(A) the Interstate Shellfish Sanitation Conference;

"(B) the State from which any such fish may have been harvested;

"(C) the Secretary of Commerce;

"(D) the Commissioner of Food and Drugs; and

"(E) the Administrator of the Environmental Protection Agency.

The Secretary shall publish notice of the significant instance or trends determined to exist in the Federal Register.

"(2) ACTIONS.—Each agency notified under paragraph (1) shall, not later than 30 days after the receipt of such notice, inform the Secretary in writing of any actions that such agency has taken to prevent the distribution of adulterated fish products to consumers. Any such written information shall be available for public inspection.

"(d) GRANTS.—The Secretary, in cooperation with States under this section, may provide States with financial and other assistance to prevent the entry of adulterated fish products into establishments, including annual grants to each State that is a member of the Interstate Shellfish Sanitation Conference.

"(e) CLOSURE OF AREAS.—

"(1) IN GENERAL.—In the case of public health emergencies or on receiving notice of the type described in subsection (b) from the Secretary, the Secretary of Commerce may close waters under the exclusive jurisdiction of the Secretary of Commerce, or otherwise restrict the harvesting of a fish species in such waters if the Secretary of Commerce determines that fish of such species within the identified harvesting or growing areas are likely to be adulterated.

"(2) REVIEW.—The Secretary of Commerce shall periodically review the growing and harvesting areas closed or restricted under this subsection to determine whether such closure or restriction should be removed. The Secretary of Commerce shall establish procedures to permit further review on petitions by affected persons.

"(3) NOTICE.—The Secretary of Commerce shall give reasonable public notice, except in cases determined to be public health emergencies, prior to ordering any closure or restriction under this section.

"SEC. 1905. POWER OF INSPECTORS.

"(a) ACTIONS OF INSPECTORS.—Inspectors authorized by the Secretary to conduct inspections, enforce compliance, and otherwise implement his title (including State employees so authorized) shall, pursuant to procedures prescribed by the Secretary, take such actions as are necessary in the judgment of the inspector to implement this title and the regulations promulgated under this title. Such actions may include—

"(1) the inspection of establishments and all locations within establishments, including fish products, packages, containers, labeling, equipment, processing procedures, and records related to this title;

"(2) the sampling and testing of fish products;

"(3) the detention and condemnation of adulterated or misbranded fish products in accordance with this title; and

"(4) the inspection, sampling and testing of imports of fish products.

"(b) CONDEMNED FISH PRODUCTS.—

"(1) IN GENERAL.—Except as provided in paragraph (2), all fish products found by the Secretary to be adulterated or misbranded shall be immediately segregated, seized, and, if objection is not made within 48 hours, condemned. If objection is made, such fish products that are in perishable form may be processed to the extent necessary to prevent spoilage pending hearing and judicial review.

"(2) COMPLIANCE ACTIONS.—If the Secretary determines that an adulterated or misbranded fish product can, by relabeling or other action, be brought into compliance with this title or the regulations promulgated under this title, the Secretary may defer a final determination as to the condemnation of such fish product pending the performance by the applicant within a time period specified by the Secretary of such relabeling or other action as the Secretary may authorize. If after such action is performed, the Secretary determines that the fish product has been brought into compliance with this title, the Secretary shall permit its entry into commerce.

"(3) DESTRUCTION.—A fish product condemned by the Secretary without objection, or after hearing and judicial review under section 1918, shall be destroyed and not utilized for human food purposes under the supervision of the Secretary.

"(c) ACCESS.—Inspectors under this title shall have access, for purposes of examination, sampling, inspection, condemnation, and for such other purposes as are determined necessary, to every part of any establishment.

"SEC. 1906. SANITARY CONDITIONS.

"(a) MAINTENANCE OF FACILITIES.—Each establishment shall maintain premises, facilities, and equipment, and the operation of such, in accordance with such sanitary practices as are required under regulations promulgated by the Secretary for the purpose of preventing the entry into, or flow or movement in, or burdensome effect on, commerce, of fish products which are adulterated.

"(b) STORAGE OR HANDLING.—The Secretary shall, by regulation, prescribe conditions under which fish products shall be stored or otherwise handled by any person engaged in the business of buying, selling, freezing, storing, or transporting, in or for commerce, or importing, such articles, when the Secretary determines that such action is necessary to ensure that such articles will not be adulterated or misbranded when delivered to the consumer. The Secretary may establish guidelines for the training of persons who are employed by establishments involved in fish and fish product sanitation and quality control.

"(c) TEMPORARY EXEMPTION AUTHORITY.—The Secretary may, under such sanitary conditions as the Secretary may by regulation prescribe, exempt from the inspection requirements of this title until, July 1, 1995, or earlier, the handling or processing of fish products by any person, where the Secretary determines—

"(1) that it is impractical to provide such inspection based on the amount of funds appropriated for the administration of this title; and

"(2) that an exemption under this subsection will aid in the effective transition to the program implemented under this title.

"SEC. 1907. CERTIFICATION OF ESTABLISHMENTS, IMPORTERS.

"(a) IN GENERAL.—

"(1) PROCEDURES.—The Secretary shall establish procedures for the annual certification, or decertification for good cause, of establishments, and persons engaged in the business of importing of fish or fish products.

"(2) INFORMATION.—The Secretary shall require such information as the Secretary determines appropriate for application for certification under paragraph (1), including the name of the owner and operator of the establishment or import business, the principal place of business, and a list of each type of fish or fish product typically processed, handled, or imported by each such establishment or importer.

"(3) PROHIBITION.—No establishment or person engaged in the business of importing shall process or handle any fish product for commercial purposes unless such establishment or importer is certified by the Secretary.

"(b) APPLICATIONS.—Applications for certification under subsection (a) shall be made to the Secretary using such forms and requiring such information as the Secretary shall prescribe by regulation including a description of the quality control program of the establishment or importer.

"(c) REFUSAL TO CERTIFY, REVOCATION.—

"(1) IN GENERAL.—If an establishment or importer certified under subsection (a) fails to comply with any requirement of this title or the regulations promulgated under this title, the Secretary may, after notice and an opportunity for a hearing—

"(A) revoke such certification;

"(B) suspend such certification for a period of time; or

"(C) impose conditions or restrictions on such certification as the Secretary determines necessary and appropriate.

"(2) DENIAL OR REVOCATION.—The Secretary may (for such period, or indefinitely, as the Secretary determines necessary to effect the purposes of this title) refuse to certify or decertify an establishment or importer if the Secretary determines, after providing such establishment or importer with an opportunity for a hearing, that such establishment or importer is unfit to engage in any business subject to or requiring inspection under this title as a result of the establishment or importer, or anyone responsibly connected with the establishment or importer, having been convicted in any Federal or State court of—

"(A) acquiring, handling, or distributing adulterated, mislabeled, or deceptively packaged food or fraud in connection with transactions in food; or

"(B) any felony, involving fraud, bribery, extortion, or any other act or circumstances indicating a lack of the integrity needed for the conduct of operations affecting the public health.

"(3) RESPONSIBLY CONNECTED.—For the purpose of this subsection a person shall be considered to be responsibly connected with the establishment or importer if such person is a partner, officer, director, holder, or owner of 10 percent or more of the voting stock of the establishment or importer or is an employee in a managerial or executive capacity, as defined in regulations promulgated by the Secretary.

"(4) HEARINGS.—On the revocation of a cetification for failure to destroy condemned fish products as required under this title, or as a result of any other failure of an establishment or importer to comply with the requirements of this title as to premises, facilities, or equipment, or the operation thereof, or other noncompliance with the requirements of this title, the applicant for, or holder of, the certification shall, on request, be afforded an opportunity for a hearing with respect to the merits or validity of such action under section 1918. Such decertification or refusal to certify shall continue in effect unless otherwise ordered by the Secretary.

"(5) REINSTATEMENT.—

"(A) IN GENERAL.—An establishment or importer that has had a certification revoked or suspended under this subsection may apply for reinstatement of such certification. The Secretary shall grant such reinstatement, if the revocation or suspension is pending in a hearing or appeal under paragraph (4), if the Secretary determines that the establishment or importer is fit to engage in the handling or processing of fish products.

"(B) CONDITIONAL OR RESTRICTED CERTIFICATIONS.—An establishment or importer that has a certification that is conditional or restricted may apply for the removal of such conditions or restrictions. The Secretary shall immediately remove such conditions or restrictions, if the existence of the condition or restriction is pending in a hearing or appeal under paragraph (4), if the Secretary finds that adequate measures have been taken to comply with this title or regulations promulgated under this title.

"SEC. 1908. LABELING, PACKAGING AND MARKING.

"(a) LABELING.—All fish products processed at any establishment certified under this title, and that are not found to be adulterated, shall at the time that such products leave the establishment bear, in distinctly legible form, on their shipping containers and immediate containers such information as the Secretary may require. The Secretary may permit such fish products to bear a seal stating that the product was processed in accordance with Federal standards or such similar language as the Secretary determines appropriate.

"(b) PROTECTION OF PUBLIC.—The Secretary, when the Secretary determines such action is necessary for the protection of the public, may prescribe—

"(1) the styles and sizes of type to be used, with respect to material required to be incorporated in labeling to avoid false or misleading labeling, in marking and labeling any fish products subject to this title;

"(2) definitions and standards of identity or composition of articles subject to this title and standards of fill of containers for such articles that shall not be inconsistent with any such standards established under the Federal Food, Drug, and Cosmetic Act; and

"(3) procedures that permit statements on labels that indicate the State or location of origin of the product.

"(c) MARKING.—The Secretary shall—

"(1) require the owner or operator of any establishment certified under this title, to cause each package of fish product that is processed in such establishment to be marked at the time the package leaves the establishment with—

"(A) the appropriate identification issued under the authority of this title; and

"(B) labeling that bears or contains an official mark; and

"(2) ensure that the official mark shall be available only for fish products that are processed in establishments certified under this title.

"(d) NO SALES.—No article subject to this title shall be sold or offered for sale in commerce by any person, under any name or other marking or labeling that is false or misleading, or in any container of a misleading form or size. Established trade names and other marking and labeling that are not false or misleading and that are approved by the Secretary are permitted.

"(e) FALSE LABELS OR MARKINGS.—

"(1) WITHHOLDING REQUIREMENT.—If the Secretary has reason to believe that any marking or labeling or the size or form of any container in use or proposed for use with respect to any article subject to this title is false or misleading in any particular, the Secretary may require that such use be withheld unless the marking, labeling, or container is modified in such manner as the Secretary may prescribe so that it will not be false or misleading.

"(2) REQUEST FOR HEARING.—If a person using or proposing to use markings, labeling, or a container that is subject to a withholding requirement under paragraph (1) does not accept such requirement, such person may request a hearing, and the use of such marking, labeling, or container shall, if the Secretary so requires, be withheld pending such hearing and final determination by the Secretary.

"(3) APPEALS.—Any determination by the Secretary under paragraph (2) shall be conclusive unless, not later than 30 days after the person receives notice of such final determination, such person appeals such determination to the United States Court of Appeals for the circuit in which such person has its principal place of business or to the United States Court of Appeals for the District of Columbia Circuit. The provisions of section 204 of the Packers and Stockyards Act, 1921 (7 U.S.C. 194) shall be applicable to appeals brought under this section.

"SEC. 1909. RECORDS, REPORTS AND DISCLOSURE.

"(a) IN GENERAL.—Establishments shall maintain accurate records as determined to be appropriate by the Secretary. Any requirements imposed under this section may include information concerning—

"(1) the receipt, delivery, sale, movement, or disposition of fish or fish products;

"(2) matters reasonably related to whether fish products may be adulterated or misbranded, including the growing or harvesting area from which such fish was harvested;

"(3) the effective enforcement of this title to ensure against the sale or distribution of adulterated or misbranded fish products to consumers; and

"(4) other activities and matters relevant to food safety and sanitation.

"(b) TIME PERIODS.—The persons described in subsection (c) shall, for such period of time as the Secretary may by regulation prescribe (not to exceed 2 years unless otherwise directed by the Secretary for good cause shown) keep and maintain such records as determined by the Secretary to be appropriate under subsection (a).

"(c) PERSONS AFFECTED.—The recordkeeping and other requirements of this section shall apply to any person, not exempted under section 1902—

"(1) that engages in the business of processing any fish product for interstate commerce; and

"(2) that engages in the business of buying or selling (such as acting as products brokers or wholesalers), or transporting, in interstate commerce, or storing in or for interstate commerce or importing any fish products.

"(d) ACCESS TO RECORDS.—The Secretary and the Secretary of Commerce shall, on request at reasonable times, have access to and make copies of records maintained under this section.

"SEC. 1910. IMPORTS.

"(a) REQUIREMENT.—

"(1) IN GENERAL.—No fish product shall be entered, or withdrawn from warehouses, for consumption in the United States, unless such fish product—

"(A) is not adulterated or misbranded;

"(B) complies with all requirements applicable to fish products in commerce in the United States under this title;

"(C) is marked and labeled as required by regulations for imported articles; and

"(D) complies with the requirements of this title and regulations promulgated under this title.

"(2) TREATMENT.—On entry into the United States, any fish product that satisfies the requirements of paragraph (1) shall be considered and treated as domestic fish products under this title, except that all labeling of such fish products shall identify the country of origin.

"(b) INSPECTION OF IMPORTS.—The Secretary shall enforce the requirements of this section through inspections and other procedures, and the sampling and inspection of fish products that are offered for importation or entered, or withdrawn from warehouses, for consumption in the United States, and through any other procedures that the Secretary determines necessary to ensure compliance with this title.

"(c) CORRECTIVE ACTIONS.—All fish products that are refused entry into commerce in the United States under subsection (a) or that are entered, or withdrawn from warehouses, for consumption in the United States in violation of this section, shall pursuant to regulations promulgated by the Secretary, be destroyed unless—

"(1) such fish products are exported within a time fixed for such exportation by the Secretary; or

"(2) the Secretary determines that such fish product can be brought into compliance with this title through relabeling or other action.

If the Secretary makes a positive determination under paragraph (2), the destruction of such fish product may be deferred pending the filing of a written application by the owner or consignee and the execution by the applicant of a bond within a time period specified by the Secretary. On such filing and execution of a bond, the Secretary may authorize the applicant to perform such relabeling or other actions required by the Secretary. If after such action is performed, the Secretary determines that such fish product has been brought into compliance with this title, the Secretary shall permit its entry into commerce.

"(d) COSTS.—Storage, cartage, labor, and other costs resulting from the denial of entry, or withdrawal from warehouse, of any fish product under this section shall be paid by the owner or consignee of such product. The nonpayment of such costs shall constitute a lien against such product and any other fish product thereafter entered, or withdrawn from warehouse, for consumption in the United States by such owner or consignee.

"(e) FOREIGN SEAFOOD INSPECTION PROGRAM.—

"(1) REVIEW.—On request of a country desiring to export fish products to the United States, the Secretary shall review the inspection program, including the sanitary, wholesomeness, quality, species verification, residue and other requirements and tolerances, with respect to fish products to be offered for importation into the United States, to determine whether such requirements and tolerances for such products are at least equal to those established under this title.

"(2) CERTIFICATION.—If the Secretary determines that a country desiring to export fish products to the United States meets the standards and procedures set forth in paragraph (1), with respect to fish products to be offered for importation into the United States, and that such country will permit the enforcement measures that the Secretary determines necessary pursuant to paragraph (5), the Secretary shall issue a certificate to such country stating that the country meets such requirements.

"(3) EFFECT OF NONCERTIFICATION.—All fish products imported from a country that is not certified by the Secretary under this section shall be inspected by the Secretary at the port of entry to ensure compliance with the provisions of this section.

"(4) REVIEW.—

"(A) IN GENERAL.—The Secretary shall periodically review certificates issued under this subsection and shall revoke any such certificate if the Secretary determines that such action is necessary.

"(B) INSPECTION.—The consideration of any application for a certification under this subsection and the review of any such certification, by the Secretary, shall include the inspection of individual establishments that produce fish products to be offered for export to the United States to ensure that such products, and the procedures and standards used in handling and processing such products, meet the inspection, sanitary, quality, species verification, residue and other standards and tolerances required by this title.

"(5) ENFORCEMENT.—The Secretary shall enforce the requirements of this section through inspections, sampling, testing, or such other actions at such stages in the handling or processing of fish products, whether in the foreign country, during importation, or otherwise as the Secretary determines necessary to ensure compliance with this title.

"(f) REPORTS TO CONGRESS.—Not later than March 1 of each year, the Secretary shall submit, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a comprehensive and detailed written report with respect to the administration of this section during the immediately preceding calendar year. Such report shall include—

"(1) a certification by the Secretary that foreign entities exporting fish products under this section have complied with requirements at least equal to all the inspection, building construction standards, and all other provisions of this title and regulations issued thereunder;

"(2) the names and locations of establishments authorized or permitted to have imported fish products into the United States;

"(3) the number of inspectors employed by the Department of Agriculture in the calendar year for which the report is being prepared that were assigned to inspect the establishments referred to in paragraph (2) and the frequency with which each such establishment was inspected by such inspectors;

"(4) the number of inspectors licensed by each country from which any imports subject to the provisions of this section were imported who were assigned, during the calendar year concerned, to inspect such imports and the facilities in which such imports were handled and the frequency and effectiveness of such inspections;

"(5) the total volume of fish products that were imported into the United States during the year for which such report was prepared from each country, including a separate itemization of the volume of each major category of such imports from each country during such year, and a detailed report of rejections of entities for certification and products because of the failure of such entities or products to meet appropriate standards prescribed under this section; and

"(6) the name of each foreign country that applies requirements for the importation of fish products from the United States.

"SEC. 1911. EXPORTS.

"(a) STANDARDS.—Fish products intended for export to a foreign country shall not be considered to be adulterated or misbranded under this title if such products—

"(1) are exported consistent with the specifications of the foreign purchaser;

"(2) are not in conflict with the laws of the country to which they are intended for export;

"(3) are labeled on the outside of the shipping package that they are intended for export; and

"(4) are not sold, offered for sale, or otherwise disposed of in commerce within the United States except that such fish product shall be considered to be adulterated if the Secretary determines such products represent a threat to the health of the eventual consumer.

"(b) INSPECTION.—The Secretary shall inspect fish products intended to be exported to foreign countries at such times and places and in such manner as the Secretary determines necessary.

"(c) CERTIFICATES.—The Secretary shall, on request of the exporter, provide a certificate for export stating the condition of fish products inspected under this section.

"SEC. 1912. RECALL.

"The Secretary may require any person who owns or operates an establishment or is in the business of importing of fish products, to recall any fish product that is adulterated or misbranded if the Secretary determines that such fish product is adulterated or misbranded and could cause serious health consequences.

"SEC. 1913. COOPERATION WITH CENTERS FOR DISEASE CONTROL.

"The Secretary of Health and Human Services shall establish, through the Centers for Disease Control, an active surveillance system, based on a representative proportion of the population of the United States, to provide an accurate estimate of the frequency of human disease in the United States associated with the consumption of food, including a comparison of each major food category.

"SEC. 1914. PROHIBITED ACTS.

"The following acts and the causing thereof are prohibited under this title—

"(1) the processing or handling of any fish product at any establishment except in compliance with the requirements of this title;

"(2) the refusal to permit entry or inspection to or on any establishment or business engaged in importing fish products, or to otherwise interfere with any inspector or other person in carrying out the duties required under this title or under regulations implementing this title;

"(3) the sale, transportation, or offer for sale or transportation, in interstate commerce of any fish product that is adulterated or misbranded at the time of such sale, transportation, or offer for sale or transportation;

"(4) the possession by any establishment of fish products except in compliance with the requirements of this title or regulations issued under this title;

"(5) the commission of any act, or the omission of any act, while fish product is being transported in interstate commerce, or held for sale after such transportation, that is intended to cause or has the effect of

causing such products to be adulterated or misbranded;

"(6) the sale, transportation, or offer for sale or transportation, in interstate commerce of any fish product that is not processed in accordance with the requirements of this title or any regulations promulgated under this title;

"(7) the reproduction, alteration, or destruction of any official stamp or certificate without the authorization of the Secretary;

"(8) the misbranding of fish products, or the creation or maintenance of records that are false either by content or omission, or destruction of records containing information required under this title or the alteration or removal of the whole or any part of the labeling of, or the doing of any other act with respect to fish products if such act is done while such fish products are held for sale (whether or not such sale is the first sale) after shipment in interstate commerce and results in such article being adulterated or misbranded;

"(9) the handling or processing for interstate commerce of fish products in any establishment unless there is in effect for such establishment a certification issued by the Secretary; and

"(10) the importation into the United States of fish products if such articles are adulterated, labeled or packaged in a false or misleading way, or otherwise misbranded, or fail to comply with all the inspection, good processing practices, and other provisions of this title and regulations issued under this title applicable to such articles in interstate commerce within the United States.

"SEC. 1915. CIVIL PENALTIES.

"(a) FINES.—

"(1) IN GENERAL.—Any person who violates any provision of this title, or the regulations promulgated pursuant to this title, shall be liable to the United States for a civil penalty in an amount not to exceed $5,000 for the first violation. Each day of a continuing violation shall constitute a separate offense.

"(2) CIVIL ACTIONS FILED IN DISTRICT COURT.—The Secretary may commence a civil action in the United States district court in which the person subject to requirements of this title resides, to seek a civil fine from any such person for violation of this title.

"(3) FINDING OF FAILURE TO COMPLY.—If the court, in an action brought under paragraph (2), finds on the basis of clear and convincing evidence, that the person subject to the requirements of this title has failed to comply with such requirements, or the rules and regulations promulgated thereunder, the court shall fine the person not more than $5,000 for each such violation.

"(4) NOTICE.—Not less than 90 days, and not more than 180 days, prior to commencing a civil action under paragraph (2), the Secretary shall provide to each person that is the subject of the action, a written notice that shall include—

"(A) a statement that the Secretary intends to commence such an action;

"(B) a comprehensive description of the alleged violations of this title and the regulations promulgated under this title; and

"(C) a description of the actions to be taken by such person that the Secretary considers necessary to enable the person to comply with this title and to eliminate the need to commence such civil action.

"(5) OPPORTUNITY TO BE HEARD.—Prior to the commencement of a civil action by the Secretary under paragraph (2), the Secretary shall provide the person with an opportunity to present, orally or in writing, information concerning the alleged violations or with respect to such proceeding.

"(6) WRITTEN NOTICE OF WARNING.—In determining whether the public interest would be adequately served by issuing a written notice of warning in lieu of commencing a civil action under paragraph (2), the Secretary shall take into account—

"(A) the compliance history of the person;

"(B) the magnitude of the violations by the person;

"(C) whether compliance with this title would be obtained as a result of a notice of warning; and

"(D) whether such violation is of a minor or technical nature.

Prior to commencing any such civil action under paragraph (2), the Secretary, after considering the factors described in subparagraphs (A) through (D), shall provide a written explanation to the establishment concerning the reasons why the alleged violations of the person warrant commencing a civil action.

"(b) MODIFICATION.—The Secretary may compromise, modify, or remit, with or without conditions, any civil penalty that is subject to imposition or that has been imposed under this section.

"SEC. 1916. CRIMINAL PENALTIES.

"(a) IN GENERAL.—Any person who intentionally violates any provision of section 1903, 1908, 1910 or 1914, or the regulations promulgated thereunder, may—

"(1) be fined in an amount not to exceed $10,000, or imprisoned for not more than 1 year, or both; and

"(2) if such intentional violation involves the intent to defraud, or any distribution of any fish product that is adulterated or misbranded, be fined in an amount not to exceed $20,000, or imprisoned for not more than 3 years, or both.

"(b) NOTICE OF WARNING.—In the case of one or more minor violations of this title or the regulations promulgated under this title, the Secretary may, when the Secretary determines that the public interest will be adequately served thereby, issue to the person committing such violation a suitable written notice of warning. In determining whether the public interest will be adequately served by a written notice of warning, the Secretary shall consider, among other factors—

"(1) the compliance history of such person;

"(2) the magnitude of the violation;

"(3) whether compliance with this title would likely be obtained as a result of such notice; and

"(4) whether such violation is of a minor or technical nature.

"(c) NOTICE TO ALLEGED VIOLATOR.—

"(1) IN GENERAL.—Before any violation under this title is reported by the Secretary to any United States attorney for institution of a criminal proceeding under this section, the person against whom such proceeding is contemplated shall be given reasonable notice of the alleged violation and an opportunity to present the views of such person orally or in writing with regard to such contemplated proceeding.

"(2) EXCEPTION.—Paragraph (1) shall not apply in those cases where it is determined that such notice would significantly interfere with the ability of the United States attorney to prosecute any violation. Nothing in this title shall be construed as requiring the Secretary to report for criminal prosecution violations of this title when the Secretary believes that the public interest will be adequately served by the procedures described in subsection (b).

"(d) PUBLICATION.—In each case in which a criminal penalty is imposed under this section, the Secretary shall publish the name of the offending person, the location of the violator, the amount of the fine and the reason for the fine.

"SEC. 1917. CARRIERS.

"No common carrier or contract carrier, including such carriers that are fish tender vessels, shall be subject to penalties under this title for the receipt, carriage, holding, or delivery, in the usual course of business, as a carrier, of any adulterated or misbranded fish product owned by another person, unless the carrier—

"(1) during the time of such receipt, carriage, holding, or delivery, had knowledge or was in possession of facts that would cause a reasonable person to believe that the fish products were adulterated or misbranded or were otherwise not eligible for transportation under this title; or

"(2) refuses to furnish on request of the Secretary the name and address of the person from whom the carrier received the adulterated or misbranded fish product, and copies of all documents pertaining to the delivery of such fish product.

"SEC. 1918. HEARINGS AND SUBPOENAS.

"(a) ADMINISTRATIVE HEARINGS.—Except in the case of criminal prosecutions under section 1916, and as described in section 1908(e) and 1915, the Secretary shall afford an opportunity for an administrative hearing, under procedures established by the Secretary through regulations, to any person claiming to be adversely affected by the action or inaction of the Secretary under this title (hereinafter referred to in this section as the 'claimant'). Such procedures shall include an opportunity to present evidence, a right of cross examination, and a right to be heard in person or by counsel and through witnesses. After the expiration of 60 days after the entry of an order by the Secretary against the claimant under this section, the Secretary shall take any appropriate action under such order, unless the claimant files for judicial review under subsection (d).

"(b) SUBPOENAS.—

"(1) AUTHORITY.—For the purposes of any hearing or investigation under this title, the Secretary may issue subpoenas requiring the attendance and testimony of witnesses and the production of any documentation or other evidence that relates to any matter under investigation or in dispute before the Secretary and to administer oaths or affirmations.

"(2) COMPENSATION.—The Secretary shall pay witnesses subpoenaed under this subsection customary reasonable fees and transportation expenses.

"(c) INTERIM RELIEF.—The Secretary may take any actions in emergency situations determined necessary, during the pendency of the administrative hearing process and during the pendency of judicial review (unless the court shall order otherwise) to protect the public health, curb persistent violations that endanger public health, or enforce other provisions of this title or regulations promulgated pursuant to this title.

"(d) JUDICIAL REVIEW.—

"(1) PETITION.—Not later than 60 days after the entry of an order by the Secretary, a person adversely affected by such order may obtain judicial review through the filing of a petition of judicial review in the United States court of appeals for the cir-

cuit in which such person resides or where the principal place of business of such person is located, by filing with the clerk of such court a written petition praying that the order of the Secretary be set aside or modified in the manner stated in the petition together with a bond in such sum as the court may consider appropriate. A copy of the petition shall be transmitted by the clerk to the office of the Secretary, and the Secretary shall file in the court the record of the proceeding.

"(2) EVIDENCE.—The evidence contained in the record of the proceeding filed by the Secretary under paragraph (1) shall be considered by the court as evidence in the case. Judicial review of any such order shall be on the record on which the determination and order are based.

"(3) FINDINGS.—The findings of the Secretary concerning questions of fact surrounding the order for which a petition for judicial review is filed shall be sustained if supported by substantial evidence when considered on the record as a whole.

"(4) ACTION BY COURT.—The court may affirm, modify, or set aside the order of the Secretary. If the court determines that just and proper disposition of the case requires the taking of additional evidence, the court shall order the hearing to be reopened for the taking of such evidence in such manner and on such terms and conditions as the court determines to be appropriate. The Secretary may modify the findings of the Secretary as to the facts or make new findings by reason of the additional evidence so taken, and the Secretary shall file such modified or new findings, and the recommendations of the Secretary, if any, for the modification or setting aside of the order of the Secretary, with the return of such additional evidence.

"(5) APPEAL.—The judgment of the court affirming or setting aside, in whole or in part, any order by the Secretary under this subsection shall be final and subject only to review by the Supreme Court of the United States on certiorari or certification as provided for in section 1254 of title 28 of the United States Code.

"SEC. 1919. OTHER CRIMES.

"(a) BRIBES.—

"(1) PERSON WHO BRIBES.—Any person, or agent or employee of any person, who shall give, pay, or offer, directly or indirectly, to any inspector, or other officer or employee of the United States or a State, authorized to perform any of the duties authorized under this title or under rules or regulations of the Secretary promulgated under this title, any money or other thing of value, with the intent to influence such inspector, officer or employee, in the discharge of any duty of such inspector, officer or employee provided for under this title, shall be considered to have committed a felony and, on a conviction thereof, shall be punished by a fine not less than $5,000 nor more than $10,000 and by imprisonment for not less than 1 year nor more than 3 years.

"(2) PERSON ACCEPTING BRIBES.—Any inspector, officer or employee of the United States or a State authorized to perform any of the duties authorized under this title or under rules or regulations of the Secretary promulgated under this title, who shall accept any money, gift, or other thing of value from any person, or officers, agents, or employees thereof, given with the intent to influence the official action of such inspector, officer, or employee, or who shall receive or accept from any person engaged in commerce any gift, money, or other thing of value given with any purpose or intent whatsoever, shall be considered to have committed a felony and shall, on a conviction thereof, be summarily discharged from office and shall be punished by a fine not less than $1,000 nor more than $10,000 and by imprisonment not less than 1 year nor more than 3 years.

"(b) ASSAULT.—Any person who forcibly assaults, resists, opposes, impedes, intimidates, or interferes with any inspector or other person while engaged in or on account of the performance of the official duties of such inspector or other person under this title shall be fined not more than $5,000 or imprisoned not more than 3 years, or both. Whoever, in the commission of any such acts, uses a deadly or dangerous weapon, shall be fined not more than $10,000 or imprisoned not more than 10 years, or both. Whoever kills any person while engaged in or on account of the performance of the official duties of such person under this title shall be punished as provided under sections 1111 and 1114 of title 18, United States Code.

"SEC. 1920. REGULATION OF PRODUCTS AND ESTABLISHMENTS.

"(a) PROCESSING.—Each establishment or import business that is subject to inspection under this title shall be operated in accordance with such sanitary, good processing, quality control, and handling procedures or practices as are required by regulations promulgated by the Secretary.

"(b) STAMP.—The Secretary shall by regulation prescribe standards for identifying and otherwise marking fish or fish products, or their packages or containers, with an official stamp. The Secretary shall ensure that the official stamp is available only for fish and fish products that are processed or handled in accordance with the requirements of this title.

"(c) RECORDKEEPING.—The Secretary shall promulgate regulations providing for the preparation and maintenance of records that specifically describe all activities relevant to food safety and sanitation. Any such records shall be maintained for such periods of time as the Secretary may by regulation prescribe, but such period shall not exceed 2 years unless the Secretary directs otherwise for good cause shown. Any duly authorized representative of the Secretary shall, at all reasonable times, on notice, be given the opportunity to examine and to copy all such records.

"SEC. 1921. RESEARCH AND EDUCATION.

"(a) RESEARCH.—The Secretary shall, in consultation with other Federal agencies and with the States, establish priorities for fish and fish products safety research, such as test methodology for microbiological and chemical contaminants, and the appropriate Federal agencies shall conduct research regarding such priorities.

"(b) EDUCATION GRANTS.—The Secretary, acting through the Extension Service, shall provide $2,000,000 each fiscal year out of the funds appropriated to carry out this title to award grants for the establishment of demonstration projects by States, under terms and conditions prescribed by the Secretary, to assist States in conjunction with the Extension Service in providing food safety information and instruction regarding the proper handling, storage and preparation of fish and fish products for human consumption.

"(c) SHELLFISH INDICATOR RESEARCH PROGRAM.—

"(1) ESTABLISHMENT.—The Secretary of Commerce, in consultation with the Administrator of the Environmental Protection Agency, shall establish and administer, for a 5-year period, a shellfish indicator research program to develop a system of classification of shellfish harvesting areas based on the latest technological advancements in microbiology and epidemiological methods. In establishing such a program, the Secretary of Commerce shall develop a program that shall include the following activities:

"(A) ASSESSMENTS.—An assessment of commercial shellfish growing areas in the United States, including the evaluation of the relationships between indicators of fecal contamination and human enteric pathogens.

"(B) EVALUATIONS.—An evaluation of the relationships described in subparagraph (A) with respect to potential health hazards associated with human consumption.

"(C) COMPARISONS.—A comparison of the current microbiological methods used for evaluation of indicator bacteria and human enteric pathogens in shellfish and shellfish harvesting areas with new technological methods designed for this purpose.

"(D) EPIDEMIOLOGICAL STUDIES.—The design of epidemiological studies to relate microbiological data, sanitary survey data, and human shellfish consumption data to actual hazards to health associated with such consumption.

"(2) GRANTS.—The Secretary of Commerce shall carry out the research program established under paragraph (1) by providing assistance in the form of grants to eligible applicants.

"(3) SOLICITATION.—Not later than 90 days after the date of enactment of this title, the Secretary of Commerce shall publish in the Federal Register a solicitation of research proposals to carry out the research program established under this subsection.

"(4) AWARDING OF GRANTS.—Not later than 90 days after the date of the publication of the solicitation under paragraph (3), the Secretary of Commerce shall award a grant or grants to eligible applicants to carry out the research program established under this subsection.

"(5) ELIGIBLE APPLICANT.—As used in this subsection, the term "eligible applicant" means—

"(A) any public or private institution of higher education;

"(B) any public or private organization with suitable research capabilities; or

"(C) any consortium of two or more entities referred to in subparagraphs (A) and (B).

"(d) ADVISORY PANEL.—The Secretary shall establish an advisory panel, consistent with the requirements of the Federal Advisory Committee Act, to assist in the development and implementation of the research programs under this section. Such advisory panel shall include one representative each from the Environmental Protection Agency, the Food and Drug Administration, the Department of Commerce, the Fish and Wildlife Service, the Interstate Shellfish Sanitation Conference, appropriate State health authorities and a representative from the commercial fish industry and from a public interest group.

"(e) PERIODIC REVIEW.—The Secretary shall review the research programs established under this section not less than once every 2 years and, on the basis of that review, make changes in the administration of the programs that are appropriate to carry out more effectively the activities described.

"(f) RESEARCH STUDY CONCERNING INSPECTIONS OF HARVESTING AND FISH TENDER VESSELS.—

"(1) CONDUCT OF STUDY.—

"(A) IN GENERAL.—Not later than 2 years after the date of enactment of this title, the Secretary, in cooperation with the Secretary of Commerce shall conduct and complete a study of—

"(i) the role of fish tender and fish harvesting vessels in safeguarding the wholesomeness of fish products;

"(ii) the potential necessity of requesting the Secretary of Commerce, in cooperation with the Coast Guard and the States, to establish procedures for the registration of commercial fishing vessels, fish processing vessels, and fish tender vessels; and

"(iii) based on a scientific analysis, the potential necessity of including any particular type or class of such vessels in the inspection program conducted pursuant to this title.

"(B) UPDATE.—The Secretary, in cooperation with the Secretary of Commerce, may from time to time update the study conducted under subparagraph (A) and shall on completion of such study or after any such updates, immediately submit to the Committees on Agriculture and Merchant Marine and Fisheries of the House of Representatives and the Committees on Agriculture, Nutrition, and Forestry and Commerce, Science, and Transportation of the Senate, the results of such study and the results of any update of such study.

"(2) CONCLUSIONS.—If as a result of the study conducted under paragraph (1) or any update of such study the Secretary concludes, in consultation with the Secretary of Commerce, that any type or class of vessels not subject to inspection should be subject to inspection, the Secretary shall so advise the Committees described in subparagraph (B) of paragraph (1).

"(g) OTHER RESEARCH.—The Secretary shall conduct and support research concerning—

"(1) the testing of methodology for detecting and measuring biological and chemical contaminants in fish products;

"(2) the techniques and procedures utilized for inspecting fish and fish products;

"(3) the sanitation practices for the harvesting, processing, transportation, and storage of fish and fish products; and

"(4) any other matters that may further the purposes of this title.

"(h) REPORTS TO CONGRESS.—The Secretary of Agriculture in cooperation with the Secretary of Commerce shall prepare and submit, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a biennial report concerning the research and education programs authorized and established under this section. Such reports shall be made available to appropriate Federal and State agencies, the fish industry, and the general public. Each such report shall include, with respect to the period for which such report was prepared—

"(1) a description of the research assisted under this section and the results of such research;

"(2) all changes that were made in the administration of the programs established under this section subsequent to the date of the previous report; and

"(3) any recommendations for legislative action to improve the effectiveness of the inspection program for fish products.

"SEC. 1922. MISCELLANEOUS.

"(a) PROHIBITION ON COPYING OF OFFICIAL MARKS.—No brand manufacturer, printer, or other person shall cast, print, lithograph, or otherwise make any device containing any official mark or simulation thereof, or any label bearing any such mark or simulation, or any form of certificate or simulation thereof, except as authorized by the Secretary.

"(b) COMPLIANCE.—No establishment processing fish products for interstate commerce or otherwise subject to this title shall process any fish product except in compliance with this title.

"(c) ENTRY OF ARTICLES INTO ESTABLISHMENTS.—The Secretary may limit the entry of fish products and other materials into any establishment, under such conditions as the Secretary may prescribe to assure that permitting the entry of such products into such establishments will be consistent with the purposes of this title.

"(d) CONDEMNATION OF SEIZURE.—This title shall not be construed to limit the authority of the Secretary to condemn or seize property that is conferred by provisions of other laws.

"(e) ADMINISTRATIVE DETENTION, CONDEMNATION.—

"(1) ADMINISTRATIVE DETENTION.—When any fish product is found by any authorized representative of the Secretary on any premises where it is held for purposes of, or during or after distribution in, commerce or otherwise subject to the requirements of this title, and there is reason to believe that any such product is adulterated or misbranded and is capable of use as human food, or that it has not been inspected, in violation of the provisions of this title or any other Federal law or the laws of any State or Territory, or the District of Columbia, or that it has been or is intended to be, distributed in violation of any such provisions, it may be detained by such representative for a period of not to exceed 20 days, pending notification of any Federal, State, or other governmental authorities having jurisdiction over such product, and shall not be moved by any person, from the place at which it is located when so detained, until released by such representative. All official marks may be required by such representative to be removed from such product before it is released unless it appears to the satisfaction of the Secretary that the product is eligible to retain such marks.

"(2) CONDEMNATION.—

"(A) LIBEL OF INFORMATION; JURISDICTION.—Any fish product that is being transported in commerce or otherwise subject to the requirements of this title, or that is held for sale in the United States after such transportation, and that—

"(i) is or has been processed, sold, transported, or otherwise distributed or offered or received for distribution in violation of this title;

"(ii) is capable of use as human food and is adulterated or misbranded; or

"(iii) in any other manner is in violation of this title;

shall be liable to be proceeded against and seized and condemned at any time, on a libel of information in any United States district court or other proper court as provided for in this title within the jurisdiction of which the product is found.

"(B) DISPOSAL.—If a fish product is condemned it shall, after the entry of the decree of condemnation—

"(i) be distributed in accordance with regulations promulgated by the Secretary; or

"(ii) be disposed of by destruction or sale as the court may direct and the proceeds, if sold, less the court costs and fees, and storage and other proper expenses, shall be paid into the Treasury of the United States, but such product shall not be sold contrary to the provisions of this title, or the laws of the jurisdiction in which it is sold.

On the execution and delivery of a good and sufficient bond conditioned that the fish product shall not be sold or otherwise disposed of contrary to this title, or the laws of the jurisdiction in which the disposal is made, the court may direct that such product be delivered to the owner thereof subject to such supervision by authorized representatives of the Secretary as is necessary to insure compliance with the applicable laws.

"(C) COURT COSTS AND FEES.—When a decree of condemnation is entered against a fish product and such product is released under bond, or destroyed, court costs and fees, and storage and other proper expenses shall be awarded against the person, if any, intervening as claimant of the fish product.

"(D) PROCEEDINGS.—The proceedings in libel cases under this subsection shall conform, as nearly as may be, to the proceedings in admiralty, except that either party may demand a trial by jury of any issue of fact joined in any case, and all such proceedings shall be at the suit of and in the name of the United States.

"(3) ADMINISTRATION AND ENFORCEMENT.—For the efficient administration and enforcement of this title, the provisions (including penalties) of sections 46, 48, 49, and 50 of title 15, United States Code (except subsections (c) through (h) of section 46 and the last paragraph of section 49 of such title) and the provision of section 4091 of title 47, United States Code, shall be applicable to the jurisdiction, powers, and duties of the Secretary in administering and enforcing the provisions of this title and to any person with respect to whom such authority is exercised. The Secretary, in person or by such agents as the Secretary may designate, may prosecute any inquiry necessary to carry out the duties of the Secretary under this title, and the powers conferred by sections 49 and 50 of title 15, United States Code, on the district courts of the United States may be exercised for the purposes of this title.

"(f) JURISDICTION.—Except as otherwise provided in this title, the United States district courts, the District Court of Guam, the District Court of the Virgin Islands, the highest court of American Samoa, and the United States courts of the other territories, are vested with jurisdiction specifically to enforce, and to prevent and restrain violations of, this title and shall have jurisdiction in all other kinds of cases arising under this title. All proceedings for the enforcement or to restrain violations of this title shall be by and in the name of the United States.

"(g) SEVERABILITY.—If any provision of this title, or the application of such provision to any person or circumstance is held to be unconstitutional or otherwise invalid, the remainder of this title, and the application of the provisions of such to any person or circumstance shall not be affected thereby.

"SEC. 1923. REGULATIONS.

"(a) ISSUANCE.—The Secretary shall issue regulations necessary or appropriate to carry out this title in accordance with the informal notice and prior public comment requirements of section 553 of title 5, United States Code.

"(b) COPY AND JUSTIFICATION.—Not later than 5 days prior to issuing of any regulation under subsection (a), the Secretary shall provide to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate a copy of the regulation and a statement in justification of the regulation.

"SEC. 1924. INTERAGENCY COOPERATION.

"The Secretary may, by agreement with the head of any Federal agency, utilize on a reimbursable basis or otherwise, the personnel, services, and facilities of any other department or agency of the United States in the performance of the duties of the Secretary under this title.

"SEC. 1925. EXEMPTION FROM FEDERAL FOOD, DRUG, AND COSMETIC ACT.

"The inspection, sampling or regulation of fish products, and the handling, processing, storage, or transportation of fish products, shall be exempt from the provisions of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321 et seq.) to the extent that this title applies to such fish products, or the handling, processing, storage, or transportation of fish products, except that this title shall not diminish any authority conferred by the Federal Food, Drug, and Cosmetic Act prior to the implementation or enforcement of this title under section _____05 of the Fish Safety Act of 1990.

"SEC. 1926. COST OF INSPECTION, OVERTIME.

"The cost of inspections rendered under the requirements of this title, shall be borne by the United States, except that the cost of overtime and holiday work required in establishments at such rates as the Secretary may determine shall be borne by establishments. Sums received by the Secretary in reimbursement for sums paid out by the Secretary for such premium pay work shall be available without fiscal year limitation to carry out this title.

"SEC. 1927. AUTHORIZATION OF APPROPRIATIONS.

"(a) INSPECTION PROGRAM.—There are authorized to be appropriated to carry out this title, not to exceed $14,000,000 for fiscal year 1991, $40,000,000 for fiscal year 1992, $80,000,000 for fiscal year 1993, and $100,000,000 in each of the fiscal years 1994 and 1995.

"(b) RESEARCH PROGRAMS AUTHORIZATION.—Of the amounts appropriated under subsection (a), the Secretary shall use not to exceed $5,000,000 in each of the fiscal years 1991, 1992, and 1993, to carry out the research programs under section 1921 of this title.

"(c) EARMARKING OF FUNDS.—

"(1) FOOD AND DRUG ADMINISTRATION.—Of the amount appropriated under subsection (a) in a fiscal year, the Secretary shall ensure that the Food and Drug Administration shall receive—

"(A) 80 percent of such amount in fiscal year 1991;

"(B) 60 percent of such amount in fiscal year 1992;

"(C) 40 percent of such amount in fiscal year 1993; and

"(D) 20 percent of such amount in each of the fiscal years 1994 and 1995.

"(2) DEPARTMENT OF COMMERCE.—Of the amounts appropriated under subsection (a), the Secretary shall ensure that the Department of Commerce shall receive 10 percent of such amounts in each of the fiscal years 1991 through 1995 to carry out its research and classification functions under this title.

"SEC. 1928. EFFECTIVE DATE.

"This title shall become effective on the date of enactment of this title.".

SEC. ____04. AMENDMENTS TO THE ACT OF MAY 8, 1914.

(a) EXTENSION SERVICE.—Section 2 of the Act of May 8, 1914 (38 Stat. 373, chapter 79; 7 U.S.C. 342), is amended by inserting "food safety," after "home economics,".

(b) EDUCATION.—Section 3 of such Act (7 U.S.C. 343) is amended by adding at the end thereof the following new subsection:

"(g) There are authorized to be appropriated for each of the fiscal years 1991 through 1995, $750,000 for additional programs to be administered by the Secretary of Agriculture through the Extension Service to disseminate food safety information, publications, and instruction to consumers, restaurant food handlers, schools and other persons concerning the proper handling, storage and preparation of fish products.".

SEC. ____05. IMPLEMENTATION BY SECRETARY OF AGRICULTURE.

(a) IN GENERAL.—Except as otherwise provided in this section or in title XIX of the Food Security Act of 1985 (as added by section 3), the Secretary of Agriculture shall, not later than 18 months after the Commissioner of Food and Drugs has issued the initial set of final regulations under section _____06, develop and implement by regulation the comprehensive fish product inspection program required under such title XIX. Such regulations issued by the Secretary of Agriculture shall include regulations—

(1) establishing inspection procedures;

(2) setting forth procedures for training inspectors;

(3) regarding the certification of establishments and importers;

(4) for inspecting imported fish products;

(5) authorizing State programs; and

(6) establishing labeling requirements and procedures for the approval of labels and labeling in accordance with the program established under the amendment made by section _____03.

(b) PHASE-IN OF STATUTORY PROVISIONS.—

(1) EFFECT OF CURRENT REGULATIONS.—The provisions of law in effect on the date of enactment of this title relating to fish product safety, fish product labeling, fish product inspection, and related matters, that are relevant to the regulations of the Secretary of Agriculture, the Secretary of Commerce, or the Food and Drug Administration in effect on such date concerning such matters, shall remain in effect until such regulations are revoked, superseded, amended, or modified by regulations promulgated under title XIX of the Food Security Act of 1985 (as added by section _____03).

(2) TRANSITION.—The Secretary of Agriculture shall issue regulations as the Secretary determines necessary or appropriate, in consultation with the Secretary of Commerce and the Commissioner of Food and Drugs, that provide for an orderly transition to the program required under title XIX of the Food Security Act of 1985 (as added by section _____03). During such transition and phase-in period, the Secretary of Agriculture may implement any aspects of such program prior to the implementation of other aspects of such program and may require the implementation of such aspects in certain geographic areas prior to such implementation in other areas.

SEC. ____06. IMPLEMENTATION BY THE COMMISSIONER OF FOOD AND DRUGS.

(a) IN GENERAL.—Except as otherwise provided in this section or in title XIX of the Food Security Act of 1985 (as added by section _____03), the Commissioner of Food and Drugs, in cooperation with the Secretary of Agriculture, shall, not later than 2 years after the date of enactment of this title, develop and implement a program to carry out and administer such title XIX.

(b) SPECIFIC REQUIREMENTS.—

(1) CONTRACT WITH NATIONAL ACADEMY OF SCIENCES.—Not later than 30 days after the date of enactment of title XIX of the Food Security Act of 1985 (as added by section _____03), the Commissioner of Food and Drugs shall enter into contracts with the National Academy of Sciences to identify chemical and microbiological contaminants, parasites, toxins and other harmful substances that are most likely to be found in fish and fish products and that are most likely to cause fish and fish products to be adulterated.

(2) REPORT.—Not later than 6 months after the date of the execution of the contract under paragraph (1), the National Academy of Sciences shall prepare and submit, to the Secretary of Agriculture, the Secretary of Health and Human Services, the Secretary of Commerce, the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a report describing the results of the research conducted under paragraph (1).

(3) REGULATIONS.—

(A) PUBLICATION OF TOLERANCES BASED ON REPORT.—Not later than 6 months after receiving the report under paragraph (2), the Commissioner of Food and Drugs shall publish an initial set of proposed regulations that shall include tolerances for those chemical and microbiological contaminants, parasites, toxins and other harmful substances that under such report are found in fish and fish products and that are most likely to cause fish and fish products to be adulterated.

(B) FINAL REGULATIONS.—Not later than 6 months after the date on which the Commissioner issues the proposed regulations under subparagraph (A), the Commissioner shall promulgate final regulations. Such final regulations shall contain a timetable for the issuance of additional rules and regulations.

SEC. ____07. IMPLEMENTATION BY THE SECRETARY OF COMMERCE.

Except as otherwise provided in this section or in title XIX of the Food Security Act of 1985 (as added by section _____03), the Secretary of Commerce in cooperation with the Secretary of Agriculture shall, not later than 2 years after the date of enactment of this title, develop and implement a program to carry out the requirements of such title XIX. Not later than 18 months after such date of enactment, the Secretary of Commerce shall issue proposed regulations.

JEFFORDS AMENDMENTS NOS. 2357 AND 2358

Mr. JEFFORDS proposed two amendments to the bill S. 2830, supra, as follows:

AMENDMENT No. 2357

On Page 28, line 11, after "export", insert the following: "(Other than the export of live dairy cattle)".

AMENDMENT No. 2358

On page 18, line 20, strike "and".

On page 18, line 24, strike the period and insert a semicolon.

On page 18, after line 24, insert the following:

(7) dairy policy should protect against widely fluctuating consumer prices and producer income;

(8) it is in the interest of the United States to have wholesome dairy products available for domestic and international nutrition programs;

(9) a properly functioning dairy program should result in a balanced purchase of dairy products so that the products are available to carry out the nutrition programs; and

(10) the Federal dairy program should encourage greater protein production in milk and discourage additional butterfat production through the use of incentives and disincentives.

HEINZ (AND OTHERS) AMENDMENT NO. 2359

Mr. HEINZ (for himself, Mr. BRADLEY, Mr. ROTH, Mr. SPECTER, Mr. BIDEN, and Mr. LAUTENBERG) proposed an amendment to the bill S. 2830, as follows:

On page 924, line 15, insert "(a) IN GENERAL.—" before "The first".

On page 924, between lines 19 and 20 insert the following new subsection:

(b) TOLERANCES.—Section 8e(a) of such Act (7 USC 608e-1 (a) is amended by adding at the end thereof the following new sentences:

"In carrying out inspections pursuant to a marketing order in the United States or foreign countries, all such inspections shall apply en route or delivery tolerances to all commodities, domestic or foreign, when such inspections are performed at any site in the United States other than a shipping point. For purposes of this subsection, the term 'shipping point' means, with respect to domestic and foreign commodities, the point of origin of the shipment in the producing area or at a port of loading for ship stores. All inspections under this paragraph shall be paid for by the shipper on a user fee basis."

BAUCUS (AND GRASSLEY) AMENDMENT NO. 2360

Mr. LEAHY (for Mr. BAUCUS, for himself, Mr. GRASSLEY and Mr. LEAHY) proposed an amendment to the bill S. 2830, supra, as follows:

On page 425, between lines 4 and 5, insert the following new paragraph:

"(2) to increase export sales of United States processed, value-added agricultural products;".

On page 425, line 5, strike out "(2)" and insert in lieu thereof "(3)".

On page 425, line 6, strike out "(3)" and insert in lieu thereof "(4)".

On page 425, line 9, strike out "(4)" and insert in lieu thereof "(5)".

On page 425, line 15, strike out "(5)" and insert in lieu thereof "(6)".

On page 425, line 18, strike out "(6)" and insert in lieu thereof "(7)".

On page 429, between line 23, strike out "and".

On page 429, between line 23 and 24, insert the following new subparagraph:

"(E) and increase the United States share of world markets for processed, value-added products because of the multiple benefits derived from such United States exports for American producers, processors, agricultural-industrial exporters and the national workforce; and".

On page 429, line 24, strike out "(E)" and insert in lieu thereof "(F)".

On page 432, line 17, after the comma insert "and value-added".

On page 437, between lines 5 and 6, insert the following new subsection:

"(c) VALUE-ADDED PRODUCTS.—With respect to the trade performance of processed, value-added products under the reviews required under this section, the Secretary, not later than 18 months after the initial 3-year period described in such subsections, shall conduct an interim review under this subsection. Such interim and subsequent reviews shall include reports to the appropriate Committees of the Congress concerning those actions that the Secretary has taken during the reporting period to increase exports of United States processed, value-added agricultural products and the plans of the Secretary pertaining to such actions during the subsequent reporting period.".

On page 466, between lines 15 and 16, insert the following new paragraph:

"(10) RELIEF FROM UNFAIR TRADE PRACTICES AGAINST PARTICULAR COMMODITIES.—

"(A) COMMERCIAL EXPORT PROMOTION.—

"(1) AVAILABILITY.—The Secretary shall, if appropriate for each agricultural commodity described in clause (ii), make available some or all of the commercial export assistance that is available under this subtitle to assist in the mitigation or to offset the unfair trade practice serving as the basis for the proceeding described in such subparagraph.

"(ii) APPLICATION.—Clause (i) shall apply in the case of agricultural commodities for which the United States has—

"(I) instituted any dispute settlement proceeding under any international trade agreement;

"(II) been prevented from progressing to a decision in proceedings described in subclause (I) as a result of the failure of a panel to reach a conclusive interpretation of law or the refusal of the party maintaining the unfair trade practice to permit the proceeding to progress; or

"(III) initiated a section 301 investigation into foreign unfair trade practices effecting the article.

"(B) DUTIES OF SECRETARY.—For any agricultural commodity described in subparagraph (A)(ii), the Secretary shall—

"(i) promptly consult with representatives of the industry producing such commodities and other allied groups or individuals regarding specific actions or the development of an integrated marketing strategy that utilizes some or all of the assistance available under this subtitle to assist in the mitigation or to offset the unfair trade practice identified in subparagraph (A)(ii); and

"(ii) ascertain and take into account the industry preference for the practical use of available assistance in implementing subparagraph (A)(i).".

On page 477, between lines 10 and 11, insert the following new section:

"SEC. 407. BUDGET INCENTIVES.

"(a) PROVISION OF ADVISE.—Not later than November 15 of each year, the Secretary shall advise the Secretary of the Treasury and the Director of the Office of Management and Budget concerning the additional United States agricultural exports, including but not limited to exports of value-added agricultural products resulting from the assistance provided by the Secretary under section 302(c)(10).

"(b) ESTIMATION OF REVENUE.—The Director of the Office of Management and Budget shall estimate the amount of additional revenue received by the Treasury as a result of the assistance programs established under this Act to provide for the enhancement of United States processed, value-added agricultural exports.

"(C) DETERMINATION OF BUDGETS.—In determining the budgets of the Department of Agriculture, the President shall, to the maximum extent practicable, provide special consideration for the export assistance programs funded by the Secretary under this Act, based on the increases in Treasury receipts and the balance of payments of the United States with other countries.".

MOYNIHAN (AND OTHERS) AMENDMENT NO. 2361

Mr. LEAHY (for Mr. MOYNIHAN, for himself, Mr. LEAHY, Mr. LEVIN, Mr. D'AMATO and Mr. KASTEN) proposed an amendment to the bill S. 2830, supra, as follows:

At the end of title XIV, add the following:

SEC. . Interagency research, design criteria and eradication program on zebra mussels, Dreissena polymorpha, as they affect the nation's agricultural irrigation systems.

(a) the Secretary of Agriculture and the Assistant Secretary of the Army for Civil Works, in consultation with the Director of the U.S. Fish and Wildlife Service and the Administrator of the Environmental Protection Agency, shall develop a program of research and design criteria for agricultural irrigation systems, with the emphasis on developing techniques and design standards to eradicate and control the effects of zebra mussels in the nation's agricultural irrigation systems.

(b)(1) There are hereby authorized to be appropriated to the Secretary of Agriculture to carry out subsection (a) of this section, the amount of $2,000,000 for each of the five fiscal years beginning with fiscal year 1991.

(2) There are hereby authorized to be appropriated to the Secretary of the Army for Civil Works to carry out subsection (a) of this section, the amount of $2,000,000 for each of the five fiscal years beginning with fiscal year 1991.

SANFORD AMENDMENT NO. 2362

Mr. LEAHY (for Mr. SANFORD) proposed an amendment to the bill S. 2830, supra, as follows:

Add the following section at the end of title IX:

SEC. 9. DISTORTIONS TO WORLD SUGAR TRADE.

Whereas the Senate finds that:

(1) the sugar industry is important to the countries of Latin America, especially in the Caribbean, Central American and Andean regions;

(2) the United States is an important destination for sugar from these countries;

(3) over the past nine years, import quotas have drastically reduced U.S. imports of sugar;

(4) the sugar industry of these countries is in the midst of a prolonged crisis, undermining economic growth and creating political instability;

(5) for the long-term development of these regions, trade is more important than aid;

(6) the export-promotion strategy of these regions can succeed only to the extent that other developed countries increase access to their markets for sugar;

(7) despite requests by regional governments, the international community has not been forthcoming in granting broader market access; and

(8) in light of Latin America's severe economic crisis and its commitment to rebuilding its economies, the international community should remove obstacles to reviving trade.

Therefore, the General Accounting Office shall, no later than October 31, 1990, report to Congress recommendations for policies the United States can adopt to improve and enhance developing countries access to world sugar markets and reduce other distortions to world sugar trade.

GARN (AND RIEGLE) AMENDMENT NO. 2363

Mr. LEAHY (for Mr. GARN, for himself and Mr. RIEGLE) proposed an amendment to the bill S. 2830, supra, as follows:

On page 444, line 20, strike "fiscal" and insert "financial" and strike all from line 24 through line 7 on page 445 and insert the following:

"(3) is the financial institution issuing the letter of credit or a subsidiary of such institution."

SIMON (AND OTHERS) AMENDMENT NO. 2364

Mr. LEAHY (for Mr. SIMON, Mr. CONRAD, Mr. HARKIN, Mr. DIXON, Mr. LUGAR, Mr. BURDICK, Mr. COATS, Mr. DASCHLE, Mr. GORE, Mr. HELMS, Mr. HOLLINGS, Mr. JEFFORDS, Mrs. KASSEBAUM, Mr. LEVIN, Mr. WALLOP, Ms. MIKULSKI, Mr. GRAMM, and Mr. LEAHY) proposed an amendment to the bill S. 2830, supra, as follows:

On page 499, between lines 9 and 10, insert the following new section:

SEC. 1136. SENSE OF SENATE CONCERNING REBALANCING PROPOSAL OF THE EUROPEAN COMMUNITY.

(a) FINDINGS.—Congress finds that—

(1) the success of the agriculture negotiations under the Uruguay Round of the General Agreement on Tariffs and Trade (GATT) is important to the liberalization of world agricultural trade and the development of the markets for United States commodities;

(2) In order to correct distortions and restrictions in world agricultural markets, the participants in GATT negotiations have committed to substantial and progressive reductions in agricultural protection and support;

(3) the history of establishing more market-oriented trade since World War II has been progressive liberalization through a series of multilateral trade negotiations;

(4) the European Community's proposal to "rebalance" import protections could actually permit the European Community to increase import barriers for some products, including products which have enjoyed barrier free trade status as a result of earlier trade negotiations;

(5) this rebalancing proposal could pose a particularly severe threat to United States exports of corn gluten feed and oilseeds to the European Community, products whose duty-free status the European Community has long sought to undercut; and

(6) the European Community market for United States exports of corn gluten feed and oilseeds has been a successful fixture of United States-European Community trade relations for approximately 30 years, and should not be restricted.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that—

(1) the European Community's proposed balancing of import protections is fundamentally at odds with the important goals of liberalizing world agricultural trade and eliminating trade-distorting policies;

(2) such rebalancing could have a particularly severe impact on United States exports of corn gluten feed and oilseeds to the European Community, leaving them vulnerable to unfair treatment and increased trade barriers; and

(3) the United States, throughout the remainder of the Uruguay Round of the GATT negotiations on agriculture, should forcefully reject the European Community's proposal to rebalance import protections.

LEAHY (AND LUGAR) AMENDMENT NO. 2365

Mr. LEAHY (for himself and Mr. LUGAR) proposed an amendment to the bill S. 2830, supra, as follows:

On page 861, between lines 19 and 20, insert the following new subtitle:

SUBTITLE E—AMERICA THE BEAUTIFUL

SEC. 1571. SHORT TITLE.

This subtitle cited as the "America the Beautiful Act of 1990".

SEC. 1572. FINDINGS.

Congress finds that—

(1) trees and forests provide beauty and diversity to both rural and urban landscapes;

(2) trees and forests protect the Nation's soil, water, and wetland resources by filtering runoff and preventing erosion;

(3) trees and forest provide food and cover for many species of wildlife;

(4) trees and forests capture and safely store greehouse gases, thereby reducing the possibility of global climate change;

(5) trees and forests provide shade, block winds, and add moisture to the air, thereby mitigating the urban "heat island" effect and signficantly reducing energy use;

(6) trees and forests make important contributions to the environmental, social, and economic well-being of both rural and urban areas across the Nation; and

(7) stewardship of trees and forests could be significantly enhanced by encouraging, promoting, and supporting partnerships and community service projects involving individuals, youth groups, organizations, businesses and governments at all levels.

SEC. 1573. PURPOSES.

The purposes of this subtitle are to—

(1) authorize the President to designate a private nonprofit foundation as eligible for a one-time grant from the Secretary of Agriculture, to be used for promoting public awareness and a spirit of volunteerism, soliciting private sector contributions, and overseeing the use of these contributions to encourage tree planting projects in communities and urban areas;

(2) promote the principles of basic forest stewardship through the nationwide planting, improvement, and maintenance of trees in order to increase reforestation, enhance the environmental and aesthetic qualities of our Nation's rural and urban areas, and reduce global carbon dioxide levels;

(3) authorize the Secretary of Agriculture to provide increased financial and technical assistance to State forestry agencies and others, and enter into cost sharing agreements with individuals, for the purpose of encouraging owners of nonindustrial private lands to plant and maintain trees and improve forests in rural areas; and

(4) authorize the Secretary of Agriculture to provide increased financial and technical assistance to State forestry agencies and others for the purpose of encouraging units of local government, civic groups, and individuals to plant and maintain trees and improve forests in communities and urban areas.

SEC. 1574. NATIONAL TREE TRUST FOUNDATION.

(a) PURPOSES.—It is the intent of this section to provide for the awarding of a grant to a private nonprofit Foundation to be used for the following purposes—

(1) to solicit, accept, and administer public and private sector grants;

(2) to promote public awareness and a spirit of volunteerism by awarding grants to, and providing organizational support and training for, local community volunteer organizations dedicated to tree planting and the care of trees;

(3) to support the preservation of unique national resources and environments; and

(4) to award matching grants to nonprofit organizations including youth groups for the planting and cultivation of trees to ensure that our descendants may share the pride of their ancestors when referring to their land as "America the Beautiful".

(5) to award matching grants to municipalities that have developed an urban forestry and have demonstrated a capability to provide at least one-half of the total cost of the project or program for which the Foundation funds will be used.

(b) AUTHORITY.—

(1) IN GENERAL.—The President is authorized to designate a private nonprofit organization (hereinafter referred to in this section as the "Foundation") as eligible to receive funds pursuant to subsection (d), after making a determination that such organization is able, consistent with its charter, to carry out the purposes described in subsection (a), and that the officers of such organization have the experience and expertise necessary to direct the activities of the organization.

(2) CONSTRUCTION.—Nothing in this section shall be construed as making the Foundation an agency or instrumentality of the United States, or as making officers, employees, or members of the board of directors of the Foundation officers or employees of the United States.

(c) AMOUNT OF GRANT.—In fiscal year 1991, the Secretary of Agriculture is authorized to make a grant to the Foundation, from amounts appropriated to carry out this subtitle, in an amount that shall not exceed $25,000,000.

(d) USE OF FUNDS.—

(1) IN GENERAL.—Amounts provided under a grant awarded under subsection (c) shall be utilized by the Foundation—

(A) to carry out the purposes described in subsection (a); and

(B) for the administrative expenses of the Foundation incurred in carrying out such purposes.

(2) INTEREST.—Notwithstanding any other provision of law, the Foundation may hold amounts awarded under a grant under subsection (c) in interest-bearing accounts, prior to the disbursement of such funds for the purposes described in subsection (a),

and may retain for such program purposes any interest earned on such deposits.

(e) ELIGIBILITY OF THE FOUNDATION.—

(1) COMPLIANCE.—To be eligible to receive a grant under this section, the Foundation shall agree to comply with the requirements of this section.

(2) CONSISTENCY WITH PURPOSES.—The Foundation may use funds provided under this section only for programs and projects that are consistent with the purpsoes described in subsection (a).

(3) OUTSIDE SOURCES OF COMPENSATION.—Officers and employees of the Foundation may not receive any salary or other compensation for services rendered to the Foundation from any source other than the Foundation.

(4) PROHIBITION ON ISSUANCE.—The Foundation shall not issue any shares of stock or declare or pay any dividends.

(5) COMPENSATION.—No part of the funds of the Foundation shall inure to the benefit of any board member, officer, or employee of the Foundation, except as salary or reasonable compensation for the services or expenses of such member, officer or employee. Compensation for board members shall be limited to reimbursement for reasonable costs of travel and expenses. No director, officer, or employee of the Foundation shall participate, directly or indirectly, in the consideration or determination of any question before the Foundation if such question affects the financial interests of the director, officer, or employee or the interests of any corporation, partnership, entity, or organization in which such director, officer, or employee is an officer, director, or trustee, or in which such director, officer, or employee has any direct of indirect financial interest.

(6) POLITICAL ACTIVITY.—The Foundation shall not engage in lobbying or propaganda for the purpose of influencing legislation and shall not participate or intervene in any political campaign on behalf of any candidate for public office.

(7) GENERAL AUDITS.—For the fiscal year in which the Foundation receives the grant awarded under this section, and for the succeeding 5 fiscal years, the accounts of the Foundation shall be audited annually in accordance with generally accepted accounting procedures by independent certified public accountants or independent licensed public accounts certified or licensed by a regulatory authority of a State or of a political subdivision of the United States. The report of each such independent audit shall be included in the annual report required by paragraph (10).

(8) AGENCY AUDITS.—The financial transactions undertaken under this section by the Foundation may be audited by any agency designated by the President for the fiscal year in which the Foundation receives the grant awarded under this section and for the 5 succeeding fiscal years.

(9) MAINTENANCE OF RECORDS.—The Foundation shall ensure—

(A) that each recipient of assistance provided through the Foundation under this subtitle maintains, for 5 years after the receipt of such assistance, separate accounts with respect to such assistance, and such records as may be reasonably necessary to disclose fully the amount and the disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is provided or used, the amount and nature of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit; and

(B) that the Foundation, the agency designated by the President pursuant to paragraph (8), or any of the duly authorized representatives of the Foundation, shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipient of assistance under this section that are pertinent to the provision and use of such assistance.

(10) ANNUAL REPORT.—Not later than 3 months after the conclusion of each fiscal year, the Foundation shall publish an annual report for the preceding fiscal year. The report shall include a comprehensive and detailed report of the operation, activities, financial condition, and accomplishments of the Foundation under this subtitle. The obligation of the Foundation to publish annual reports under this paragraph shall terminate after publication of the report incorporating the findings of the final audit required by paragraph (9).

SEC. 1575. RURAL TREE PLANTING, FOREST IMPROVEMENT AND STEWARDSHIP PROGRAM.

(a) ESTABLISHMENT.—The Secretary of Agriculture is authorized to establish a rural tree planting, forest improvement and stewardship program as a special component of the Rural Forestry Assistance Program and forest stewardship incentives program established under sections 3 and 4 of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2102) (as amended by subtitle A).

(b) ASSISTANCE.—

(1) IN GENERAL.—In carrying out this section, the Secretary of Agriculture is authorized to provide financial, technical, and related assistance to State foresters and other persons for the purpose of assisting nonindustrial private landowners to plant, maintain, and improve trees and forest resources in rural areas.

(2) EMPHASIS.—Assistance provided by the Secretary of Agriculture under this section shall be used to emphasize tree planting and forest stewardship practices designed to prevent soil erosion, enhance aesthetics and recreational opportunities, improve wildlife habitat, increase timber supplies, reduce the possibility of global climate change, and provide other environmental and economic benefits.

SEC. 1576. COMMUNITY TREE PLANTING AND FOREST IMPROVEMENT PROGRAM.

(a) ESTABLISHMENT.—The Secretary of Agriculture is authorized to establish a community tree planting and improvement program as a special component of the urban forestry assistance program established under section 8 of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2105) (as redesignated by section 1514).

(b) ASSISTANCE.—

(1) IN GENERAL.—In implementing this section, the Secretary of Agriculture is authorized to provide financial, technical, and related assistance to State foresters and other persons for the purpose of assisting units of local government, civic organizations, and individuals to plant, maintain, and improve trees and forests in communities and urban areas.

(2) EMPHASIS.—Assistance provided by the Secretary of Agriculture under this section shall be used to emphasize tree planting and forest improvement practices designed to improve the efficiency of energy use, enhance aesthetics and recreational opportunities, improve wildlife habitat, moderate temperature extremes, reduce the possibility of global climate change, and provide other general environmental benefits that contribute to social well-being and a sense of community.

SEC. 1577. GENERAL PROVISIONS.

(a) ADDITIONAL AUTHORITY.—In carrying out this title, the Secretary of Agriculture may utilize such of the authority provided in section 12 of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2109) (as redesignated by section 1514) as the Secretary may consider appropriate and practicable.

(b) REGULATIONS.—The Secretary of Agriculture may issue such regulations as may be necessary to carry out the provisions of this subtitle.

SEC. 1578.

There are authorized to be appropriated as necessary such sums as may be necessary to implement this subtitle.

KERREY AMENDMENT NO. 2366

Mr. KERREY proposed an amendment to amendment No. 2365 proposed by Mr. LEAHY (and Mr. LUGAR) to the bill S. 2830, supra, as follows:

On page 3, strike lines 2 through 8.
On pages 4 to 9, strike section 1574.

HARKIN (AND DIXON) AMENDMENT NO. 2367

Mr. LEAHY (for Mr. HARKIN, for himself, Mr. DIXON, and Mr. GRASSLEY) proposed an amendment to the bill S. 2830, supra, as follows:

At the appropriate place in the bill, insert the following new section:

SEC. PSEUDORABIES ERADICATION.

(a) FINDINGS.—Congress finds that efforts to eradicate pseudorabies in United States swine populations by the Department of Agriculture in cooperation with State agencies and the pork industry have a high priority and should be continued until pseudorabies is completely eradicated in the United States.

(b) ESTABLISHMENT OF PROGRAM.—The Secretary shall establish and carry out a program for the eradication of pseudorabies in United States swine populations.

(c) USE OF FUNDS FOR TESTING AND CONTROL OF DISEASES AND PESTS.—The Secretary shall ensure that not less than 65 percent of the funds appropriated for any animal or plant disease or pest eradication or control program administered by the Department of Agriculture shall be used for testing and screening of animals or plants and for other purposes directly related to the eradication or control of the animal or plant disease or pest.

(d) APPROPRIATIONS.—There are hereby authorized to be appropriated for each of the fiscal years ending September 30, 1991 through September 30, 1995, such sums as may be necessary for the purpose of carrying out the program established under this section.

FOWLER (AND GORTON) AMENDMENT NO. 2368

Mr. LUGAR (for Mr. FOWLER, for himself and Mr. GORTON) proposed an amendment to the bill S. 2830, supra, as follows:

Beginning on page 924, strike line 21 and all that follows through line 18, page 929, and insert the following:

SEC. 1725. SHORT TITLE.

This may be cited as the "Agricultural Marketing Research and Reform Act of 1990."

SEC. 1726. DEFINITION.

COSMETIC.—The term "cosmetic" means superficial damage to, or alteration of, the exterior appearance of an agricultural commodity that does not significantly affect yield, taste, or nutritional value.

SEC. 1727. STATEMENT OF POLICY.

It is the policy of Congress that federal grade standards for perishable commodities shall be developed with consideration of their impact on farmers' ability to reduce pesticide use and of consumer access to a safe, affordable, abundant, flavorful and nutritious food supply.

It is further the policy of Congress that the Federal Government shall investigate the impact of federal grade standards on pesticide use in agriculture and take appropriate action based on the findings of that research.

SEC. 1728. RESEARCH.

(a) The Secretary of Agriculture shall provide for the conduct of research, through the Economic Research Service and the Cooperative State Research Service, in consultation with other agencies within USDA;

(b) The research shall examine the effects, to the extent listed in the following subsection (c) ("scope of research"), of grade standards and other regulations, as developed and promulgated pursuant to the Agricultural Marketing Act of 1946 (7 U.S.C. 1621 et seq.), and other statutes governing cosmetic appearance;

(c) SCOPE OF RESEARCH.—The primary goal of this research is to investigate the extent to which grade standards and other regulations governing cosmetic appearance affect pesticide use in the production of perishable commodities. The research shall also—

(1) determine pesticide application levels for U.S. perishable commodity production and assess trends and factors influencing those trends of such pesticide application levels since 1975;

(2) determine the extent to which federal grade standards and other regulations affect pesticide use in agriculture for cosmetic appearance;

(3) determine the effect of reducing emphasis on cosmetic appearance in grade standards and other regulations on:

(A) the application and availability of pesticides in agriculture;

(B) the adoption of agricultural practices that result in reduced pesticide use;

(C) production and marketing costs;

(D) domestic and international markets and trade for perishable commodities:

(4) determine the extent to which grade standards and other regulations reflect consumer preferences;

(5) develop options for implementation of food marketing policies and practices that will remove obstacles that may exist to pesticide use reduction, based on the findings of research conducted under this section;

(6) FIELD RESEARCH.—

(A) The Secretary of Agriculture shall implement, not later than 12 months after enactment of this Act, or upon completion of the first phase of the research, a minimum of three, 2-year market research projects, in at least three States, to demonstrate and evaluate the feasibility of consumer education and information programs;

(B) Scope of field research—Research shall be conducted to evaluate programs designed to—

(i) offer consumers choices among perishable commodities produced with different production practices;

(ii) provide consumers with information about agricultural practices used in the production of perishable commodities;

(iii) educate the public about the relationship, as determine in the research conducted under this Act, between cosmetic appearance of perishable commodities and pesticide use.

(d) DISSEMINATION OF RESULTS.—The Secretary of Agriculture shall disseminate to concerned parties the results obtained from prior scientifically valid research concerning federal marketing policies and practices described in this section to avoid any duplication of effort and to ensure that current knowledge concerning such policies and practices is enhanced;

(e) ADVISORY COMMITTEE—

(1) The Secretary of Agriculture shall establish an advisory committee for the purposes of providing ongoing review of the implementation of the requirements in this section and providing the Secretary of Agriculture with recommendations regarding the implementation of those requirements;

(2) MEMBERSHIP.—The Advisory Committee shall consist of twelve members comprising of three representatives from not-for-profit consumer organizations, three representatives from not-for-profit environmental organizations, three representatives from production agriculture and the perishable commodity grower/shipper community, and three representatives from the food retailing sector, each with experience in the policy issues discussed in this section;

(3) The Advisory Committee shall cease to exist no later than September 30, 1993.

(f) REPORT—The Secretary of Agriculture shall report to Congress on the findings of research under this section no later then September 30, 1992 with the exception of the findings under subsection (6) which shall be reported no later than September 30, 1993.

SEC. 1729. CHANGES IN PROCURAL REGULATIONS.

With regard to federal grade standards developing and promulgated pursuant to the Agricultural Marketing Act of 1946 (7 U.S.C.1621 et seq.), the Secretary of Agriculture shall—

(1) take into account the impact of these standards on perishable commodity growers' ability to reduce the use of pesticides;

(2) provide for citizens outside of the perishable commodity industry fair and reasonable opportunity to formally petition a change in grade standards;

(3) provide for a comment period after a formal petition to change grade standards has been made to enable all interested parties to submit information. The Secretary of Agriculture shall evaluate the information and consider it in the revision process;

(4) provide interested parties with annual status reports, updated upon request, on all pending grade standard changes the Department of Agriculture is considering.

SEC. 1730. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out the activities required under this Act, $4,000,000 for each fiscal year.

KASSEBAUM (AND DASCHLE) AMENDMENT NO. 2369

Mr. LEAHY (for Mrs. KASSEBAUM, for herself and Mr. DASCHLE) proposed an amendment to the bill S. 2830, supra, as follows:

On page 328, between lines 12 and 13, insert the following new subsection:

(d) TREATMENT OF MULTIYEAR PROGRAM CONTRACT PAYMENTS.—Effective beginning with the date of enactment of this act, the Food Security Act of 1985 is amended by inserting after section 1001C (7 U.S.C. 1308-3) the following new section:

"SEC. 1001D. TREATMENT OF MULTIYEAR PROGRAM CONTRACT PAYMENTS.

"(a) IN GENERAL.—Notwithstanding any other provision of law, in the event of a transfer of ownership of land (or an ownership interest in land) by way of devise or descent, the Secretary of Agriculture may, if the new owner succeeds to the prior owner's Conservation Reserve Program contract (entered into pursuant to title XII of this Act), make payments to the new owner under such contract without regard to the amount of payments received by the new owner under any Conservation Reserve Program contract executed prior to such devise or descent.

"(b) LIMITATION.—Payments made pursuant to this section shall not exceed the amount to which the previous owner was entitled to receive under the terms of the contract at the time of the death of the prior owner."

BURNS (AND CONRAD) AMENDMENT NO. 2370

Mr. LUGAR (for Mr. BURNS, for himself and Mr. CONRAD) proposed an amendment to the bill S. 2830, supra, as follows:

In S. 2830, on page 490, line 23, insert the following new section:

SEC. 1124. DURUM WHEAT IMPORTS.

(a) The Secretary of Agriculture shall conduct a study of the impact on domestic durum wheat growers of the importation of durum wheat from Canada into the United States.

(b) By no later than 1 year after the date of enactment of this Act, the Secretary of Agriculture shall submit to the Congress a report on the study conducted under subsection (a).

BURNS AMENDMENT NOS. 2371 AND 2372

Mr. LUGAR (for Mr. BURNS) proposed two amendments to the bill S. 2830, supra, as follows:

In S. 2830, on page 490, line 23, insert the following new section:

SEC. 1124. ALFALFA SEED IMPORTS.

(a) The Secretary of Agriculture shall conduct a study of the impact on domestic alfalfa seed growers of the importation of alfalfa seed from Canada into the United States.

(b) By no later than 1 year after the date of enactment of this Act, the Secretary of Agriculture shall submit to the Congress a report on the study conducted under subsection (a).

In S. 2830, on page 1081, line 10, add the following new section:

"SEC. . USDA'S OFFICE OF TRANSPORTATION.

(a) It is the sense of Congress that the United States Department of Agriculture's Office of Transportation should continue as an independent office and take the lead in addressing agricultural transportation issues. The USDA's Office of Transportation should actively participate in efforts to

seek solutions to present and future rail transportation problems. This is especially important for the purpose of maintaining and improving U.S. agriculture's competitive position in the world marketplace. Likewise, USDA, through the Commodity Credit Corporation is a major shipper of grain. During periods of rail car shortages CCC loses the flexibility it needs to properly administer federal government farm programs. Grain rail car shortages can interfere with the PL-480 program, government food donation efforts and the efficient transfer of government grain stocks to private ownership.

(b) It is the sense of Congress that USDA's Office of Transportation should assist in ensuring that adequate numbers of grain rail cars are available on an equitable and timely basis to preserve the competitiveness of U.S. agricultural producers.

(c) It is the sense of Congress that availability of adequate and timely rail transportation for all of this nation's agricultural areas permits farmers and our rural communities to maximize the benefit of prices received from end-user to producer. Conversely, when rail transportation is not available on an adequate and timely basis, farmers and rural communities are forced to seek, and rely upon, expensive government programs rather than the marketplace.

WARNER AMENDMENT NO. 2373

Mr. WARNER proposed an amendment to the bill S. 2830, supra, as follows:

On page 803, on line 1, insert;

"SEC. 1496. CLOSED-SYSTEM AQUACULTURE.

(a) In order to gain further knowledge of intensive water recirculating aquaculture systems, the Secretary may make grants for the purpose of further developing and expanding aquaculture research facilities at Virginia Polytechnic Institute and State University at Blacksburg, Virginia, and to conduct such programs as are necessary to do basic and applied research for intensive water recirculating aquaculture systems.

"(b) There is authorized, in the event the Secretary decides to take action under paragrah (a), to be appropriated the sum of $500,000, or such funds as are available, for the facility for fiscal years 1991 through 1995 to carry out the provisions of this section.".

EXON AMENDMENT NO. 2374

Mr. EXON proposed an amendment to the bill S. 2830, supra, as follows:

On page 309, between lines 9 and 10, insert the following:

"(j) IMPLEMENTATION.—The Secretary shall ensure that the program established under this section shall be implemented in such a manner that will:

"(1) Minimize potential loan forfeitures;

"(2) Minimize the accumulation of oilseed stocks by the Federal Government;

"(3) Minimize the cost incurred by the Federal Government in storing oilseeds; and

"(4) Allow oilseeds produced in the United States to be marketed freely and competitively, both domestically and internationally.".

STEVENS (AND THURMOND) AMENDMENT NO. 2375

Mr. STEVENS for himself and Mr. THURMOND) proposed an amendment to the bill S. 2830, supra, as follows:

At page 811, insert the following at line 19 and renumber subsection (2) through (5) appropriately:

"(2) develop and contract for the development of field arboretums, greenhouses, and tree nurseries, in cooperation with the State, to facilitate production and distribution of tree seeds and seedlings in states where the Secretary determines that there is an inadequate capacity to carry out present and future reforestation needs.".

SYMMS AMENDMENT NO. 2376

Mr. LEAHY (for Mr. SYMMS) proposed an amendment to the bill S. 2830, supra, as follows:

At the appropriate place in title IV, insert the following new section:

"SEC. 40. NONDISCRETIONARY AUTHORITY.

"Any provision of this Act relating specifically to the authority of the Secretary to adjust the payments due to producers of barley for the 1988 and 1989 crop years shall be nondiscretionary.".

HARKIN (AND OTHERS) AMENDMENT NO. 2377

Mr. HARKIN (for himself, Mr. GRASSLEY, and Mr. DIXON) proposed an amendment to the bill S. 2830, supra, as follows:

On page 1081 of the bill, insert the new section:

SEC. 1947. PSEUDORABIES ERADICATION.

(a) FINDINGS.—Congress finds that efforts to eradicate pseudorabies in United States swine populations by the Department of Agriculture in cooperation with State agencies and the pork industry have a high priority and should be continued until pseudorabies is completely eradicated in the United States.

(b) ESTABLISHMENT OF PROGRAM—The Secretary shall establish and carry out a program for the eradication of pseudorabies in United States swine populations.

(c) USE OF FUNDS FOR TESTING AND CONTROL OR DISEASES AND PESTS.—The Secretary shall ensure that not less than 65 percent of the funds appropriated for any animal or plant disease or pest eradication or control program administered by the Department of Agriculture shall be used for testing and screening of animals or plants and for other purposes directly related to the eradication or control of the animal or plant disease or pest.

(d) APPROPRIATIONS.—There are hereby authorized to be appropriated for each of the fiscal years ending September 30, 1991 through September 30, 1995, such sums as may be necessary for the purpose of carrying out the program established under this section.

DURENBERGER AMENDMENT NO. 2378

Mr. DURENBERGER proposed an amendment, which was subsequently modified, to the bill S. 2830, supra, as follows:

At the end of title XII, add the following:

SECTION 1. (a) FINDINGS.—The Congress finds that—

(1) Federal policy, as reflected in the Food, Agriculture, Conservation and Trade Act of 1990, to protect the Nation's wetlands and ground water from loss or degradation is of vital importance to American agriculture and to the country as a whole;

(2) Wetlands reduce floods, improve ground and surface water quality, and provide recreational areas and habitat for fish and wildlife;

(3) Ground water provides drinking water to 50 percent of the Nation's population or 117 million Americans, and that 97 percent of Americans in rural areas rely on untreated ground water for their household needs;

(4) Government regulations protecting and preventing ground water from contamination and wetlands from loss or degradation have been developed piecemeal by several different Departments and agencies and as a result are complex and confusing often leaving landowners uncertain as to their duties and obligations and the resources at risk;

(5) There is a need for a national strategy that coordinates and strengthens the Nation's ground water and wetlands protection efforts; and

(6) Key conservation provisions in the Food, Agriculture, Conservation and Trade Act of 1990 go a long way toward protecting wetlands and ground water, and any new legislation involving wetlands and ground water protection should recognize these gains.

(b) SENSE OF THE CONGRESS.—It is the sense of the Congress that—

(1) Federal agricultural policy should reflect environmental policy and concerns;

(2) Wetlands loss or degradation and ground water contamination should be discouraged by Federal, State, and local governments; and

(3) The upcoming reauthorization of the Federal clean water programs should—

(A) emphasize a policy designed to prevent wetlands loss and ground water contamination.

(B) provide consistent and understandable regulations that will give landowners greater certainty as to their duties and responsibilities for protecting wetlands and ground water; and

(C) strengthen the Nation's ground water and wetlands protection laws.

NOTICES OF HEARINGS

SUBCOMMITTEE ON GOVERNMENT CONTRACTING AND PAPERWORK REDUCTION

Mr. BUMPERS. Mr. President, the Subcommittee on Government Contracting and Paperwork Reduction of the Committee on Small Business has scheduled a hearing for Friday, July 27, 1990. The purpose of the hearing is to receive additional testimony regarding the concerns of small business government contractors relating to increasing competition from Federal prison industries. The hearing is to be held in the committee's hearing room, SR-428A, commencing at 9:30 a.m. It will be chaired by Senator DIXON, chairman of the subcommittee.

Federal prison industries [FPI], also referred to by its tradename UNICOR, is a Government-owned corporation that centrally manages a chain of 72

workshops located at 41 correctional facilities operated by the Federal Bureau of Prisons. FPI employs an inmate workforce of nearly 14,000. These industrial operations are used principally to combat idleness in the Federal inmate population.

The output of these workshops are sold to the Federal Government in direct competition with small business concerns. FPI is already a very large Government player in the Federal procurement market. According to FPI's 1988 annual report, its sales in 1988 totaled $335.9 million. If FPI were ranked among the top 100 Federal contractors for fiscal year 1988, FPI would have ranked 58th, just ahead of Chrysler Corp. Its sales for fiscal year 1989 were $360.7 million, and FPI has announced plans for further growth to meet the expected expansion of the Federal inmate population. FPI is presently forecasting growth to $427 million in total sales for fiscal year 1992.

Mr. President, small businesses also emphasize the unfairness of the competition from FPI. Under Federal procurement regulations implementing FPI's statute (18 U.S.C. 4124), FPI is a "required source of supply," giving it precedence over all other sources in meeting the needs of Federal agencies. Agencies are required to offer to FPI the opportunity to fulfill the Agency's need for a product or service found in FPI's schedule of products and services, before offering the contracting opportunity to the private sector. The small business community has come to call this FPI's "super preference." Since FPI's activities are concentrated in approximately 250 products and services out of the millions of different items bought annually by Federal agencies, FPI's impact falls intensely on only narrow segments of the Federal market.

FPI has been expanding its activities both by increasing its market share in existing product lines and by entering new markets. This has alarmed additional segments of the small business community. On July 18, 1990, the subcommittee received testimony from six small business government contractors who had personally experienced what they persuasively asserted was unfair competition from FPI. These firms furnish an array of products to various Federal agencies, most notably the Department of Defense, which is FPI's largest customer. Included among the product lines being pressured by FPI's expansion are: various forms of office and other furniture; draperies; various other forms of textiles, including a broad range of military clothing; footwear, especially combat boots and military shoes; wire and cable harnesses for various DOD applications; and envelopes. Their testimony cited the highly preferential manner in which FPI is permitted to participate in the Federal procurement process as a root cause of their charges of unfair competition from FPI.

Mr. President, the small business community has cited an additional cause for their deepening concern about competition from the Federal prisons. On July 11, 1990, the Senate passed the omnibus crime bill, S. 1970. As passed, this bill includes an amendment establishing mandatory work requirements for Federal prisoners. The provision identifies four broad categories for expanded work activities by Federal convicts: State and local public works and infrastructure repair; construction and maintenance of prisons and other detention facilities; prison industries; and other appropriate labor. The amendment establishes a Federal Private Sector/Prison Industry Enhancement [PIE] Program and expands the non-Federal PIE Program from 20 prison projects to 50 prison projects. Items manufactured through the Federal PIE Program could be sold commercially, unlike the products of FPI. The manufacturing and other activities undertaken under the new Federal PIE Program would be separate from, and in addition to the expanded activities undertaken through FPI. The amendment to S. 1970 also specifically authorizes the Federal Bureau of Prisons to furnish convict labor to private business concerns under contract through both the new Federal PIE Program and the existing FPI program. Finally, the explanatory material accompanying the amendment specifically encouraged the Federal Bureau of Prisons and FPI to focus on shoe manufacturing, textiles, and electronic assembly work, industry sectors already very hard hit by foreign competition.

Mr. President, during this Friday's hearing, the subcommittee will be hearing from Mr. Robert Q. Millan, the member of FPI's Board of Directors representing the Department of Defense. The concerns of a number of labor unions will be presented by Segundo Mercado-Llorens, director of government affairs for the United Food and Commercial Workers International Union. Testimony is to be presented by representatives of some of key national small business organizations, including the National Federation of Independent Business [NFIB], the Small Business Council of the U.S. Chamber of Commerce; and the Small Business Legislative Council [SBLC]. Finally, testimony will be received from small business dealers and contractors who furnish screenprinting services, two additional groups that have experienced FPI's unfair competition.

Further information concerning this subcommittee hearing may be obtained from the Committee's Procurement Policy Counsel, William B. Montalto; Bill may be reached at 224-5175.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON LABOR AND HUMAN RESOURCES

Mr. LEAHY. Mr. President, I ask unanimous consent that the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Wednesday, July 25, at 10 a.m., for a hearing on medical devices.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PUBLIC LANDS, NATIONAL PARKS AND FORESTS

Mr. LEAHY. Mr. President, I ask unanimous consent that the Subcommittee on Public Lands, National Parks and Forests of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate, 2 p.m., Wednesday, July 25, 1990, for a hearing to consider the findings and recommendations contained in two recent reports concerning the management and operation of the National Park Service's Concessions Program. The two reports are: "Report of the Task Force on National Park Service Concessions," April 9, 1990, prepared at the request of the Secretary of the Interior, and "Follow-up Review of Concessions Management, National Park Service," Report No. 90-62, April 1990, prepared by the Inspector General of the Department of the Interior.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY RESEARCH AND DEVELOPMENT

Mr. LEAHY. Mr. President, I ask unanimous consent that the Subcommittee on Energy Research and Development of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate, 9:45 a.m., Wednesday, July 25, 1990, for a hearing to receive testimony on the current operations and future mission of the Department of Energy's National Laboratories.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. LEAHY. Mr. President, at the July 25 business meeting, the committee will consider the following:

Agenda No. 9, S. 2555, to amend the Wild and Scenic Rivers Act by designating a segment of the Lower Merced River in California as a component of the National Wild and Scenic Rivers System.

Senator BUMPERS will circulate an amendment in the nature of a substitute.

Agenda No. 10, H.R. 2174, to provide for the establishment of the Mississippi River Corridor Study Commission, and for other purposes.

Amendments may be offered.

Agenda No. 13, S. 2680, to provide for the relief of certain persons in Stone County, AR, deprived of property as a result of a 1973 dependent resurvey by the Bureau of Land Management.

Senator BUMPERS will circulate an amendment in the nature of a substitute.

Agenda No. 15, nomination of Paul L. Ziemer to be Assistant Secretary for Environment, Safety and Health, U.S. Department of Energy.

Agenda No. 16, nomination of Calvin A. Kent to be Administrator of the Energy Information Administration, U.S. Department of Energy.

Agenda No. 17, nomination of David H. Leroy to be Nuclear Waste Negotiator, Office of the Nuclear Waste Negotiator.

The committee may also consider any other items ready for action.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. LEAHY. Mr. President, I ask unanimous consent that the full committee of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate, 9:30 a.m., Wednesday, July 25, 1990, for a business meeting to conduct pending calendar business.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. LEAHY. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate, Wednesday, July 25, 1990, at 10 a.m. to conduct a hearing on financial service developments in Europe and Japan in the context of considering measures to modernize America's financial services industry.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON NATIONAL OCEAN POLICY STUDY

Mr. LEAHY. Mr. President, I ask unanimous consent that the full Committee/National Ocean Policy Study, of the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on July 25, 1990, at 1:15 p.m. on S. 2044, Dolphin Protection Consumer Information Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

SURFACE TRANSPORTATION SUBCOMMITTEE

Mr. LEAHY. Mr. President, I ask unanimous consent that the Surface Transportation Subcommittee, of the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on July 25, 1990, at 9:30 a.m. on reauthorization of the Hazardous Materials Transportation Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. LEAHY. Mr. President, I ask unanimous consent that the Select Committee on Indian Affairs be authorized to meet on July 25, 1990, beginning at 1 p.m., in 485 Russell Senate Office Building, to consider for report to the Senate S. 1980, the Native American Repatriation of Cultural Patrimony Act and S. 2340, the Indian Child Protective Services and Family Violence Prevention Act, to be followed immediately by a hearing on S. 2770, the Indian Finance Corporation Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. LEAHY. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, July 25, at 1:30 p.m. to hold an ambassadorial nomination hearing.

Townsend B. Friedman, Jr., to be Ambassador to the People's Republic of Mozambique.

Kenneth N. Peltier, to be Ambassador to the Federal and Islamic Republic of the Comoros.

Genta H. Holmes, to be Ambassador to the Republic of Namibia.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. LEAHY. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, July 25, at 4 p.m. to hold an ambassadorial nomination hearing.

Edward W. Gnehm, Jr., to be Ambassador to the State of Kuwait.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON COURTS AND ADMINISTRATIVE PRACTICE

Mr. LEAHY. Mr. President, I ask unanimous consent that the Subcommittee on Courts and Administrative Practice of the Committee on the Judiciary, be authorized to meet during the session of the Senate on Wednesday, July 25, 1990, at 1:30 p.m., to hold a hearing on S. 2465, the Antiterrorism Act of 1990.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

HUMAN RIGHTS IN ROMANIA

● Mr. DECONCINI. Mr. President, over 1 month has now passed since the violent suppression of peaceful protests in Bucharest in mid-June. My colleagues in the U.S. Commission on Security and Cooperation in Europe—the Helsinki Commission—and I have written to Romanian President Iliescu to express our concern over the Government's continuing repression of the opposition.

The Helsinki Commission sent a delegation to the Copenhagen Meeting of the CSCE Conference on the Human Dimension, where we expressed in the strongest terms our disappointment over the grave setbacks to Romania's nascent democracy. At that time, we raised with the head of the Romanian delegation the cases of Marian Munteanu, Nica Leon, and Dumitru Dinca, as well as the scores of others in detention at the time.

We understand that Messrs. Munteanu, Leon, and Dinca remain in detention, along with 185 others. We have received disturbing reports that the detainees have not had adequate access to their families or legal counsel. We also understand that some, including Mr. Munteanu, urgently require medical care.

Last month, the Romanian Government joined its 34 partners in the CSCE in adopting the Concluding Document of the Copenhagen Meeting. That document affirms that the participating CSCE states "are determined to support and advance those principles of justice which form the basis of the rule of law. They consider that the rule of law does not mean merely a formal legality which assures regularity and consistency in the achievement and enforcement of democratic order, but justice based on the recognition and full acceptance of the supreme value of the human personality and guaranteed by institutions providing a framework for its fullest expression.

We hope that the Romanian Government will demonstrate its commitment to the Copenhagen principles not only by obeying its own laws, but also by seeking to exercise justice. The previous Romanian regime consistently belittled the value of human beings. The present Government can reawaken respect for human dignity in Romania.

Mr. President, what impressed this Commission most about the University Square demonstrators was their repeated insistence that their protest remain nonviolent. The independent groups representing the democratic opposition, including the Group for Social Dialogue, the students' leagues, the Fratia independent trade union confederation and the Alliance for the Proclamation of Timisoara have emphasized the importance of nonviolence to the democratic movement, and have repeatedly called for a dialog.

We in the Helsinki Commission second that call for a constructive approach to addressing the opposition's and Government's concerns. In our letter to President Iliescu, we request-

ed that the Romanian Government release the detainees pending the upcoming trials, and provide them with necessary medical care. Second, we expressed the hope that the Romanian Government will initiate a roundtable involving representatives of the democratic opposition. As the parliament gets down to the important task of writing a constitution, this roundtable could aid in healing the deep wounds which afflict Romanian society. Third, we encouraged the Government to permit the press to operate freely, as only a truly free press can guarantee the free flow of information on which democracies are based. We look forward to Mr. Iliescu's response to our requests, made in a spirit of cooperation.

Helsinki Commission Cochairman STENY HOYER and I, as well as other colleagues in the House and Senate, had the opportunity last week to meet with eight representatives, of Romania's fledgling independent press. These courageous journalists—Stelian Tanase, chief editor of the Group for Social Dialogue's 22 weekly; Radu Eugeniu Stan, general secretary of Expres newspaper; Leonard Constantin Opera, from Astra magazine; Stefan Niculescu-Maier, section chief of Romania Libera newspaper; Mircea Mihaies, chief editor of Orizont magazine; Lazar Madaras, chief editor of Brassoi Lapok magazine and deputy in the newly elected Romanian parliament; Eugen Cojocaru, deputy director of "Editura Clusium"; and Petre Barbu, editor of Flacara magazine—are on the front lines of the struggle to build a democracy in Romania. As they point out, the independent press can validate the idea that the expression of different opinions is vital for a free society. They emphasized that the free flow of information between Romania and the outside world is likewise essential to strengthening Romania's nascent civil society.

Mr. President, we must continue to press the Romanian Government to honor the human rights commitments it has made to its people and to the international community. At the same time, we should establish as many direct links as possible with Romania—through professional and educational exchanges, the provision of information, and financial and moral support for the institutions of civil society. Let us bear these means of advancing Romanian democracy in mind as we explore alternatives for aid to Eastern Europe.●

REMARKS BY JACK KEMP, SECRETARY, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

● Mr. MACK. Mr. President, I would like to submit for the RECORD a thoughtful speech recently given by Secretary of Housing Jack Kemp at the Wealth of Nations: 1990 World Business Conference in Edinburgh, Scotland.

In his address, Secretary Kemp reflects upon the timeless principles of democracy and free markets as conceived by Adam Smith and Thomas Jefferson. Ultimately, he suggests, it is the people, acting freely and entrepreneurially, who create the wealth, opportunity and prosperity that define a free market society. The role of government, therefore, is to protect these freedoms, the Secretary emphasizes, and to invite economic growth to end poverty.

The remarks follow:

REMARKS BY SECRETARY JACK KEMP

A DEMOCRATIC CAPITALIST MANIFESTO AND AN INQUIRY INTO THE NATURE AND CAUSES OF THE WEALTH OF CITIES, EDINBURGH, SCOTLAND, JUNE 29, 1990

Ladies and gentlemen, I am honored to be able to address this Wealth of Nations: 1990 World Business Conference. It is fitting that we should hold this conference in Edinburgh, Scotland, so close to the place where Adam Smith last looked upon this earth 200 years ago.

Yet, if he were here today, I suspect that even more than the speeches, Smith would be thrilled by the fact that Europe is celebrating the occasion by re-embracing the principles and ideas he espoused in his *An Inquiry into the Nature and Causes of the Wealth and Nations.* Indeed, isn't it incredible that the whole world is beginning to rediscover the timeless truths and ideas he laid out in 1776!

Just imagine . . . since the dawn of history . . . all at once . . . in exactly the same year . . . within a few months of each other . . . from opposite sides of the Atlantic . . . two inspired men . . . one a professor of moral philosophy, the other the fiery architect and poet of American Independence . . . gave the world the twin pillars of free society—the moral and inalienable rights to political and economic freedom. Smith's *The Wealth of Nations* and Jefferson's Declaration of Independence were then and remain today the greatest charters of freedom ever written.

Adam Smith and Thomas Jefferson didn't write a recipe for just individuals to gain wealth; they didn't write just for Anglo-Saxons, Americans, and English-speaking industrialized nations; they didn't describe how America or Britain alone could be free and create wealth and opportunity. They gave witness that free men and women in countries large or small, in any hemisphere or climate, no matter what their color or creed could govern themselves and create wealth, prosperity, and opportunity for all time to come.

In the 19th century, Abraham Lincoln's greatest insights concerning the rights of all human beings to democracy and equality of opportunity came right out of Jefferson and Smith. He said, "Any people anywhere, being inclined and having the power, have the right to rise up, and shake off the existing government, and form a new one that suits them better. This is a most valuable—a most sacred right—a right, which we hope and believe is to liberate the world."

America's foreign policy, and that of our friends and allies in Europe and Asia, has, at its best, long sought to advance the cause of freedom and democracy around the world. But two great things have changed since the end of the Second World War. Europe and Japan have prospered, as we had hoped, and taken their rightful place as world powers. Second, the Soviet Union now holds out to us the hope that it will not be the threat to political order in the future that it has been in the past.

Today, while we do not have to use exactly the same means to achieve a free international order, it is essential, in my view, to maintain and strengthen our friendships and alliances. We must also open our minds, as well as our borders, to the possibilities that lay to the East and to the South.

At this moment of such dramatic change in the world order, it has become increasingly fashionable for some on both sides of the Atlantic to claim that America's ideas and influence in the world are waning. From Yale Professor Paul Kennedy to French minister Jacques Attali, we hear of the "decline of America." Oddly enough, this thesis is just the opposite of Attali's countryman Jean Jacques Servan-Schreiber, who wrote two decades ago with great alarm about an American challenge which he said was threatening to dominate Europe's future.

Both views are not only factually wrong, but in my opinion, extremely naive and pessimistic. But one thing we must say of Mr. Attali and other doomsayers is that at least they are consistent. As a good and loyal socialist, Mr. Attali appears to have little understanding of Smith. He views political economy as essentially a zero-sum game, hence his emphasis on government welfare and redistribution of existing wealth, rather than the creation of new wealth by free people, free markets, free trade, and free democratic societies.

Minister Attali's latest thesis merely transfers this zero-sum theory to politics. In his view, apparently there is only so much greatness to go around. Thus for Europe to gain, America must lose; and for America to prosper, Asia must suffer. (or reduction ad absurdum . . . America will become but the breadbasket of Europe.)

My friends, this notion is antithetical to all we've learned about what makes nations great. Is Mr. Attali arguing that America would be a greater nation if we had done all in our power to prevent the postwar recoveries of France, Britain, Germany, and Japan? Does he seriously believe America would be more important if it were the only wealthy nation in a world of mediocrity? Surely, America is better off as a prospering nation in a thriving international economy, just as a thriving global economy is a benefit to America.

Fortunately, most Americans and Europeans agree with Adam Smith's teaching that the growth of Europe is good for America, and the growth of America is good for Europe. And I believe profoundly that a strong Asia is good for both America and Europe. In fact, as Presidents Bush and Salinas expand the trade relationship between the U.S. and Mexico in a western hemisphere free trade zone—like the one we have with Canada—and someday soon extend it to Central and Latin America, the Pacific Rim nations and Eruope will also share in new markets and new prosperity from expanding global trade.

The facts do not bear out a dismal picture of the world in which the United States is becoming an enfeebled economic power, losing its leadership in the world.

To the contrary, the last eight years have witnessed a tremendous economic expansion

that is the longest in U.S. peacetime history. The U.S. economy is nearly a third larger than it was a decade ago. U.S. manufacturing productivity is now remarkably near to that of Japan in the 1980s. Since 1981, more than 21.5 million jobs have been created—more jobs than have been created in the last decade in all of Europe, Canada, and Japan combined. More than four million new business enterprises, relatively low inflation, and higher standards of living for most of our people testify to the strength of the U.S. economy. And, according to the U.S. Treasury figures, federal income taxes paid by the top one percent of taxpayers has surged by over 80%.

I am particularly pleased to have been helpful in rediscovering the supply-side principles of classical economics. We dramatically lowered the marginal tax rates from 70% down to 28%. And, if a Democratic Congress would give President Bush his recommended reduction in the capital gains tax, the impact would be even more dramatic.

The U.S. has problems, to be sure. But the U.S. budget deficit has already dropped significantly, measured as a portion of the total economy. And the U.S. trade deficit, often cited as a sign of weakness, is in reality a symbol of capital flight from abroad seeking the thriving and profitable opportunities for new investment in the United States.

The U.S. savings rate, often cited as a sign of overconsumption is also misunderstood. It is simply arithmetic to figure out that when the U.S. economy expands by one third and the U.S. savings rate remains roughly constant, that the U.S. savings pool has accordingly expanded significantly over the last eight years. In addition, savings figures alone are no assurance, nor measure of prosperity. Witness the Soviet Union and other command economies which have enormous pools of savings, but few opportunities either to spend those funds or invest them in productive activities.

With all due respect, it's not the economy of the United States that is in decline, nor is it the entrepreneurial capitalist model. Professor Paul Kennedy and the other pessimists should have been writing about the decline of state directed economies.

At Stanford University, on his recent visit to America, President Gorbachev admitted that the cold war is over, but then suggested that it doesn't matter who won it. Well, with all due respect, it does matter—it matters a great deal who won and why. I hasten to add that our arms and missiles didn't win the cold war—it was the power of western ideas, the triumph of liberal democracy and free market economies over the stifling hand of communist and socialist economies and dictatorships.

Isn't it incredible that in Moscow, more people are lining up at McDonalds than at Lenin's Tomb! I was fascinated recently seeing on satellite TV, demonstrators carrying a banner in Red Square that read "Workers of the world, we're sorry . . . We've seen the future, it doesn't work." I've recently read that Mayor Gavril Popov wants to turn downtown Moscow into a free-enterprise zone and turn public housing over to the residents. Pyotr Filipov of the Leningrad City Council is even more explicit—he says "we must quickly hurry through Marxism-Leninism, through Socialism, to *Reaganism*!"

By now you're wondering why President Bush's Secretary of Housing and Urban Development is so passionate and outspoken about the cause of spreading democracy and entrepreneurial capitalism around the world. Well, ever since President Bush appointed me, I've been travelling across the United States and visiting thousands upon thousands of poor people living in some of the most desolate and despair-ridden communities in the world.

I've been struck by how similar the problems of America's inner cities are to those of Eastern Europe and even Third World economies. Ironically, both are suffering from the same malady. The malady is socialism.

Because, you see, in America we really have two economies. One economy—our mainstream economy—is democratic capitalist, market-oriented, entrepreneurial, and incentivized for working families whether in labor or management. The mainstream economy rewards work, investment, savings, and productivity. Incentives abound for productive human, economic, and social behavior.

But there is another economy—a second economy—that is similar in respects to the Eastern Europe or Third World "socialist" economy, if you will. It is almost totally opposite to the way people are treated in our mainstream capitalist economy, and it predominates in the pockets of poverty throughout urban and rural America. This economy has barriers to productive human and social activity and a virtual absence of economic rewards.

In the U.S., government tax, regulatory, and entitlement programs, set-up out of a desire to help the poor, in reality have led to a counterproductive economy. Instead of independence, they led to dependency. In an effort to minimize pain, they maximized welfare bureaucracy and social costs that are near pathological.

We in the Bush Administration are making a private sector war on poverty one of our highest priorities. We believe that strengthening the link between effort and reward, increasing incentives for entrepreneurship, job creation, homeownership, and private property can restore hope and opportunity to people in inner city pockets of poverty. We believe that ideas such as Enterprise Zones, where the capital gains tax rate would be eliminated in distressed communities; turning low-income people into homeowners; abolishing income and Social Security taxes on low-income workers; and expanding low-income housing vouchers can help create that ladder of opportunity out of poverty. These are the policies that can work not just in inner cities, but in less developed countries across the world.

I believe we're at a point in history when what we know about creating wealth and opportunity in America's inner cities can work not only in America, but in Eastern Europe; and not only in Europe, but in the Third World, and indeed, in the Soviet Union itself.

Conventional wisdom on the left and the right all too often says the same thing about both inner city America and Eastern Europe—they're both incredibly poor . . . lacking skills and resources . . . too much debt . . . and underdevelopment . . . where recovery, if possible at all, will be painful, hard to endure, and of such duration that not much can be done for either except inject massive doses of government assistance and promise redistribution of wealth. But, ladies and gentlemen, this is exactly the same thing people said and believed about post-war West Germany.

Too few remember that in contrast to today, West Germany and all of Western Europe were paralyzed and prostrate in 1945. People had to stand in endless lines waiting for rations of food and other essentials. Their life savings and pensions could only be redeemed in worthless currency. Barter was a way of life. There were price and wage controls, but few jobs, little production, and virtually no investment.

Devastated post-war Berlin was the essence of a zero-sum society. History records that young men fought with senior citizens for food scraps in the ruins and trash bins. The Reichsmark was all but abandoned and replaced by the "Zigaretten Wirtschaft" or cigarette economy. A carton of Lucky Strikes became a unit of account. Food, construction costs, workers' wages . . . just about everything was priced in cigarettes. The German press speculated about a possible U.S. loan of 50 million cartons of cigarettes to support the worthless Reichsmark!

People were losing hope that life would ever rise above this bleak level. In the United States there were worries that democracy itself would fail if prosperity could not be restored. And all of a sudden, something happened.

A finance minister who had studied and read the 18th century writings inquiring into "the nature and causes of the wealth of nations" came to the forefront. In just a few strokes of incredible political courage, vision, and entrepreneurship, Ludwig Erhard changed the course of German history and thus Western hopes for reconstruction.

On one day in June, the 20th of June, 1948, he reformed the currency by abolishing the Reichsmark and substituting the Deutschemark. He crushed inflation by tying the new currency *de facto* to the stable exchange rate system worked out at Bretton Woods and thus established the integrity of this new West German numeraire.

Henry Wallich, a one time U.S. Federal Reserve Board member, in his book, *The Mainsprings of German Revival* wrote "[T]he spirit of the country changed overnight. The grey, hungry and dead-looking figures wandering about the streets in their everlasting search for food came to life as, pocketing their 40 D-marks, they went on their first spending spree."

On June 22, because inflation had pushed West German people into extremely high tax rates, Erhard indexed the tax brackets to apply to high incomes, dramatically lowering effective tax rates.

On July 7, he abolished rationing, cancelled hundreds of regulations, and eliminated wage and price controls—against the advice of the U.S. State Department and the military command.

According to the history books, within a year, West German workers were eating more and better food than those in austerity-ridden Britain, which had turned to Socialist government, and, incidentally, had received more Marshall aid. In two years West Germany's real income increased 40 percent. By 1952 her exports had risen 600 percent. Over 12 years from 1950 to 1962, while the U.S. GNP was increasing a healthy 50%, West Germany's rose at a rate five times our own—247 percent. Within a generation an autocratic nation twice defeated in the century's most destructive wars had become not only a strong democracy and a world economic power, but a trusted friend and ally.

What caused this wirtschaftswunder—this economic miracle? Well, first of all, it was not a miracle! Cancellor Adenauer and his Economics Minister Ludwig Erhard both

said the Marshall Plan had little to do with it. They didn't try socialism, and it wasn't some government industrial policy. It certainly wasn't a World Bank or IMF-imposed austerity program.

Ludwig Erhart did not discover some magic formula or experience a sudden utopian vision. He simply, yet profoundly applied the socially responsible free market prescriptions of Adam Smith's classical economics.

He established a stable currency, and maintained its integrity as a storehouse of value and unit of account.

He allowed the markets to work freely in setting prices and wages, and in allocating resources by eliminating, in one bold stroke, all rationing and price controls.

He dramatically reduced the steeply graduated tax rates on working, saving, investing, and producing.

He applied orderly principles of law to private property, patents, and contracts.

And, he began to weave a safety net to take care of those who, for one reason or another, couldn't take care of themselves.

Erhard's reforms all rested on one fundamental principle of democracy: that prosperity, wealth, and opportunity can only be created by people acting freely and entrepreneurially—by strengthening the people and relying on their talents and potential—not government planning. Ladies and gentlemen, the key to wealth, and prosperity is allowing people freedom—freedom to work, to save, freedom to own their own property and homes, to succeed, and yes, to fail, but try again. The ultimate cause of the wealth of nations, and indeed, the wealth of cities, is people.

In my view, Eastern Europe's problems are no worse than those of post-war West Germany. The governments of Eastern Europe cannot expect to bring back growth without using the same classical economic approaches that restored prosperity to West Germany, helped revitalize the American economy under the policies of Ronald Reagan, and indeed are the hallmark of the dynamic nations of the Pacific Rim.

Eastern Europe really doesn't need more development banks; it doesn't need industrial policies; it doesn't need government-to-government grants and massive infusions of Marshall-style aid. The people themselves are a source of wealth. All they need is opportunity and the ideas that have been creating wealth and entrepreneurship in the West since the age of Adam Smith.

In what George Gilder, in his book, Microcosm, called the quantum age of the new technology, our greatest assets are not the wealth we see around us, but in the potential which is unseen in the economy of the human mind. With computers able to transmit the entire information contained in the U.S. Library of Congress in literally a flash of light, the capitalist market place has left the centrally-directed economies in the dustbin of history. The new waves of technology and the information revolution have left the socialist economies with but one choice: transform or descend into perpetual decline.

As President Bush said in his inaugural address: "We know what works—freedom works . . . We know how to secure a more just and prosperous life for man on earth: through free markets, free speech, free elections, and the exercise of free will unhampered by the state." The most important lesson of history is that the right policies lead to the right results.

Yet the sudden shift away from communist and socialist central planning has sometimes resulted in great pessimism about the world order. Here are people who have lived with the heavy boot of government central planning and dictatorship on their necks for some forty or fifty years—suddenly breathing the air of freedom and hope—only to be told by some in the West that what they will experience is years of pain and unemployment, sacrifice and difficulty.

To use an example from the left, Alexander Cockburn says that free market reforms would condemn Eastern Europe to permanent third-rate status. He offers no better solution than replacing hard Soviet socialism with "soft" Swedish socialsim.

Jeffrey Sachs from Harvard, using the conventional wisdom, advised Poland's first noncommunist government to impose devaluations and austerity. Poland increased taxes, rationed credit, postponed privatizatoin of enterprises, imposed strict wage controls, dramatically devalued the zloty, raised consumer prices, and crushed demand, causing so much pain and bickering that the great movement of Solidarity is breaking up into factions and disputes.

The Washington Post recently reported that the IMF is prescribing what it always prescribes—dramatic price increases in return for imposing more burdensome debt on overextended governments and people.

Well, you can't enrich poor nations by impoverishing their people. Indeed, neither Eastern Europe nor the U.S.S.R. is poor. There is tremendous wealth, creativity, and innovation in their people. After all, it is the mind and talents of a free people—not their material resources—which is the source of all wealth. The answer to poverty is not austerity. Nor is the answer international welfare. The real answer is economic growth that flows from the freedom if individuals are to work, save, invest in each other, and produce new wealth. The role of government is to protect these freedoms, and in so doing invite economic growth and an end to poverty.

This means preserving the value of the people's money, not cheating them out of their savings through devaluation. This will encourage them to produce and save more.

This means defending their property rights through the rule of law, so the people need not fear the confiscation of the fruits of their labors. This will encourage them to labor more.

This means levying taxes carefully, permitting the people to keep as much of their production as possible, thereby encouraging them to produce more.

This means taxing solely to raise revenues for the legitimate needs of the state, not to punish wealth and success to promote egalitarian ends.

This means preserving the competition of the marketplace at all levels of enterprise, resisting the impulse to protect big business and state enterprise at the expense of young and small entrepreneurs who can ultimately create most of the new wealth.

These are the lessons we have learned in the West in the last 200 years, beginning with the linkage of Jeffersonian democracy and Adam Smith's economic system of natural liberty. We have relearned and refined these lessons most recently with Ludwig Erhard's miracle in Germany, Ronald Reagan's revolution in the United States, Margaret Thatcher's revitalizaton of Great Britain, and now with President Bush's call for the 90s to be the decade of global democracy.

Looking beyond Europe 33 years ago, the great visionary and leader, Winston Churchill, predicted that "As long . . . as the free world holds together . . . and maintains its strength, Russia will find that Peace and Plenty have more to offer than exterminatory war . . . It may well be if wisdom and patience are practiced that Opportunity-for-All will conquer the minds . . . of mankind." How prophetic Churchill was! Just to survive, the Soviet Union must eventually adopt democratic capitalism and free markets. As champions of freedom, we who have long supported socially responsible free enterprise will be the first to welcome Russia back into the family of nations.

In fact, I hope to return to Scotland to help celebrate the ultimate fulfillment of Adam Smith's revolutionary ideal. Because he discovered the "nature and causes of the wealth of nations." we can increasingly look ahead to a world becoming even more united in freedom and democracy, peace and prosperity.●

TRIBUTE TO LESLIE J. MASSEY

● Mr. LUGAR. Mr. President, for more than 40 years Leslie J. Massey has worked tirelessly for the betterment of the deaf community. His constant service and caring assistance have been felt by a countless number of deaf citizens. The drive and conviction with which Les has sought to help deaf and hearing impaired individuals have resulted in the successful completion of a grand scope of accomplishments.

Les spent his youth in Lafayette, IN, as a champion boxer. His own deafness never hindered his athletic ability and certainly never stood in the way of his determination to work for the deaf community later in life. He attended the Indiana School for the Deaf, where he graduated salutatorian in 1943. Continuing his education, Les received his B.A. from Gallaudet College in 1948, and in 1961 was awarded his M.S. in education from Butler University.

For 35 years, Les served as an instructor at the Indiana School for the Deaf, where he also coached football, basketball, and track for 28 of these 35 years. His many years of teaching and coaching have helped in distinguishing Les as one of the most committed and influential leaders within the deaf community.

Throughout his life, Les has been involved with an endless number of organizations for the deaf in which he has consistently held office. He is a member of the Indiana Association of the Deaf [IAD] where he has served as both president and treasurer. Les also belongs to the National Association of the Deaf [NAD], the Registry of Interpreters for the Deaf [RID], and the Greater Indianapolis Deaf Club in which he has served as treasurer, secretary, and vice president.

Similarly, Les has remained an active alumnus of both the Indiana School for the Deaf and Gallaudet College, while also remaining involved with the Indiana State Teachers Asso-

ciation and the National Education Association. He has served as a volunteer in numerous capacities, ranging from teaching sign language classes to organizing sporting events in which deaf individuals participated.

Leslie Massey is an extraordinary person who continues to play an important role in working to benefit deaf and hard of hearing individuals. Through his deep concerns and many accomplishments, Les has made invaluable contributions to the entire deaf community.●

EXECUTIVE SUMMARY OF TO REPROCESS OR NOT TO REPROCESS: THE PUREX QUESTION

● Mr. ADAMS. Mr. President, today I am submitting for the RECORD an executive summary of a report recently published by the Hanford Education Action League on the Plutonium-Uranium Extraction [PUREX] Facility in Hanford, WA. The report is entitled "To Reprocess or Not to Reprocess: The PUREX Question," and was written by Scott Saleska and Arjun Makhijani of the Institute for Energy and Environmental Research.

I have long had questions about the best way to dispose of the remaining 2,100 metric tons of highly radioactive fuel from N-reactor operations at Hanford. To date, the Department of Energy has inadequately examined options for dealing with this fuel other than running it through PUREX. This report serves to broaden the debate over means of treating this fuel. I commend the Hanford Education Action League for commissioning this study and the State of Washington for making the funding for the report available.

The executive summary follows:

EXECUTIVE SUMMARY

INTRODUCTION

From December 1963 until 1988 the primary mission of the N-reactor at the U.S. Government's Hanford Reservation was the production of plutonium for federal nuclear weapons and research programs. Plutonium was produced as the reactor's fuel rods were irradiated; later, after the rods were withdrawn from the reactor and allowed to cool, plutonium was separated along with uranium in a chemical separation process known as PUREX (*P*lutonium-*UR*anium *EX*traction).

Until recently, the existing stock of highly radioactive used fuel (generally referred to as irradiated or spent fuel) from the N-reactor was intended to provide plutonium for the U.S. nuclear weapons program. A variety of factors, however, (including reduced international tensions, impending arms control cuts, and the cancellation of a proposed plutonium isotopic refining plant in Idaho known as SIS) have combined to reduce the need for this plutonium for weapons purposes. Since the U.S. Department of Energy (DOE) has acknowledged that it will not produce more plutonium for weapons for many years, the primary concern today for the disposition of this fuel is for environmental, safety, and health factors. Another consideration is the cost of the various options.

The N-reactor is now in a state of cold shutdown as a result of a DOE decision in early 1988 to permanently close the reactor because of safety problems raised in the aftermath of the explosion of the Soviet Union's Chernobyl nuclear station in April 1986. At the time of the 1988 decision to close the reactor, approximately 2,800 metric tons of irradiated fuel was stored in water basins awaiting reprocessing at Hanford's PUREX plant.

The safe and environmentally responsible reprocessing of irradiated nuclear fuel has always been a complex, difficult process because of the combination of radiological and chemical hazards involved, and PUREX has been plagued by many environmental and safety problems. The accumulating problems eventually caused its emergency shutdown in the middle of a reprocessing run in late 1988. Since then, PUREX has not operated except to finish up and clear out the remains of the aborted 1988 reprocessing run.

Currently there are approximately 2,100 metric tons of highly radioactive irradiated fuel from the N-reactor in storage. This fuel is currently stored in two water pools known as the K-basins. The fuel in basin K-West is encapsulated in sealed water-filled containers, while the fuel in the K-East basin is in open containers which leave it in direct contact with the basin water, which has become highly contaminated and has in the past leaked into the environment.

This study focuses on the question of what to do with this remaining irradiated fuel. This in turn involves both interim management and long-term management questions. There are three main options available for interim management of N-fuel:

Reprocess N-fuel at PUREX or a similar reprocessing plant, extracting the plutonium and uranium in the process, and converting most the rest of the spent fuel material into high-level and low-level radioactive wastes. Much of the low-level wastes would be discharged to the ground, while the high-level wastes would be stored and subject to ongoing management in Hanford's high-level waste tanks and waste processing activities;

Continue to store N-fuel underwater in storage basins with encapsulation of exposed fuel elements to protect against continued radioactive contamination of the basin water; or,

Transfer N-fuel to new dry storage facilities where fuel elements would be stored in enclosed casks under a suitable cover gas such as argon or helium.

The latter two of these options would leave the plutonium in the fuel unrecovered. All three interim options would require eventual permanent disposition of high-level radioactive waste, either in the form of containerized spent fuel rods, or in some other form such as vitrified glass (planned by DOE for high-level liquid reprocessing waste) or possibly containerized N-fuel material in an oxidized form. According to current U.S. policy, such disposition will eventually involve permanent emplacement of the waste in a deep underground repository. This is currently scheduled to begin in the year 2010, assuming the one site currently under investigation at Yucca Mountain, Nevada proves to be suitable and can be licensed by the U.S. Nuclear Regulatory Commission.

In late 1989, Westinghouse Hanford Company, the principal federal contractor at the Hanford site, released a study—"the Westinghouse Study" (WHC 1989c)—outlining several options for N-fuel management and purporting to address the question of which one to adopt. This study was based in part on a 1982 DOE Environmental Impact Statement on PUREX operation (DOE 1982), and has also been supplemented by an April 1990 study examining the non-PUREX options in somewhat greater detail (WHC 1990c).

The Westinghouse documents concluded that the most desirable option for the safe, environmentally sound, and cost-effective management of the remaining N-reactor fuel is the re-start of PUREX to reprocess it. Westinghouse further concluded that continued underwater storage of N-fuel in the basins "is not considered environmentally responsible," [1] and that the PUREX option will resolve the problem of N-fuel management the quickest by clearing all N-fuel out of basin storage by 1995.

With regard to the non-PUREX options, Westinghouse found that all "are technically possible," but that all were also "subject to regulatory and legislative guidelines/controls and more detailed engineering studies that can not be fully evaluated until the decision process begins." "In the interim," Westinghouse concludes, "we are continuing to plan on processing all of the N-Reactor spent fuel through the PUREX plant." [2]

Westinghouse also noted that all non-PUREX N-fuel storage options would probably be subject to federal law [3] requiring that an Environmental Impact Statement (EIS) be conducted prior to implementation, and that "[t]he single exception to the EIS requirement would be processing through PUREX as is currently planned." (WHC 1990c, p. 2.)

SUMMARY OF FINDINGS

There are two specific areas of findings in this study regarding the management of Hanford's irradiated N-reactor fuel. The first relates directly to the approach to this issue taken by Westinghouse and DOE and the methodology and content of studies supporting that approach. The second relates to the inherent technical and policy questions surrounding options for N-fuel management, which to a large extent, exist regardless of how DOE and Westinghouse deal with them.

A. Assessing the DOE/Westinghouse approach

Analysis of DOE management over the last decade reveals serious flaws in the approach being taken toward N-fuel management. Specifically, our principal findings with regard to the DOE approach to the N-fuel management problem are as follows:

1. The principal environmental need purportedly addressed by PUREX operation—i.e., the clean out of spent N-fuel from the water basins—is a product of DOE's past neglect. To the extent that water basin storage is now an environmental problem, it is largely one of DOE's own making, one

[1] Cover letter from J.C. Fulton, Manager, Chemical Processing Programs of Westinghouse Hanford Company to J.R. Hunter, Director of Operations at U.S. DOE—Richland, transmitting WHC 1989c (Dec. 13, 1989).

[2] Cover letter from W.G. Ruff, Deputy Manager, Defense Operations Division of Westinghouse Hanford Company to J.R. Hunter, Director of Operations at U.S. DOE—Richland, transmitting WHC 1990d (April 13, 1990), p. 1.

[3] The National Environmental Policy Act (NEPA), 42 U.S. Code, Sections 4321 *et seq.*

whose present-day urgency could have been foreseen and responsibly addressed long ago by the implementation of sounder fuel storage techniques.

2. The main Westinghouse study, conducted for DOE which called for PUREX operation as an environmental clean-up measure (WHC 1989c) is based on distorted and incomplete analysis. Our primary findings are that it downplays the feasibility of what may be the least dangerous option (dry storage) and ignores the most serious dangers to the public (the potential explosion of high-level water tanks).

3. The DOE/Westinghouse statement that PUREX will resolve the problem of N-fuel the fastest is highly misleading. On the one hand, the Westinghouse study implies that once reprocessing activities at PUREX are complete (by about 1995, it is claimed) resolution is achieved—an attitude which ignores the liquid high-level radioactive reprocessing wastes. On the other hand, it is implied that the non-reprocessing options do not resolve the problem until around 2010, the time of final disposal.

In fact, dry storage of N-fuel is an interim option which could remove N-fuel from the K-basins in the same timeframe as assumed for PUREX.

In any case, no conceivable interim option for N-fuel management resolves the problem before permanent disposition is achieved, since *all* options result in significant quantities of high-level radioactive waste or spent fuel which must be managed for the long term.

4. The tone of the Westinghouse Study implies a relatively urgent need to clear out spent N-fuel from the water basins which is not explained. Although it is fairly clear that by modern environmental standards, continued storage of N-fuel in the water basins under current conditions would not be considered "environmentally responsible" (as Westinghouse notes), there is no basis that we are aware of for concluding that continued underwater storage of N-fuel in an encapsulated form is any more environmentally irresponsible than reprocessing at PUREX; indeed, there is some reason to conclude that PUREX operation would be more environmentally irresponsible than continued N-fuel storage in K-basins (see Findings 4 and 5 in part B, below).

5. The cost figures used in Westinghouse's cost-comparison are speculative and not sufficiently developed to permit a reasonably accurate cost comparison to be made, much less to provide a basis for a definitive conclusion regarding a "least cost" option. Moreover, by failing to use standard financial cost-comparison techniques which are so basic they would be familiar to any sophomore-level student of financial planning, Westinghouse has produced a highly distorted cost picture which reduces PUREX costs relative to the non-PUREX options.

6. The Westinghouse study predicts high costs for the no-reprocessing options in large part because PUREX is assumed to be maintained in a costly stand-by until after the turn of the century. This assumption is programmatically absurd because it yields higher PUREX costs if PUREX does not operate than if the plant is used to reprocess N-fuel.

7. In fact, contrary to the conclusions of the Westinghouse study, an adjusted cost analysis based on the order-of-magnitude Westinghouse cost-data implies that the operation of PUREX may be among the most costly options for managing N-fuel.

Taken together, these flaws invalidate the conclusions of the Westinghouse study, and appear to indicate that the analysis was more a cavalier exercise in after-the-fact rationalizaiton of a decision already made to operate PUREX thatn an honest attempt to address the environmental problems posed by N-reactor fuel. Evidence for such an attitude is found in the testimony of a DOE contractor before a DOE advisory panel, in which the decision to re-start PUREX was explained as follows:

"I don't know that we debated it extensively but at least we bought off on the idea it is better to process that fuel whether you need the material or not than to leave it in the K-basin. . . . Transporting the fuel to some other location didn't strike us as a good alternative. Without what I would call detailed debate, we basically bought off on the idea that yeah, processing it was the best thing you could possibly do with that fuel." [4]

That same cavalier attitude permeates the official evaluation of options. Thus, the need for a serious, complete, and competently conducted analysis which would measure all N-fuel management options against objective criteria remains as strong as ever.

The National Environmental Policy Act (NEPA)—the primary federal law intended to encourage the kind of sound, far-sighted environmental decision-making that DOE appears to be avoiding in this case—would require the completion of just such an analysis in the form of a supplementary Environmental Impact Statement (EIS). Instead of adopting this approach, however, DOE has so far denied that the law applies to the re-start of PUREX as a clean-up machine; indeed, Westinghouse has even gone so far as to cite NEPA as just another example of one of the regulatory hurdles that would apply to all no-PUREX options for N-fuel management, but would not apply to PUREX operation itself.[5] Such an attitude—which seems to view an EIS as simply a regulatory hurdle rather than an opportunity for sound and comprehensive environmental decision-making—is perhaps another example of the narrow approach of DOE and Westinghouse to the PUREX question which resulted in such a deeply flawed study in the first place.

In any case, the fact is that the EIS requirements are not so clear-cut as Westinghouse asserts. The legal applicability of NEPA to the new plans for PUREX is a matter of some debate, and has not yet been determined by the courts.[6]

In sum, an examination of the approach taken so far by DOE and Westinghouse with regard to N-fuel management and PUREX operation reveals fundamentally inadequate technical analysis, a cavalier attitude towards issues of the most serious nature, and a narrow-minded reluctance to consider the intent of environmental law. The DOE record so far on the PUREX question indicates that DOE Secretary Watkins' attempts to change the culture of DOE have so far been ineffective, at least on this question.

B. Assessing technical and policy issues regarding N-fuel management

Based on a preliminary review of the data, and on past experience in the U.S. and Britain with the management of spent nuclear fuels and high-level nuclear wastes, we have reached several tentative conclusions about the technical and policy aspects of N-fuel management. It should be emphasized that because of constraints of time and financial resources, these findings are, of necessity, preliminary in nature. There is still a need for a more detailed, quantitative risk assessment. Specifically, our approach does not incorporate probabilistic risk analysis, but focuses instead on the conclusions which can be drawn based primarily on evaluation of the relative magnitude of possible consequences associated with proposed options. The utility of such an analysis is that it can be useful in defining the important questions which need to be further addressed in a subsequent and more detailed risk assessment.

Our principal findings regarding technical and policy issues can be divided into short-term and long-term issues as follows:

Short-Term Management Issues

1. There is no magic bullet. N-fuel was not designed for extended storage, and no option for its management is without risks. Indeed, these risks appear (regardless of the option considered) to be greater than those which would be associated with comparable options implemented with commercial spent fuel.

2. The highest-consequence potential hazards for public health and the environment appear to be associated with the operation of PUREX. Specifically, the highest-consequence hazard appears to be the explosion of a waste tank containing the high-level liquid wastes from PUREX which, depending on the explosive force generated, could result in extensive radioactive contamination.

3. It appears that the dry storage of N-fuel under a dry inert gas such as helium or argon may well be the lowest-risk method for interim on-site management of N-fuel. Because the question of final waste disposal form is left open for future determination, this approach also makes no assumptions concerning repository availability or location.

4. Even in the absence of dry storage, there is reason to conclude that the environmental consequences of PUREX operation will be comparable if not worse than continued storage in the water basins, based on PUREX's routine radioactive emissions alone. For example, although the two events are not strictly comparable, the activity level of routine discharges of radioactivity to the environment (air and ground) from PUREX during its last year of operation was greater than the accidental levels of radioactive discharge from the K-East basin which last leaked in the late 1970's.

5. Encapsulation of all currently exposed N-fuel (a prospect which was apparently considered and rejected around 1980 because it was anticipated that PUREX would clean out the K-East basin by the mid 1980's) would considerably reduce the probability of leakage of radioactivity to the environment. According to current PUREX operating standards, however, PUREX operation will result in eventual radioactive discharges to the environment with virtual 100 percent certainty.

---

[4] DOE Contractor Dana Powers, before the Advisory Committee on Nuclear Facility Safety, (Feb. 20, 1990), pp. 209-210. Available from U.S. Department of Energy, 1000 Independence Ave SW, Washington, DC 20585.

[5] As mentioned in the introduction, one recent Westinghouse document (WHC 1990c, p. 2) noted that the "single exception to the EIS requirement would be processing through PUREX as currently planned."

[6] Several citizen groups have indicated their intent to bring legal action against DOE if it does not agree to conduct an Environmental Impact Statement according to NEPA requirements. See NRDC 1990.

6. The option which would generate the greatest total volume of radioactive waste across all categories is the operation of PUREX. The ultimate volume of high-level waste (assuming it has been converted to its final vitrified glass form) generated by reprocessing would be roughly comparable to the volume of N-fuel, but the volume of low-level radioactive wastes generated by reprocessing would be immensely greater than for any other option for N-fuel disposition.

In sum, significant risks which exceed the limits of acceptability in modern commercial nuclear practice are inherent in virtually all options for managing N-fuel. However, a preliminary consideration of the options based on a "minimum possible environmental consequence" approach indicates that PUREX operation (and thus, adoption of reprocessing tank wastes and glass as an indefinite on-site storage form) is imprudent, particularly in the name of clean-up and increased safety. This is especially true in light of the existence of several interim storage alternatives which appear preferable to reprocessing at PUREX.

Long-Term Management Issues

1. There are unavoidable uncertainties which apply to all options regarding the long-term or permanent disposition of N-fuel. A principal reason for this is the large uncertainties associated with the development of a permanent solution for the disposition of high-level radioactive wastes and spent fuel in the U.S. According to current U.S. policy, such disposition will take place some time after the year 2010 by the permanent emplacement of high-level wastes and spent fuel in a deep underground repository at a site known as Yucca Mountain, Nevada, which is being developed by the DOE.

2. However, DOE's Yucca Mountain program suffers from numerous problems, and the suitability of the site itself remains in question, not to mention the date of availability. Additional uncertainty pertains to the compatibility of N-fuel (in any of its possible forms, including glass) with the Yucca Mountain environment.

3. Interim management options—such as upgraded storage in water basins or storage in dry casks—which maintain N-fuel in its current form provide the greatest technical flexibility for resolving the uncertainties associated with long-term disposal.

RECOMMENDATIONS

After consideration of the above findings, including the apparent dangers associated with PUREX operation, high-level waste generation and management, ongoing N-fuel storage, and other considerations, our preliminary recommendation are as follows:

A. Short-term management

1. Because the highest-consequence hazards appear to be associated with reprocessing, and because alternative methods for N-fuel management are available, PUREX should not restart.

2. Regardless of the method of N-fuel management ultimately adopted, underwater storage of N-fuel will continue in the K-basins for at least five years. Therefore, encapsulation of exposed N-fuel should proceed as soon as possible to minimize the risk associated with continued underwater storage.

3. Because preliminary information indicates that dry storage under helium, argon, or other suitable gas may be the most desirable option for interim management of N-fuel, preliminary design work on dry storage facilities for N-fuel should begin as soon as possible;

B. Long-term management

1. Because maintaining N-fuel in its current form provides the greatest flexibility in the face of long-term disposal uncertainties, remaining N-fuel should not be reprocessed. Thus, long-term considerations reinforce recommendation 1 in Part A, above, that PUREX should not operate.

2. In order for any DOE proposal for PUREX as a clean-up operation to be taken seriously, it should include plans for the permanent disposition of the separated plutonium along with the high-level and other wastes generated. This is the only way that DOE can assure observers that plutonium production is not the real motive for PUREX operation.

C. Issues for further study

Simultaneous with encapsulation of exposed N-fuel in the K-basins and initiation of detailed dry storage design work, an independent study (as could be mandated by Congress or conducted by the National Academy of Sciences) is needed to more precisely characterize and compare the risks inherent in options for N-fuel management. Such an analysis should include detailed consideration of:

1. Interim Measures for N-fuel Management. More detailed, quantitative consideration is needed of interim measures based on their relative environmental risks. Examination of such measures should include consideration of the following:

(a) Relative Risks of N-fuel Storage Forms. A comparison of the relative risks and costs associated with the interim storage options for maintaining N-fuel in its current form. Specifically, a comparison should be made between continued storage of N-fuel in K-basins (assuming upgrade of water storage via encapsulation of currently exposed fuel elements) and dry storage of N-fuel in new facilities;

(b) PUREX as Waste Conversion Facility. Further consideration of PUREX is probably not necessary. However, if DOE intends to further consider PUREX operation, the plant needs to be viewed as a waste treatment operation for converting N-fuel to high-level waste. From this perspective, PUREX needs to be compared with the other interim management options on the basis, not only of plant operation, but of the environmental risks and costs associated with low-level waste disposal, ongoing management of high-level waste in tanks, and with eventual vitrification of these wastes.

(c) Waste Tank Explosion risks associated with PUREX operation. Since it has not done so previously, DOE needs to undertake a complete assessment of the Soviet Kyshtym waste tank explosion and its lessons for the U.S. in terms of the consequences and probabilities of catastrophic tank explosions. Such an assessment should include consideration of the mechanism of radiolytic generation of hydrogen and failure of tank ventilation systems as a source of tank explosion risk.

(d) Ability of each option to comply with existing environmental law. Currently, even in shut-down mode, PUREX is in violation of federal hazardous waste law (RCRA). The ability of other options for N-fuel management to comply with existing federal law needs to be evaluated and compared to PUREX operation.

(e) Uranium metal Fires in all N-fuel Management Options. The risk of uranium metal fires associated with each option for the management of N-fuel needs to be fully evaluated (including risks for dry storage, oxidation, and reprocessing). In addition, the magnitude of risk probabilities associated with metal fires in each option needs to be estimated, so that it can be compared with the risks of fires in other options for managing N-fuel. It is not sufficient to simply state, as DOE has done in the past, that the risk is "small."

2. Compatibility of Interim with Long-Term Measures. The analysis should include consideration of the compatibility of interim management options with the potential problems associated with the development of long-term measures for the permanent disposition of N-fuel. Optimal interim options, from this perspective, would be those which minimize risks even in the absence of assumed repository availability and whose final waste form can be determined when final disposal conditions become more certain. Less desirable would be those interim management options which foreclose long-term options, or result in waste forms that would be more difficult to change if final disposal conditions are different from those currently assumed.

Consideration of these issues is necessary to ensure risk minimization even in the face of repository development uncertainties. Included under this category should be analysis relating to:

(a) Direct disposal for N-fuel. The direct disposal of N-fuel needs to be explicitly considered as one of the options for its management and compared on an equal basis to other long-term options. Consideration should be given in this process to the approach of viewing the waste canister and surrounding overpack as equal in importance to geologic isolation for achieving long-term containment.

(b) Potential disposal problems associated with vitrified glass waste forms. DOE needs to address the potential difficulties associated with the repository disposal of vitrified glass, especially in the Yucca Mountain environment.

(c) Possible sensitivity of waste form to repository location or nature of host-rock.

3. Complete life-cycle costs of each option. A competent cost assessment is needed that compares the costs of each option.

4. Options for irradiated FFTF and Shippingport fuels. Options for the disposition of FFTF and Shippingport fuels need to be weighed in the same way as options for N-fuel before a conclusion can be drawn regarding the safest and most cost-effective option.●

STEEL SUBSIDY NO. 7: INDONESIA

● Mr. HEINZ. Mr. President, over the past few weeks, I have spoken about a widespread problem in international steel production: the use of subsidies by many countries to support their domestic firms. As I have previously documented, subsidization is practiced in every region of the world and by most steel producers.

I would like today to turn to Indonesia—another wildcard country that is using subsidies. In my remarks of June 21, I referred to Turkey as such a wildcard because it has neither a voluntary restraint agreement, nor a bilateral consensus agreement with the United States and thus has no guidelines to insure that its steel trade with the United States is conducted on a level

playing field. The same holds true for Indonesia, and American steelmakers are the loser because of it.

In April, 1989, the Indonesian Government injected $75 million in equity and loans into that Nation's only cold-rolling mill, CRMI. According to the recently released report, "Steel at a Glance," another $357 million infusion is under consideration. Secondly, Krakatau, the state-owned integrated steelmaker, has increased its 1990 expansion project and plans to partially fund this work through loans from government banks.

Actions like these are intolerable market distortions and are the intended target of the President's efforts to forge an international consensus on steel production. But without cooperation from all parties, an agreement will remain out of reach. Renewed attempts must be made both to reach a global accord which includes these wildcard producers and to enforce existing pacts completely. The Trade Agreements Compliance Act, which Senator BAUCUS and I and others have introduced, will go a long way to accomplishing the latter task. Our steel industry can meet and beat any competitor in the world today, if free and fair trade is practiced. To this end, I urge Senators' support for President Bush's steel initiative and for the Trade Agreements Compliance Act.●

ORDERS FOR TOMORROW

Mr. LEAHY. Mr. President, on behalf of the majority leader, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9 a.m., Thursday, July 26; that following the prayer, the Journal of proceedings be approved to date; that the time for the two leaders be reserved for their use later in the day; that upon reservation of the two leaders' time there be a period for morning business not to extend beyond 10 a.m., with Senators permitted to speak therein for up to 5 minutes each; and that Senators NUNN and REID be recognized for up to 15 minutes each; and I further ask unanimous consent at 10, when the Senate resumes S. 2830, that Senator LAUTENBERG be recognized to offer an amendment relating to pesticides.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 9 A.M. TOMORROW

Mr. LEAHY. Mr. President, if there is no further business to come before the Senate, I now ask unanimous consent the Senate stand in recess under the previous order until 9 a.m., Thursday, July 26, 1990.

There being no objection, the Senate, at 10:59 p.m., recessed until Thursday, July 26, 1990, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate July 25, 1990:

SUPREME COURT OF THE UNITED STATES

DAVID H. SOUTER, OF NEW HAMPSHIRE, TO BE AN ASSOCIATE JUSTICE OF THE SUPREME COURT OF THE UNITED STATES, VICE WILLIAM JOSEPH BRENNAN, JR., RETIRED.

DEPARTMENT OF STATE

EDWARD P. BRYNN, OF VERMONT, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF COUNSELOR, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO BURKINA FASO.

RYAN CLARK CROCKER, OF WASHINGTON, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF COUNSELOR, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO THE REPUBLIC OF LEBANON.

DEPARTMENT OF THE TREASURY

JEROME H. POWELL, OF NEW YORK, TO BE AN ASSISTANT SECRETARY OF THE TREASURY, VICE DAVID W. MULLINS, JR., RESIGNED.

EXTENSIONS OF REMARKS

ITALIAN-AMERICAN HERITAGE AND CULTURE MONTH

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. ENGEL. Mr. Speaker, today I would like to take the opportunity to introduce, along with 103 of my colleagues, a bipartisan piece of legislation designating October, 1990 as Italian-American Heritage and Culture Month. This resolution will pay tribute to the experiences and achievement of Italian-Americans in this country. This commerative legislation will continue a tradition I initiated last year when Congress, for the first time, passed and the President signed a resoltuion designating October, 1989 as Italian-American Heritage and Culture Month.

The Italian-American community is one of the largest ethnic groups in the United States representing over 20 million American citizens. Their experiences are not unlike those of other immigrant groups who have journeyed to our shores seeking greater opportunities and a new and better life. Italian-Americans, like other immigrant groups, have aspired to the attainment of the American dream and their contributions have helped shape the great tapestry of the United States.

The designation of October as Italian-American Heritage and Culture Month will honor Christopher Columbus and his unique place in American history and will feature the many contributions and achievements of Italians and Italian-Americans in every facet of life in these United States. In addition, a key objective of this commemoration will be to acquaint the American public with the lesser known personages such as William Paca, an original signer of the Declaration of Independence, Philip Mazzei, credited with coining the Declaration of Independence phrase, "All men are created equal," Enrico Fermi, one of the early pioneers of nuclear physics, and others who have contributed so much to the development of our country.

There are many Italian-American groups and organizations throughout the country which greatly contribute to the progress and prosperity of our Nation on a yearly basis. These organizations are planning special programs and events during the month of October in conjunction with Italian-American Heritage and Culture Month. These events will bring to the attention of the public the great contributions Italian-Americans have to our society.

Mr. Speaker, it is with great honor and pride that I propose this legislation. I wholeheartedly urge my colleagues to join me in designating October 1990 as "Italian-American Heritage and Culture Month."

H.R. 4000, THE CIVIL RIGHTS ACT OF 1990, IS PRO-WOMEN'S RIGHTS

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 25, 1990

Mr. HAWKINS. Mr. Speaker, the Civil Rights Act of 1990 is largely restorative in nature, but it also achieves equity for women by conforming the remedies available under Federal law for intentional discrimination. Currently, only racial minorities may recover compensatory and, in particularly egregious cases, punitive damages. Our society holds gender, religious and national origin discrimination to be just as reprehensible, but victims of these types of intentional job bias cannot recover such damages under Federal law. The Civil Rights Act of 1990 would fill this gap in title VII's remedial scheme.

The current gap discourages many victims from filing suit to enforce their rights. As one Federal judge has recognized:

There is little incentive for a plaintiff to bring a title VII suit when the best that she can hope for is an order to her supervisor and to her employer to treat her with the dignity she deserves and the costs of bringing her suit. One can expect that a potential claimant will pause long before enduring the humiliation of making public the indignities which she has suffered in private • • • when she is precluded from recovering damages for her perpetrators' behavior.

Even if they file suit, and prove a violation of title VII, many women are not made whole for their injuries. What good is a legal right without an effective remedy to enforce its breach?

The employer lobby warns that adding damages to title VII will trigger a litigation explosion and produce multimillion dollar jury verdicts for plaintiffs. But look at our experience with cases involving intentional racial discrimination. A recent study by Shea & Gardner, a large Washington, DC, law firm, found that plaintiffs were awarded compensatory and punitive damages in only 68 of 576 reported cases between 1980 and 1989. Plaintiffs received less than $50,000—for both compensatory and punitive damages combined—in two-thirds of these 68 cases, and received more than $200,000 in only three instances. I would like to include this study in the CONGRESSIONAL RECORD for the benefit of the Members of Congress.

The changes proposed by the pending legislation are fair, necessary, and long overdue for women and nonracial minorities. These workers deserve better than second-class remedies.

ANALYSIS OF DAMAGE AWARDS UNDER SECTION 1981

INTRODUCTION

Title VII of the Civil Rights Act of 1964, 42 U.S.C. §§ 2000e-2000e-17 (1982), prohibits employment discrimination on the basis of race, color, religion, sex or national origin. 42 U.S.C. § 2000e-2(a). Employees who succeed on a Title VII claim are entitled to equitable relief including back and front pay, reinstatement, instatement, injunctive relief and attorney fees. 42 U.S.C. §2000e-5(g) and (k). Successful Title VII employees cannot, however, receive compensation for consequential damages for injuries resulting from the discrimination, such as medical expenses, nor are they entitled to punitive damages.

Employees also are protected from intentional employment discrimination on the basis of race under 42 U.S.C. §1981 (1982). In addition to equitable relief, Section 1981 awards compensatory and punitive damages. Thus, if an employee sues under both Title VII and Section 1981, compensatory and punitive damages would be available. Because, however, Section 1981 does not prohibit employment discrimination on all of the bases protected under Title VII, such as sex, even where an employer intentionally engages in unlawful sex discrimination, an employee is not entitled to compensatory or punitive damages.

Legislation entitled "The Civil Rights Act of 1990," S. 2140/H.R. 4000, 101st Cong., 2d Sess. (1990) (the 1990 Act), has recently been introduced in Congress. The purpose of the 1990 Act is to "amend the Civil Rights Act of 1964 to restore and strengthen civil rights laws that ban discrimination in employment . . ." Preamble to the 1990 Act. In Title VII cases involving intentional discrimination, Section 8 of the 1990 Act states that compensatory damages may be awarded and, if an employer engages in an "unlawful employment practice with malice, or with reckless or callous indifference to the federally protected rights of others, punitive damages may be awarded."

The purpose of Section 8 is to ensure that remedies available to Title VII plaintiffs are equivalent to the remedies which are available to employees who sue under Section 1981. When looking at liability, courts have already held that, "[w]hen 42 U.S.C. § 1981 and Title VII are alleged as parallel bases of relief, the same elements of proof are required for both actions."

Flanagan v. *Aaron E. Henry Community Health Services Center*, 876 F.2d 1231, 1233-34 (5th Cir. 1989). Thus, since the standard for proving intentional discrimination would be the same for Section 1981 and Title VII, by examining damages which have been awarded in Section 1981 employment discrimination cases, it is possible to forecast the types of awards which could be rendered if Congress passes the 1990 Act.

We have reviewed Section 1981 employment discrimination claims decided in United States federal district courts and Courts of Appeals for the past ten years. In short, using the Section 1981 experience as

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

a guide our research shows that, if Congress passes the 1990 Act:

(1) Most plaintiffs' claims for damages will fail for procedural or substantive reasons;

(2) Of those plaintiffs who do prevail, many will receive only equitable relief, which currently is available under Title VII;

(3) When a plaintiff does receive compensatory or punitive damages, the award will probably be moderate;

(4) If an employer engages in outrageous intentional discrimination, in a few cases, the plaintiff may receive a more substantial compensatory or punitive damages award; and

(5) If either a jury or court awards excessive compensatory or punitive damages, the award may well be reduced or reversed on appeal.

DISCUSSION

Our research included a total of 576 cases decided between 1980 and 1990. Of these cases, 144 settled, or were reversed or remanded, and no further information was available. In 314 cases, the claims either were dismissed before trial or a court or jury ruled that the plaintiff was not entitled to relief under Section 1981.

In the 118 remaining cases, the plaintiff proved that the employer intentionally engaged in unlawful racial discrimination. In 50 of these cases, however, plaintiffs did not receive any compensatory relief or punitive damages. Rather, the plaintiff received only back pay, front pay or other equitable remedies comparable to those currently available under Title VII. See Appendix B for a list of these cases. In many of these cases, compensatory or punitive damages were not awarded because the court specifically concluded that the remedies afforded under Title VII were sufficient to make the plaintiff whole for the damage suffered. See *e.g., Walsdorf* v. *Board of Commissioners for The East Jefferson Levee District,* 857 F.2d 1047, 1054 (5th Cir. 1988). Thus, because it is likely that Title VII plaintiffs will have experiences similar to Section 1981 plaintiffs, even if the 1990 Act is passed, our research demonstrates that, in a substantial number of cases, courts will continue to award only equitable relief.

From 1980 to the present, our research found that plaintiffs were awarded compensatory or punitive damages in 68 cases involving 91 claims.[1] Of the 65 claims where it is possible to determine the exact amount of the award,[2] 42 of the combined compensatory and punitive damages awards were $50,000.00 or less. See Appendix A. In fact, in four cases, plaintiffs received nominal awards of less than $500,00.

Our research found five cases over the past ten years where judges or juries awarded substantial compensatory or punitive damages that were later found to be unwarranted.[3] On appeal, these awards were either reduced or the entire case was reversed because of the amount of the award. Thus, in *Vance* v. *Southern Bell Tel. and Tel. Co.,* 863 F.2d 1503 (11th Cir. 1989), a jury awarded $42,000.00 in back pay, $500,000.00 in front pay, $500,000.00 in compensatory damages and $2.5 million in punitive damages. The district court ruled that all of the damages awards were excessive and granted the defendant's motion for a new trial. The Court of Appeals affirmed the district court and remanded for a new trial stating that "the size of each of the damages awards when considered in light of the evidence presented supports the district court's grant of a new trial." 863 F.2d at 1516.

Similarly, in *Stephens* v. *South Atlantic Canners, Inc.,* 848 F.2d 484 (4th Cir. 1988), a jury awarded $100,000.00 in compensatory damages and $85,000.00 in punitive damages. After reviewing the evidence, the Court of Appeals affirmed the compensatory damages award, but held that "our detailed review of the proceedings reveals no evidence which would support an award of punitive damages." *Id.* at 492 (footnote omitted). See also *Ramsey* v. *American Air Filter Co.,* 772 F.2d 1303 (7th Cir. 1985); *Rodgers* v. *Fisher Body Division, 739 F.2d 1102 (6th Cir. 1984); Rowlett* v. *Anheuser-Busch Inc.,* 832 F.2d 194 (1st Cir. 1987). These cases indicate that if a jury or a court awards excessive compensatory or punitive damages, the award can be corrected by a trial or appeals court.

In all of the cases we reviewed, we found only three cases, one of which is pending on Appeal, where a plaintiff was ultimately awarded in excess of $200,000.00 in compensatory and/or punitive damages. In *Rowlett* v. *Anheuser. Busch, Inc.,* 832 F.2d 194 (1st Cir. 1987), a jury awarded $123,000.00 in compensatory damages and $3 million in punitive damages. The Court of Appeals noted that the defendant discriminated against the plaintiff for over ten years, then terminated the plaintiff for "disloyalty" after he filed a discrimination claim with the New Hampshire Commission of Human Rights. 832 F.2d at 197. Because of these acts, the court ruled that the compensatory damages award was not grossly excessive. While the court felt that the punitive damages award needed to be substantial because "Anheuser-Busch is a substantial company [and] any amount adjudged must be sufficient to deter it or any other rational employer from repeating such conduct in the future," it did not feel that Anheuser-Busch's conduct warranted "$3 million worth of outrage." *Id.* at 206, 207. Accordingly, it reduced the $3 million award to $300,000.00.

Similarly, the court in *Mitchell* v. *Keith,* 752 F.2d 385 (9th Cir. 1985), awarded $500,000.00 in punitive damages. The plaintiff in this case was the first Equal Employment Opportunity Coordinator at one of General Motors Corporation's (GM) California plants. Although there were multi-defendants in this case, punitive damages were assessed only against General Motors Corporation. The Court of Appeals ruled that the amount was not excessive because GM fired the plaintiff solely because of his efforts to protect the rights of minority employees.

Finally, in *McKnight* v. *General Motors Corporation,* 705 F.Supp. 464 (E.D. Wis. 1989), the plaintiff was awarded $500,000.00 in punitive damages. The jury found that the plaintiff was fired in retaliation for filing valid racial discrimination complaints in the past.[4]

CONCLUSION

Our research demonstrates that, since 1980, victims of intentional employment discrimination have not received excessive damage awards under 42 U.S.C. 1981. Since courts use the same standards to examine intentional discrimination claims under Section 1981 and Title VII, we believe that the types of relief afforded in Section 1981 claims accurately reflect relief that would be awarded under the Civil Rights Act of 1990. Using the Section 1981 experience as a guide, our research shows that, if Congress passes the 1990 Act, most plaintiffs will receive neither compensatory nor punitive damages. Even if an employee proves that the employer engaged in intentional discrimination, unless an employer has engaged in outrageous, intentional conduct, compensatory and punitive damages awards will be moderate. Finally, if a judge or jury awards "excessive" damages, the award will be modified by another court.

FOOTNOTES

[1] Some of the cases had more than one plaintiff.

[2] Because some of the awards combined back pay and compensatory damages and because many of the trials were bifurcated or the damages award was calculated later, we were unable to ascertain the amount of damages awarded in all cases.

[3] These five cases appear on Appendix C.

[4] General Motors has appealed the jury verdict. The case was argued on February 12, 1990 in the United States Court of Appeals for the Seventh Circuit before Judges Posner, Easterbrook and Fairchild. It is currently under advisement.

Footnotes at end of article.

STATUS OF NEW GERMAN EXPORT CONTROL LEGISLATION

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. HAMILTON. Mr. Speaker, I would like to draw the attention of my colleagues to correspondence I recently had with the German Ambassador to the United States, the Honorable Juergen Ruhfus, regarding German export control laws. This correspondence deals with the status of German export control legislation introduced in 1989 following revelations linking German private companies to the Rabta chemical plant in Libya.

At that time of the Rabta incident, Chancellor Kohl announced that his government would tighten export controls and strengthen weak laws and lax penalties for companies that illegally exported weapons technology. To date, only part of this legislation has entered into force.

The correspondence that follows deals with the pace of progress the German Government has made in addressing this issue. It includes a letter from the subcommittee to Ambassador Ruhfus, dated June 21, 1990 and two subsequent responses from Ambassador Ruhfus, dated July 6, and July 19, 1990.

The correspondence follows:

COMMITTEE ON FOREIGN AFFAIRS,
Washington, DC, June 21, 1990.

His Excellency JUERGEN RUHFUS,
Ambassador, Embassy of the Federal Republic of Germany, Washington, DC.

DEAR MR. AMBASSADOR: I write with respect to an article which appeared in *The Washington Post* on Sunday, June 10, 1990. The article, "Asia's Nuclear Nightmare: The German Connection," states that "a constant flow of German exports has brought India and Pakistan to the brink of nuclear deployment."

The article makes several charges against the government of the Federal Republic concerning lax export policies. Specifically, the article claims that:

The West German government did not stop uranium enrichment exports to Pakistan from the firm of Albert Migule between 1977 and 1980;

West German firms provided special steel, electronics and processing vessels enabling

Pakistan to produce nuclear weapons materiel;

West German firms provided Pakistan with designs for a tritium-making reactor and supplied Pakistan with a tritium gas purification plant;

The West German Government did nothing to prevent a Duesseldorf firm from smuggling heavy water to India, or to prosecute it later, despite intelligence provided by the United States and diplomatic overtures from the United States, Switzerland and Norway.

I would appreciate your comments on these points raised by Mr. Milhollin's article, as well as your answers to the following questions:

How have export control laws, regulations and administrative practices in the Federal Republic changed since the time of the incidents raised by Mr. Milhollin's article?

Would current export control laws, regulations and administrative practices in the Federal Republic now prevent the types of exports cited by Mr. Milhollin?

How would the changes in export control laws proposed by Chancellor Kohl's government in the aftermath of the Rabta affair (early 1989) affect German exports of nuclear-, chemical-, and ballistic missile-related technologies?

What is the status of the proposed export control legislation?

What priority does the government of the Federal Republic attach to enactment of this legislation?

Do you expect this legislation to be enacted before Federal elections take place at the end of this year?

What is the reason for the long delay in enactment of this legislation?

I am sure you are aware of the sensitivities of many Members on these export issues. I would appreciate your providing comments on this article and I look forward to your reply.

With best regards.

Sincerely yours,

LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.

THE AMBASSADOR OF THE
FEDERAL REPUBLIC OF GERMANY,
Washington, DC, July 6, 1990.

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, Washington, DC.

MR. CHAIRMAN: Thank you for your letter of June 21, 1990, in which you raised questions regarding an article by Prof. Milhollin in the Washington Post of June 10, 1990.

As a preliminary answer to your questions I should like to inform you that in response to increasing risks of proliferation and misuse in the areas of nuclear, chemical and biological weapons technology the Federal Republic of Germany has considerably strengthened its export administration and regulations.

On July 1, 1990, legislation raising penalties for violation of German foreign trade law has entered into force. A bill that will strengthen the War Weapon Control Act has been passed by the Bundestag and is under final consideration in the Bundesrat.

The enclosed paper will give you a short summary of the present state of this tightened legislation.

I have passed on your further questions to the Foreign Ministry in Bonn and will get back to you as soon as I receive the reply.

With best regards,

Sincerely yours,

JUERGEN RUHFUS.

TIGHTENING OF GERMAN EXPORT CONTROLS

After thorough deliberations, the Parliament of the Federal Republic of Germany recently passed an initial package of laws that entered into force on 1 July. This continued the extensive reform of foreign trade and payments legislation in the light of the experience gained with various incidents involving the spread of dangerous technology, especially as regards chemical weapons in Libya and nuclear weapons in Pakistan.

The Government of the Federal Republic of Germany had previously issued numerous regulations introducing additional bans and authorization requirements, e.g. the ban on all supplies to the plant at Rabta in Libya, an authorization requirement for all fifty chemical precursors covered by the Australian Group, an authorization requirement for the transfer of know-how and for all transit transactions, and a regulation prohibiting the participation of German companies in Iraq's "big gun" project. Furthermore, the staff of the Frankfurt-based Federal Office of Economics responsible for export controls were more than doubled from 75 to 160 by the end of 1989 and will be trebled by the end of 1990. The establishment of a modern data processing system further increased the efficiency of export controls. In numerous cases, intensified investigations of suspected companies were initiated.

The recently enacted laws are more stringent in three respects:

1. *Increased deterrence under criminal law.*—The maximum punishment for infringements of foreign trade and payments legislation has been greatly increased from 3 to 10 years' imprisonment. In future, the mere endangerment (as opposed to violation until now) of the security and external relations of the Federal Republic of Germany and of peaceful international relations will constitute an offense. This very high maximum penalty in relation to other countries will lead to considerably more severe sentences in future than were customary in the past.

2. *Provisions against activities abroad.*—The new laws provide for the first general legal basis for subjecting activities abroad by German nationals to authorization. The Federal Government will make use of this power in the next few days in order to prevent uncontrolled activity by German missile exports abroad. This is particularly important in view of pertinent experience with countries like Argentina, Egypt, Iraq and Libya.

3. *Better information base.*—An important part of new laws enables the authorities to develop in future a close-knit information network for the purposes of preventing illegal activities. All German companies are required to provide information on their products in the sensitive areas of nuclear, biological and chemical weapons technology, even if the products are not intended for export. By being placed further upstream, the export control system will thus serve to prevent illegal exports more effectively.

Parliament is still debating a more stringent War Weapons Control Bill with even stiffer maximum penalties and the inclusion of additional activities abroad. The Bill failed to pass the Bundesrat (Upper House) on 22 June, because several Länder wanted to include even more stringent provisions than envisaged by the Bundestag (Lower House). The Bundesrat has, however, decided that the Bill should take immediate effect (eliminating the customary three-months waiting period), after termination of further deliberations on 1 October of this year.

THE AMBASSASOR OF THE
FEDERAL REPUBLIC OF GERMANY,
Washington, DC, July 19, 1990.

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, Washington, DC.

MR. CHAIRMAN: Referring to your letter of June 21, 1990, as well as to my letter of July 6, 1990, I should like to finally reply to your questions on German export controls.

As to the exports to Pakistan (your first three and your sixth questions) the West German companies concerned acted against German export regulations by exporting without the necessary license. If the companies had filed export applications, they would have been refused by the competent authorities.

Even the new export legislation and measures will give no complete guarantee against such illegal exports in future, they do, however, substantially increase costs and risk of any violation of the German Foreign Trade and Payments Law by improving the control system, widening the scope of punishable activities and raising penalties.

As to your fourth question concerning the Dusseldorf based company Hempel, not all of Hempel's shipments to India were illegal and subject to prosecution. In this trial based on the former legislation only the misuse of documents could be punished. Under the new export legislation, also the other parts of Hempel's transactions would be illegal and punishable.

To your fifth and seventh question: The new legislation provides tighter regulations in three areas:

The production of biological, chemical and nuclear weapons in Germany is prohibited.

The participation of Germans in the production of these weapons and in ballistic missile-related projects will be punishable.

The penalties for violations of the Foreign Trade and Payments Law have been substantially increased.

The new laws and regulations will enable the authorities to prevent illegal exports of nuclear, chemical, biological and ballistic missile-related technologies far more effectively than before.

To your questions eight through ten: The reform of the Foreign Trade and Payment Law has been adopted by the German parliament and entered into force. The War Weapons Control Bill is still under consideration in the Conference Committee and is expected to be adopted in autumn this year.

And finally to your eleventh question: The bills imply as host of new and complicated legal matters comparable to the renewal of the US Export Administration Bill. Due to the great importance of the matter, a thorough discussion has been necessary in which all political forces could participate. Therefore, the parliamentary debate took considerable time and is still to be completed as to the War Weapons Control Bill.

I hope that these answers are satisfactory. Please do call me if further clarifications are necessary.

With best regards,

Sincerely yours,

JUERGEN RUHFUS.

AIDS PROTESTERS

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. PORTER. Mr. Speaker, recently protesters shouted down Secretary of Health and Human Services Dr. Louis Sullivan during his speech to the AIDS Conference in San Francisco.

With thousands of people dying each year from AIDS, and many more suffering from this horrible disease, I can understand the protesters' frustration. In the past, these disruptive activities helped to focus Federal attention on AIDS and move forward our research and treatment of efforts.

But, Mr. Speaker, these raucous tactics are no longer productive. They only obscure the truly important issues.

Recent Federal initiatives to combat AIDS are unprecedented in our Nation's history. We have responded more dramatically and forthrightly to AIDS than to any other public health problem.

Since 1984, Federal spending for AIDS has increased from $61 million to several billion dollars. In fiscal year 1991, six departments of Government will spend $3.5 billion on AIDS. The Public Health Service alone will spend $1.7 billion—as much as it spent for cancer.

Mr. Speaker, AIDS activists should work responsibly with the Federal Government, rather than shouting down the very officials who are most dedicated to helping them.

TRIBUTE TO THE JEDNOTA

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. TRAFICANT. Mr. Speaker, I rise today to pay tribute to the Jednota, the First Catholic Slovak Union. The Jednota will be celebrating its 100th anniversary on September 4, 1990.

Between 1880 and 1924 there was a mass immigration of Slovaks to the United States and like all other groups of immigrants, they made their own contributions to American society. People of Slovak descent worked hard to help create the America we know today. They worked long hard hours in coal mines, forges and furnaces of steel mills, industrial plants and farms. But what Americans of Slovak heritage are best known for is their profound faith and devotion to keep God and their love for their homeland.

The Jednota, which literally translated means union or fraternity, is the name used to represent the First Catholic Slovak Union of the United States and Canada. The Jednota was established in Cleveland, OH for the purpose of forming a national Slovak Catholic fraternal benefit society. Over the last 100 years, the Jednota has grown into one of the most notable Slovak Catholic fraternal benefit societies in the world. At present, it has 71,510 members and $65 million in assets.

The Jednota has been especially involved in charity work. It has provided in excess of a million dollars in charitable and cultural grants to churches, schools and institutions. The Jednota also runs an orphanage where more than 4,000 children have been cared for and educated.

I would like to take this opportunity to recognize the Jednota, the First Catholic Slovak Union. It is an outstanding organization that has made exceptional contributions to our society. I would also like to recognize the members of the Jednota from my 17th Congressional District of Ohio who have dedicated themselves to making our community a better place. I am proud to pay tribute to this fine organization.

TRIBUTE TO ITALIAN-AMERICANS

HON. FRANK PALLONE, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. PALLONE. Mr. Speaker, it was nearly 500 years ago when Christopher Columbus discovered America and opened a pathway which centuries later would be traveled by countless immigrants to the United States. These immigrants have contributed greatly to the culture and spirit of our Nation. In truth, the essence of American life is greatly founded upon the immigrant experience.

Prominent among those peoples who have immigrated to America is the Italian-American. Beginning in 1492 with the brave son of Genoa, Columbus, Italian immigrants have traveled west across the Atlantic and set upon a new life in America. As the quincentennial anniversary celebration of Columbus' discovery rapidly approaches, there is no more fitting time to again recognize the contributions made by Italian-Americans to our Nation.

Twenty million Italian-Americans reside as citizens in the United States, making Italian-Americans one of the largest ethnic groups in our melting pot. There are thousands of Italian-American organizations and clubs which share a common pride in their heritage and contribute to the progress and prosperity of the United States. Americans of Italian descent have made outstanding contributions in the arts, humanities, education, law, Government, medicine, and entertainment.

I am proud to introduce with Representative ELIOT ENGEL, legislation designating October 1990 as Italian-American Heritage and Culture Month. In doing so, I join over 100 of our colleagues in paying tribute to the remarkable experiences and achievements of our fellow Italian-Americans.

Since the inception of an Italian-American Heritage and Culture Month last year, many Italian-American organizations have hosted events celebrating and sharing their culture with their communities. By designating October as Italian-American Heritage and Culture Month once again, we seek to encourage the continuing celebration of the unique contributions of Italian-Americans to our culture and communicate the great pride we share as Americans of Italian descent.

RULE ON H.R. 4328, THE TEXTILE, APPAREL, AND FOOTWEAR TRADE ACT OF 1990

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. ROSTENKOWSKI. Mr. Speaker, I wish to serve notice to my colleagues that, pursuant to the rules of the Democratic caucus, I have been instructed by the Committee on Ways and Means to seek less than an open rule for the consideration by the House of Representatives of H.R. 4328, the Textile, Apparel, and Footwear Trade Act of 1990.

H.R. 4000, THE CIVIL RIGHTS ACT OF 1990: THE VANISHING PLAINTIFF'S LAWYER

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. HAWKINS. Mr. Speaker, this body will soon be considering H.R. 4000—the Civil Rights Act of 1990—which overturns a number of recent Supreme Court decisions that substantially narrowed the scope and protections of Federal antidiscrimination law. This legislation restores substantive rights and strengthens existing remedies.

I worry, however, that the changes made by the bill may be undermined by a larger trend in civil rights cases—the shrinking pool of plaintiffs' lawyers. Without them, victims of employment discrimination cannot pursue legal redress for their injuries, employers are not held responsible for discriminatory actions, and workers will be unable to serve as private attorneys general to enforce our strong public policy against discrimination, as Congress intended.

A recent story in the Washington Post confirmed this troubling development. According to the article, lawyers who once handled plaintiffs' employment discrimination cases on a regular basis have virtually all gone out of business. Some lawyers took out personal loans to allow them to continue working on such cases, but were ultimately forced to give up their practices. Moreover, the problem of adequate compensation is particularly acute in the context of large class action cases challenging systemic discrimination, which ironically enough provide the most far-reaching relief to women and minorities.

Because this is an issue of great importance to the Members of Congress, I would like to include this article in the CONGRESSIONAL RECORD. As one Federal judge recently warned, unless the decline in the number of civil rights lawyers is reversed, "the progress that has been made during the past four decades toward eradicating discrimination * * * will be halted, and the promise of equal treatment and opportunity for all will be but empty words."

THE VANISHING JOB-BIAS LAWYERS—ATTORNEYS, LAW FIRMS SAY THEY CAN'T AFFORD TO TRY RIGHTS CASES

(By Sharon Walsh)

In the early 1970s, Richard T. Seymour was an idealistic young Washington lawyer in solo practice, handling complicated employment discrimination cases. He won every case.

But Seymour had a problem that most winning lawyers never face: He could never make any money. Three years after he opened his employment discrimination practice, he closed it, swamped with debts that would take him 10 years to pay.

Now Congress and the Bush administration are engaged in intense negotiations over the Civil Rights Act of 1990, which would broaden the rules under which employees can bring cases against companies charging discrimination on the basis of sex, race, religion or disability. But as Seymour and other lawyers point out, many good cases will never get to trial because most lawyers cannot afford to take them.

"Would I be willing to set up a small office to concentrate on employment discrimination again?" asked Seymour, now a salaried attorney for the nonprofit Lawyers Committee for Civil Rights Under Law. "No. I would be crazy."

According to a number of civil rights lawyers, the system set up by Congress and the courts for paying legal fees for discrimination cases is tilted against them. Because most plaintiffs cannot afford to pay the usual hourly fees, lawyers must agree to take their cases on a contingent fee basis—which means they get paid only years after the suits are filed, and then only if they win. When they do win, they often find themselves in court again, haggling over hourly rates and the number of hours they spent on the case. And current rules allow no interest to be paid on the fees that are owed.

"I know of no lawyers who will take these cases routinely on a contingent-fee basis," said William L. Bransford, a Washington attorney who had handled many job discrimination cases.

"Since 1973, people who've handled them on a regular basis have all gone out of business," said Joel P. Bennett, a Washington attorney and member of the American Bar Association's Economics of Law Practice Section. "In many cases, some of them stopped solo practice and went to big firms. The big firms won't do them. It's just not economically feasible."

One of Seymour's most successful cases is a good example of why so many attorneys have abandoned the practice of employment discrimination law.

In 1972, Seymour took on the Mississippi State Employment Service for discriminating against blacks and women in job referrals. The case was tried in 1979. Two appeals and 11 years later, a federal appeals court judge found that the state agency was guilty of willful discrimination and was ordered to pay a judgment of nearly $5 million.

However, during the 18 years Seymour handled the case, he was never paid a dime—and still hasn't been because attorneys must wait until the case has reached its final appeal before applying for fees. The case cost him more than $100,000 in out-of-pocket expenses—forcing him to take out personal loans.

While the problem of finding lawyers for discrimination suits is national in scope, many Washington-area attorneys said it is even more pronounced here because this is where suits against the federal government are filed. According to plaintiffs' attorneys, the Justice Department still fights cases that would be settled in the corporate world. And, when they lose, they fight over attorney's fees—a move that a number of attorneys said discourages them from bringing even meritorious cases in the first place.

"My experience is that the U.S. government can be one of the most difficult and irrational of defendants," said Guy Saperstein, of Saperstein, Seligman & Mayeda in Oakland. "The word settlement isn't in their vocabulary."

Stuart M. Gerson, head of the Justice Department's civil division, denies that the federal government is reluctant to settle cases. "We settle a lot of major cases," Gerson said. "We have a fixed budget, and with the S&L cases and fraud cases, we can't afford to tie up attorneys on bad cases."

"The numbers of Title VII cases continue to climb," said Gerson of the contention that it's difficult to find attorneys to pursue them. "Somebody's taking these cases."

While the number of cases does climb every year, many are filed by the employees themselves, without an attorney and never make it to trial because they can't find lawyers to work on a contingent-fee basis.

Kathy Hammond knows firsthand the difficulties of finding an attorney to handle a discrimination case. Hammond, formerly a GS-5 clerk for the Naval Investigative Service, began looking for a lawyer to file a race discrimination case against her employer last December. Since then, she has been fired from her job and has talked to at least 30 private attorneys and countless bar referral services and civil rights groups.

Why can't she find a lawyer? "Basically, money," said an undeterred Hammond. "They definitely don't want to take the case on a contingent-fee basis. . . . This is really a bad situation. It has happened to other black women [at the agency], but they're getting away with it because I can't afford an attorney," she said, her voice rising with frustration.

The Lawyers Committee for Civil Rights Under Law reports receiving about 1,000 requests each year for assistance in employment cases, according to Joseph M. Sellers, the committee's director. Of that number, the committee takes about 50, or 5 percent.

While a number of large firms take such cases on a pro bono basis—in Washington, firms such as Arnold & Porter, Covington & Burling, Hogan & Hartson and Arent, Fox, Kintner, Plotkin & Kahn—they are not part of their regular business. And there simply are not enough pro bono hours to go around, according to legal experts.

Robert M. Adler, a Washington attorney who has handled a number of job discrimination cases in the past, seldom takes them now. "Every now and then somebody calls and they really touch you, so you'll take the case," said Adler. Most of the time, he said, he doesn't even take the calls.

One ongoing dispute between lawyers who bring discrimination suits and those who defend against them is over what attorneys call "fee enhancement."

Attorneys who take other types of contingent-fee cases are often compensated for the "risk" of the cases by getting double their usual fees when they win. However, both state and federal agencies often fight this. And, in cases brought under Title VII of the Civil Rights Act, judges in a number of states and federal jurisdictions differ on the amount of additional fees for risk.

The proposed revisions to the 1964 law now before Congress is silent on the question of fee enhancement, but it does contain language that would allow lawyers to collect interest on the fees they win. Many civil rights lawyers think that more than that will be needed to get more lawyers interested in job-bias cases again.

"No one thing will really change it," Sellers said. "Some attorneys might be more willing to take cases, but not against the government."

Saperstein, who has one of the largest practices in the country devoted to civil rights law, has stopped taking new cases. He was getting about 150 new case requests a month and decided to take only class-action suits.

"I had to put many mortgages on my house during the lean years," Saperstein said. "Not many people are willing to do that."

PRECEDENT-SETTING CASE HAS YET TO PAY A PENNY

(By Sharon Walsh)

In 1983, Washington attorney Robert M. Adler took on the case of Mabel King, a nurse who sued the D.C. Department of Corrections for sex discrimination. He took out thousands of dollars in loans along the way to support the case.

After prevailing in *King v. Palmer*, Adler was awarded attorney fees and costs. In addition, the court awarded him what is known as an "enhancement" payment equal to 50 percent of his contingent fees for the risk of taking the case. The District contested that part of the award.

Last week, the U.S. Court of Appeals unanimously found that Adler was entitled to a 100 percent enhancement—or double his fees in the case—which should boost his total fee award to more than $400,000.

Attorneys here say the precedent-setting case could mean that more attorneys will be willing to take discrimination cases in the District. However, the District government has decided to appeal the decision to the Supreme Court.

"Everybody thinks I'm rich," said Adler wearily, noting he has waited seven years to be paid for his work. "I'm going to have to hire an attorney who knows his way around the Supreme Court, probably pay them out of my own pocket."

And, said Adler, if the Supreme Court does hear the case and the District loses, it could mean another $50,000 or more in attorney fees that the District would have to pay—or, more accurately, that the District taxpayers would have to fork over.

"Fee litigation is among the most socially useless forms of litigation," said Joseph M. Sellers of the Washington Lawyers' Committee for Civil Rights. "Nobody likes to do it. The U.S. and District governments seem unwilling to resolve a fee dispute by simply paying it."

THE BALANCED BUDGET AMENDMENT

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday,

July 25, 1990, into the CONGRESSIONAL RECORD:

THE BALANCED BUDGET AMENDMENT

The federal budget deficit is one of the most intractable problems facing the Congress and the President. The deficit must be controlled to sustain our economic vitality and to reduce our dependence on foreign capital. Yet, our government has failed to muster the political will necessary for meaningful deficit reduction, and many Americans are now looking at alternative methods to decrease the budget deficit. One popular proposal is an amendment to the Constitution requiring a balanced budget.

The balanced budget amendment under consideration by the Congress would require that total government spending for each year could not exceed estimated revenues unless three-fifths of the Congress provided for a specific excess. The Congress and the President would have to agree in advance on the revenue estimate. The amendment also would require a three-fifths majority to increase the federal debt. The amendment would be waived when a declaration of war is in effect.

Supporters of this proposal in the House of Representatives recently failed by a vote of 279 to 150 to attain the two-thirds majority necessary for passage. The Senate could vote on this issue later this year. The action by the House probably kills the balanced budget amendment for this year.

I agree that the Congress and the President clearly have not done enough to reduce the deficit, and that much tougher steps must be taken to control the growing government debt. Although I voted for a balanced budget amendment in 1982, I do not agree that this proposal will do what its supporters contend. I voted against it for the following reasons:

First, the proposal does not guarantee that a balanced budget will in fact be achieved. It states that total spending shall not exceed estimated receipts. If we have learned anything in the last ten years it is that there is often a dramatic difference between estimates and reality. Recent revenue estimates have been wrong more often than they have been correct, missing the mark by billions of dollars.

Second, evasion would be easy. The President and the Congress have amply demonstrated their skill at manipulating legislative procedures to avoid tough political choices. The Gramm-Rudman budget reduction law, for example, has failed in large part due to the deliberate use of rosy economic forecasts, underestimated costs, bloated savings and revenue estimates, and expenses shifted to other years. The federal government also could follow the lead of many state and local governments of moving programs off-budget to balance the budget. State and local units have created over 25,000 off-budget entities to tax and spend outside local and state budget controls.

Third, the proposed amendment is unworkable. It contains no enforcement mechanism for achieving a balanced budget—mandating a result without offering a solution. The proposal is similar to declaring that the United States shall henceforth have clean air or be drug-free. It does not say what happens if the Congress and the President do not agree on the estimated receipts or what happens if the budget is not balanced and the government runs a deficit. If the revenue estimate is wrong, or a crisis emerges, would each program within every agency have to be approved by the Congress, or would each agency be allowed to determine the exact allocation of funding, or would some arbitrary formula be applied? Would the government default on its bills because the increase in the debt had not been approved by a three-fifths majority?

Fourth, the proposal promises to do something about the budget deficit tomorrow, but the problem is today. The measure would not take effect until 1995 at the earliest; sending a signal that hard budget choices can be put off until later. In the meantime, almost $1 trillion could be added to the national debt. The amendment is politics by distraction.

Fifth, the proposal could trigger a recession. The Congress and the President would be required to reduce the budget deficit—however large it might be—to zero the first year the proposed amendment is in effect. The deficit is currently hovering around $200 billion. Pulling large amounts of money out of the economy quickly could cause enormous economic hardship because of jobs lost and benefits cut or eliminated.

Sixth, federal courts would almost certainly be asked to resolve disputes about interpretation of the proposal. If the courts make many of the tough decisions required to balance the budget, that would represent a dramatic shift in authority from elected representatives to the unelected power of judges. And if the courts refuse to become involved in the political dispute over the amendment, the budget process could stalemate. In either case, the proposal ensures an endless stream of lawsuits as various questions are placed before the courts slowing down the budget process while the Congress and the President await decisions.

Seventh, the proposal would reduce the federal government's flexibility to deal with emergencies and is potentially dangerous. A serious recession or world crisis could produce revenue losses or require spending increases that would result in a deficit. Under the proposed amendment, a minority in one House of the Congress could frustrate the efforts of the Congress and the President to respond quickly in urgent circumstances.

Finally, the proposal would enshrine one kind of fiscal policy in the Constitution. The place to solve the deficit problem is at the budget summit now in progress and not in the Constitution. Meaningful budget reforms are possible without a constitutional amendment. Placing the empty promise of this proposal into the Constitution will only breed deep cynicism about the Constitution as people understand that the measure is unenforceable and cannot deliver what is promised.

The budget deficit represents an absence of political will, not the need to restructure our entire political system. Where there is political leadership, public consensus can be organized around the requirement to pay for what we spend, and a balanced budget amendment is not necessary. In the absence of leadership, an amendment to the Constitution cannot guarantee a balanced budget.

RESIDENT MANAGEMENT

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. PORTER. Mr. Speaker, very soon the House is scheduled to debate H.R. 1180, the housing reauthorization. I want to call Members' attention to one aspect of Secretary Kemp's HOPE proposal, which is included as a separate title in this legislation.

Subtitle A, "HOPE for Public Housing Homeownership," would authorize $136 million to help public housing residents form resident management councils to purchase public housing units from local housing authorities.

Mr. Speaker, resident management is no fuzzy theoretical construct. It is a system of empowerment that is working nationwide in public housing developments. And it is working most successfully in developments that local housing authorities had abandoned as unmanageable.

Resident-managed developments require lower operating and capital budgets than comparable developments managed by housing authorities. But more importantly, resident management serves as the foundation upon which communities are built.

And now, under the HOPE legislation, with resident management as their foundation, public housing tenants will get a chance at the American dream—homeownership. I encourage your support of the HOPE Program.

TRIBUTE TO DR. DOMINIC DEMARCO

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. TRAFICANT. Mr. Speaker, I rise today to honor Dr. Dominic DeMarco, D.D.S., of my 17th Congressional District of Ohio, a founding member of the Domingos Foundation.

Dr. DeMarco, along with his son, Paul, founded this nonprofit, tax-exempt organization in order to put the skills of retired healthcare workers at the disposal of Third World countries. After 39 years of dedicating himself to the dental profession in Girard, OH, Dr. Demarco now gives much of his time to providing dental care throughout the Third World. Since 1980, Dr. DeMarco has made nine trips to a remote fishing village called Turiacu on the northern coast of Brazil.

Dr. DeMarco earned his degree in dentistry from the Ohio State University in 1949. He married the former Alice Detesco some 34 years ago and served his country throughout the Korean conflict as a dentist. Following the conflict, Dr. and Mrs. DeMarco had four sons: David and Andrew, both doctors, and Peter and Paul, both attorneys.

Dr. DeMarco's commitment to his local community, his country, and the underprivileged of the Third World is highly commendable. We owe him a great deal for his commitment to service in the 17th District.

RULE ON H.R. 5350, THE SHORT-TERM DEBT CEILING EXTENSION AND H.R. 5355, THE LONG-TERM DEBT CEILING EXTENSION

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. ROSTENKOWSKI. Mr. Speaker, I wish to serve notice to my colleagues that, pursuant to the rules of the Democratic caucus, I have been instructed by the Committee on Ways and Means to seek less than an open rule for the consideration by the House of Representatives of H.R. 5350, the short-term debt ceiling extension, and H.R. 5355, the long-term debt ceiling extension.

OUR COMMITMENT TO EDUCATION

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. HAWKINS. Mr. Speaker, as the budget summit proceeds, I thought it would be instructive to read the Committee for Education Funding "Statement on Deficit Reduction and Budget Process Reform." Deficit reduction is important but preserving and enhancing our commitment to education is equally important and entirely compatible with deficit reduction.

THE COMMITTEE FOR EDUCATION FUNDING "STATEMENT ON DEFICIT REDUCTION AND BUDGET PROCESS REFORM"

The Committee for Education Funding (CEF) is a coalition of 100 national elementary, secondary, and higher education associations and institutions. Through its member organizations, CEF represents the views of several million students, parents, teachers, faculty, presidents, administrators, librarians, counselors, trustees, and school board members regarding adequate federal financing of educational opportunities for America's preschool, elementary, secondary and postsecondary students.

On January 22, 1990, the Committee for Education Funding advised Congress and the President that the current resources allocated to education programs should be increased from $24 billion to $54.5 billion over a five year period in order to extend educational aid and services to all eligible children. For Fiscal Year (FY) 1991, CEF recommended a $5 billion education increase as the first increment toward meeting this goal. Although education is considered one of the highest priorities in the regular FY 1991 Congressional budget and appropriations process, this commitment of resources may be seriously compromised by across-the-board solutions to deficit reduction imposed by a budget summit agreement or by budget process reforms.

The members of the education community well understand the strain that has been placed on the federal budget by excessive deficits, and we favor equitable efforts to balance the budget. However, domestic discretionary priorities such as education have borne the brunt of deficit reduction efforts over the last several years, while other areas of the budget have grown substantially and necessary revenue increases have been laid aside. The member organizations of the Committee for Education Funding urge Congress and the President to ensure that any deficit reduction solution agreed to in the current budget summit negotiations protects our nation's commitment to the education of its children. Any such agreement must ensure an increased investment of federal resources in education programs. We urge members of Congress and the Administration to consider the following recommendations in any budget summit agreement:

(1) CEF strongly supports making an increased investment in education a top budget priority. Education is an essential investment in the future of our country. It is an investment in economic growth and the personal and social well-being of our citizens. Education should not be used to achieve short-term deficit reduction savings that will sacrifice our nation's long-term economic competitiveness.

(2) CEF supports new revenues to fund universal educational opportunity.

(3) CEF supports the Pre-Gramm-Rudman-Hollings budget and appropriations process, which assigned Congress and the President joint responsibility to make the choices necessary to balance the budget.

(4) CEF supports the repeal of Gramm-Rudman-Hollings Act.

(5) CEF opposes legislative measures that impose across-the-board reductions in education funding, or that shift the power to make budgetary decisions from Congress to the President. Specifically, CEF opposes the following measures:

Balanced-budget constitutional amendment;

Line-item veto;

Enhanced rescission authority;

Separate funding caps for defense and for domestic discretionary programs, which were imposed in previous budget summit agreements; and

Across-the-board spending cuts that negate congressional priorities.

IMPACT ON EDUCATION OF GRAMM-RUDMAN-HOLLINGS

In 1985, Congress passed and the President signed the Gramm-Rudman-Hollings Balanced Budget and Emergency Deficit Control Act. Unlike the original Budget Act of 1974, which was designed primarily to impose greater order on congressional fiscal decisions, GRH was conceived specifically to eliminate the record $221 billion deficit in a five-year period. This legislation marked a new era in federal budgeting by introducing the automatic sequestration process which imposed across-the-board cuts in federal spending if Congress and the President failed to agree on an alternative deficit reduction plan. Gramm-Rudman-Hollings was signed into law just three months after its introduction, without benefit of hearings and adequate debate to determine how or if the new process and the sequester mechanism would actually work.

Although proponents claimed that the GRH sequester was such an arbitrary solution to deficit reduction that it would never be used, Congress and the President have consistently used across-the-board spending reductions as a means to obtain deficit savings since the passage of Gramm-Rudman-Hollings. Furthermore, proponents of the original GRH legislation argued that it would serve as a means to achieve equilibrium between defense and domestic reductions, to rein in mandatory spending, and to force new revenues. In reality, GRH has served to extract heavy cuts in domestic discretionary programs while only marginally curbing the rate of increase in defense spending, and has exercised virtually no leverage to boost revenues or limit entitlement growth.

For federal education spending, GRH had immediate and severe consequences. In March of 1986, when the GRH sequester mechanism was first activated, 4.3 percent was automatically cut from every discretionary education program for a total of $678 million. Eighteen of the 21 major education programs were cut below their previous year's levels and hundreds of thousands of disadvantaged students were denied services or direct aid for which they were eligible.

Subsequent experience with GRH has provided conclusive evidence of its profound ability to undermine public policy imperatives, as well as its failure to appreciably reduce the deficit. Since the 1983 release of the Department of Education's report *A Nation at Risk*, numerous studies have documented America's mounting *education* deficit. But GRH has served systematically to counteract congressional attempts to respond to this crisis.

Implementation of the first White House/Congressional budget summit agreement for FY 1988, called to avoid a pending sequester, resulted in a $710 million cut from education programs by imposing a 4.26 percent across-the-board reduction on all domestic discretionary programs. In FY 1990, the failure of some authorizing comittees to comply with their budget reconciliation instructions forced yet another form of an across-the-board cut on education programs: the partial sequester. The partial sequester was used despite the fact that appropriators had already complied with the discretionary budget authority and outlay caps imposed by the budget resolution. However, appropriated accounts including education were then partially sequested in order to meet the deficit savings that were required by reconciliation to come from other areas of the budget. The partial sequester cut education by $270 million.

In fact, since the passage of GRH, education has been cut by a total of $2 billion either in the form of a sequester or in across-the-board spending cuts that have been forced by domestic discretionary caps agreed to in the last three budget summits. Although an overwhelming majority of Congress and the American people support substantial investments in federal education spending, every education program has been cut repeatedly by across-the-board spending reductions that negate congressional priorities.

For the past five years, Gramm-Rudman-Hollings has forced disproportionate cuts in domestic discretionary priorities such as education, while little real progress has been made in reducing the unified budget deficit. The deficit has remained at about $150 billion over the past three years. Based on the most recent estimates, OMB is projecting that the FY 1990 deficit will be between $184 and $206 billion. If the Social Security surplus is excluded from the calculation, the deficit estimate would increase by another $65 billion. It is clear that although GRH was touted as a means to force responsible deficit reduction, the obsession with meeting the yearly GRH targets has actually provided incentives for unrealistic forecasts of economic growth and interest rates, budget gimmickry, and the inability

of Congress to set and maintain domestic spending priorities such as education.

FY 1991 BUDGET AND APPROPRIATIONS PROCESS

Congress and the President are currently engaged in yet another White House/Congressional budget summit. Pressure for summit negotiations this year developed as a result of: the Office of Management and Budget's (OMB) revision of its FY 1991 deficit estimate from $100 billion to $159 billion; an emerging political consensus to take the Social Security trust funds out of the deficit calculation in order to unmask the true funds out of the deficit calculation in order to unmask the true size of the deficit; and the need to meet the enormous cost of the Savings and Loan bailout. These three factors have given new impetus to reach a deficit reduction agreement and to consider yet another round of budget process reforms.

Although OMB's January deficit estimate required $36 billion in savings this year, OMB's revised estimate of $159 billion, issued just six months later, requires a $95 billion sequester—or a 36% across-the-board cut on nonexempt domestic discretionary programs including education.

In order to avoid such a catastrophic sequester, the budget summit negotiators are attempting to reach agreement on $50 to $60 billion in savings for FY 1991 and as much as $500 to $600 billion in savings over the next five years. In addition to discussing various spending reduction and revenue raising proposals, the negotiators are considering adjusting and extending the GRH deficit targets and several budget process reforms that would directly impact on the availability of funding for education. For these reasons, the Committee for Education Funding has taken the following positions:

CEF POSITION ON BUDGET REFORM

(1) CEF strongly supports making an increased investment in education a top budget priority. Education is an essential investment in the future of our country. It is an investment in economic growth and the personal and social well-being of our citizens. Education should not be used to achieve short-term deficit reduction savings that will sacrifice our nation's long-term economic competitiveness.

The President's FY 1991 budget states "The United States faces major challenges in the coming decades. To take advantage of these opportunities and to meet the challenges, a step-up in the rate of economic growth is essential. . . . The key to faster productivity growth is an increase in investment where investment is broadly understood to include not only additions to physical capital but also additions to knowledge in the form of research and development and improvements in human capital resulting from education and training." CEF agrees with the President and believes that a substantial investment in education is called for at this time.

There is no clearer link between investment and future growth than that which has been documented in education. The U.S. House Select Committee on Children, Youth and Families has even quantified the impact, finding that for every $1.00 invested in quality preschool education, $6.00 in savings is returned through lower costs in special education, public assistance and crime.

The same committee reported last year that "each year's class of school dropouts costs the nation more than $240 billion in lost earnings and foregone taxes over their lifetimes." At the elementary and secondary school level, we must offer incentives to encourage young people to stay in school through expanded investments in federal education programs targeted to disadvantaged students and school improvement." We must fully fund child nutrition programs consistent with current law. And we must ensure equal access to a postsecondary education for all students through expanded student financial assistance.

An overwhelmingly majority of the American people agree that education is a vital and cost-effective investment of our federal resources. A New York Times/CBS News poll released in June 1990 found that 86 percent of Americans believe that if spending cuts are needed to reduce the deficit, it is unacceptable to cut education.

Any budget summit agreement must consider education a prime growth incentive by maintaining the commitment that Congress has made to allocate a multi-billion dollar increase to education this year in the regular budget and appropriations process.

(2) CEF supports new revenues to fund universal educational opportunity.

CEF has consistently supported raising revenues to pay for increased investments in education and other domestic priorities. As proof of this commitment, we strongly backed the FY 1988 congressional budget resolution that recognized for the first time since the passage of GRH that new revenues were a necessary component of deficit reduction.

We recognize that any responsible deficit reduction package to address the current deficit must include new revenues. The President's recognition that tax revenue increases must be a part of a budget summit deficit agreement is encouraging.

It is clear that Americans are willing to pay higher taxes if there is some assurance that the revenue generated will pay for needed investments in areas such as education and the environment. A Gallup poll taken in October 1989 found that 76 percent of Americans considered increased spending for improving public education the top federal budget priority. Sixty-three percent of those polled were willing to pay higher taxes for education increases compared to only 13 percent who were willing to pay higher taxes for space exploration.

(3) CEF supports the pre-Gramm-Rudman-Hollings budget and appropriations process, which assigned Congress and the President the joint responsibility to make the choices necessary to balance the budget.

CEF agrees with countless observers who have expressed variants of the following theme: "We must stop trying to solve policy problems with procedural fixes", (Senator Robert Byrd, February 1989); and "process reform is not a substitute for the discipline and political courage needed to solve the problem of budget deficits," (President George Bush, February 1989.)

Congress and the President have the ability to propose and implement a balanced budget plan without the imposition of automatic, mechanistic procedural reforms such as the GRH sequester. The only requirements are political will and the willingness to compromise. The pre-GRH budget and appropriations process required Congress and the President first to set priorities and then to make the difficult but necessary choices in allocating resources and raising revenues to balance the budget.

(4) CEF supports the repeal of the Gramm-Rudman-Hollings Act.

The Gramm-Rudman-Hollings Act is a budget experiment that has failed and must be repealed. Instead of a fail-safe device to ensure budget discipline, the GRH sequester has become a political tool for budgetary brinkmanship. The arbitrary nature of the sequester frustrates congressional efforts to establish priorities. The timing of the sequester prevents expeditious action by Congress on spending bills. And the required reliance on OMB economic assumption to predict the need for and magnitude of a sequester has increased the power of the President to nullify congressional spending decisions. As stated by the former director of the Congressional Budget Office, Alice Rivlin, "Gramm-Rudman-Hollings was a well intentioned effort, but it is now doing more harm than good."

Experience has shown that GRH favors reliance on gimmicks such as asset sales and user fees as a means for avoiding revenue increases and skews deficit reduction efforts toward spending cuts. Education and other domestic discretionary programs have borne the brunt of such efforts while other areas of the budget have grown substantially.

Every discretionary education program, in fact almost every discretionary children's program, is subject to GRH sequesters. Education is only 1.8 percent of the total federal budget, but it accounts for over 11 percent of total discretionary spending available to be cut by sequester and 19 percent of the domestic discretionary budget.

For these reasons, CEF opposes the extension of the GRH sequester provision beyond FY 1993, which would result from legislative proposals to exclude the Social Security Trust Fund from the deficit calculation. CEF strongly opposes the proposal to introduce a second sequester which would ensure that the previous year's education appropriation would be automatically cut subject to revised deficit estimates. This proposal is just a further abrogation of the duty to set priorities and to carry them out, or to raise the necessary revenues to pay for them.

(5) CEF opposes legislative measures that impose across-the-board reductions in education, or that shift the power to make budgetary decisions from the Congress to the President. Specifically, CEF opposes the following measures:

Balanced-budget constitutional amendment—Unless a balanced-budget amendment were drafted to ensure that it would be used as a revenue-forcing device, education programs would be at risk disproportionately among the appropriated accounts available to be cut. At roughly 15 percent of the budget, domestic discretionary spending is already at its smallest share of GNP since the early 1960s, and cannot realistically be expected to bear the primary burden of additional deficit reduction. Education, which has declined as a percent of the total federal budget from 2.5 percent in 1980 to 1.8 percent today, comprises almost 19 percent of the domestic discretionary spending that is most easily cut. Ratification of a balanced budget amendment could result in massive cuts in federal education programs.

Line-item veto—This much-sought-after presidential tool would be an assault on the separation of powers by infringing on congressional power to allocate funds, while yielding little in the way of significant deficit reduction. In addition, the line-item veto could well prove an ineffective tool if Congress applied the several devices available to circumvent it, such as funding percentage set asides, conditional or dependent authorizations, and entitlements. Education programs would be especially vulnerable to the line-item veto because of the considerable

number of separate lines that delineate the small, individual programs of the Department of Education budget—in contrast, for example, to the large, mega-categories that make up the Defense budget.

Enhanced rescission authority—A primary objection to this proposal is that it would shift the power of individual spending decisions from Congress to the President. Furthermore, education would be particularly vulnerable to further cuts due to the large number of individual program lines in the education account. In addition, this proposal would severely retard progress on spending bills and burden Congress with the task of revisiting time and again spending decisions where agreement has already been achieved. Increasing the President's independent authority to cut spending is unnecessary given past experience. In fact, from 1945 to 1989, total appropriations enacted by Congress fell $173.6 billion below the total Administration's budget requests.

Separate funding caps for defense and for domestic discretionary programs imposed by previous budget summits—Every budget summit agreement to date has imposed three separate spending caps on defense, international affairs and domestic discretionary programs. This procedure has replaced the expertise of the appropriators to make and set priorities among these areas with binding agreements that are made by the negotiators without the benefit of hearings or debate. Experience has shown that these arbitrary ceilings thwart the ability of Congress to effectively respond to changing global circumstances and to address pressing domestic priorities. In short, these caps have been used to create a spending floor for defense while creating a spending ceiling for domestic programs. CEF supports the regular budget process that imposes one ceiling on all discretionary spending and allows Congress to determine the allocation of those funds through the appropriations process.

Any across-the-board spending reduction that negates congressional priorities—CEF opposes the use of across-the-board cuts on domestic discretionary programs as a means to fund domestic priorities. Over the last decade, domestic discretionary programs have contributed far more to deficit reduction than any other area of the budget. Total funding for domestic discretionary programs has decreased as a percentage of the total budget from 25 percent to 15 percent. Education and other domestic priorities such as drug prevention, biomedical research and programs aimed at improving our children's health and nutrition should not be forced to compete for resources that are restricted by an arbitrary domestic ceiling. Offsetting funds for domestic priorities by across-the-board cuts on all domestic discretionary programs only exacerbates the inability of Congress to make difficult but necessary budgetary decisions, including raising revenues.

The Committee for Education Funding believes that we cannot continue to mortgage our children's future to finance the deficit. Deficit reduction is a national priority. But it is not the only national priority. Congress and the President must safeguard our nation's future by continuing to invest in its citizens, especially its young people, who are and will be its future.

NO CANDLE BURNS WITHOUT A "WIC"

HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. MRAZEK. Mr. Speaker, a friend of mine, Alan M. Miller of North Merrick, Long Island, recently penned the following column in the South Shore Record. The column speaks eloquently of the frustration many of our citizens feel over the priorities we choose in this country, and in particular of the penny-wise, pound-foolish cutbacks made in the most basic services we can provide to those among us in the greatest need.

I commend this article to the attention of my colleagues and salute Mr. Miller for his questioning of the fundamental choices we make in this body and throughout the Federal Government.

[From the South Shore Record, June 14, 1990]

NO CANDLE BURNS WITHOUT A "WIC"

(By Alan Miller)

One of the strengths of our nation, in the 200-plus years since its founding, has been our ability to endure, to prosper, to feed and care for our own. Part of our independence has been our self-sufficiency.

I have seen, in my lifetime, a retreat from that concept, as mega-corporations have swallowed up little ones, and as government has changed from the concept of "for the people" into the oligarchy which it has become. We have marched from a land of struggle to a society of self-indulgence.

One of the most beneficial programs sponsored by the Federal Government has been the "WIC" program. "WIC," which stands for "Women, Infants & Children," has, with a budget of $2.1 billion, insured that those in need, under-privileged in terms of nutrition, would receive assistance to insure that they have enough nutritious food to eat, to sustain them.

In a country where we have a trillion dollar budget, where we spend billions in giving assistance to other nations to help improve their standard of living, the WIC program would seem to be a fundamental and necessary adjunct to our humanitarian beliefs. Yet, with the blessing of the Bush Administration, the program faces cutbacks, is taking no new applicants and is struggling for an additional $150 million this year just to meet increasing costs.

I cannot, for the life of me, understand how we have the resources to bail out a savings and loan industry to the tune of perhaps $500 billion, and not have enough money to guarantee basic nutritional needs for those in society who are less fortunate, largely through no fault of their own.

Corrupt and inept bankers, many of whom lined their own coffers, made bad loans, speculated, took care of families and friends and now the entire nation is made to suffer. Bankers who held lavish conventions in Hawaii, and who lived high on the hog, have gone virtually untouched by any regulatory arm of government, except for several "show-case" trials.

At a time when the Cold War—if not ended—is certainly defrosting rapidly, why can't we divert the funds for just one Stealth bomber (you remember Stealth—when we finally used it, in Panama, it dropped its bombs 400 yards off the target area) to the needs of WIC? What we spend now for basic nutrition, we will reap as benefits, in decades yet to come.

If we can give favored-nation trade (FNT) status to a Chinese government which slaughtered its intellectuals in Tainanamen Square only a year ago and then thumbed its nose at world indignation, why can't we give "favored human status" to those in our own nation who so desperately need it?

No one in this country should go to bed hungry, and no one should do without the basic nutritional requirements of good health. The WIC keeps the candle burning.

FMLN CONTINUES TO UNDERMINE PEACE NEGOTIATIONS

HON. BILL McCOLLUM

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. MCCOLLUM. Mr. Speaker, I am placing in the RECORD the following letter as I believe it sheds light on a subject in which many people have an avid interest but about which very few know the entire truth. General Adolpho Blandon, the author of the letter, is the defense attache at the Embassy of El Salvador. I believe he is a very reliable source of information and is very knowledgeable as to the events currently taking place in El Salvador.

I found General Blandon's letter to be most disturbing. We have all been so encouraged so far by the support success of the peace talks in El Salvador. It appeared that the FMLN and the EL Salvador Government were finally willing to sit down and negotiate terms for a peaceful settlement in El Salvador.

From this letter you will discern, as I did, that the FMLN has obviously not been as true to its word as most commonly thought. The FMLN has been active in preparing and carrying through with terrorist and assassination attempts against members of the El Salvador Government, particularly military officers. These actions are reprehensible and should be stopped immediately. As General Blandon has stated, few know of these efforts by the FMLN to undermine the peace negotiations. Therefore, he has asked me to do what I can to make others aware of this situation with the overriding hope that this will facilitate the peace process in El Salvador.

Once again, this is a very serious matter that deserves immediate attention and action. I urge my colleagues and others to do what they can to see that this obvious breach of trust by the FMLN is stopped as quickly as possible.

General Blandon's letter reads:

EMBAJADA DE EL SALVADOR,
AGREGADURIA DE DEFENSA,
Washington, DC, July 19, 1990.

Hon. BILL MCCOLLUM,
House of Representatives, Washington, DC.

DEAR CONGRESSMAN MCCOLLUM: On behalf of the Armed Forces of El Salvador, and knowing of your interest in my country, I am writing this letter to inform you of several terrorist actions committed by the FMLN recently, that in my opinion are intended to endanger the possibility of bringing peace to El Salvador soon.

I have been very optimistic about the present peace process between the Government of El Salvador and the FMLN. The possibility of peace is higher now than at any other time in the last ten years. However, the recent assassination of off-duty military officers carried out and publicly claimed by the FMLN brings to serious question the real purposes of their strategy.

On one hand, the FMLN has publicly threatened to launch another offensive if they do not get what they want in the round of talks scheduled to begin in Costa Rica on the 20th of this month.

On the other hand, the FMLN's campaign of assassinations is designed to provoke the failure of the negotiations and to try to provoke a violent reaction by members of the Salvadoran military.

The latest incidents in the pattern of FMLN provocations against the Armed Forces are:

Major Carlos Alfonso Figueroa, 42, was assassinated by the FMLN on 09 July as he was leaving his home to attend an evening class at a civilian university. Major Figueroa was off-duty and wearing civilian clothes. The FMLN took responsibility for the assassination.

Captain Ramon Aristides Reyes, 30, off-duty and also in civilian clothes, was assassinated on the 17th of July as he was driving his car with his wife, who was shot twice during the attack. Captain Reyes was an examplary soldier and he leaves behind three young children. Once again the FMLN took responsibility for the assassination.

These two assassinations are not isolated incidents, but rather are part of a pattern of provocation directed against the Armed Forces. The attacks began last year, when the FMLN placed bombs in the homes of several officers, causing damage and endangering many innocent lives. Then the FMLN started to assassinate relatives of officers, including the daughter of a Colonel on her 23rd birthday and the son-in-law of a general. As of this year, the FMLN has assassinated in cold blood 3 officers and has made attempts to assassinate several others. Since the FMLN has taken credit for these actions, the only interpretation is that they are trying to provoke a hardening of the position of the military, which has so far given its full support to the ongoing peace process.

I am convinced that if we are going to find peace in El Salvador, these provocations must stop immediately. So far, the FMLN has acted with complete impunity, both legal and political. The only way that this attempt to undermine the peace process will stop is if the FMLN is made to pay a political price for their actions by an international rejection and condemnation for the assassination of off-duty military officers and their relatives.

Until now, almost nobody outside El Salvador knows about these FMLN attempts to derail the peace process.

Any action that you can take on this regard will be a very significant contribution to the peace that we all want for El Salvador.

Sincerely,

GEN. ADOLFO BLANDON,
Defense Attache, Embassy of El Salvador, Washington, DC.

HANDGUNS USED IN 639,000 CRIMES A YEAR

HON. JOHN Edward. PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. PORTER. Mr. Speaker, according to a Justice Department, criminals carrying handguns confront 639,000 Americans every year. On average, between 1979 and 1987, the Justice Department found that there were 9,200 murders, 12,100 rapes, 210,000 robberies and 407,600 assaults committed by criminals carrying handguns.

And criminals with handguns were responsible for 44 percent of all murders, 22 percent of aggravated assaults, 18 percent of robberies and 7 percent of all rapes during this period. Overall, 27 percent of all crimes that involved weapons of any type were committed with handguns.

Mr. Speaker, this madness must end. The easy availability of handguns in the United States has made our Nation a shooting gallery where law abiding citizens are the targets.

Like the NRA, I support tough laws, and tough enforcement that will keep repeat offenders off the streets. I believe also that Americans have the right to keep a gun to lawfully protect their homes and businesses. But the acquisition of a handgun needn't be as easy as purchasing a package of gum. Reasonable restraints would constitute a small inconvenience for lawful gunowners and a substantial deterrence on convicted felons and persons who are mentally deranged.

So I also support the Brady bill, which requires a 7-day waiting period for the purchase of a handgun. I urge the Judiciary Committee to report a clean version of the Brady bill and give the House a chance to vote on this important measure.

RULE ON H.R. 5269, THE COMPREHENSIVE CRIME CONTROL ACT OF 1990

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. ROSTENKOWSKI. Mr. Speaker, I wish to serve notice to my colleagues that, pursuant to the rules of the Democratic caucus, I have been instructed by the Committee on Ways and Means to seek less than an open rule for the consideration by the House of Representatives of H.R. 5269, the Comprehensive Crime Control Act of 1990.

HONORING CONGRESSMAN JOE RESNICK

HON. MATTHEW F. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. McHUGH. Mr. Speaker, Congressman Joseph Y. Resnick was a distinguished predecessor of mine in representing the mid-Hudson region of New York in Congress in the mid-1960's. He set a very high standard for responsive representation of his constituents, and was a respected and effective Member of this body until his sudden and untimely death in 1968.

Joe Resnick was a much beloved person and exemplary public servant. Members of his family, as well as a number of his friends and admirers, gathered at the Ellenville, NY, Library recently to commemorate his birthday and to celebrate his life. I would like to share with my colleagues the comments I contributed to that gathering; they are sentiments of admiration and appreciation which I am sure are shared by those in the House who were privileged to serve with Congressman Joe Resnick.

COMMENT FROM CONGRESSMAN MATT MCHUGH IN REMEMBRANCE OF CONGRESSMAN JOE RESNICK, ELLENVILLE LIBRARY "EVENING OF REMEMBRANCE," JULY 12, 1990

Joe Resnick was a pioneer in many ways, and was willing to take risks to develop himself and the world around him. Ellenville and the Hudson Valley region have never been the same.

Because Joe believe in developing himself, he took the risk of following his imagination. It's that quality that led him and his brothers to start the Channel Master Company in Ellenville. The success of that venture changed the history of this region, because it encouraged others to see this area as a good place to do business.

Because Joe also believed in developing the possibilities in the world around him, he chose to take other risks to provide political leadership in this area's communities, and waged a successful campaign to represent this region in Congress, the first Democrat to do so. I am keenly aware of how much courage, persistence, and support from fellow citizens it took for him to reach that goal. I am privileged to be a successor of his in representing the people of this community, something that might never have happened if Joe and not been such a pioneer in courageously seeking office as the candidate of a political minority party.

When I think of Joe as a pioneer and leader, I also think of how his family has shared in that quality of his, and continued his ability to better the world around him, both in his immediate community and elsewhere. The Resnick family has become a legend in this region and in many communities throughout the world because it has always carried on Joe's belief that doing well for one's self meant that one had a responsibility to help other people. In a beautiful book he wrote, called "This Special Valley", he expressed it both simply and eloquently: "The great thing about America is that is gives each man a chance to reach his potential. And that includes the opportunity to spend a little time thinking about the other fellow."

In the same book, I love the humorous anecdote he told about a visitor to the plant who was surprised that all the workers called Joe Resnick by his first name. When he asked one the workers why they didn't call the boss "Mr. Resnick", he was told: "I may be working for Joe, but I ain't beholden to him."

In a gathering like this, it is sad to contemplate that Joe Resnick died while still a young man. But I am reminded of what the great American educator John Dewey had said about the span of a person's life: "Be

ashamed to die until you have won some victory for humanity." In that sense, Joe's life was certainly a very complete one. He had won great personal victories, and all around us, in this community and many communities throughout the world, the spirit of his leadership and responsibility for the welfare of others lives on. It lives on especially in the humanitarian leadership of his large extended family, and in the deep affection and pride with which his memory is cherished among us.

EMPLOYEE BENEFITS SIMPLIFICATION ACT OF 1990

HON. ROD CHANDLER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. CHANDLER. Mr. Speaker, today I am pleased to present Congress with a unique opportunity; that being the opportunity to enact legislation which, for the first time in over 15 years, would actually reduce the complex regulation and administration that currently burdens the sponsors of private pension plans. But in doing so, Mr. Speaker, we have an opportunity which is far more important than merely easing an employer's administrative burdens. More importantly, we have the opportunity to expand our Nation's private pension coverage by removing some of the impediments that discourage employers from offering their employees a pension plan. In short, Mr. Speaker, we have the opportunity to help ensure the retirement security of American workers. I am referring to the Employee Benefits Simplification Act of 1990, a bill I am pleased to introduce today with Mr. ARCHER.

At the outset of my remarks, I commend Senator PRYOR and his staff for initiating this important effort in the other body. I am working with my colleagues in the House to do the same. Together, on a bipartisan basis, we need to achieve something positive for the pension system. It is essential that we do so if we are to provide the future financial security that American workers of all ages expect and deserve.

Since the Employee Retirement Income Security Act [ERISA] was enacted in 1974, various revenue acts have amended retirement plan provisions of the Internal Revenue Code. Specifically, since 1980, an average of one statute per year has been enacted to change the laws governing private pension plans. In fact, since October 1986, five new statutes have been enacted to change pension laws: the Tax Reform Act of 1986, the Omnibus Budget Reconciliation Act of 1986, the Omnibus Reconciliation Act of 1987, the Technical and Miscellaneous Revenue Act of 1988 and the Omnibus Reconciliation Act of 1989. Each of these laws required extensive, sometimes complex, administrative plan changes. The complexity snowballed as new laws were enacted before regulations implementing existing laws were promulgated. This troubling situation has only worsened as Congress has turned with greater frequency to the private pension system as a means of raising Federal revenue.

I have long been concerned that too many changes in pension law have been driven by revenue needs, rather than by what constitutes sound retirement income policy. In 1986, I said it was a mistake to include the far-reaching pension changes that were eventually incorporated into that year's landmark tax bill. There was neither the time, nor—to some extent—the inclination during that debate to evaluate carefully how these changes would affect the ability of employers to continue to provide retirement plans for their employees. One disturbing result of that process has been a dramatic decline in the establishment of new employer-sponsored pension plans. This bill seeks to reverse that alarming trend; not by dismissing the important budgetary constraints we must consider. But by balancing those concerns with a long-term retirement income policy which addresses the needs of a rapidly changing work force.

SIMPLIFICATION FEATURES

It is difficult to achieve simplicity and yet retain flexibility. Important features of this proposed legislation strike such a balance. For instance, this bill will end complex testing requirements for determining who is a highly compensated employee. The new definition is narrowed to someone who is paid more than $50,000 or who is a 5-percent owner. The bill also ends confusion over the various definitions of compensation found in the Internal Revenue Code. The proposed legislation sets forth a single definition of compensation based on W-2 income. Alternatively, the employer may elect to use base pay to determine compensation. These options eliminate the need for additional calculations on the part of the employer.

ALTERNATIVES TO ADP AND ACP TESTING FOR 401(K) PLANS

This bill provides an alternative to burdensome and expensive data collection and calculations required under current law for cash or deferred 401(k) plans. An employer can eliminate actual deferral percentage [ADP] or actual contribution percentage [ACP] testing by using a plan-designed safe harbor. The employer has two choices in this regard. The first alternative to ADP and ACP testing is to provide in the plan for a 100 percent match for elective deferrals up to 3 percent of compensation and a 50-percent match for the next 2 percent of compensation. The second alternative is to have the plan provide a nonelective deferral of at least 3 percent of compensation. Either of these plan-designed alternatives will eliminate needless and expensive calculations without compromising the original policy intent of ADP testing.

PRESERVATION OF BENEFITS

The bill attempts to broaden pension participation and to make sure that money originally set aside for retirement is actually there when an individual retires. In this regard, the bill expands the opportunities for rollovers and mandates the transfer of pension distributions to another plan or to an individual retirement arrangement. However, the grandfather provision for 10-year averaging under the 1986 Tax Reform Act remains unchanged. By allowing unlimited rollovers, pension distribution rules are greatly simplified for both employers and employees. Savings are also increased by encouraging employees to preserve pension funds until retirement.

OTHER PROVISIONS

For plans covering self-employed individuals, the bill will standardize most of the rules governing Keogh plans with basic pension requirements. This will provide consistency of treatment for small businesses. The bill further encourages small employer-provided retirement plans by allowing expanded participation in salary reduction arrangements for simplified employee pension plans. The bill also clears up confusion in the current tax code regarding employers who jointly maintain a Voluntary Employee Benefit Association [VEBA], by allowing expanded coverage on a national level. Fairer treatment is accorded handicapped employees by a provision permitting the plan to continue to contribute on behalf of all disabled participants without violating contribution limits under current law.

Mr. Speaker, while there will be many different views of what constitutes simplification, there should be no dispute concerning the need to begin the task. The time has come to stop adding layer upon layer of excessive regulation to a private retirement system which is already hamstrung by complicated rules. I believe this bill is an excellent first step toward addressing a complex and confusing area of the law that is greatly in need of reform. Throughout this process, our main priority has been to simplify pension rules while retaining enough flexibility to encourage employers to maintain retirement plans for their employees. In doing so, I believe we have taken an important first step toward improving the future retirement security of American workers.

THE CHURCH BENEFITS SIMPLIFICATION ACT OF 1990

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. MATSUI. Mr. Speaker, I am pleased to introduce today the Church Benefits Simplification Act of 1990. The act provides much needed simplification and clarification of the rules that apply to church retirement plans and brings workable consistency to those rules. In addition, the act resolves significant problems churches face in administering their retirement and welfare benefit programs under current law.

My staff and I have worked closely with leaders of the pension boards of 27 Protestant and Jewish denominations in developing this important legislation. The employee benefit program of these denominations are among the oldest programs in our country. Several date from the 1700's, and their median age is in excess of 50 years. These programs provide retirement and welfare benefits for several hundred thousand ministers, lay workers employed by thousands of churches, and church ministry organizations serving the spiritual needs of over 66 million members.

Church retirement benefit programs began in recognition of a denomination's mission to care for its church workers in their advanced years. Several church retirement and welfare benefit programs were initially formed to provide relief and benefits for retired, disabled or

impoverished ministers and families as particular cases of need were identified. As time passed, church denominations began to provide for the retirement needs of their ministers and lay workers on a current and systematic basis. Today, church retirement and welfare benefit programs provide benefits for ministers and lay workers employed in all forms of pastoral, healing, teaching, and preaching ministries and missions, including, among others, local churches, seminaries, old-age homes, orphanages, mission societies, hospitals, universities, church camps, and day care centers.

The goal of the act is to simplify and clarify the rules that apply to church employee benefit plans. Under current law, these rules are generally lengthy and complex and are, for the most part, designed for for-profit, commercial employers. Most denominations are composed of thousands of work units, each having only a few employees, and the budgets of these work units, each having only a few employees, and the budgets of these work units are marginal at best. These organizations rely almost completely on contributions from the offering plate to support their missions, including the salaries and retirement and welfare benefits of their ministers and lay workers. Unlike for-profit business entities, churches cannot pass operating costs on to customers by raising prices. Churches are also much more loosely structured than most for-profit business organizations, and many denominations cannot impose requirements on their constituent parts. For example, hierarchically organized denominations may be able to control the provision of employee benefits to ministers and lay workers, while in congregational denominations, such control is typically more difficult. In addition, churches are tax-exempt and, unlike for-profit business organizations, have no need for tax deductions. Churches and church ministry organizations therefore lack the incentive of for-profit employers to maximize either the amount of the employer's tax deduction or the amount of income which the highly compensated employees who control a for-profit business can shelter from current taxation through plan contributions and tax-free fringe or welfare benefits.

Retirement and employee benefit tax laws do not always take the difference between churches and for-profit employers into account, with the result that churches have had to divert a significant amount of time and resources from their religious missions and ministries in attempting to identify and comply with rules that in many instances are unworkable or simply not needed for church employee benefit plans. This legislation will significantly reduce administrative burdens and related costs now imposed on churches and church ministry organizations. Unlike the for-profit sector, where cost savings can result in a better "bottom line" for shareholders, savings in the church sector will find their way into missions and ministries that help people who need assistance.

A study of Independent Sector, a national membership organization composed of over 600 tax-exempt organizations and corporate philanthropy departments, indicated that approximately half the funds contributed by churches was used in service to others. Religious congregations are the primary voluntary service providers for neighborhoods. Ninety-three percent of religious congregations have one or more programs in human services. Four-fifths of all religious congregations offer family counseling, and one-third give meals or shelter to the poor. Some 78 percent donate for international relief or missionary activity, and two-thirds sponsor hospices, health programs, hospitals, or provide for disabled, retarded, or people in crisis. The Independent Sector study indicated that religious congregations made $8.5 billion in direct grants to other groups and paid $10.7 billion for education, human services, and health programs. These figures are double the giving of all U.S. foundations and corporations combined.

It is my view that the Congress should do everything possible to ensure that churches can continue to maximize their contributions toward these important missions and ministries, rather than paying for costs of complying with rules that are unworkable, or not needed, for church employee benefits plans.

The cornerstone of the act is a recodification of the rules applicable to church retirement plans so that all of such rules in the Internal Revenue Code are identified, simplified, and separated from the rules that apply to for-profit employers. Retirement plan issues unique to churches will thus not be inadvertently impacted when Congress is considering future Code changes which are applicable to for-profit employers but not appropriate for churches.

The act would also ensure that church retirement plans, whether described in the new section 401A (applicable to what are now church section 401(a) plans) or section 403(b), are subject to the same coverage and related rules. In 1986, Congress determined that the section 403(b) plans of churches and so-called "qualified church controlled organizations" should not be subjected to the expense of complying with coverage and related rules. The act would extend this same relief to church section 401A plans and would also eliminate the troublesome "qualified church controlled organization" approach in favor of a provision that only subjects church-related hospitals and universities to applicable coverage and related rules. The act, consistent with the law that now applies to church section 401(a) plans, would also clarify that the coverage rules that will apply to the section 403(b) programs of church-related hospitals and universities are those that were applicable prior to the enactment of the Employee Retirement and Income Security Act of 1974.

The act also would resolve a number of other problems many church pension boards face under current law. For example, under present law there is a question as to whether self-employed ministers are chaplains who work for nonchurch employers are able to participate in their denomination's retirement and welfare benefits programs. The act would make it clear that such ministers participate in such programs.

The act would also: restore QVEC's for church plans; solve several church employee "aggregation" problems; eliminate an administrative problem faced by multiple employer church plans that provide permitted post-retirement medical benefits; provide relief that will result in better retirement income for foreign missionaries; simplify the required distribution rules that apply to church retirement plans; eliminate a unworkable requirement under the so-called section 403(b) "catch-up" contribution rules; and make relief granted under section 457 consistent with coverage relief proposed for church retirement plans.

I urge my colleagues to join me in cosponsoring this vitally important church employee benefits legislation.

TRIBUTE TO KANISHKA RATNAYAKA

HON. DOUG BARNARD, 1JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. BARNARD. Mr. Speaker, I rise today to pay tribute to a young man, Kanishka Ratnayaka of Athens, GA, for being named Georgia's Voice of Democracy broadcast scriptwriting winner.

Kanishka is a 15-year-old 10th grade student at Cedar Shoals High School in Athens. He was born in Sri Lanka and became a citizen of the United States in August 1986. He incorporated this event into his winning essay entitled, "Why I am Proud of America."

I take great pleasure in submitting Kanishka's essay for reprint in the CONGRESSIONAL RECORD:

In August of 1986, I became a citizen of the United States. I became part of one of the greatest countries in the world. In one hand I held my Certificate of Citizenship, and in the other hand I held the Flag of the United States, the symbol of freedom and democracy. I felt honored to have this citizenship that insures freedom, and be among those to whom this comes as their birthright. Then for the first time in my life I realized what it means to be an American, and why I and so many other people are proud of America.

I am proud of America's great heritage. Our forefathers fought for the freedom that was rightfully theirs, and they founded this land of opportunity. Their greatest gift to us was the Constitution, which today gives us the freedom that other world citizens are fighting for. Our inheritance, the Constitution, gives us the opportunity to live and learn freely. We have the freedom to exercise any religion and speak or print our opinions and feelings, without fear of persecution. We are innocent until proven guilty, and our citizens age 18 or older enjoy the right to vote. From fighting for freedom, equality, and justice over two hundred years ago, to today, our forefathers marked our progress.

I am proud of America's progress. America, in spite of its short history, has led the world's progression. Our progress in democracy and humanity is marked by our 26 amendments to the Constitution. It has been emphasized by our Revolutionary War and our strong civil rights movement. It is proved by our commitment to set the example for other countries to follow, and how we uphold Woodrow Wilson's immortal words, "The world must be made safe for democracy." Our progress in education and technology has been tremendous. The people of the United States have the privi-

lege for universal public education, whether one is accelerated, average, or special. These developments have enhanced the quality of life through the attempt to attain total literacy and has provided for a just society with equal opportunity. Technology has advanced rapidly, making scientific and space programs flourish, and making the lives of people around the world easier and better. From inventors such as Thomas Edison to scientists like Albert Einstein, America's past is proof of progress in technology. Many other advances have helped America's progress. In agriculture, we are developing new ways to farm while other countries are still hand planting their staple crops. Scientific and medical research are fields led by America. Our movies and theatre productions are the basis of the world's entertainment. Progress is America's history and promise for the future.

The foundation of any great country is its people. I am proud to be a part of the hard-working American people who have molded America into what she is today. America has become the melting pot of the world, a symbol of many races, nationalities, and cultures living together harmoniously. This mixture of cultures and diversity, yet balance of the American people is symbolized in the landscape of this great country. We live in a land of plains and mountains, deserts and rivers, volcanoes and lakes, beaches and tundras, rolling grassy meadows and rocky mountain trails. This is a country blessed with a rich heritage, progress and beauty.

I hope the few words I have spoken has painted a picture, and image in your mind, of why I am proud of America from Patrick Henry's words which symbolize our great heritage and the mentality of the great American people, "Give me liberty or give me death", to the words of Neil Armstrong which illustrates America's progress, leadership, and pioneering spirit, ". . . Tranquility base here, the eagle has landed. This is one small step for man, one giant leap for mankind."

CORPS OF ENGINEERS ENVIRONMENTAL PROTECTION ACT OF 1990

HON. ARLAN STANGELAND

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. STANGELAND. Mr. Speaker, today I'm introducing the Corps of Engineers Environmental Protection Act of 1990. This legislation establishes within the corps an environmental protection mission, provides environmental and fiscal reforms to the Nation's largest water resources program, and authorizes several important wetlands protection initiatives.

My bill is based on testimony the House Public Works and Transportation's Water Resources Subcommittee received in developing its biennial Corps of Engineers project authorization bill and in reviewing the Nations wetlands programs. It reflects significant input from environmental organizations—particularly the National Wildlife Federation, as well as the Corps of Engineers and others concerned about water projects, wetlands, and environmental protection.

My legislation will help the corps realize their potential to become the Nation's premier environmental engineers. It promotes an environmental ethic within the agency that emphasizes good stewardship of natural resources without weakening the corps' critical role in flood control, navigation, economic development, and other areas.

It also strengthens the agency's wetlands protection efforts—but without resorting to heavy-handed regulations that restrict normal farming practices or infringe on private property rights.

Highlights of the bill include: Establishing environmental protection as one of the agency's primary missions; Providing as part of the Corps' civil works mission a goal of no net loss of wetlands; Expanding opportunities for wetlands protection by demonstrating wetlands restoration, creation, and mitigation banking; Establishing a new program to evaluate and demonstrate the use of constructed wetlands as a way to meet rural America's wastewater treatment and wetlands protection needs; Easing problems associated with wetlands regulations by training and certifying individuals on how to identify and delineate wetlands; Revising water project planning to take into account more fully environmental costs and benefits; Protecting the Federal Treasury against unwise investments in flood plain or shoreline protection projects; Encouraging the use of nonstrucutural, environmental compatible flood control and beach proteciton projects; and Improving reservoir management to increase the corps' flexibility in meeting demands for recreation and fish and wildlife protection and to allow greater public participation in management decisions.

My hope is to incorporate provisions of the bill into H.R. 5314, the Water Resources Development Act of 1990. Time constraints prevented me from attempting to include these provisions in the version of H.R. 5314 introduced on July 19. However, I know that subcommittee chairman HENRY NOWAK, full committee chairman GLENN ANDERSON, and ranking minority member JOHN PAUL HAMMERSCHMIDT support environmental initiatives and procedural and planning reforms within the corps' civil works programs. I look forward to working with them and the rest of my colleagues as we move H.R. 5314 through the committee and onto the floor.

Mr. Speaker, I urge all of my colleagues to support the Corps of Engineers Environmental Protection Act of 1990. Both the National Wildlife Federation and the corps have worked closely with me on developing the bill's various environmental initiatives and reforms. It's not a perfect bill, but it's a good start.

A brief section-by-section summary of the bill is attached.

SECTION-BY-SECTION SUMMARY OF THE CORPS OF ENGINEERS ENVIRONMENTAL PROTECTION ACT OF 1990

Section 1 provides the bill's short title—the Corps of Engineers Environmental Protection Act of 1990.

Section 2 establishes environmental protection as one of the Corps primary missions in planning, designing, constructing, operating and maintaining water resources projects. The section also requires the Corps to transmit periodic reports to Congress on specific steps taken to implement its new mission and on administrative and legislative recommendations.

Section 3 contains several important provisions on wetlands protection, restoration, creation, mitigation banking, and delineation.

Subsection (a) establishes, as part of the Corps' water resources program, an interim goal of no overall net loss of wetlands and a long term goal of increasing the quality and quantity of our wetlands. These are the goals endorsed by the 1988 National Wetlands Policy Forum. The subsection also requires the Corps to develop a wetlands action plan to implement the goals.

Subsection (b) authorizes a nationwide, experimental program for wetlands restoration and creation. Modeled in part on section 45 of the Water Resources Development Act of 1988 (P.L. 100-676), the new program is intended to develop technical information so that wetlands restoration and creation become more helpful in achieving the no-net-loss and net-gain goals.

Subsection (c) authorizes a program to evaluate and demonstrate the use of constructed wetlands to meet rural America's wastewater treatment and wetlands protection needs. The subsection also directs the Corps to establish an interagency working group on constructed wetlands for purposes of meeting the nation's water quality and wetlands protection goals.

Subsection (d) provides cost sharing responsibilities for non-Federal interests in carrying out wetlands programs in subsections (b) and (c). These provisions are modeled in part on requirements contained in section 45 of the Water Resources Development Act of 1988 (P.L. 100-676).

Subsection (e) authorizes a program to demonstrate the use of mitigation banks in meeting the Act's wetlands protection goals and compensation requirements under the Clean Water Act, the Rivers and Harbors Act of 1899, and other laws.

Subsection (f) authorizes a demonstration program for the training and certification of individuals to identify and delineate wetlands and directs the Corps to report on ways to improve the content and implementation of the Federal Manual for Identifying and Delineating Jurisdictional Wetlands.

Section 4 provides important reforms to existing policies on flood plan management.

Subsection (a) revises the Corps benefit/cost analysis procedures to prohibit the Corps from including in the benefit base for justifying Federal flood damage reduction projects any new or substantially reconstructed structures built in the 100-year flood plain.

Subsection (b) directs the Corps to study and report to Congress on increasing the non-Federal share of costs for new projects in areas where new or substantially reconstructed structures are built in the 100-year flood plain.

Subsection (c) and (d) provide for regulations and effective dates.

Section 5 restricts the Corps' ability to participate in environmentally-questionable beach stabilization or renourishment projects.

Subsection (a) prohibits the Corps from spending Federal funds on beach stabilization or renourishment projects unless the impacted State has committed to a beach front management program that restricts unwise development, the use of structural protection measures, and provides for structural relocations and increased public access to beaches.

Subsection (b) and (c) provide for exceptions and the issuance of regulations.

Section 6 requires various reforms to reservoir management policies to increase opportunities for environmental protection and public participation.

Subsection (a) requires the Corps to establish technical advisory committees at major reservoirs.

Subsection (b) requires the Corps to ensure the public has significant opportunities to participate in reservoir management decisions.

Subsection (c) provides the Corps with authority to manage existing reservoirs for recreation and fish and wildlife purposes if other project purposes would not be impaired.

Section 7 defines "Secretary" to mean Secretary of the Army and "wetlands" to mean those areas as defined in EPA's and Corps of Engineers' regulations issued under the Clean Water Act.

CAMPAIGN CONTRIBUTIONS

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. TORRES. Mr. Speaker, The savings and loan crisis has spawned a critical look at the flow of campaign contributions as they affect the legislative process. In particular, allegations have been made that Members' votes have been unduly influenced by contributions from savings and loan industry individuals or political action committees.

I think the critical examination that is going on now is long overdue. I am a cosponsor of legislation which would completely reform the campaign financing system and abolish political action committees. It is imperative that the Congress act on campaign finance reform legislation this year.

Members are being advised, principally by their respective national and local campaign organizations, to scour their records to see if they have received any contributions from individuals or PAC's associated with the savings and loan mess. The name Charles Keating figures prominently in the research efforts. Let me tell my colleagues something about Charles Keating. He never contributed a penny to any one of my campaigns.

The question now arises: had I received a contribution from Charles Keating before his recent notoriety, would I now give it back? And in the future, as the names of individual savings and loan executives are splashed across the headlines, would I return their money also? What standards should I apply? Should I be selective or should I just consider all the savings and loan industry contributions as tainted, and return it all? If so, for what years?

Of all the campaign contributions I have received since 1982, 6 percent have been from the savings and loan industry.

My colleagues, even the hint of an accusation that there is some connection between my votes and campaign contributions raises my blood pressure. Henceforth, I will not be accepting any campaign contributions from any individual or political action committee associated with the savings and loan industry. The fact is, that until we reform the campaign finance system, any other position I might take as a member of the Banking Committee would be interpreted as suspect.

I would point out, that as a member of the Banking Committee, I have voted for strong capital standards for savings and loans that require the owners to put up more of their own money. This is the key to protecting the taxpayers from another bailout in the future. I have also supported tighter regulation of the industry and strong enforcement provisions that punish those involved in financial institution fraud.

I voted to redirect the thrift industry back to housing and community development. In addition, I supported provisions that end discriminatory redlining and instead promote affordable housing.

The American taxpayer is right to be outraged that so little has been done to prosecute the con men and seize the money that was looted from the thrift industry. The House Banking Committee has approved legislation which I cosponsored to uncover and prosecute fraud and embezzlement in the savings and loan industry. The bill, H.R. 5050, will help the Federal Government to successfully prosecute financial crimes at the same time it increases the amount the Government will be able to recover from failed financial institutions. This bill is the strongest step yet taken to ensure that financial criminals will be held accountable to the taxpayers for their actions.

BUFFALO, NY, STUDENT AWARDED SCHOLARSHIP

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. NOWAK. Mr. Speaker, I would like to recognize and congratulate Ms. Deidre Brown a resident of Buffalo, NY, of the 33d District of New York, which I am proud to represent. A student at Canisius College, Ms. Brown is one of 10 recipients of the 1990 Public Service Scholarships awarded by the Public Employees Roundtable. More than 300 applications for these scholarships were received this year.

At this point, I would like to present Ms. Brown's winning essay: "How My Education and Experience Have Prepared Me for My Chosen Government Career." This is a poignant, sensitive description of a tragedy she encountered that inspired here to select child psychology as her career area.

HOW MY EDUCATION AND EXPERIENCE PREPARE ME FOR MY CHOSEN PUBLIC SERVICE CAREER

(By Deidre L. Brown)

My education and experience will help me in my chosen career as a Child Psychologist in the public school system. I presently attend one of the best private colleges in New York State, Canisius College. I am confident that I will receive an excellent education. Therefore I wish not to focus on the quality of the education I will receive at Canisius.

The task set before me was to explain how my education and experience prepare me for my chosen public service career. In doing so, I wish to emphasize the importance my individual experience, I would not be the person I am today or be as devoted to my chosen career.

As a child, I lived a somewhat sheltered life. The words abuse, incest, and molestation were foreign and meaningless to me. In my world, those things simply did not exist. That world came to an end when I learned the gravity of what they meant. Those words were no longer mere utterances on the six o'clock news or in the newspaper. They were reality and became the words that would change my life.

In my sophomore high school English class I sat across from a girl named Tammy. She came into class once again with a blackened eye and I assumed she had had another confrontation with a student. Behind me, two students sat snickering at Tammy and laughed that "her father must have beat her again." I was paralyzed, glued to my seat. I could not believe what I had heard. I am not sure if I am more horrified at their laughter or Tammy's abuse.

After class I spoke with my teacher and explained what I had overheard. I was not sure what was going to be done, I only knew that I wanted to help. In the subsequent weeks, Tammy showed up for fewer and fewer classes. It eventually reached the point where I never saw her again.

I often wonder if she is alive and doing well. When I question my actions then and wonder if I helped, I remember that a life of abuse is no life at all. It is a perpetual hell in which one lingers in with no hope of escape. For Tammy, I chose to take a step to end that hell. If the situation were to arise today, I know that I would again take that step.

It disturbed me that I had been a silent observer, never questioning Tammy's blackened eyes and by this oversight allowing the abuse to continue. I was further saddened that no one else took the time to ask Tammy if she had a problem or if she needed help. We all waited until a time when it may have been too late.

One other incident helped me decide my future in Child Psychology. A six-month-old baby boy named Eric was molested while visiting his father's house. Several people had been in the house at the time and it was impossible to determine who was responsible.

I love Eric as if he were a son. He is now six years old and remembers that something adverse happened over his father's house. Eric exhibits educational as well as behavioral difficulties in school. He never received professional help to deal with his feelings and I wonder if his problems stem from this early childhood tragedy.

I realize that the world is full of Tammys and Erics and all I have to do is look around to see them. Working in a public school will allow me the chance to reach children who are financially unable to seek professional care. I want to help America's forgotten children, for they are our future.

TRIBUTE TO GEN. JOHN W. ROBERTS, USAF-RETIRED

HON. G.V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. MONTGOMERY. Mr. Speaker, I had occasion recently to reexamine Gen. John W. Roberts' biography. I never realized it before

but, in one way or another, John has spent his entire adult life either in or working for the military.

Born in Mankato, MI, he entered the Air Force and earned his pilot's wings in 1943, when, as you may recall, it was still the Army Air Corps. During the Korean Conflict he flew combat missions in F-84 and F-86 aircraft.

Following the war, John had a succession of assignments, each entailing greater and greater responsibility. Among these were command of the 3529th Combat Crew Training Squadron, Assistant Deputy Chief of Staff for Plans, Air Training Command, and Assistant Chief of the Special Warfare Division, Headquarters, United States Air Force. In between these assignments he found time to earn his master's degree in business administration from the George Washington University and to attend the National War College.

During the Vietnam War, John commanded the famed 366th Tactical Fighter Wing (the Gunfighters) located at Da Nang Air Base. Shortly thereafter, upon promotion to Brigadier General, he became Director of the Tactical Air Control Center, Tan Son Nhut Air Base. Following tours as the Air Force's Director for Personnel Planning and as Deputy Chief of Staff for Personnel, he assumed command of the Air Training Command, a position he held until his retirement in 1979.

General Roberts was elected to the board of directors of The Retired Officers Association [TROA] in 1984 and as chairman of the board in December 1988. Through his stewardship, The Retired Officers Association played a vital role as staunch advocates of legislative initiatives to maintain readiness and improve the quality of life for all members of the military community—active, reserve, and retired—plus their families and survivors. I won't describe all of his accomplishments, but will briefly focus on a few to illustrate the breadth of his concern for military people. As chairman, he led the fight for affordable health care which, in turn, ultimately resulted in the repeal of the onerous and illadvised Medicare surtax that was associated with the Medicare Catastrophic Coverage Act—a feat people are still talking about. Likewise, under his direction, TROA supported strengthening the underpinning of the Montgomery GI bill and thus provided a solid foundation for our Nation's future leaders by placing the wherewithall for a college education on the horizon of more than 1,000,000 young men and women who otherwise might have been denied that opportunity. Finally, he was ever mindful of the adverse effects on morale and retention caused by broken commitments and inadequate compensation and forcefully championed the causes of fairness and equity. His leadership efforts to defeat the imposition of user fees in military health care facilities, to preserve COLA and to provide adequate military pay raises are especially worthy of note.

As a final thought, as I am sure you will all agree, the word leadership is often applied to those who do not deserve it. In General Robert's case, just the opposite is true. He has been, in every sense of the word, a leader in the military, TROA and the entire retired community. Our wishes go with him for a long life and continued success in service to his Nation and especially those in uniform whom he has so admirably led.

THE DELANCEY STREET FOUNDATION

HON. NANCY PELOSI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Ms. PELOSI. Mr. Speaker, I rise today to share with my colleagues the occasion of the grand opening of the Embarcadero Triangle, the new headquarters of the world-renown Delancey Street Foundation, which will be the largest self-managed, self-built, self-help complex in the country.

Under the extraordinary leadership of Mimi Silbert, its founder, president, and chief executive officer, Delancey Street has garnered a well-deserved reputation as the most successful program of its kind in the world. With no cost to the taxpayer, Delancey Street takes its residents through a 2-year program consisting of practical and technical training, general education, cooperative living, rap sessions, self-analysis and positive self-esteem workshops. This unique multidiscipline approach has graduated thousands into society as drug-free, legitimate, and successful citizens.

In keeping Ms. Silbert's promise to "prove that people everybody thinks are losers are really winners," Delancey Street currently has 800 residents of all ages, races, and backgrounds in New York, North Carolina, New Mexico, Los Angeles, and its headquarters in San Francisco. The program has been found to be so successful that it has been replicated by countries from Australia to Poland.

The Embarcadero Triangle is the culmination of the Delancey Street creed. Over 250 formerly unemployable drug addicts, homeless people, and ex-felons residing at Delancey Street, trained in every skill in the building trades, as well as in purchasing, contracting, computer, and accounting services, have transformed an entire city block into a 4-story, 350,000-square-foot mixed-use site that includes retail stores, restaurants, and dwelling units for the residents of Delancey Street.

Embarcadero Triangle is more than the ultimate sweat-equity project. Allan Temko, the Pullitzer Prize winning architecture critic of the San Francisco Chronicle, has called the architecture of the Embarcadero Triangle a "masterpiece of contemporary social design." For in fabricating their own steel, in creating their own molds, in sculpting the ironwork, stairs, and terraces, there is a little piece of somebody where ever you look in this magnificent structure.

Thus, it should also be written that Embarcadero Triangle, under the leadership of Mimi Silbert and the Delancey Street Foundation, is a masterpiece of social work as well. It is a complex where its residents can live, and work, and dream, and, in doing so, start a new journey in life. I salute Delancey Street's founder, its workers, and its spirit on this, the occasion of the grand opening of the Embarcadero Triangle, July 26, 1990.

DAVID H. HITT RECEIVES GOLD MEDAL AWARD OF THE AMERICAN COLLEGE OF HEALTHCARE MANAGEMENT

HON. MARTIN FROST

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. FROST. Mr. Speaker, Mr. David H. Hitt, the president and chief executive officer of Methodist Hospitals of Dallas, located in my congressional district, is the 1990 winner of the Gold Medal Award of the American College of Healthcare Executives.

The Gold Medal Award, granted annually to an individual who has demonstrated excellence and leadership in healthcare management, will be presented to David during the college's July 29, 1990, annual banquet in Washington, DC.

David Hitt has been in healthcare administration for 42 years and is well known for his professional competence and leadership. For example, during the 1950's he chaired the first American Hospital Association task force on the use of computers in hospitals. In 1990, he is serving on the AIDS task force for Dallas County, illustrating his participation in a wide range of activities aimed at improving patient care.

For 27 years, he served in executive management at Baylor University. While there he developed and implemented many patient-oriented programs, including an innovative decentralized organization plan that required nursing and executive management to visit nursing units regularly in order to improve communications with the medical care staff and physicians.

Six years ago David took over the leadership of Methodist Hospitals of Dallas. In that time, he has played a critical role in the growth and development of this major community hospital.

The American College of Healthcare Executives, a Chicago-based international professional society of more than 23,000 healthcare executives, has honored David Hitt for his professional service to our community and our Nation, and it is a very just recognition.

I am pleased to call Mr. David Hitt to the attention of the U.S. House of Representatives and to congratulate him on his receiving the Gold Medal Award of the American College of Healthcare Executives.

HONORING METROHEALTH MEDICAL CENTER—CLEVELAND, OH

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Ms. OAKAR. Mr. Speaker, today, with great pride, I rise to offer this statement in recognition of the accomplishments of MetroHealth Medical Center located in Cleveland, OH. MetroHealth is one of the Nation's leading medical centers and a model for how an institution

in today's competitive health care environment can remain committed to a public charitable mission, and not let quality or financial viability suffer.

The Medical Center is nationally recognized for its patient care, academic and clinical research programs. MetroHealth's name and accomplishments are directly associated with past medical milestones such as the eradication of polio, the control of tuberculosis, and many of today's efforts toward conquering AID's and the ravages of cancer. In 1988, MetroHealth was named by the American Hospital Association as the finest hospital in the country for providing community service.

As Cleveland's first hospital, MetroHealth Medical Center has more than 150 years of experience handling complex medical problems. Last year more than 150,000 Greater Clevelanders chose MetroHealth as the place to receive their care.

MetroHealth is a national leader in the area of women's and children's health, trauma and critical care, cancer and rehabilitation services. Whether providing routine care or treatment for a life threatening condition, MetroHealth has available the most qualified medical staff, leading edge technology, and most important, a commitment to quality.

Three examples of the unique capacities of MetroHealth are its aeromedical transport program, the MetroHealth Center for Rehabilitation, and the John A. Gannon Center for Burns and Trauma. Metro Life Flight is a regional emergency transport service serving Ohio, neighboring States and Canada. Metro Life Flight is prepared, 24 hours a day, 7 days a week, to transport critically ill patients from referring locations to MetroHealth Medical Center, and to more than 50 other receiving hospitals within a 200 mile service area. Flying the largest, safest, most powerful aeromedical helicopters in the country, Metro Life Flight has completed 10,000 missions, making it the second largest program of its kind in the United States.

Nearly one-third of the patients transported by Metro Life Flight are treated at MetroHealth in the John A. Gannon Center for Burns and Trauma. One of only 169 or so Level One Trauma Centers in the country, the center treats major trauma and severe burns in one of the newest and most technologically advanced facilities in the nation. MetroHealth's Burn Center was established in 1971 and has grown in recognition as a leading center for the treatment of severe burns.

The MetroHealth Center for Rehabilitation, Ohio's largest and most comprehensive rehabilitation center, has provided annually inpatient and outpatient rehabilitation treatments to over 1,200 patients suffering from serious injuries and chronic illnesses. MetroHealth's common goal is for each patient receiving rehabilitation services to achieve the highest level of independence within the framework of the illness or injury. A pioneer in innovative services since its inception, MetroHealth Center for Rehabilitation is nationally recognized for its range of services and specialized programs in the areas of spinal cord and head injury, stroke, and also as a pioneer in research programs such as functional electrical stimulation.

MetroHealth has a unique mission of service to the poor in the Cleveland area, and a corresponding open door policy. Their success in maintaining this mission and continually improving the types and quality of services available must be recognized with special notice being given to the dedicated physicians, nurses and support staff who better the lives of thousands of Clevelanders—especially those with no place else to turn.

QUESTIONNAIRE RESULTS

HON. CHALMERS P. WYLIE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. WYLIE. Mr. Speaker, last spring I asked the people of the 15th District of Ohio, which I have the honor to represent, their opinions on a number of important issues facing our Nation today. Admittedly this is not a scientific survey, but after tabulating and reviewing the 13,000-plus responses, I thought that our colleagues might find the following results interesting.

FINAL QUESTIONNAIRE RESULTS

[In percent]

	His			Hers		
	Yes	No	Und.	Yes	No	Und.
1. Do the political changes taking place in the Soviet Union and Eastern Europe warrant a reduction in defense spending?	70	22	8	68	24	8
2. Do you favor increasing economic aid to Eastern European countries?	33	54	13	28	59	13
3. Do you favor increasing economic aid to Nicaragua?	33	55	12	25	59	16
4. Should Ohio congressmen vote for the clean air bill if the cost sharing formula for acid rain cleanup results in higher electric rates?	64	27	9	62	26	12
5. Should Pacific Rim nations such as Japan, Korea and Taiwan contribute a greater share of the cost of their own defense?	95	3	2	93	4	3
6. Do you favor the legalization of the use of marijuana, cocaine or heroin?	16	78	6	14	79	7
7. Do you favor a capital gains tax cut?	44	44	12	41	43	16
8. Do you think the amount of money appropriated to provide shelters and services for the homeless should be increased above President Bush's budget recommendation?	37	51	12	42	46	12
9. President Bush has asked Congress to appropriate $5.5 billion for research development and the construction of five B–2 stealth bombers for FY 1991. Should I support the President?	29	62	9	25	62	13
10. Do you favor repeal of the outside earnings limitation for Social Security recipients?	67	22	11	61	24	15
11. Do you favor excluding the Social Security Trust Fund from federal deficit calculations?	75	16	9	72	15	13
12. Would you favor reducing the Social Security tax now to a pay-as-you-go level even though additional monies would have to be added in the future to the Social Security Trust Fund to take care of the baby boomers?	27	59	14	24	57	19
13. Do you favor increasing direct subsidies and payments to state certified child care facilities to meet the growing need for child care?	36	54	10	44	46	10
14. Do you favor a refundable tax credit to parents to pay for child care in a facility of the parents' choice?	52	38	10	57	35	8
15. The issue of federal funding for abortions has become one of the most controversial in my years in Congress. Please indicate which position most nearly states your own?						
a. I favor a constitutional amendment making abortion illegal in all cases.		9			9	
b. I do not favor a constitutional amendment but am opposed to abortion except in the case of rape, incest or where the life of the mother is in danger.		12			11	
c. I am pro life, but do not support a constitutional amendment, and do not think federal funds should be used to pay for an abortion in any case.		10			10	
d. I am pro choice but do not feel federal funds should be used to pay for abortions.		15			16	
e. I would support federal funding of abortions but only if the life of the mother is in danger.		1			1	
f. I would support federal funding of abortions in the case of rape, incest or where the life of the mother is in danger if she can't afford an abortion otherwise.		18			16	
g. I favor federal funding for abortion for mothers who can't afford it if that is what the mother wants.		35			37

TRIBUTE TO ADM. CARLISLE A.H. TROST

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. SKELTON. Mr. Speaker, today I pay tribute to Adm. Carlisle A.H. Trost, a truly outstanding naval officer and gentleman. On July 1, 1990, Admiral Trost ended 37 years of active naval service. In ceremonies held at the U.S. Naval Academy in Annapolis, MD, on June 29, 1990, Admiral Trost was relieved by Adm. Frank B. Kelso II, as Chief of Naval Operations.

Admiral Trost graduated first in his class from the U.S. Naval Academy on June 5, 1953. Subsequently, Admiral Trost served on the U.S.S. *Robert A. Owens* (DD 827) before beginning his long career serving in both nuclear-powered attack and ballistic missile submarines. On July 1, 1986, he was named the 23d Chief of Naval Operations.

A leader during a time of rapid change, Admiral Trost set a course which will guide the Navy into the 21st century and ensure the U.S. Navy's role in the protection of our national interests. He maintained a firm commitment to Navy people and their families which helped the Navy to achieve its highest levels of reenlistment in the post-Vietnam era. In October 1989, Admiral Trost became the first Chief of Naval Operations to visit the Soviet Union, making a significant contribution to the lessening of tensions and building of confidence between our two Navies.

I would like to personally express my appreciation to Admiral Trost and recognize him for his devoted years of service to the Navy and our country. Let me also recognize his wife, Pauline, and their children for their loyalty and support, which are so necessary in the life of a career naval officer. I invite my colleagues to join with me in congratulating this gentleman for his distinguished career.

A "POINT OF LIGHT" CHOSEN IN RIVERSIDE

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. BROWN of California. Mr. Speaker, I rise today to recognize an organization in my district which was selected on Saturday, July 21, 1990, as a "Daily Point of Light" by the President. This organization, Alternatives to Domestic Violence, represents the volunteer ethic at its finest, and I am proud to join the President in bringing attention to this group.

Founded in 1977 by concerned citizens, Alternatives to Domestic Violence provides support services to victims of domestic violence. More than 100 volunteers play a role in carrying out the organization's programs and helping increase public awareness about the terrible social problem of domestic violence.

Volunteers who assist with the 24-hour crisis line provide counseling, information, referral, and emotional support to those who call in need of assistance. Those who work with the Horizon House Shelter comfort women and their children who have sought refuge from domestic abuse. The childrens' program counsels the children who temporarily live at Horizon House. The volunteers work with the children, helping them cope emotionally with the violence they have experienced. In addition, the volunteers accompany the women throughout the judicial process, offering advice and providing support.

In these, and myriad other ways, the volunteers of Alternatives to Domestic Violence truly embody the spirit of the Point of Light program, which is intended to call every individual, group, and organization in America to claim society's problems as their own by taking direct action. Without this volunteer effort, groups such as Alternatives to Domestic Violence surely could not exist.

However, we make a grave mistake to assume that hard work alone is all that it takes to make volunteer organizations, such as this one, work. The reality is that operating a crisis telephone line, paying rent and operating a shelter, and providing care for children, takes more than elbow grease and good intentions: It takes money.

It is becoming increasingly clear that our Nation is approaching a period of economic stringency. In my home State of California, we have already seen how that translates into budget cuts. Alternatives to Domestic Violence is a prime example of an outstanding organization which depends on State funding to supplement its volunteer effort, and which is being threatened by budget cuts. Despite our praise, and despite our Presidential Point of Light, without the necessary funding, Alternatives to Domestic Violence will cease to exist.

I call upon my colleagues in the House to keep this example in mind as we consider the tough budget choices which we will have to make in months and years ahead.

LEAD POLLUTION PREVENTION ACT OF 1990

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. THOMAS A. LUKEN. Mr. Speaker, lead poisoning in the United States has reached epidemic proportions, with an estimated one in six children suffering from dangerously elevated levels of lead. This means that over 3 million children are threatened with the possibility of significant neurologic impairment, permanently lowered I.Q.'s, convulsions, comas, or even death as a result of exposure to lead, often from everyday sources such as dirt, dust, and drinking water or, in many older homes, paint chips.

Even relatively small exposures to lead can cause subtle but irreparable harm, resulting in brain damage and nervous disorders which stunt children's prospects for full, productive lives. And although children, particularly in urban areas, are at special risk, adults may also suffer serious health effects from exposure to lead. Indeed, there appears to be no safe level of exposure to this toxic heavy metal.

Although the dangers of lead are by now well known, too little has been done towards eradicating lead in the environment. Decades of widespread use of products such as leaded gasoline and lead paint have left a menacing legacy of toxic contamination of our air, water, and soil. And the continuing use of lead in a wide variety of products further contributes to the already intolerable amounts of lead in the environment.

The Lead Pollution and Exposure Reduction Act, which I am introducing today, would combat the hazards posed by lead which has already been dispersed into the environment, while taking firm steps to curtail additional contamination. Strict limits would be placed on the lead content of many products, including paint, plumbing fixtures, solder, inks, and plastic additives. Further, manufacturers would have to notify EPA of any additional or newly developed products containing lead. New products would be banned unless EPA finds dispersion of lead in the environment to be unlikely and no comparable product is available. The bill also requires labeling of products which contain lead.

All lead-acid batteries, which account for three-fourths of the 1.4 million tons of lead used in the United States annually, would be recycled. And leaded gasoline, which has in the past contributed heavily to our environmental burden of lead, could not be sold at a price lower than unleaded gas.

The bill also requires EPA to revise Federal standards for lead in drinking water and ambient air, long overdue. EPA would be directed to work with other Government agencies to set standards for environmental sampling and blood analysis laboratories and to bring about improvements in lead detection and abatement. The bill also provides for critically needed research and public education activities.

Similar legislation has been introduced by Senators REID, LIEBERMAN, and BRADLEY. I look forward to working with them and others to halt the incalculable damage caused by lead pollution which, today, is all too pervasive in the United States.

THE 1990 FARM BILL ADDRESSES NORTHEAST PENNSYLVANIA'S GYPSY MOTH PROBLEM

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. KANJORSKI. Mr. Speaker, the 1990 farm bill which we are currently considering, deals with a myriad of issues related to American agriculture. While some are contentious, these debates should also focus on other aspects of the bill which make important strides to address serious problems.

One such issue is insect control. Section 1502 of the farm bill outlines the Federal Government's response to insect infestation in our Nation's State and private forests. I applaud the more aggressive stand taken by these provisions in the farm bill to assist the States in the insect control programs, and urge my colleagues to join me in supporting this effort.

Mr. Speaker, the area I represent in northeastern Pennsylvania suffered extensive damage this year due to an unprecedented infestation of gypsy moths. Approximately 1,500,000 acres in Pennsylvania were defoliated in the spring and summer of 1989 by gypsy moths. This year, the damage is expected to be twice that amount.

The gypsy moths completely stripped trees of their leaves, caused serious rashes in some people who came in contact with the insects, and did untold economic and environmental damage to a large number of communities.

Preliminary investigation indicates that the problem will worsen before it improves, and next year Pennsylvania may experience even worse defoliation. Furthermore, research indicates that the gypsy moths are moving to the West and to the South, and that soon very few areas in our country may be free of these troublesome pests.

As I indicated earlier, section 1502 of the 1990 farm bill takes a more aggressive approach to pest abatement by raising the cost-share assistance provided to the States for insect control from 50 to 75 percent and by authorizing $10 million for the pest abatement program; an increase of $1 million over last year's authorization.

Mr. Speaker, I have been assured by the Pennsylvania Department of Forestry that these increases are needed and will be important in their upcoming battles against the gypsy moth. Although I realize that these actions will not in themselves cure the problem, they will offer some relief until the pest can be permanently eradicated.

I would like to offer my sincere appreciation to Chairman VOLKMER and Chairman DE LA GARZA for their leadership and assistance in this important area.

A TRIBUTE TO THE GREATER MIAMI OPERA

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, I am honored to recognize the Greater Miami Opera which will be celebrating its 50th anniversary this 1990–91 season.

Dr. Arturo di Filippi, a voice teacher at the University of Miami, was the first to conceive the idea of bringing opera to Miami and founded the Opera Guild of Greater Miami in 1941. di Filippi was general manager from the company's first production, staged February 13, 1942, of Leoncavallo's "Pagliacci," sung in English until his death in 1972. Dr. di Filippi has had only two successors in the 18 years after his death. The first was his good friend, Robert Herman, who served as general manager from 1973 to 1985 when he retired and was elected to the board of directors as vice president of advocacy and development. The second is Robert M. Heuer, who originally joined the guild in 1979 as its first director of productions and then became assistant general manager in 1983. Mr. Heuer has now served as general manager since 1986.

These three men worked each with a single goal in mind: To raise the Opera of Greater Miami to its finest measure. They succeeded by concentrating on different aspects of the art, such as the visual and contemporary innovations that they saw possible. Today, the Miami Opera is the largest renter of scenery in the country and have created new positions, such as artistic director, which has been held by Dr. Emerson Buckley and Willie Anthony Waters. It has also changed its repertoire to include Mozart, Strauss, Wagner, and contemporary operas, as well as Puccini and Verdi, all done in the original language.

Volunteer leadership has also been a significant part of the guild's rapid success. Soon after Arturo di Filippi founded the guild, Mrs. Marcia Pawley was elected the guild's first president and an executive board was chosen. Mrs. Pawley served as president for 15 years from the guild's inception to 1956.

Currently, this noteworthy opera company is under the masterful stewardship of Chairman Dr. Maxwell Dauer, Vice Chairman Roberta Balfe, Vice Chairman Robert Traurig, President James Herron, Vice President Horacio Aguirre, Treasurer Ronald Korn, Secretary Mrs. Phillip George, and Assistant Secretary Mrs. Oswald Turner. It should be proud to also include as chairmen emeriti, Mr. Horace Cordes, Mrs. Joseph Crawley, Dr. Adelio Montanari, Mr. Alberto Vadia, Mr. Alexander Wolfe; and as directors emeriti, Dr. Richard Elias, Mr. Nathan Gumenick, Dr. Leonard Jacobson, Mr. Graham Miller, and Mr. Morton Weiner.

In its 50 years, the Opera of Greater Miami has done more than just serve an artistic and aesthetic function. The opera's educational and community service program is the largest of its kind in the country. These programs reach every age group in trying to elicit interest and curiosity into the little-known world of the arts.

In celebration of the guild's anniversary, the company will perform Pagliacci, in honor of the company's first production. It also will start the season with a transatlantic opera cruise on the *Queen Elizabeth II* from August 9 to August 15, 1990, led by General Manager Robert M. Heuer and featuring Carol Neblett, Joseph Illick, Virginia Browning, and young artist program graduate Lawrence Craig. The Opera Ball, chaired by Mr. and Mrs. Egmont Sonderling, takes place on November 30. There will also be a gala party on February 18, with opera stars and local dignitaries.

I am pleased to congratulate the Opera of Greater Miami on their commemorative anniversary and wish them much success with their drive to add $10 million to their opera endownment by 1992, to build a performing arts center in the 21st century.

CLARK PORTEOUS HONORED

HON. DON SUNDQUIST

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. SUNDQUIST. Mr. Speaker, a few weeks ago, a good friend and a great newspaperman from the town of Collierville, TN, Clark Porteous, was honored by his community on the occasion of his 80th birthday. As the House was in session on July 10, I was unable to take part in celebrating Clark Porteous Day, but his long and distinguished career are worthy of note by this House.

Clark Porteous has been a newspaperman for six decades. During his 47 years with the Press-Scimitar in Memphis, he covered the politics of the Crump machine, served his country as a combat correspondent during World War II, covered the big flood control projects that tamed the Mississippi River, was there at the onset of the civil rights movement, witnessed the space program come to the Mid-South, wrote about Rock and Roll and a Memphis legend named Elvis Presley.

From 1981 until 1988, Clark edited the Collierville Herald, for whom he remains an associate editor.

A caring man long active in his community, he is also a family man, father to six, grandfather to five, and soon to be a great-grandfather.

Clark Porteous Day in Collierville July 10 is an expression of how people feel about this wonderful man whose friendship and support I am proud to have.

I ask that the Collierville Herald's account of Clark Porteous Day be reprinted in its entirety in the CONGRESSIONAL RECORD.

CLARK PORTEOUS DAY BRINGS PRAISE FROM HIGH PLACES

(By Daisy Fontaine)

He received a letter from the governor of Tennessee. He was made an honorary Shelby County Commissioner. He was given Shelby County Mayor Bill Morris' Shelby County Meritorious Service Award, only the eighth ever given. It was Clark Porteous' day.

The day had already been declared his day by Collierville Mayor Herman Cox and at a morning reception at the Collierville Depot on the Historic Square friends, relatives, admirers, and politicians came in numbers to honor Porteous, The Herald associate editor and dean of Tennessee reporters, on his 80th birthday.

The reception, sponsored by The Herald, the Town of Collierville, and the Collierville Area Chamber of Commerce, was marked by camaraderie and respect from people who had known Porteous from his Memphis Press-Scimitar days and from those who had known him only during the nine years he has been associated with The Herald.

Accolade followed accolade:

John Fowler, Chamber of Commerce president, welcomed the guests and praised the honoree.

Mayor Herman Cox and Vice Mayor Tom Brooks presented Porteous with a framed copy of the proclamation which made Tuesday "his day." Cox said, "I believe in giving flowers to the living. I don't want to lay them on your grave, Clark."

Gov. Ned McWherter, in his letter, praised Porteous for his many years of honest and dedicated journalism.

A Press-Scimitar alumnus who had worked at Memphis City Hall with Porteous, Tom Stone, presented him with the award of merit on behalf of Mayor Morris, who was unable to attend.

County Commissioner Carolyn Gates sealed Porteous' appointment as an honorary county commissioner with a hug and a kiss. She told the crowd Porteous was the first newsman to take her political ambitions seriously and credits his coverage of her campaign as being instrumental in her election to the commission.

Chief Dennis Joyner paid the respects of the Colierville Police Department to Porteous.

The Herald editor and publisher, Van Pritchartt, who worked with Porteous for many years on the Press-Scimitar, reminisced humorously about the years on the daily paper when Porteous was accused of setting waste paper baskets on fire with the embers from a pipe, which was the reporter's constant companion in those days. He added, "Clark, you and I have much more work to do before we're through."

Politicians paying their respects to Porteous and making their bid for election among the guests were Billy Ray Schilling, along with his finance chairman, Charles Pegram, a former manager of the Community Bank of Collierville; and Riley Garner, veteran county trustee, along with his Collierville brother-in-law and his wife, Mr. and Mrs. Joe Boyd Rives.

Members of Porteous' family present were his wife, Elizabeth; three sons, Tom, a captain with the Memphis Police Department; David, an attorney and a Collierville resident; and John, an automotive mechanic. The sons were accompanied by their families. Three of Porteous' grandchildren, Michele, Maria, and Michael, were on hand to wish their grandfather happy birthday.

The newspaperman is the second news media person to receive Mayor Morris' meritorious award. He joins Marge Thrasher, TV personality. Others who have been honored with the medal are Larry Finch, Memphis State University basketball coach; Tom Turner, Shelby County businessman; Arthur N. Seessel, Memphis grocer; Brother Theodore Drahmann, president of Christian

Brothers University; Eleanor Hughes, Shelby County geneologist and member of the Shelby County Historical Commission; and Bishop William H. Graves, bishop of the Christian Methodist Episcopal Church.

INADVERTENT ERROR

HON. MICHAEL R. McNULTY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. McNULTY. Mr. Speaker, my good friend and colleague, Mr. SOLARZ, was inadvertently left off the list of original cosponsors of H.R. 5282.

I fully intended to include Mr. SOLARZ on this bill as an original cosponsor and I would like the RECORD to state this.

DUTY SUSPENSION FOR DIGITAL PROCESSING UNITS

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. ARCHER. Mr. Speaker, on July 23, 1990, I introduced H.R. 5342, a bill to extend a duly suspension for digital processing units.

Subheading 9902.84.71 of the HTS was created at the request of the administration to provide a 2-year duty suspension on imports of digital processing units—motherboards—for computers. This provision expires after December 31, 1990. At the same time, specific negotiating authority, for the purpose of reducing the tariff on this item through international agreement, was included in the Omnibus Trade and Competitiveness Act of 1988. No serious effort was made to use this authority before it expired during October 1989, given the focus on the GATT talks. Negotiations are now taking place in the context of the Uruguay round, and the administration expects to reach an agreement which will reduce the tariff on this item beginning January 1, 1992.

An extension of the duty suspension is necessary to bridge the gap between the end of the current suspension—December 31, 1990—and the time when the Uruguay round tariff reductions are expected to take place—January 1, 1992.

SITUATION IN KASHMIR

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. GEJDENSON. Mr. Speaker, I rise today to call attention to the volatile situation in Kashmir and my concern for the human rights of the people of this region. Our sense of humanity demands that we acknowledge the unfortunate plight of the Kashmiris. Since the establishment of Pakistan and India in 1947, the people of Kashmir have known only limited peace. Currently, indiscriminate killings, arbitrary arrests, unlawful searches, and unprovoked assaults on peaceful demonstrators haunt the provincial residents. Additionally, food and medical supplies, including vaccines, are extremely scarce. These obvious human rights infractions have created a lifestyle dominated by suffering, fear, and insecurity.

I commend Presidents Bush and Gorbachev for placing this important regional conflict on their agenda at the recent summit in June. Further, I believe that through the medication of these two superpowers and the office of the United Nations, both Pakistan and India may approach the negotiating table prepared to reach an agreement over the integrity of Jammu and Kashmir. Daily news reports express the urgency of this situation and the pressures of extremism on both the Indian and Pakistan Governments which undermine the democratic foundations of both these nations. While I respect the territorial integrity of the Indian Government, I strongly urge the Indian Government and all responsible leaders of the Kashmiri people to attempt to achieve a political solution that will permit the settlement of accumulated grievances and the restoration of law and order, while guaranteeing human rights for all the people of India.

THE PEACE CHILD FOUNDATION

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. FASCELL. Mr. Speaker, I rise today to give recognition to a group whose work with children across America and around the world is helping to promote peace and harmony and to build bridges across racial lines. The Peace Child Foundation brings children from diverse racial, cultural, and socio-economic backgrounds together to work toward a common goal of creating and performing in a musical revue, combining and sharing their unique cultures and experiences.

The Peace Child Foundation is a nonprofit organization which acts as an umbrella for local groups in cities around the United States; helps them get started and gain sponsorship; and oversees the international projects of the foundation. The local groups bring children of different races together to create and perform a musical production extolling harmony and peace. Internationally, Peace Child selects American youths to join with children from other countries to perform and share their cultures and ideas. With these small steps, they are aiding in the peace process in a unique way.

I was recently fortunate enough to see "City at Peace," presented by the Miami branch of the Peace Child Foundation. It was comprised of 112 students who sang and danced their way into the audience's heart. They put their individual talents and interests together and produced a moving show, encompassing the ideals of peace and racial harmony, combined with an antidrug message. Through their effort and group commitment, these young people learned that although they come from different backgrounds, they are all part of one community and can work together to create something truly special on their own. Hopefully with this experience, these children, and those they come in contact with, will grow older and wiser without the prejudice and fear that comes with the unknown.

CONGRESSIONAL SALUTE TO RICHARD V. BERTAIN

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 25, 1990

Mr. ANDERSON. Mr. Speaker, I rise today to pay highest tribute to Dr. Richard V. Bertain on the occasion of his nomination by the President of the United States to the position of Associate Director of the Office of Domestic and Antipoverty Operations at ACTION.

Richard Bertain holds the best of academic qualifications for this position. After receiving his A.B. in both philosophy and English from St. Mary's College in 1951, Richard went on to attain his master's degree in educational administration for California State University at San Diego in 1960. He then went on to earn his certificate of advanced study from the Graduate School of Education at Harvard University. To top this impressive list, Richard earned his doctorate in educational administration from Harvard in 1964.

Dr. Bertain's professional record is as equally distinguished as his academic record. Since 1978 Richard has held the posts of superintendent and assistant superintendent, business services, of the El Segundo Unified School District. His invaluable contributions to the process of educating our youth in this position, as director of all district functions, including the budget, business services, curriculum/instruction, and personnel, mean he will be sorely missed. Certain people are simply not replaceable. His prior work record reveals a man tirelessly dedicated to the noble field of education in California. He has been assistant superintendent in the Palm Springs Unified School District; the deputy superintendent of schools, acting planning director, and special consultant to the superintendent in the Glendale Unified School District; the director of secondary schools and a high school principal in the Culver City Unified School District, and assistant to the superintendent of the Beverly Hills Unified School District. He was also a teacher in San Diego for 5 years. Furthermore as a management consultant and president of American Educational Services, Richard has provided an invaluable service to numerous other districts in the region. Dr. Bertain is also professionally involved with the Association of California School Administrators, the Association of Supervision and Curriculum Development, and the California Association of School Business Officials. Dr. Bertain is also well published in the field of education.

Above and beyond his professional experiences, Dr. Bertain has found time to be an instructor in educational administration at Loyola-Marymount University. He is also executive administrator of the Schools for Sound Finance, a member of the Southern California City Superintendents, and a member of the Suburban School Superintendents. Furthermore he is executive director of the El Segundo Educational Foundation, the director of

the Thomas Jefferson Center, the director of Four A's Foundation and chairman of the Southwest Special Education Local Planning Agency.

Dr. Bertain has also found time somewhere to sit on the Boy Scouts of America Advisory Council, to be a sustaining member of the Young Men's Christian Association, and to be heavily involved in Harvard University regional alumni clubs and the Knights of Columbus.

I cannot commend Dr. Richard Bertain highly enough. Though I think his record speaks for itself, today, I ask my colleagues to rise in tribute to a man who has spent his life in tireless pursuit of bettering the education and opportunities of California's youth. His achievements stand as a proud example to us all, and one we all would do well to emulate. My wife, Lee, and I wish Richard, his wife, and six children all the best in the years to come, and most especially wish him the greatest success in his newest position.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Thursday, July 26, 1990, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

JULY 27

9:30 a.m.
Commerce, Science, and Transportation
Consumer Subcommittee
To hold hearings on S. 1933, to provide for the minting of coins in commemoration of the bicentennial of the death of Benjamin Franklin and to enact a fireservice bill of rights and programs to fulfill those rights, and H.R. 4522, to improve the information available to emergency response personnel in the field.
SR-253

Energy and Natural Resources
Public Lands, National Parks and Forests Subcommittee
To hold hearings on S. 2521, to exchange certain lands in the State of New Mexico, S. 2527, to direct the Secretary of Agriculture to conduct a study to determine the need for a National Forest Information Center and an expanded environmental education program in New Mexico, S. 2597, to revise the act of June 20, 1910, to clarify in the State of New Mexico authority to exchange lands granted by the United States in trust, and to validate prior land exchanges, S. 2684, to authorize a study of methods to protect and interpret the nationally significant fossil trackways found in the Robledo Mountains near Las Cruces, New Mexico, and S. 2804, to revise the act of May 15, 1965 to designate the NezPerce National Historical Park in the State of Idaho.
SD-366

Governmental Affairs
To hold hearings to review the regulation of all terrain vehicles (atv's).
SD-342

Small Business
Government Contracting and Paperwork Reduction Subcommittee
To hold hearings on the increased competition for small businesses as a result of the expansions in the activities of the Federal Prison Industries, a government-owned corporation.
SR-428A

10:00 a.m.
Appropriations
Business meeting, to mark up H.R. 5229, making appropriations for fiscal year 1991 for the Department of Transportation and related agencies, and H.R. 5311, making appropriations for fiscal year 1991 for the government of the District of Columbia.
S-128, Capitol

Finance
Energy and Agricultural Taxation Subcommittee
To hold hearings on the United States' growing dependence on foreign energy imports and on ways to increase domestic energy production and reserves.
SD-215

Foreign Relations
To hold hearings on S. 2575, to urge the Secretary of State to negotiate a ban on mineral resource activities in Antarctica, S.J. Res. 206, calling for the U.S. to encourage immediate negotiations toward a new agreement among Antarctic Treaty Consultative parties, for the full protection of Antarctica as a global ecological commons, and S. Res. 186, expressing the sense of the Senate that the protection of the Antarctic system must be a basic consideration in decisions relating to all activities conducted in the Antarctic.
SD-419

10:15 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on the nomination of Constance Horner, of the District of Columbia, to be a Member of the Board of Directors of the National Consumer Cooperative Bank.
SD-538

2:30 p.m.
Environment and Public Works
Toxic Substances, Environmental Oversight, Research and Development Subcommittee
Business meeting, to mark up S. 2637, to revise the Toxic Substances Act to reduce the levels of lead in the environment.
SD-406

JULY 30

9:30 a.m.
Judiciary
Antitrust, Monopolies and Business Rights Subcommittee
To hold hearings on the impact of restructuring the savings and loan industry.
SD-226

2:30 p.m.
Finance
International Trade Subcommittee
To hold hearings on the impact of environmental concerns on international trade, focusing on proposed legislation to prohibit designation of a control as a beneficiary under the U.S. Generalized System of Preferences or the Caribbean Basin Initiative unless that country has effective pollution control standards and meets those standards.
SD-215

JULY 31

9:30 a.m.
Governmental Affairs
To hold hearings on the Department of Energy's high-level waste tanks.
SD-342

10:00 a.m.
Banking, Housing, and Urban Affairs
To resume hearings on proposed legislation to reform and modernize the legal and regulatory structure of the financial services industry to increase competitiveness of U.S. institutions.
SD-538

Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
SR-253

Finance
Taxation and Debt Management Subcommittee
To hold hearings on proposed legislation to increase the public debt limit, focusing on the escalating cost of the savings and loan crisis.
SD-215

2:00 p.m.
Energy and Natural Resources
Water and Power Subcommittee
To hold hearings on S. 2659, to revise and supplement Federal reclamation law to eliminate abuses of the Reclamation program, and H.R. 2567, to authorize funds for the construction of the Buffalo Bill Dam and the Reservoir, Shoshone Project, Pick-Sloan Missouri Basin Program, Wyoming.
SD-366

2:30 p.m.
Judiciary
To hold hearings on S. 1400, to regulate interstate commerce by providing for a uniform product liability law.
SD-138

AUGUST 1

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on reversing the decline of the U.S. electronics industry.
SR-253

Governmental Affairs
To hold hearings to examine efforts by the Internal Revenue Service (IRS) to collect taxes owed to the Government by individuals and corporations, and to

examine why these IRS accounts receivable are so large.
SD-342

Judiciary
Technology and the Law Subcommittee
To hold hearings on S. 2030, to protect the privacy of telephone users by permitting the use of pen registers and trap and trace devices on emergency assistance telephone lines of police and fire departments and where the provider of wire or electronic communication services enables the communication originator to block receipt of his or her number (caller identification).
SD-226

Small Business
Urban and Minority-Owned
Business Development Subcommittee
To hold hearings to examine the impact of the Supreme Court decision in City of Richmond v J.A. Croson Company on minority-owned small businesses.
Room to be announced

2:00 p.m.
Governmental Affairs
To hold hearings on the nominations of Wallace E. Stickney, of New Hampshire, to be Director of the Federal Emergency Management Agency, Stephen D. Potts, of Maryland, to be Director of the Office of Government Ethics, Office of Personnel Management, and Russell F. Miller, of Maryland, to be Inspector General, Federal Emergency Management Agency.
SD-342

Select on Indian Affairs
Business meeting, to mark up S. 2770, to establish the Indian Finance Corporation, an independent, Federally chartered financial institution in which Indian tribes would be directly involved in its administration in an effort to close the gap between the established sources of private capital and Indian country, S. 2451, to establish in the Department of the Interior a Trust Counsel for Indian Assets, S. 2850, to authorize demonstration projects in connection with providing health services to Indians, and S. 2645, to improve the health status of the urban Indian population and to enhance the quality of health care services and disease prevention.
SR-485

AUGUST 2

9:30 a.m.
Energy and Natural Resources
Energy Regulation and Conservation Subcommittee
To hold hearings on proposed legislation to promote energy efficiency through the use of waste and recoverable materials.
SD-366

Governmental Affairs
To hold hearings on control and financial management of expired appropriations accounts, M accounts.
SD-342

10:00 a.m.
Commerce, Science, and Transportation
To hold hearings to review the National Science Foundation's Director's views on science and technology policy.
SR-253

Foreign Relations
To hold hearings on the Convention on the Elimination of All Forms of Discrimination Against Women (Ex. R, 96th Congress, 2nd Session).
SD-419

Judiciary
Business meeting, to consider pending calendar business.
SD-226

2:00 p.m.
Agriculture, Nutrition, and Forestry
To hold hearings on the nomination of Wendy L. Gramm, of Texas, to be a Commissioner of the Commodity Futures Trading Commission.
SR-332

Commerce, Science, and Transportation
Communications Subcommittee
To hold hearings on proposed legislation on emerging telecommunications technologies.
SR-253

Energy and Natural Resources
Energy Regulation and Conservation Subcommittee
To continue hearings on proposed legislation to promote energy efficiency through the use of waste and recoverable materials.
SD-366

AUGUST 6

9:30 a.m.
Judiciary
Antitrust, Monopolies and
Business Rights Subcommittee
To resume hearings on the impact of restructuring the savings and loan industry.
SD-628

AUGUST 11

9:30 a.m.
Select on Indian Affairs
To hold hearings on proposed legislation on San Carlos water settlement rights.
SR-485

AUGUST 18

2:00 p.m.
Foreign Relations
Western Hemisphere and Peace Corps Affairs Subcommittee
To hold hearings to review Peace Corps programs in eastern Europe.
SD-419

AUGUST 21

10:00 a.m.
Finance
International Trade Subcommittee
To hold hearings to review the final report on the U.S.-Japan Structural Impediments Initiative (SII) talks.
SD-215

SEPTEMBER 12

9:00 a.m.
Select on Indian Affairs
Business meeting, to mark up S. 1554, to implement water settlements involving the Pyramid Lake Paiute Tribe, the States of California and Nevada and other parties regarding the waters of the Truckee and Carson Rivers and Lake Tahoe in Nevada and California, and H.R. 5063, to provide for the settlement of the water rights claims of the Fort McDowell Indian community in Arizona.
SR-485

SEPTEMBER 18

9:00 a.m.
Veterans Affairs
To hold joint hearings with the House Veterans' Affairs Committee on legislative recommendations of the American Legion.
SD-106

POSTPONEMENTS

AUGUST 1

9:30 a.m.
Small Business
To hold hearings to examine the impact on small businesses of proposed legislation regarding estate tax freezes and capital gains.
SR-428A
